3.2 Quality Assurance

The Contractor shall have in place a production quality assurance (QA) system compliant with ISO 9001. This QA system shall be able to ensure that manufactured configuration items are built to print, functional, and reliably made IAW controlling technical drawings, specifications and standards. Each item manufactured as part of this contract shall have passed a Government final inspection prior to DD-250.

3.3 Government Inspection and Acceptance

Government Inspection and Acceptance of all production units shall be accomplished at the source by representatives of Defense Contract Management Agency (DCMA).

3.4 Item Unique Identification (IUID) Marking of US Military Property

In accordance with DFARS Clause 252.211-7003 Item Identification and valuation, the Contractor is required to mark and register all end items and their components meeting the requirements called out in MIL-STD-130N. These include components for which the Government's unit acquisition cost is \$5,000 or greater, or any component, subassembly or embedded part that is serially managed, mission essential or a controlled inventory item.

3.4.1 Construct and Method

Details on creating the UID and the marking method are contained in MIL-STD-130N. The UID may be either UID Construct #1 or Construct #2 with Construct #2 being the preferred method.

3.4.2 UID Location and Marking

The locations and marking methods selected should bear no impact on the performance of the part and minimal configuration change(s) to the part. The UID (including 2D Matrix) should be incorporated onto the data plate in accordance with Drawing 3909AS9999 Rev C (Identification Plate/UID Markings). If the 2D matrix cannot be incorporated onto the data plate, a 2D matrix sticker can be applied onto the main data plate provided it can be done without covering any critical data. When the 2D Data Matrix is placed directly onto the data plate, the Part Number, Serial Number and CAGE human readable characters are not required. If the above cannot be accomplished, a separate data plate can be attached which contains the 2D Matrix plus the human readable characters for the Part Number, Serial Number and CAGE. This added data plate should be attached in close proximity to the main data plate.

3.4.3 Permanency and Legibility

The UID marking and identification plates, tags, or labels when used on equipment, parts, assemblies, subassemblies, units, sets, or groups shall be permanent during the normal life expectancy of the item and be capable of withstanding the environmental test and cleaning procedures specified for the item. Legibility shall be as required for ready readability as per MIL-STD-130N.

3.4.4 UID Registration

The prime Contractor has the responsibility to furnish Item Unique Identification (IUID) data to the IUID registry. Data submission of IUID data and acquisition cost should be via Wide Area Work Flow (WAWF), IUID XML file, IUID flat

file or web entry. Additional information regarding data submission as well as the actual marking can be found at <http://www.acq.osd.mil/dpap/pdi/uid/index.html>.

3.4.5 Records

The Contractor shall maintain an accurate, current list of UIDs for all manufactured items on this contract and supply to the Government upon request. The list shall include P/N, Serial #, CAGE, UID Location, Construct use, how it was marked, and the registration method used.

3.4.6 Request for Variance (RFV) - (CDRL A001)

When identified, the contractor shall submit to the government for approval recommendations for a Request for Variance (RFV). Any proposed design changes affecting form, fit, and/or function of the Support Equipment (SE), including enhancements, that deviate from drawings provided should be identified prior to the fabrication process and will be reviewed by the cognizant Support Equipment Lead Engineer for approval/disapproval. The contractor shall submit to the Government for approval a RFV to request deviations from the contractually specified design configuration. The contractor is advised to consult MIL-HDBK-61 Configuration Management for guidance when contemplating submitting an RFV. These change requests shall be prepared and submitted to the Government IAW Contract Data Requirements List (CDRL) A001. Once approved, the RFV will be incorporated via contract modification, which authorizes and approves the RFV. No work associated with the RFV shall commence until a fully executed contract modification is received.

3.4.7 Asbestos Containing Material Certification - (CDRL A002)

If applicable, the Contractor shall provide a statement certifying that all material contains 0% asbestos. Request for Asbestos Containing Material Certification shall be submitted IAW this SOW and CDRL A002.

The contractor shall select the appropriate special marking label (s) as additional means to protect the items during packaging, handling, storage, transit and removal from the pack.

4.3 Transportation

Transportability issues shall be identified and addressed to ensure all shipments can be transported with unrestricted movement via over-the-road transport. Transportability problem items shall be identified in accordance with MIL-STD-1366E criteria. Requirements for shipment of DOD materiel shall meet, as a minimum, the requirements of the following

(a) *Definitions.* As used in this clause-

Long-term contract means a contract of more than five years in duration, including options. However, the term does not include contracts that exceed five years in duration because the period of performance has been extended for a cumulative period not to exceed six months under the clause at 52.217-8, Option to Extend Services, or other appropriate authority.

Small business concern-

- (1) Means a concern, including its affiliates, that is independently owned and operated, not dominant in its field of operation, and qualified as a small business under the criteria in 13 CFR part 121 and the size standard in paragraph (c) of this clause.
- (2) *Affiliates*, as used in this definition, means business concerns, one of whom directly or indirectly controls or has the power to control the others, or a third party or parties control or have the power to control the others. In determining whether affiliation exists, consideration is given to all appropriate factors including common ownership, common management, and contractual relationships. SBA determines affiliation based on the factors set forth at 13 CFR 121.103.
- (b) If the Contractor represented that it was a small business concern, a small disadvantaged business concern, or a joint venture that was any of the small business concerns identified in 19.000(a)(3) prior to award of this contract, the Contractor shall rerepresent its size and socioeconomic status according to paragraph (e) of this clause or, if applicable, paragraph (g) of this clause, upon occurrence of any of the following:

The small business size standard corresponding to this NAICS code(s) can be found at <https://www.sba.gov/document/support--table-size-standards>.

(d) The small business size standard for a Contractor providing an end item that it does not manufacture, process, or produce itself, for a contract other than a construction or service contract, is 500 employees, or 150 employees for information technology value-added resellers under NAICS code 541519, if the acquisition-

(3) Was an 8(a), HUBZone, service-disabled veteran-owned, economically disadvantaged women-owned, or women-owned small business set-aside or sole-source award regardless of dollar value.
