

Performance Work Statement (PWS)

**Information Assurance/Mission Assurance
and Program Lifecycle Management Framework (PLMF)**

in support of:

United States Air Force (USAF) Air Force Materiel Command

**Air Force Lifecycle Management Center (AFLCMC-WVV)
Executive Aircraft Division (EAD)**

Issued by:

GSA Assisted Acquisition Services (AAS) Air Force/Navy/Space Force

Controlled by Team Lead: TBD

B.1 GENERAL

The work shall be performed in accordance with all Sections of this Performance Work Statement (PWS).

B.2 CONTRACT ACCESS FEE (CAF)

The General Services Administration's (GSA) operating costs associated with the management and administration of this contract are recovered through a CAF. This TO shall have a separate Contract Line Item Number (CLIN) to cover this access fee, and this CAF shall be obligated at TO Award (TOA).

B.3 ORDER TYPE

This Task Order (TO) is a combination of Firm-Fixed-Price (FFP) and Time-and-Materials (T&M) performance-based, severable, commercial type task order issued in accordance with FAR Part 16.5. T&M is defined under FAR 16.6, T&M. This TO also includes Direct Reimbursable Not-to-Exceed (NTE) Contract Line Item Numbers (CLINs) for Other Direct Costs (ODCs) and Travel.

The Contractor shall provide a single rate for each labor category which will be charged no matter if the prime Contractor or a subcontractor is to perform the work. This T&M task order will be an incrementally funded award.

The contractor shall perform the effort required by this TO on a hybrid FFP + T&M basis for:

a. Mandatory Labor CLINs With Contract Line Item Structure:

Description	Platform	CLIN				
		Base Year	OY1	OY2	OY3	OY4
Labor	VC-25A	0001	1001	2001	3001	4001
Labor	VC-25B	0005	1005	2005	3005	4005
Labor	C-32	0009	1009	2009	3009	4009
Labor	C-37	0013	1013	2013	3013	4013
Labor	C-40	0017	1017	2017	3017	4017
Labor	E-4B	0021	1021	2021	3021	4021
Labor	C-12	0025	1025	2025	3025	4025
Labor	C-21	0029	1029	2029	3029	4029
Labor	SAOC	0033	1033	2033	3033	4033
Labor	VIPSAM	0037	1037	2037	3037	4037

The contractor shall perform the effort required by this TO on an NTE basis for:

SECTION B – SUPPLIES OR SERVICES AND PRICES

b. Other Direct Costs (ODCs) CLINs:

Description	Platform	CLIN				
		Base Year	OY1	OY2	OY3	OY4
Other Direct Costs (ODCs)	VC-25A	0002	1002	2002	3002	4002
Other Direct Costs (ODCs)	VC-25B	0006	1006	2006	3006	4006
Other Direct Costs (ODCs)	C-32	0010	1010	2010	3010	4010
Other Direct Costs (ODCs)	C-37	0014	1014	2014	3014	4014
Other Direct Costs (ODCs)	C-40	0018	1018	2018	3018	4018
Other Direct Costs (ODCs)	E-4B	0022	1022	2022	3022	4022
Other Direct Costs (ODCs)	C-12	0026	1026	2026	3026	4026
Other Direct Costs (ODCs)	C-21	0030	1030	2030	3030	4030
Other Direct Costs (ODCs)	SAOC	0034	1034	2034	3034	4034
Other Direct Costs (ODCs)	VIPSAM	0038	1038	2038	3038	4038

c. Long-Distance Travel CLINs:

Description	Platform	CLIN				
		Base Year	OY1	OY2	OY3	OY4
Direct Reimbursable Travel	VC-25A	0003	1003	2003	3003	4003
Direct Reimbursable Travel	VC-25B	0007	1007	2007	3007	4007

B.4 SERVICES AND PRICES

Labor is anticipated to be awarded as a T&M Labor CLIN for the base year. At the end of each contract period GSA will review the burn rates of each labor category (LCAT) to determine if there are LCATs that are consistently burned that can be put into a firm fixed price (FFP) Labor CLIN. If labor is moved from the T&M CLIN to the FFP CLIN, a new proposed pricing proposal will be negotiated between the Contractor and the Government prior to any change.

ODCs, priced across all CLINs, are to be determined (TBD) for each Period of Performance (PoP).

Travel (long distance), priced across all CLINs is TBD for each PoP.

Long-distance travel is defined as travel over fifty (50) miles from any contractor on-site location. Local travel will not be reimbursed.

The Government will provide authorization and framework for obtaining an official (non-tourist) passport in the event the contractor is required to travel OCONUS for official duties. All requests for contingency travel shall be approved by the COR prior to commencement of travel. The contractor shall submit to the COR cost estimates for such travel. Joint Federal Travel Regulations apply. The contractor shall be responsible for all travel arrangements including airline, hotel, and rental car reservations. The contractor shall make every commercially reasonable effort to schedule travel far enough in advance to take advantage of reduced airfares.

See H.12.2, TRAVEL AUTHORIZATION REQUESTS (TAR) for the Approval for Travel Consent to Purchase (CTP) Process.

Travel is included as a Not-to-Exceed (NTE) CLIN and price for cost estimation. Locations listed in Table 6.1 either have regular scheduled meetings or a high probability of travel in the future.

The following abbreviations are used in this price schedule:

CAF	Contract Access Fee
CLIN	Contract Line Item Number
FFP	Firm-Fixed-Price
LH	Labor-Hour
NTE	Not-to-Exceed
ODC	Other Direct Cost
QTY	Quantity
T&M	Time-and-Materials

B.5 LABOR

B.5.1 LABOR OUTSIDE THE CONTINENTAL UNITED STATES (OCONUS)

OCONUS is defined as other than the 48 adjoining states plus the District of Columbia (D.C.). The United States (U.S.) Department of State's (DoS) Bureau of Administration, Office of Allowances, publishes report indexes of living costs abroad, per-diem rate maximums, quarter's allowances, hardship differentials, and danger pay allowances. The Department of State Standardized Regulations (DSSR) is the controlling regulation for allowances and benefits available to all U.S. Government civilians assigned to foreign Top Secret security clearance

Contractor personnel assigned to foreign areas may receive the allowances and benefits detailed in Section H but shall not receive allowance and benefits in excess of those identified in the DSSR.

Where costs are not specifically addressed in the DSSR, the Government will reimburse the contractor for all reasonable, allowable, and allocable costs in accordance with Federal Acquisition Regulation (FAR) Part 31, Contract Cost Principles and Procedures, and other applicable agency-specific regulatory supplements. The Assisted Acquisition Services (AAS) Contracting Officer (CO) with input from the Air Force Lifecycle Management Center Contracting Officer's Representative (AFLCMC/WVV COR) will determine if costs are reasonable, allowable, allocable and in accordance with the terms of the TO.

B.5.2 INDIRECT/MATERIAL HANDLING RATE

Costs incurred for Long-Distance Travel, ODCs, OCONUS Logistical Support and Materials and Equipment may be burdened with the contractor's indirect/material handling rate in accordance with the contractor's disclosed practices, provided that the master contract does not prohibit the application of indirect rate(s) on these costs.

1. If no indirect/material handling rate is allowable in accordance with the contractor's disclosed practices, no indirect/material handling charges shall be applied to or reimbursed on these costs.

2. If no rate is specified in the schedule of prices above, no indirect rate shall be applied to or reimbursed on these costs.

The indirect handling rate over the term of the TO shall not exceed the rate specified in the schedule of prices above.

Any contractor costs submitted under the Long-Distance Travel, ODC, OCONUS Logistical Support, and Materials and Equipment CLINs—direct or indirect—beyond the indirect/material handling rates) reflected in the schedule of prices above, will be unallowable. Subsequently, invoices for contractor costs—direct or indirect—on the Long-Distance Travel, ODC, OCONUS Logistical Support, and Materials and Equipment CLINs, beyond the indirect/material handling rates reflected in the schedule of prices above, will be rejected as unallowable.

B.5.3 DIRECT LABOR RATES

Fully burdened rates for all labor categories will be established at the task order level. No additional indirect rates (e.g., OH, G&A, profit, material and handling charges, etc.) shall be added to the approved burdened labor rates when invoiced.

Note: Any labor categories included in the vendor's price proposal which are not included in their master contract, e.g.: Engineer, shall be listed in a crosswalk of its labor categories.

B.5.4 TIME-AND-MATERIALS (T&M) LABOR MIX AND LEVEL OF EFFORT

The labor mix and level of effort specified in the contractor's proposal and incorporated into this TO are for estimation purposes. The contractor may reallocate, with prior written approval of the Assisted Acquisition Services AFLCMC/WVV COR, the number of hours by labor category, within each labor CLIN as needed to effectively manage the project, provided the total funded labor cost and total hours are not exceeded. The reallocation of hours across CLINs requires approval in advance by the AAS CO. Any additional labor categories not originally proposed or increases to total hours or increases to ceilings required during performance must be approved by the AAS CO and added to the TO by modification.

B.5.4.1 The Government anticipates the Contractor will require a level of effort (LOE) as identified in the Contractor's Pricing Worksheet. The Pricing Worksheet delineates estimated manhours and labor categories applicable to this requirement. The Government considers 2080 hours (including federal holidays) as full time equivalent (FTE) for Contractor personnel.

In the event this task order is awarded under a GSA GWAC the offeror shall use their GSA master contract labor categories and propose labor rates, as applicable.

NOTE: If the offeror desires or chooses to propose alternative solutions, the offeror must provide the rationale explaining why they chose to deviate from the proposed mix (labor category and hours) so that it is clear that they understand the requirement. Further, for any labor category the offeror

deems to be non-exempt to the Service Contract Act, the offeror shall annotate that chosen category as non-exempt and provide rationale.

B.5.4.2 Overtime: No overtime will be authorized as a result of this order unless for any labor category the offeror deems to be non-exempt to the Service Contract Act and annotates that chosen category as non-exempt and provides rationale which is then approved by the Government.

B.5.5 ACCOUNTING FOR SERVICE CONTRACT REPORTING

Costs associated with Accounting for Service Contract Reporting are covered in the CLINs shown relate to this TO only, as the costs associated with complying with this mandatory contract requirement are considered part of the contractor's general overhead or indirect costs of doing business with the Government. These costs are allocated across all applicable CLINs of the contract and are not typically broken out into a separate, directly funded CLIN

B.5.6 CONTRACTOR MANPOWER REPORTING

The Contractor shall ensure ALL Contractor labor hours (including subContractor labor hours) required for the performance of services provided under this task order are reported via a secure data collection site. The Contractor (and all subContractors providing direct labor under this task order) shall report complete and accurate data for the labor executed during the period of performance during each Government fiscal year (FY), which runs from October 1 to September 30. The Contractor shall input the data into the appropriate eCMRA reporting tool, which can be accessed via a secure web site at <http://www.ecmra.mil/>. There are four separate eCMRA tools: Army, USAF, Navy and All Other Defense Components. The appropriate eCMRA reporting tool to use is determined by the requiring activity being supported. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. The Contractor shall completely fill in all required data fields. The required information includes:

- (1) Contract Number;
- (2) Fiscal Year (FY that the work was performed);
- (3) Task Order Number;
- (4) Requiring Activity Unit Identification Code;
- (5) Command (Command of the Requiring Activity that would be performing the mission if not for the Contractor);
- (6) Contractor Name;
- (7) Total Invoiced Amount (the total dollar amount invoiced during the fiscal year, at the Task Order level. This is the responsibility of the Contractor);
- (8) Questions about Contract Performance (Contractors: Indicate if the task order includes the above services);
- (9) Government Supervision (Are the Contractor personnel subject to relatively continuous supervision and control by a Government employee or officer);
- (10) Government's Tools and Equipment (Does the Government furnish the principal tools and equipment needed for task order performance);
- (11) Government Facility (Are some or all of the Contractor employees provided with a workspace in a Government facility for use on a regular basis);

- (12) Contracting Officer (First Name, Last Name, Phone Number, and Email);
- (13) COR/COTR (First Name, Last Name, Phone Number, and Email);
- (14) Contractor (First Name, Last Name, Phone Number, and Email);
- (15) Location Information (Federal Supply Code (FSC), City of Installation or Services, State, Zip, and Country);
- (16) Direct Labor Hours; (17) Direct Labor Dollars;
- (18) Fund Cite.

Contractors may direct technical questions to the eCMRA help desk at dodcmra@pentagon.af.mil.

B.6 INCREMENTAL FUNDING

B.6.1 INCREMENTAL FUNDING LIMITATION OF GOVERNMENT’S OBLIGATION

Incremental Funding for Labor CLINs 0001 through 0040 will be allotted, upon award, and will be available for payment by the Government. Additional incremental funding for these CLINs may be allotted and available for payment by the Government as the funds become available. The estimated period of performance covered by the allotments for the mandatory CLINs is for five (5) years, or sixty (60) months, from the time of award, unless otherwise noted in Section B. The TO may be modified to add funds incrementally up to the maximum of \$TBD over the performance period of this TO. In the event the full six-month Extension of Services, value TBD, is exercised, IAW FAR clause 52.217-8 the total Task Order value will be \$TBD.

These allotments constitute the estimated cost for the purpose of Federal Acquisition Regulation (FAR) Clause 52.232-22, Limitation of Funds, which applies to this TO on a CLIN-by-CLIN basis.

B.7 TRANSITION TO ALTERNATE CONTRACT TYPE

Over the course of performance, circumstances may make different contract types more appropriate for certain CLINs or Tasks than used at TO award. When it is appropriate to do so, the Government intends to transition suitable cost-reimbursement, T&M, or LH contract-type requirements to FFP contract type that transfers the risk to the contractor in accordance with FAR 16.103(c).

B.8 ANCILLARY SUPPORT

The ancillary support to be performed in this TO is defined in Section C.

[END SECTION B]

C.1 BACKGROUND

The Air Force (AF) Executive Aircraft Division (EAD) consists of four branches; Presidential, Very Important Person Special Air Mission (VIPSAM), Special Duty and E-4B National Airborne Operations Center (NOAC). Each branch has mission requirements to provide Information Technology (IT), Information Assurance (IA), and Mission Assurance (MA) insertions onto Commercial Derivative Aircraft (CDA) meeting technology currency, emerging technologies, implementation of cybersecurity management programs, provide sustainment due to aging aircraft technologies and provide solutions through the acquisition process. EAD provides support to the following platforms:

- VC-25A/B, C-32, C-37, C-40, E-4B, RC-26, C-12, C-21, Survivable Airborne Operations Center (SAOC), Foreign Military Sales (FMS) programs, and any new programs that get added to the EAD portfolio

C.1.1 PURPOSE

The Air Force Materiel Command (AFMC) Executive Aircraft Division (EAD), specifically the Presidential and Executive Airlift Directorate, manages the government's fleet of aircraft used for transporting high-ranking officials, including the President. This includes the well-known Air Force One (VC-25A), the National Airborne Command Post (E-4B), as well as other aircraft like the C-32, C-40, C-37, C-21, and C-12. The division focuses on sustaining and improving support for these aircraft to ensure reliable transportation for senior government leaders.

The division manages the entire lifecycle of these aircraft, from acquisition and maintenance to upgrades and eventual retirement. The specific platforms include the VC-25A (Air Force One), the E-4B (National Airborne Command Post), and various other smaller aircraft like the C-32, C-40, C-37, C-21, and C-12.

The key responsibilities of the EAD include providing transportation for senior leaders, ensuring the reliability and availability of these aircraft, and managing contractor logistics support. In essence, the Executive Aircraft Division is responsible for ensuring the safe, reliable, and efficient transportation of high-ranking government officials, with a particular focus on the critical role of presidential airlift.

C.1.2 AGENCY MISSION

The AFLCMC is responsible for managing the Air Force's aircraft lifecycle, including acquisition, sustainment, and modernization. Within AFLCMC, the Presidential and Executive Airlift Directorate focuses on the Air Force's fleet of executive aircraft.

The Executive Aircraft Division (EAD), under the command of the Air Force Life Cycle Management Center (AFLCMC) at Tinker Air Force Base, is responsible for managing and supporting aircraft that are based on commercial designs, like the C-37B, and is also responsible for maintaining and modifying these aircraft. The EAD acquires and sustains a variety of commercial

derivative aircraft, through which the Presidential and Executive Airlift Directorate focuses on the Air Force's fleet of executive aircraft, including those used by senior White House, U.S. State Department, and U.S. Department of Defense officials and is responsible for maintaining and modifying these aircraft to meet specific military needs.

The EAD provides logistical support, including maintenance, supply, personnel, and deployments, for aircraft like the RC-26, which is used for aerial surveillance and reconnaissance and collaborates with organizations like the 76th Aircraft Maintenance Group, which is home to the 568th Aircraft Maintenance and Support Group (AMXS), the first Military Repair Station certified to work on commercial derivative aircraft.

C.2 SCOPE

The EAD has mission requirements for IT/IA/MA and information systems security improvements to CDA and other ground/airborne systems involving secure systems engineering. The Contractor shall support the EAD by providing technical research and analysis to fulfill mission requirements.

EAD requires professional services to support the aircraft platform in this Non-Personal Services task order. The primary Contractor work locations for day-to-day support will be within the EAD based at Tinker Air Force Base, Oklahoma; however, travel to support mission needs at other locations may be required. The only OCONUS locations currently authorized for travel and Contractor performance are Belgium, Japan, and Germany. All other OCONUS location travel requests must be sent to GSA for scope review before submitting a CTP.

All labor performed by the Contractor pursuant to this PWS shall cover all requirements listed within PWS Section C.4 - OBJECTIVES (PWS Section 2.0 Program Objectives/Description of Work) and defined in PWS Section C.5 - TASKS (PWS Section 4.0 Requirements/Specific Tasks), including the task deliverables, known and unknown, stated in PWS Section F.3 TASK ORDER (TO) SCHEDULE AND MILESTONE DATES (PWS Section 5.0 Deliverables/Reports). The services provided by the Contractor are required to meet the EAD mission needs, objectives, and tasks.

It is projected that, as the aircraft in EAD's portfolio continue to age, such as the VC-25A and E-4B fleets, there will be an increase in requirements executed under this task order in order for EAD to meet its mission to keep the aircraft operational for the user community. Maximizing aircraft availability is key to the EAD mission. Sustainment challenges for these critical assets, coupled with evolving mission needs and administration changes, necessitate the requirements placed on this task order to ensure continued, uninterrupted support for the Presidential and other EAD fleet missions. Additionally, the C-37 Recapitalization Program requirement for EAD to execute is projected to occur during this task order's Period of Performance (PoP).

Projected requirement increases on this task order vary yearly due to each EAD fleet for EAD's approved requirements for their respective aircraft modernization through modification programs/sustainment efforts requiring IT/IA/MA deliverables. Requirements on this task order are for deliverables to comply with upcoming Federal Aviation Administration mandates for the

National Airspace, to address aircraft obsolescence issues, and to comply with required statutory/regulatory requirements, as determined by statute and DoD/USAF leadership, for those EAD programs.

Program Lifecycle Management Framework. EAD utilizes a structured approach to manage requirements, development, integration, transition, sustainment, and oversight activities across the program lifecycle.

C.3 INFORMATION TECHNOLOGY (IT)/NETWORK ENVIRONMENT

The contractor shall provide updates to compliance status and documentation, infrastructure support, software maintenance and support, user support, incident response, and hosting environment support. The contractor shall maintain compliance with Department of Defense (DoD) Risk Management Framework (RMF) to retain the system's Authority to Operate (ATO): efforts include recurring system vulnerability and maintenance patching, maintenance of Security Technical Implementation Guide (STIG) / Security Requirements Guide (SRG) compliance, and continuous monitoring of the system for security threats and newly discovered vulnerabilities. Contractor shall support security roles to include compliance with applicable policies, procedures, and directives; assist in meeting security requirements for the system and its components; assist in the day-to-day operations of the system and its operational availability to support the mission. Contractor shall maintain security staff in accordance with DoD 8570 at Information Assurance Technical (IAT) Level 2 or higher. Information about the system and its operational status shall be maintained and reported to DoD/Air Force authoritative sources, to include National Defense Authorization Act (NDAA) compliance and maintenance of system records in Information Technology Investment Portfolio Suite (ITIPS) and Enterprise Mission Assurance Support Service (eMASS) systems.

The Contractor shall coordinate with Defense Information Systems Agency (DISA) and the appropriate DoD network approval authorities to obtain required connection approvals, including submission of required documentation for system connection, cybersecurity validation, and interoperability certification, as applicable.

C.4 OBJECTIVE

The EAD requires subject matter and functional area expertise in the following objective areas:

- Cybersecurity Requirements
- Airborne Systems IT/IA/MA Mission Requirements
- IT/IA/MA Capability Gaps and Requirements
- Ground Systems Mission Requirements
- Alternatives for Mission Requirements
- Development and Assessment of IT/IA/MA Requirements
- Assessment of Impacts on IT/IA/MA Technology
- Secure Data Management Systems / PLMF
- Assessment of Capabilities in Real-World Environments
- Conference Planning and Meeting Initiatives

To meet these requirements, the Contractor will provide the EAD specialized and unique backgrounds of staff, which will enable the division to meet worldwide IT/IA/MA challenges and missions. The Contractor shall be ready to provide support across several projects or tasks, at unclassified through Top Secret, Sensitive Compartmented Information (SCI), and potentially Special Access Programs (SAP) to effectively support task deliverables without extensive ramp up time or retraining. Personnel working these requirements are required to access the SCIFs identified in Attachment 7. These requirements are not limited to mission planning, nuclear command and control actions and Presidential support actions for EAD.

As documented in Attachment 6, the potential Task Deliverables include 1, 2, 3, 5, 6, 7, 9, 11, 14, 20, 21, 22, 27, 30, 41, 43, 44, 45, 47 and 55. These deliverables require the Contractor appropriate access for the use of program information documentation and are sourced from products classified at the SCI or SAP classification levels to include vulnerabilities, threats, capability gaps in order to provide analytical support and technical research analysis.

C.5 TASKS This is a commercial task order issued in accordance with FAR Part 16.5.

This is a hybrid FFP+T&M Type commercial task order issued in accordance with FAR Part 16.5.

C.5.1 TASK 1 – Provide Project Management

The contractor shall provide project management support under this TO. This includes the management and oversight of all activities performed by contractor personnel, including subcontractors, to satisfy the requirements identified in this Performance Work Statement (PWS).

C.5.2 TASK 2 – Cybersecurity Requirements

C.5.2.1 SUBTASK 1

Cybersecurity requires programmatic actions and strategies to evolve to a future norm of integrated planning, operations and execution. The Contractor shall conduct research and analysis to assist the AF EAD in its assessment of priorities and strategies for achieving strategic planning, interoperability, and secure architectures in its fielding of IT/IA/MA capabilities that satisfy specified mission requirements for command, control, communications, computers and intelligence (C4I).

C.5.2.2 SUBTASK 2

To assess aircraft system compliance with policies and interoperability, the Contractor shall conduct technical research and analysis to support recommendations for the application of leading-edge technology, existing networks, reduce vulnerabilities, and increase efficiency to mitigate aircraft operational capability gaps. The Contractor shall provide recommendations for the development of a Department of Defense (DoD) IT/IA/MA-compliant architecture framework that incorporates Network Centric Enterprise Services and complies with the component of the Department of

Defense Information Network (DODIN) architecture (Deliverable 1: Technical Analysis and Deliverable 2: Technology Assessment).

C.5.2.3 SUBTASK 3

The Contractor shall conduct technical research, analysis, and recommendations for existing and emerging Assessment and Authorization (A&A) activities for the USAF EAD to certify and accredit secure airborne and ground systems, information systems, and special-purpose airborne and ground systems. The Contractor shall provide cyber risk analysis for system-level components of weapons systems. It shall determine the scope of information necessary to complete analysis, determine system attributes and data requirements, review architectural documentation, block wiring diagrams, system interface analysis, hardware and software information and configurations, technical analysis, mission information, mission essential subsystem, and develop Assessment and Authorization packages IAW DoDI 8510.01 Risk Management Framework (RMF) for DoD Systems. The Contractor shall determine maturity and extent of data available and able to be collected, locate information sources, and support system information package development. Cyber risk prioritization may be accomplished with Government participation to develop and deliver the system package. (Deliverable 3: Assessment and Authorization Analysis).

C.5.2.4 SUBTASK 4

The Contractor shall design and evaluate test plans for USAF systems to include aircraft or Internet Protocol based network systems. The Contractor shall utilize a proven assessment methodology for evaluating weapons systems to evaluate complex system-of-systems components, published academic articles relating to aviation cyber security, prepare reports, establish access to systems integration laboratories (SIL) and incorporate rigor associated with formal test and evaluation for assessing AF weapons systems that will be reflected in pre and post-test reports. Test planning will require Government approval of proposed method of test within test plans prior to execution. (Deliverable 4: Test Plan and Assessment).

C.5.2.5 SUBTASK 5

The Contractor shall provide onsite assessment of USAF weapons systems and associated components. They shall analyze avionics systems and weapons systems components' firmware and software, identify vulnerabilities in avionics systems and weapons systems components' firmware, software and protocols, determine access vectors for potential targeting of avionics systems and weapons systems components, develop proof-of-concept demonstrations for identified vulnerabilities, and identify means to non-cooperatively introduced malware and counterfeit firmware and software into avionics systems and weapons systems components. The results shall be compiled into a Cyber Vulnerability Performance Assessment. (Deliverable: 5 Vulnerability Assessment).

C.5.2.6 SUBTASK 6

The Contractor shall: evaluate risks to EAD weapons systems and potential impacts to the EAD mission for identified vulnerabilities, formally classify vulnerabilities; perform risk analysis on vulnerabilities for prioritization; provide risk rating for identified vulnerabilities considering mission impact and characterization of vulnerabilities; and provide formal mitigation recommendations for addressing vulnerabilities trends in EAD weapons systems that may have strategic implications across multiple platforms; and deliver these results in a risk analysis. (Deliverable 6: Risk Analysis).

C.5.2.7 SUBTASK 7

As new technologies and capabilities are developed, the Contractor shall draft analysis for survivability and threats to EAD platform systems information networks and databases that will enable EAD to develop assessments, evaluations, and residual risk analysis for inclusion in the associated DoD A&A packages (Deliverable 7: Technical Analysis for Integrating IA/MA into Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR)).

C.5.2.8 SUBTASK 8

The Contractor shall conduct assessments related to the technical, operational, and scheduling aspects of strategic planning efforts. The Contractor shall conduct technical analyses of tools, techniques, and procedures to capture the state of commercial and military technology, aerospace operations, and infrastructure. Based on this technical analysis, the Contractor shall develop recommendations for Transformation Plans and Plans of Action and Milestones (POA&M) associated with cybersecurity measures on the aircraft. (Deliverable 8: Recommendations for Transformation Plans and Plans of Action and Milestones).

C.5.2.9 SUBTASK 9

The Contractor shall provide technical analyses for capability-based planning processes and other strategic planning efforts through architecture development, requirements analysis, capability analysis, technical and resource evaluation of alternatives, and examination of key enabling technologies consistent with other agencies and commands (Deliverable 9: Capabilities/Requirements Analysis).

C.5.2.10 SUBTASK 10

The Contractor shall provide analytic techniques and models for EAD's planning processes that analyze the Presidential, Special Air Mission, Special Duty, E-4B NAOC platform's objectives of seamless airborne and ground communications, security priorities, and a strategy for achieving those objectives (Deliverable 10: Network Modeling of Fleet).

C.5.2.11 SUBTASK 11

The Contractor shall develop recommendations for Concepts of Operations (CONOPSs), and for Headquarters (HQ) DoD planning and requirements structure (Deliverable 11: CONOPS and Requirements Structure Recommendations).

C.5.2.12 SUBTASK 12

The Contractor shall perform technical assessments, threat assessments, and critical infrastructure protection analyses across EAD. The Contractor shall develop a system or infrastructure risk assessment methodology that provides a qualitative assessment of IT/IA/MA related actions, results, and related metrics (Deliverable 12: Risk Assessment Methodology).

C.5.3 TASK 3 – Compliance of Airborne Systems to Meet IT/IA/MA Mission Requirement

C.5.3.1 SUBTASK 1

The Contractor shall conduct IT/IA/MA technical research and analysis and shall identify requirements for airborne systems and modifications to CDA to assist EAD in complying with CDA and stakeholder requirements (Deliverable 13: Recommendations for Airborne IT/IA/MA Prioritization).

C.5.3.2 SUBTASK 2

The Contractor shall analyze existing and evolving DoD policies to identify IT/IA/MA technical shortfalls that emerge during the development of secure airborne systems. The Contractor shall analyze information gathered from the Airborne Security Plan and report the impacts identified on specific systems to AF EAD branches and weapon systems and provide recommendations on findings. (Deliverable 14: Airborne Security Plan and Program Protection Plan).

C.5.3.3 SUBTASK 3

The Contractor shall analyze airborne system specifications, program success criteria, program exit criteria, system safety requirements, and Operational Test and Evaluation (OT&E) requirements against IT/IA/MA objectives (Deliverable 15: Objective Analysis for Airborne Systems). Based on the analysis, the Contractor shall develop recommendations for aligning new technologies, policies and procedures. (Deliverable 16: Airborne Policy and Procedure Assessment and Recommendations).

C.5.3.4 SUBTASK 4

The Contractor shall conduct technical research and analysis to identify and test emerging technologies to identify the impact of technologies on programs for aircraft, training, and system modification. (Deliverable 17: Airborne Technology Impact Analysis).

C.5.3.5 SUBTASK 5

The Contractor shall perform technical assessments and deficiency analysis to integrate commercial system engineering drawings and specifications into EAD flight and maintenance manuals. The Contractor shall ensure accurate and on-time technical orders (TOs) are delivered to the Government in an electronic format per Attachment 6 - Deliverables. The Contractor shall review and assess existing TOs and recommend changes required to integrate modifications or changes to the aircraft during maintenance or modification efforts. (Deliverable 18: T.O. Analysis and Recommendations) .

C.5.3.6 SUBTASK 6

Based on the prioritized requirements, the Contractor shall provide technical research, analysis, and recommendations regarding military Capability Requirements (CR)s, associated capability gaps, and other related data and to provide refined requirements and system-level performance attributes for materiel and non-materiel capability solutions. (Deliverable 19: Requirement Analysis).

C.5.4 TASK 4 – Analyze and Identify IT/IA/MA Capability Gaps and Requirements

C.5.4.1 SUBTASK 1

To support EAD’s response to IT/IA/MA capability gaps with CDA and other ground, airborne systems and platforms, the Contractor shall identify deficiencies, requirement shortfalls and recommend updates to requirements documents. (Deliverable 20: Capability Gap Analysis).

C.5.4.2 SUBTASK 2

The Contractor shall conduct technical analyses, including the development of requirements, test, and modification of CDA and other ground, airborne systems and platform systems, subsystems, and components. (Deliverable 21: CDA Feasibility).

C.5.4.3 SUBTASK 3

The Contractor shall provide support in addressing identified capability gaps through research and assessment of emerging technologies. The Contractor shall demonstrate prototype solutions of the forefront technologies. (Deliverable 22: Prototype Solution of Capability Gap) .

C.5.4.4 SUBTASK 4

The Contractor shall develop recommendations for the way ahead for modifications and development planning (including the development of databases) to identify and report impacts on the status of aircraft modifications (Deliverable 23: Modification and Development Planning Recommendations and Deliverable 24: Databases).

C.5.4.5 SUBTASK 5

The Contractor shall provide technical analysis and recommendations focused on identifying, evaluating, and implementing actions to mitigate Diminishing Manufacturing Sources and Material Shortages (DMSMS) events. The Contractor shall recommend to the Government options that identify solutions to resolve DMSMS when they occur to mitigate the risk of EAD part availability affecting mission readiness (including the development of databases). (Deliverable 25: DMSMS Analysis Recommendations and Deliverable 26: DMSMS Case Management Databases).

C.5.4.6 SUBTASK 6

The Contractor shall provide engineering and operational analyses to evaluate system designs and analyze EAD and other ground, airborne systems and platform functionalities (e.g., communication systems, system-level requirements, emerging technologies, CDA, and other ground, airborne and platform systems modernization programs) and airborne systems risks. (Deliverable 27: System Design, Functionality, and Risk Assessment).

C.5.4.7 SUBTASK 7

The Contractor shall conduct technical analyses of requirements definition, development, production, test, modification, and sustainment of EAD and other ground, airborne and platform systems modernization programs. (Deliverable 28: Analysis of Modernization Programs).

C.5.4.8 SUBTASK 8

The Contractor shall provide technical analysis, assessments, identification, and recommendations for potential Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, and Facilities (DOTMLPF) approaches to mitigating capability gaps to assist EAD in meeting requirements. (Deliverable 29: DOTMLPF Analysis).

C.5.4.9 SUBTASK 9

The Contractor shall provide technical research, analysis, and recommendations in developing short- and long-term strategic plans to include experimentation efforts, concept formulation, technology identification, technology insertion, technology transition, and additive manufacturing enhancing the ability of EAD to proactively identify solutions to real and potential issues. (Deliverable 30: Strategic Plan Recommendations).

C.5.5 TASK 5 – Compliance of Ground Systems to Meet Mission Requirements

C.5.5.1 SUBTASK 1

The Contractor shall conduct technical research, analysis and develop recommendations to identify requirements specific to individual ground systems ensuring EAD's compliance with both newly

developed ground systems and modifications to existing ground systems with EAD and stakeholder requirements. (Deliverable 31: Requirements Recommendations for Ground Systems).

C.5.5.2 SUBTASK 2

The Contractor shall analyze existing and evolving DoD IT/IA/MA policies to identify shortfalls related to technical issues that will emerge during the development of secure ground systems. (Deliverable 32: Ground Systems Policy Gap Analysis).

C.5.5.3 SUBTASK 3

The Contractor shall analyze ground system specifications, program success criteria, program exit criteria, system safety requirements, and Operation Test and Evaluation (OT&E) requirements to ensure that objectives are met. (Deliverable 33: Objective Analysis for Ground Systems). Based on the results of the analysis, the Contractor shall develop recommendations for aligning new technologies, policies and procedures. (Deliverable 34: Ground Policy and Procedure Assessment and Recommendations).

C.5.5.4 SUBTASK 4

The Contractor shall perform technical research and analysis to identify and test emerging technologies to support platform training and ground modifications. (Deliverable 35: Ground System Technology Impact Analysis).

C.5.5.5 SUBTASK 5

Based on the recommended requirements priorities, the Contractor shall provide technical research, analysis, and recommendations regarding military Capability Requirements (CR)s, associated capability gaps, and other related data and to provide refined requirements and system-level performance attributes for materiel and non-materiel capability solutions. (Deliverable 36: Requirement Analysis).

C.5.5.6 SUBTASK 6

The Contractor shall conduct research to provide analysis, courseware, and/or systems ensuring EAD's ability to meet its training requirement for its aircraft and/or related ground systems. (Deliverable 37: Training Materials).

C.5.6 TASK 6 – Detailed and Viable Alternatives for Mission Requirements

C.5.6.1 SUBTASK 1

The Contractor shall conduct technical analysis, technology studies, analyses of alternatives (AoAs), and feasibility analysis to ensure that EAD can evaluate operational effectiveness of platform systems to meet mission capabilities. The Contractor shall draft a study plan that shall specify

assessment actions, timetables, and deliverables for an AoA and shall then coordinate the analysis through the appropriate organizations for approval. (Deliverable 38: Analysis of Alternatives).

C.5.6.2 SUBTASK 2

The Contractor shall draft Technology Plans that should include EAD platform systems technology and capabilities (Deliverable 39: Technology Plan). The Contractor shall draft Technology Roadmaps that include a description of USAF EAD platform systems technology, capabilities, desired outcome, and schedule for deployment. (Deliverable 40: Technology Roadmap).

C.5.6.3 SUBTASK 3

The Contractor shall develop or arrange for briefings on selected advance technologies and their impact on EAD platform systems. (Deliverable 41: Advance Technology Presentation). The Contractor shall draft summary analysis on selected advance technologies and their impact on EAD platform systems, including a risk analysis of potential systems and subsystems (Deliverable 42: Advance Technology Analysis).

C.5.7 TASK 7 – Development and Assessment of IT/IA/MA Requirements

C.5.7.1 SUBTASK 1

The Contractor shall conduct technical research and analysis, and provide recommendations for the development of mission needs, capability acquisition procedures, and requirements documents. The Contractor shall develop capability-based analysis, to include recommendations to Initial Capabilities Documents (ICDs), Capability Development Documents (CDDs), and Capability Production Documents (CPDs) and associated briefings (e.g., Requirements Strategy Review (RSR)). (Deliverable 43: Mission Need Analysis).

C.5.7.2 SUBTASK 2

The Contractor shall analyze requirements, constraints, and guidelines described in requirements documents and shall apply the results of the analysis to develop recommendations for the optimal method of incorporating IT/IA/MA into systems that merge voice, data, and video traffic over networks (Deliverable 44: IT/IA/MA Recommendations for Systems that Merge Voice, Data, and Video Traffic).

C.5.8 TASK 8 – Assessments of Impacts on IT/IA/MA Technology

C.5.8.1 SUBTASK 1

The Contractor shall provide research and analysis pertaining to the development of applications and system interfaces that EAD will need to securely integrate evolving technologies into the platform systems. (Deliverable 45: Interface Control Document).

C.5.8.2 SUBTASK 2

The Contractor shall conduct technical research and analysis and develop recommendations for the development, execution, and documentation of large-scale Advanced Concept Technology Demonstrations (ACTDs), simulations, experiments, and exercises. (Deliverable 46: ACTD Analysis).

C.5.8.3 SUBTASK 3

The Contractor shall conduct technical research and analysis and shall develop recommendations pertaining to airborne and ground secure voice communications to those designated ground and airborne platforms that require common access to joint, global, and network-centric applications and tools. Additionally, the Contractor shall analyze new technologies, procedures, and policies identified in the ACTD experiments. (Deliverable 47: Component ACTD Analysis).

C.5.9 TASK 9 – Secure Data Management Systems/Program Lifecycle Management Framework (PLMF)

C.5.9.1 SUBTASK 1

A Secure Data Management System for Program Lifecycle Management is utilized to provide Lifecycle Sustainment Analysis for USAF EAD platforms.

C.5.9.2 SUBTASK 2

The Contractor shall provide technical reports, cloud infrastructure administration, and software deployments in support of PLMF to EAD program office affected by the releases. The Contractor shall provide IA process compliance and documentation required to operate the PLMF. In addition, the Contractor shall include generation, monitoring, and updates to all required IA documentation, compliance status data, infrastructure support, software maintenance and support, user support, incident response, and hosting environment support. The Contractor shall also maintain compliance with DoD RMF to retain the system's Authority to Operate (ATO). These efforts include recurring system vulnerability and maintenance patching, maintenance of Security Technical Implementation Guide (STIG)/Security Requirements Guide (SRG) compliance, and continuous monitoring of the system for security threats and newly discovered vulnerabilities. The Contractor supported security roles will include:

- Information System Security Manager (ISSM): ensures compliance with applicable policies, procedures, and directives
- Information System Security Officer (ISSO): assists in meeting security requirements for the system and its components
- IA Automated Information System (AIS) System Administrators (SAs): assist in the day-to-day operation of the system and provide operational availability to support the mission

C.5.9.3 SUBTASK 3

The Contractor shall provide PLMF infrastructure support to ensure the system is stable, reliable, and up to date. The Contractor shall also provide full PLMF software development support including a Configuration Control Board (CCB) for reviewing and approving changes, regular code reviews scans and software testing. This task maintains separate testing, staging, and production environments to facilitate updates and software configuration management for the PLMF. The testing environment will be contractor funded. The Contractor shall also provide a PLMF help desk and user support. In addition, the Contractor shall provide an incident response capability to restore system functionality or otherwise address the incident condition as quickly as possible.

C.5.9.4 SUBTASK 4

The Contractor shall manage the Cloud Hosting of the PLMF in the Amazon Web Services (AWS) GovCloud environment at Impact levels 5 (NIPR) and 6 (SIPR) with a cross domain solution from level 5 to 6. The Contractor will coordinate with a Tier 2 Cybersecurity Service Provider (CSSP) to ensure maintenance of a secure server in the cloud environment. The Contractor shall coordinate across the EAD community to ensure cloud hosting costs are shared.

The Contractor shall provide an operational DevSecOps pipeline to support build, test, integration, scanning, deployment, and sustainment activities for all containerized applications. Pipelines shall leverage mature tools and processes referenced in existing program environments.

The Contractor shall maintain DoD 8570-compliant and credentialed cloud engineering and operations staff and ensure all containerized hosting environments meet applicable ATO requirements, RMF controls, and continuous monitoring expectations. Environments shall support access to NIPR, SIPR, JWICS, and associated eMASS systems as required.

C.5.9.5 SUBTASK 5

The Contractor shall provide fleet management, program management, module enhancements, and system administration for PLMF, including a detailed chronology of known or forecasted aircraft lifecycle events, along with comprehensive fleet management. The Contractor shall provide technical research, analysis, and recommendations to EAD to aid in developing a secure, capabilities-based planning process for identifying, interpreting, and leveraging near-, mid-, and long-term opportunities, as well as metrics for capturing existing, new, and emerging requirements.

From Day One the PLMF shall have the ability to:

- Sustain existing Service-Oriented Architecture (SOA) to enable seamless data exchange and integration with authoritative data sources, such as: Air Force/A4 Basing and Logistics Analytics Data Environment (BLADE), Air Force Core Automated
 - Maintenance System (CAMS for Mobility - G081), Air Force Master Nuclear
 - Certification List (MNCL), Project Management Resource Tools Enterprise Analytics
 - (PMRT EA), Comprehensive Capital Analysis and Review (CCAR), and Boeing VECTOR.

- Provide a secure, fully traceable environment for managing Contract Data Requirements List deliverables from creation through submission, review and acceptance.
- Provide the ability to aggregate large amounts of data into a series of data visualizations with users having specific permissions that enable them to import, read, and modify data within the system.
- Provide select users with a workflow approval process to include the ability to create a Configuration Change Board (CCB) and facilitate until CCB package is approved.
- Support the tracking of deficiency reports that are generated post maintenance activity. These reports are routed from field users to the Joint Deficiency Reporting Systems (JDRS) and imported into PLMF and associated to applicable aircraft to issues and track trends.
- Provide users a single location to import Engineering Technical Assistance Requests to populate the status tracking and summary visualizations, thus allowing System Program Office (SPO), Engineering (EN), or Depot support personnel to rectify an issue and document the approach used to address the issue.
- Provide a report to determine when Unplanned Depot Level Maintenance (UDLM) is required. This information is linked to schedules to support the execution of a UDLM that is required for each asset within the fleet.
- Allow select users to track the status of AF Form 1067 as they go through the approval process, giving users the ability to download the 1067 form, fill out the data, and submit to create a 1067 record in PLMF. Additionally, the system provides dashboards to summarize the status of 1067 records. Users will have the ability to create Engineering Assignment (EA) records from the 1067 module.
- Allow for the tracking and management of service actions for commercial derivative aircraft that have been identified in a Service Action Review Board (SARB) to enable follow-up actions, metrics, and reporting.
- Provide for a Trouble Report Tracker which creates reports created when an issue with an aircraft arises. Users can easily navigate by phase, and they can drill down to understand the details of any issues with an aircraft, the findings and recommendations for mitigating the issue, and the action taken to resolve the issue.
- Provide an integrated workspace to monitor and manage parts obsolescence across system bills of materials (BOM). Users can import and maintain hierarchical BOM structures, track and manage individual parts (including end-of-life data, maintenance periods, and usage metrics), and proactively create and manage Diminishing Manufacturing Sources and Material Shortages (DMSMS) cases prioritized by cost, schedule, readiness, and lifecycle phase. The system shall provide forecasting views to flag immediate actions, watch items, and monitoring needs, along with an Illustrated Parts Catalog (IPC) for hierarchical part visualization. Dashboards display asset metrics, case distribution, and part status across programs. The workspace supports collaboration between stakeholders to research, track, and mitigate part obsolescence risk effectively.
- Provide a capability to import BOMs, track and manage parts, identify priorities, and keep the hierarchical structure of parts on the aircraft, allowing the ability to view subparts that roll up to other parts.
- Import info from various sources so parts information can be created and tracked as well as assigned a capability end-of-life date that provides the need date for alternative means to

obtain that part. Provides a visual depiction of the Heavy Maintenance (HM) periods for each VC-25A and Very Important Person Special Air Mission aircraft, along with vital information for analysis that includes flight hours, landings, pressure cycles, HM tasks, and inspection cards.

- Provide a document workflow for managing and tracking the approval of documents by using drag and drop to create a series of approval steps with the ability to assign people/groups to each pertinent approval step to include due dates for each assignee.
- Support tracking of required funding, allocated funding, and funding deltas at the program and overall system level and provides a general system financial summary to understand the types of funding used and identify shortfalls or surpluses in current budgets and emerging requirements.
- Support the tracking of current and future configurations of assets by unique identification codes to support planning and analysis. The capabilities provide the ability to drill down into detailed information on a single asset. This includes information on usage rates, configuration, future modification schedule, maintenance schedule, and maintenance data. Also, PLMF should offer the ability to track assets down to the part and piece part level as required by the Government.
- Track required fleet inspections, status dashboards, and waivers on a tail by tail basis. Tracks cards aligned to depot maintenance schedules to ensure the health of the fleet, recommending critical inspections to maintain the aircraft for operational use.

The Contractor shall prepare data management system security requirements analysis on selected advanced technologies and their impact on EAD platform systems (Deliverable 47: Secure Data Management System Security Requirements and Deliverable 48: PLMF Monthly Status).

C.5.9.6 SUBTASK 6

The Contractor shall prepare secure data management system security plan on selected advanced technologies and their impact on EAD platform systems. (Deliverable 49: System Security Plan).

C.5.9.7 SUBTASK 7

The Contractor shall provide research and analysis of the interoperability and compatibility of these new components with existing and planned systems. The Contractor shall identify Network Operations (NetOps) requirements and capabilities for information systems and operations, as well as identify technology insertion opportunities and potential capability shortfalls of EAD airborne and/or ground systems. (Deliverable 50: Requirement Recommendations).

C.5.9.8 SUBTASK 8

The Contractor shall assess the vulnerability, authenticity, and continuity of EAD's information systems and networks to ensure that those systems and networks comply with DoD IT/IA/MA policies. (Deliverable 51: Assessment of Architectural Compliance).

C.5.9.9 SUBTASK 9

The Contractor shall prepare a Configuration Control Board (CCB) assessment for EAD platform systems. (Deliverable 52: CCB Assessment).

C.5.9.10 SUBTASK 10

The Contractor shall verify that EAD airborne/ground systems, platform communications systems architectures, interfaces, and configurations conform to existing and emerging DoD guidance. (Deliverable 53: Critical Program Technical Assessment).

C.5.9.11 SUBTASK 11

The Contractor shall provide generative Artificial Intelligence (AI) capability and retrieval augmented generation (RAG) to retrieve data from disparate data sources. The Contractor shall provide a chatbot feature that allows personnel to easily access real-time information, including structured and unstructured data through natural language queries.

The Contractor shall use Amazon Services to build and maintain AI chatbot; including but not limited to Amazon Bedrock service. The Contractor shall adhere to Impact-Level 5 (IL5) and FEDRAMP-approved LLMs unless approved otherwise, to facilitate cost-effective and standardized AI solutions.

The Contractor shall follow Security Technical Implementation Guide (STIG)-compliance and IL5 guidelines, making it adaptable for use within multiple Air Force and DoW organizations. The Contractor shall verify that the AI solution follows DevSecOps Guidance, DoW Custom Container Building and Deploying Guidance.

C.5.10 TASK 10 – Assessment of Capabilities in Real-World Environments

C.5.10.1 SUBTASK 1

The Contractor shall provide modeling or simulation design, development and execution for the development and analysis of strategic plans, the identification and assessment of capability requirements, and the evaluation of technology and system opportunities. The Contractor shall perform technical analysis and offer recommendations in the design, development, implementation, and execution of flight planning and command and control (C2) models to optimize EAD airborne and/or ground systems. (Deliverable 54: Modeling and Simulation Assessment).

C.5.10.2 SUBTASK 2

The Contractor shall assess and recommend modeling approaches to satisfy requirements and analyze the outcome of modeling and simulation scenarios based on real-world scenarios and parameters of EAD airborne and/or ground systems. In addition, the Contractor shall develop

operational CONOPS based on the outcome of those scenarios and parameters. (Deliverable 55: Model and Simulations CONOPS).

C.5.10.3 SUBTASK 3

The Contractor shall develop guides and instructions for modeling and simulation use and assessments, which can be reused in future evaluations. (Deliverable 56: Modeling and Simulations Guides).

C.5.11 TASK 11 – Conference Planning and Meeting Initiatives

C.5.11.1 SUBTASK 1

The Contractor shall conduct research and analysis so that SMEs are integrated into designated interagency and Government-wide conferences, symposia, workshops, community of interest meetings, program reviews, system requirement reviews, preliminary design reviews, critical design reviews, and technical interchange working groups. (Deliverable 57: Conference and Meeting Reports).

C.5.11.2 SUBTASK 2

The Contractor's participation shall include pre-event planning, on-site coordination, and post event activities, as well as the identification and definition of topics that focus on research and development, and the technical advancement of IT/IA/MA. (Deliverable 58: Conference Report).

[END OF SECTION C]

SECTION D – PACKAGING AND MARKING

This page intentionally left blank.

E.1 PLACE OF INSPECTION AND ACCEPTANCE

Inspection and acceptance of all work performance, reports, and other deliverables under this TO will be performed by the AFLCMC/WVV COR.

E.2 SCOPE OF INSPECTION

All deliverables will be inspected for content, completeness, accuracy, and conformance to TO requirements by the AFLCMC/WVV COR. Inspection may include validation of information or software through the use of automated tools, testing, or inspections of the deliverables, as specified in the TO. The scope and nature of this inspection will be sufficiently comprehensive to ensure the completeness, quality, and adequacy of all deliverables.

The Government requires a period NTE ten (10) calendar days after receipt of deliverable items for inspection and acceptance or rejection.

E.3 BASIS OF ACCEPTANCE

The basis for acceptance shall be compliance with the requirements set forth in the TO and relevant terms and conditions of the contract. Rejected deliverable items shall be corrected in accordance with the applicable clauses.

Acceptance of deliverables (e.g., reports, documents, and narrative-type deliverables) will occur when all discrepancies, errors, or other deficiencies, as identified in writing by the Government, have been resolved through documentation updates, program correction, or other mutually agreeable methods.

If a deliverable is adequate, the Government may accept it or provide comments for incorporation. All of the Government's comments on deliverables shall either be incorporated in the succeeding version of the deliverable, or the contractor shall explain to the Government's satisfaction why such comments should not be incorporated.

If the Government finds that a deliverable contains spelling errors, grammatical errors, or improper format, or otherwise does not conform to the quality assurance requirements stated within the TO, the document may be rejected without further review and returned to the contractor for correction and resubmission. If the contractor requires additional Government guidance to produce an acceptable deliverable, the contractor shall arrange a meeting with the AFLCMC/WVV COR.

E.4 DELIVERABLES

E.4.1 DELIVERABLES/REPORTS

The Contractor shall prepare and deliver assigned deliverables in accordance with this PWS and Attachment 6: Table 5.1 Deliverables. All deliverables shall be reviewed by the COR for adherence to the schedule and requirements. All physical deliverables will become the physical property of the

Government and may contain a legend or similar marking identifying the Contractor staff who prepared the deliverable including the first initial, last name and employer.

E.4.1.1 Deliverables

The Contractor shall assure that each deliverable is accurate and complete, technically sound, and free of clerical errors. The reviewer shall notify the COR via e-mail that a review has been completed. If such a review may not be performed on any deliverable, the Contractor shall contact the COR prior to submitting the deliverable. The Contractor shall immediately notify the COR if schedules for task completion may not be met and also upon learning of anything that might affect performance under this PWS.

E.4.1.2 Additional Reports/Analysis Deliverables

During the performance period of this task order, it is estimated that additional reports and analysis will be performed (Deliverable 59: Additional Analysis). These deliverables will be initiated by the Government and a scope of the requirements will be provided to the vendor and a request for milestones and estimated level of effort will be requested from the Contractor. After Government approval, by the COR, the Contractor will perform the report/analysis at the labor rates provided at the time of TO award. Table 5.2 provides a list of historical reports/analysis deliverables completed on a previous TO.

E.4.1.3 Delivery Instructions:

Copies of deliverables shall be furnished to the appropriate Government personnel. The Contractor shall deliver each report to EAD platform requesting the information. Deliverables are to be transmitted with a cover letter, on the prime Contractor's letterhead, describing the contents. Concurrently, a copy of the cover letter shall be attached to the task in GSA's Electronic Ordering System (ASSIST/ITSS).

E.4.1.4 Inspection and Acceptance of Services

E.4.1.4.1 All periodic reports and task deliverables shall be inspected, tested (where applicable), reviewed, and accepted by the Government within a reasonable period of time in accordance with FAR 52.212-4 (a), which states: Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this Task Order. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or re-performance of nonconforming services at no increase in TO price. If repair/replacement or re-performance will not correct the defects or is not possible, the Government may seek an equitable price reduction or adequate consideration for acceptance of nonconforming supplies or services. The Government must exercise its post-acceptance rights.

- (1) Within ten working days after the defect was discovered or should have been discovered; and

- (2) Before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

E.4.1.4.2 52.212-4(a) is amended as follows: The acceptance criteria are set forth in Table 5.6, Sample Quality Control Matrix, “Acceptable Quality Level” column.

E.4.1.4.3 Only the client representative (CR), their designated alternate, the GSA Project Manager (PM) or GSA Contracting Officer (CO) has the authority to inspect, accept, or reject all deliverables. Final acceptance of all deliverables will be provided in writing, or in electronic format, to the GSA PM or GSA CO within 30 days from the end of the task order.

E.4.2 Monthly Status Report (MSR):

The Contractor shall prepare and submit an MSR. The MSR shall be used by the Government to review and evaluate the technical progress and schedule status of the deliverables in sections 4 and 5, and in the deliverables table. The MSR should include a list of Labor. The report format shall be coordinated with the COR. Cost information and burn rate (the amount of money left on the task order) shall be included in this report. The MSR includes actual task expenditures, technical progress made, schedule status, travel conducted, meetings attended, issues, and recommendations. The report identifies funding compared to current CLIN dollar value ceiling, actual expenditures, and deliverables funded and date they were funded, technical progress made and schedule status per deliverable, deliverable titles and numbers completed within the previous month, and the deliverables scheduled to be delivered during the upcoming month. (Deliverable 60: Monthly Status Report)

E.4.3 Contractor Quality Control Requirements

E.4.3.1 The Contractor shall establish and maintain a complete Quality Control Plan (QCP) to ensure the services are performed in accordance with PWS and commonly accepted commercial practices. The Contractor shall develop and implement procedures to identify, prevent and ensure non-recurrence of defective services. The Government reserves the right to perform inspections on services provided to the extent deemed necessary to protect the Government’s interests. The Contractor must control the quality of the services and deliverables provided in support of this task and maintain substantiating evidence that services conform to contract quality requirements and furnish such information to the Government if requested.

E.4.3.2 The QCP shall include a quality control matrix (QCM), such as the sample QCM shown in Table 5.6. The QCM shall reflect the quality approach (using the headings shown in Table 5.6) of the offeror as it applies to the key areas of the offeror’s proposed TA. (Deliverable 61: Contractor Quality Control Plan (QCP).

E.4.3.3 This is a task order for commercial services. The Contractor shall develop and maintain a quality process to ensure services are performed in accordance with commonly accepted commercial practices and existing quality control systems. The Contractor shall develop and implement procedures to identify, prevent and ensure non-recurrence of defective services. However, the

Government reserves the right to perform inspections on services provided to the extent deemed necessary to protect the Government's interests. The Contractor must control the quality of the services and deliverables provided in support of this task; the Contractor must maintain substantiating evidence that services conform to contract quality requirements and furnish such information to the Government if requested.

E.5 WRITTEN ACCEPTANCE/REJECTION BY THE GOVERNMENT

The AAS CO or AFLCMC/WVV COR will provide Written Notification of Acceptance or Rejection of all deliverables within ten (10) calendar days (unless specified otherwise in Section F). All notifications of rejection will be accompanied with an explanation of the specific deficiencies causing the rejection.

The Government will provide written acceptance, comments, and/or change requests, if any, within thirty (30) calendar days (unless specified otherwise in Section F) from Government receipt of the deliverable. Upon receipt of the Government comments, the contractor shall have three (3) calendar days to incorporate the Government's comments and/or change requests and to resubmit the deliverable.

Once accepted, electronic deliverables shall be submitted to the AFLCMC/WVV COR via the Assisted Service Shared Information SysTem (ASSIST) Collaborations no later than five (5) calendar days after the AAS CO's or AFLCMC/WVV COR's acceptance.

E.6 NON-CONFORMING PRODUCTS OR SERVICES

Non-conforming products or services will be rejected. Deficiencies shall be corrected, by the contractor, within ten (10) calendar days of the rejection notice. If the deficiencies cannot be corrected within ten (10) calendar days, the contractor shall immediately notify the AFLCMC/WVV COR of the reason for the delay and provide a proposed corrective action plan within ten (10) calendar days.

[END SECTION E]

F.1 PERIOD OF PERFORMANCE

The period of performance for this task order is one (1) twelve-month base period with four (4) twelve month option periods (total of sixty (60) months). If FAR 52.217-8 is exercised, the total length of the order can be up to sixty-six (66) months.

Base Period:	TBD
First Option Period:	TBD
Second Option Period:	TBD
Third Option Period:	TBD
Fourth Option Period:	TBD
*52.217-8 Extension:	TBD

Notes:

1. *Dates listed beside FAR 52.217-8 – Extension of Services are listed to show the maximum extent possible to extend the service dates of this task order, in the event that the Government elects to exercise this clause. In that event this would be a unilateral modification.
2. Evaluation of Options: Options shall be evaluated in accordance with the provision (as included herein) at FAR 52.212-2(b), Evaluation – Commercial Items.
3. FAR 52.217-8 Option to Extend Services (NOV 1999): The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within thirty (30) calendar days prior to the expiration of the contract.
4. FAR Clause 52.217-9 Option to Extend the Term of the Contract (Mar 2000):

The Government may extend the term of this contract by written notice to the Contractor at least 1 day prior to the expiration of the current period of performance provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days before the contract expires. The preliminary notice does not commit the Government to an extension.

If the Government exercises this option, the extended contract shall be considered to include this option clause.

5. GSAR 52.217-71 Notice Regarding Option(s) (NOV 1992)

The General Services Administration (GSA) has included an option to extend the term of this contract in order to demonstrate the value it places on quality performance by providing a mechanism for continuing a contractual relationship with a successful Offeror that performs at a

level which meets or exceeds GSA's quality performance expectations as communicated to the Contractor, in writing, by the Contracting Officer or designated representative. When deciding whether to exercise the option, the Contracting Officer will consider the quality of the Contractor's past performance under this contract in accordance with 48 CFR 517.207.

F.2 PLACE OF PERFORMANCE

All Contractor support will be performed at Government locations for Labor Categories listed as Government sites. Contractor support will be performed at the Contractor's location in the event of base closure, or other events that prohibit access to the primary work location. Performance may also be at Contractor locations as approved by the Government. With client approval/concurrence, the Contractor will also be allowed to telework in cases where it is more efficient to work from alternate locations.

Contractor support will be performed on the Government site at the following locations:

Primary Locations: **Tinker Air Force Base**

Potential additional Government locations for task completion are below (for planning use only, subject to change):

- a. Greenville, TX
- b. San Antonio, TX
- c. Joint Base Andrews, MD
- d. Joint Base Langley-Eustis, VA
- e. Offutt AFB, NE
- f. Scott AFB, IL
- g. Wright-Patterson AFB, OH
- h. Savannah, GA

The Contractor shall adhere to a work schedule that includes core hours 0800-1600; however, work schedules will often vary based on mission need. Modification work typically occurs 5-6 times a year for a period ranging from 30-60 days. During these periods, core hours may surge to 0700-1900 Monday through Saturday. Work accomplished during modification periods is considered mission essential during these periods and may be covered with a mixed workforce of Contractor and military members. The Contractor may be required to work on weekends, Government holidays, base closures, and other official Government site closings, as the mission dictates. Individual schedules will be agreed upon between the Task Lead/Program Manager and the Government Client Representative. Schedule consideration and flexibility between surge periods will be allowed to maintain normal work life balance of 40 hours/week annually.

Contractor personnel will not report to Government facilities to work nor remain at the work locations any time the Government is unexpectedly required to close their offices; however, they may arrange alternate work locations or arrange for remote work (tele-commute). The Contractor will not be compensated for these unexpected or expected Government closures. The Contractor is responsible for all notification of their Contractor staff during times of closure.

F.3 TASK ORDER (TO) SCHEDULE AND MILESTONE DATES

The following schedule of milestones will be used by the AAS Air Force/Navy/Space Force COR to monitor timely progress under this TO.

The following abbreviations are used in this schedule:

CLIN: Contract Line Item Number
DEL: Deliverable
GOV'T: Government
IAW: In Accordance With
NLT: No Later Than
TOA: Task Order Award
Days: Unless otherwise specified, all references to days are calendar days.

Deliverables are due the next Government workday if the due date falls on a holiday or weekend.

Data Rights Clause – Abbreviations in this column of the table below shall be interpreted as follows:

N/A: Not Applicable
UR: Unlimited Rights, per Defense Federal Acquisition Regulation Supplement (DFARS) 252.227-7013
RS: Restricted Software, per DFARS 252.227-7014
LD: Limited Rights Data, per DFARS 252.227-7013
SW: Special Works, per DFARS 252-227-7020

The Government asserts UR rights to open-source COTS software. Any collateral agreements (within the meaning of FAR 52.227-14) proposed for data, regardless of the type of rights offered, shall be subject to the requirements of PWS Section H.5.1, H.6 and H.14. For purposes of the foregoing, the terms “collateral agreement,” “Supplier Agreement,” and “Commercial Supplier Agreement” have the same meaning.

The Government does not assert any rights to management software tools if the contractor does not plan to charge the Government directly for that tool and does not propose that the Government will own or use that tool.

The contractor shall deliver the deliverables listed in the following table on the dates specified:

Table F.3.1 - Deliverables Table

PWS Section	Deliverable #	Required Deliverable/Report	Delivery Method/Format	Planned Frequency	Required Due Date
4.1.2	1	Technical Analysis	Word Document or PDF	Estimated: 5 due per PoP for 3 PoPs (15 total)	120, 240, & 360 days after assignment unless otherwise directed
4.1.2	2	Technical Assessment	Word Document or PDF	Estimated: 5 due per PoP for 3 PoPs (15 total)	120, 240, & 360 days after assignment unless otherwise directed
4.1.3	3	Assessment and Authorization Analysis	Word Document or PDF	5 total	Annually
4.1.4	4	Test Plans and Assessment	Word Document or PDF	Monthly	25 th of Every Month
4.1.5	5	Vulnerability Assessment	Word Document or PDF	Monthly	25 th of Every Month
4.1.6	6	Risk Analysis	Word Document or PDF	Monthly	25 th of Every Month
4.1.7	7	Technical Analysis for Integrating IA/MA into C4ISR	Word Document or PDF	Estimated: 5 due per PoP for 4 PoPs (20 total)	Quarterly
4.1.8	8	Recommendations for Transformation Plans and Plans of Action and Milestones	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	After receipt of order per government

SECTION F – DELIVERIES OR PERFORMANCE

4.1.9	9	Capabilities / Requirements Analysis	Word Document or PDF	Estimated: 5 due per PoP for 4 PoPs (20 total)	Quarterly
4.1.10	10	Network Modeling of Fleet	Per Client	Estimated: 5 due per PoP for 2 PoPs (10 Total)	180 & 360 days after assignment unless otherwise directed
4.1.11	11	CONOPS and Requirements Structure Recommendations	Word Document or PDF	Monthly	As required or requested
4.1.12	12	Risk Assessment Methodology	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.2.1	13	Recommendations for Airborne IT/IA/MA Prioritization	Word Document or PDF	5 total	Annually
4.2.2	14	Airborne Security Plan and Program Protection Plan	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	180 & 360 days after assignment unless otherwise directed
4.2.3	15	Objective Analysis for Airborne Systems	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government

SECTION F – DELIVERIES OR PERFORMANCE

4.2.3	16	Airborne Policy and Procedure Assessment and Recommendations	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.2.4	17	Airborne Technology Impact Analysis	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.2.5	18	T.O. Analysis and Recommendations	Word Document or PDF	As required	As required or requested
4.2.6	19	Requirement Analysis	Word Document or PDF	Estimated: 5 due per PoP for 4 PoPs (20 total)	Quarterly
4.3.1	20	Capability Gap Analysis	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.2	21	CDA Feasibility	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.3	22	Prototype Solution of Capability Gap	As determined by client	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government

SECTION F – DELIVERIES OR PERFORMANCE

4.3.4	23	Modification and Development Planning Recommendations	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.4	24	Databases	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.5	25	DMSMS Analysis Recommendations	Word Document or PDF	As required	As required or requested
4.3.5	26	DMSMS Case Management Databases	Word Document or PDF	As required	As required or requested
4.3.6	27	System Design, Functionality, and Risk Assessment	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.6	28	Analysis of Modernization Programs	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.3.8	29	DOTMLPF Analysis	Word Document or PDF	As required	As required or requested
4.3.9	30	Strategic Plan Recommendations	Word Document or PDF	As required	As required or requested
4.4.1	31	Requirements Recommendations for Ground Systems	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government

SECTION F – DELIVERIES OR PERFORMANCE

4.4.2	32	Ground Systems Policy Gap Analysis	Word Document or PDF	5 due 2x/PoP (10 total)	ARO per government
4.4.3	33	Objective Analysis for Ground Systems	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.4.3	34	Ground Policy and Procedure Assessment and Recommendations	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.4.4	35	Ground System Technology Impact Analysis	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	ARO per government
4.4.5	36	Requirement Analysis	Word Document or PDF	Estimated: 5 due per PoP for 4 PoPs (20 total)	Quarterly
4.4.6	37	Training Materials	Per client	1 total	As required or requested
4.5.1	38	Analysis of Alternatives	Word Document or PDF	5 total	Annually
4.5.2	39	Technology Plan	Word Document or PDF	Estimated: 5 due per PoP for 5 PoPs (25 total)	60, 120, 180, 240, 300, and 360 days after assignment unless otherwise directed

SECTION F – DELIVERIES OR PERFORMANCE

4.5.2	40	Technology Roadmap	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs	80 and 360 days after assignment unless otherwise directed
4.5.3	41	Advance Technology Presentation	Word Document, PDF, or Power Point	Estimated: 5 due per PoP for 2 PoPs (10 total)	80 and 360 days after assignment unless otherwise directed
4.5.3	42	Advance Technology Analysis	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	80 and 360 days after assignment unless otherwise directed
4.6.1	43	Mission Need Analysis	Word Document or PDF	Estimated: 5 due per PoP for 4 PoPs (20 total)	Quarterly
4.6.2	44	IT/IA/MA Recommendations for Systems that Merge Voice, Data, and Video Traffic	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	80 and 360 days after assignment unless otherwise directed
4.7.1	45	Interface Control Document	Word Document or PDF	5 total	Annually
4.7.2	46	ACTD Analysis	Word Document or PDF	5 total	Annually
4.7.3	47	Component ACTD Analysis	Word Document or PDF	5 total	Annually

SECTION F – DELIVERIES OR PERFORMANCE

4.8.5	48	Secure Data Management System Security Requirements	Word Document or PDF	5 total	Annually
4.8.5	48	PLMF Monthly Status	Word Document or PDF	Monthly	25 th of Every Month
4.8.6	49	System Security Plan	Word Document or PDF	As required	Annually
4.8.7	50	Requirement Recommendations	Word Document or PDF	As required	As required or requested
4.8.8	51	Assessment of Architectural Compliance	Word Document or PDF	10 total	360 days after assignment or as otherwise directed
4.8.9	52	CCB Assessment	Word Document or PDF	5 total	Annually
4.8.10	53	Critical Program Technical Assessment	Word Document or PDF	Estimated: 5 due per PoP for 2 PoPs (10 total)	360 days after assignment or as otherwise directed
4.9.1	54	Modeling and Simulation Assessment	Word Document or PDF	5 total	Annually
4.9.2	55	Model and Simulations CONOPS	Word Document or PDF	5 total	Annually
4.9.3	56	Modeling and Simulations Guides	Word Document or PDF	5 total	Annually
4.10.1	57	Conference Meeting Reports and	Word Document or PDF	5 total	Annually
4.10.2	58	Conference Report	Word Document or PDF	5 total	Annually

SECTION F – DELIVERIES OR PERFORMANCE

5.2	59	Additional Reports/Analysis	Word Document or PDF	As required	Determined per separate requirement
5.5	60	Monthly Status Report	Word Document or PDF	Monthly	Due monthly on or before the 25th of each month of the following month after the end of the MSR reporting period
5.6.2	61	Contractor Quality Control Plan (QCP)	Word Document or PDF	Once and upon updates	10 days after TO start and updates
7.2	62	Trip Reports	Word Document or PDF	Monthly	25 th of Every Month
7.4	63	Consent to Purchase (CTP) for Travel	Word Document or PDF	As required	Submitted with monthly invoice
8.2.1	64	Consent to Purchase (CTP) for ODCs	Word Document or PDF	As required	Submitted with monthly invoice
10.12	65	Post Award Conference Meeting Minutes	Word Document or PDF	1 total	Within 3 days after completion of the meeting
11.6	66	Final Invoice	Word Document or PDF	After TO Completion	Due 60 days from completion of TO
11.7	67	Release of Claims	Word Document or PDF	15 days after final payment	Due within 15 calendar days of final payment

Note: The contractor shall mark all deliverables listed in the above table to indicate authorship by contractor (i.e., non-Government) personnel; provided, however, that no deliverable shall contain any proprietary markings inconsistent with the Government's data rights set forth in this TO. The Government reserves the right to treat non-conforming markings in accordance with DFARS 252.2277013 and 252.227-7014.

F.4 DELIVERABLES MEDIA

The following are the required electronic formats, whose versions shall be compatible with the latest commonly available version on the market.

- a. Text Microsoft (MS) Word, Portable Document Format (PDF)
- b. Spreadsheets MS Excel
- c. Briefings MS PowerPoint
- d. Drawings MS Visio
- e. Schedules MS Project, Smartsheet

F.5 METHOD OF DELIVERY

Unclassified deliverables and correspondence shall be delivered to the AAS CO or AFLCMC/WVV COR at the email address provided in Section G.1.1 for inspection and acceptance.

Copies of all deliverables shall also be delivered to the AFLCMC/WVV COR at the email address provided in Section G.1.1.

The contractor shall utilize the ASSIST Collaborations to deliver all AAS CO or AFLCMC/WVV COR accepted deliverables identified in Section F.3 unless the deliverable(s) meets one or more of the following exceptions.

- a. Deliverable(s) that cannot be uploaded due to format (e.g., website).
- b. Classified deliverable(s).
- c. Individual deliverable(s) that exceed the ASSIST file size limitations.

For deliverables where an above exception applies, the contractor shall submit notification via the ASSIST Collaborations outlining the applicable exception(s), the method of delivery, the alternative deliverable(s) storage location, the point(s) of contact who received the deliverable(s), and the date of deliverable(s) submission.

The contractor shall utilize a standard naming convention when uploading deliverables in the ASSIST Collaborations. The naming convention of deliverables shall follow the following format: [Acquisition Identifier #][Document Name][Final Document Date or Date Received][File Extension]. Date must be in this format: YYYY-MM-DD.

F.6 NOTICE REGARDING LATE DELIVERY/PROBLEM NOTIFICATION REPORT (PNR)

The contractor shall notify the AFLCMC/WVV COR via a Problem Notification Report (PNR) as soon as it becomes apparent to the contractor that a scheduled delivery will be late. The contractor shall include in the PNR the rationale for late delivery, the expected date for the delivery, and the project impact of the late delivery. The AFLCMC/WVV COR will review the new schedule and provide guidance to the contractor. Such notification in no way limits any Government contractual rights or remedies including, but not limited to, termination.

F.7 HOURS OF OPERATION

The Contractor shall adhere to a work schedule that includes core hours 0800-1600; however, work schedules will often vary based on mission need. Modification work typically occurs 5-6 times a year for a period ranging from 30-60 days. During these periods, core hours may surge to 0700-1900 Monday through Saturday. Work accomplished during modification periods is considered mission essential during these periods and may be covered with a mixed workforce of Contractor and military members. The Contractor may be required to work on weekends, Government holidays, base closures, and other official Government site closings, as the mission dictates. Individual schedules will be agreed upon between the Task Leader/Program Manager and the Client Representative. Schedule consideration and flexibility between surge periods will be allowed to maintain a normal work-life balance of 40 hours/week annually.

Contractor personnel will not report to Government facilities to work nor remain at the work locations any time the Government is unexpectedly required to close their offices; however, they may arrange alternate work locations or arrange for remote work (tele-commuting). The Contractor will not be compensated for these unexpected or expected Government closures. The Contractor is responsible for all notification of their Contractor staff during times of closure.

F.7.1 HOLIDAYS

The Contractor shall make best efforts to align employee holiday leave to the U.S. Office of Personnel Management published here:

opm.gov/policy-data-oversight/pay-leave/federal-holidays/

The following federal holidays are observed by the Government and may affect the Contractor's ability to access Government's facilities. Therefore, these dates shall be staffed similar to other non-duty days (i.e., weekends):

- a. New Year's Day: January 1st
- b. Martin Luther King's Birthday: 3rd Monday in January
- c. President's Day: 3rd Monday in February
- d. Memorial Day: Last Monday in May
- e. Juneteenth: June 19th
- f. Independence Day: July 4th
- g. Labor Day: 1st Monday in September
- h. Columbus Day: 2nd Monday in October
- i. Veterans Day: November 11th
- j. Thanksgiving Day: 4th Thursday in November
- k. Tinker Energy Day: Friday after Thanksgiving (Contractor employees must take leave or telework)
- l. Christmas: December 25th (and possibly the day after or before, depending on an executive order)

Notwithstanding holidays and Government closures, the Contractor shall perform in accordance with the terms established in its GSA contract and this task order.

F.7.2 PRODUCTIVE LABOR HOURS

For purposes of this order and specific services, the Government will pay only for productive direct labor hours, which are those hours expended by Contractor personnel in performing work under the scope of this order. This does not include sick leave, vacation leave, holidays, jury duty, military leave, or any other kind of administrative leave.

“Direct labor hours” are those productive hours expended by Contractor personnel in performing work under this task order that are charged as direct labor under the Contractor’s established accounting policy and procedures. The term does not include sick leave, vacation, holiday leave, military leave, or any type of administrative leave but does include direct labor hours provided under level-of-effort subcontracts.

The estimated hours assigned to each labor category in the awarded price schedule may vary as GSA and the Contractor mutually agree, but in no case will the variance result in an increase to the total not to-exceed price of the task order as awarded.

If personnel have to obtain a background check prior to being able to perform under the terms of the order, the vendor is not permitted to bill (in the case of a T&M or an FFP/FFP LOE/Cost Reimbursable or other order type) until the Contractor’s personnel are fully able to perform the requirements of the PWS.

F.7.3 NON-PERSONAL SERVICES

The client has determined that use of the GSA contract to satisfy this requirement is in the best interest of the Government, economic and other factors considered, and this task order is not being used to procure personal services prohibited by the Federal Acquisition Regulation (FAR) Part 37.104 titled “Personal services contract”.

To counter the circumstances that infer personal services and to preserve the non-personal nature of the task order, the Contractor shall adhere to the following guidelines in the performance of the task:

- Contractor provides for direct supervision of all contract employees assigned to the task.
- Refrain from discussing the issues such as skill levels and hours, salaries, cost and funding data, or administrative and personnel matters affecting Contractor employees with the client.
- Ensure close communication/coordination with the GSA PM, reporting problems to the PM as they occur (not waiting for a monthly meeting).
- Do not permit Government officials to interview potential Contractor employees, discuss individual performance, approve leave or work scheduling of Contractor employees, terminate Contractor employees, assist Contractor employees in doing their jobs, or obtain assistance from the Contractor in doing Government job.
- Do not assign Contractor personnel to work under direct Government supervision.
- Maintain a professional distance from Government employees.
- Provide Contractor employees with badges, if appropriate, identifying them as Contractors.
- Ensure proper communications with the Government (technical discussion and Government surveillance is okay, but the Government cannot tell the Contractor how to do the job).
- Assign a task leader to the task order. The task leader, or alternate, should be the only one who accepts tasking from the assigned Government point of contact or alternative.

- The Government has the right to reject the finished product or result and this does not constitute personal services.
- When travel is required for the performance on a task, the Contractor personnel are only to travel as directed by their contract management.

F.7.4 POST AWARD CONFERENCE

The Government will schedule, coordinate and host a Post Award Conference meeting via teleconference or at a location approved by the Government within 30 calendar days after award. The meeting will provide an introduction between the Contractor personnel and Government personnel. The meeting will provide the opportunity to discuss technical, management, security logistics and travel authorizations and reporting procedures. At a minimum, the attendees shall include representatives from EAD, Contracting Officer, Contracting Officer Representatives, General Services Administration/Direct Client Support Representative (GSA PM) and other relevant Government personnel. The Contractor shall take minutes from the post award conference and distribute to attendees within 3 days after completion of the meeting. (Deliverable 65: Post Award Conference Meeting Minutes)

The Contractor shall participate in a post-award conference for the purposes of making introductions, coordinating security requirements, discussing schedules, prioritizing PWS requirements, and providing details regarding the transition of work requirements from the incumbent Contractor.

The Contractor shall commence work on the first day of the period of performance. The Post Award Orientation Conference shall occur at **Tinker AFB (or in the Oklahoma City, OK area), within 30** days after award. Attendance by the Contractor shall be at no additional (direct) cost to the Government.

[END SECTION F]

G.1 CONTRACTING OFFICER'S REPRESENTATIVE (COR)

The AAS CO appointed an AFLCMC/WVV COR in writing through a COR Designation Letter. The AFLCMC/WVV COR will receive, for the Government, all work called for by the TO and will represent the AAS CO in the technical phases of the work. The AFLCMC/WVV COR will provide no supervisory or instructional assistance to contractor personnel.

The AFLCMC/WVV COR is not authorized to change any of the terms and conditions, scope, schedule, and price of the Contract or the TO. Changes in the scope of work will be made only by the AAS CO by properly executed modifications to the Contract or the TO.

G.1.1 CONTRACT ADMINISTRATION

Contracting Officer:

Name: TBD

Contracting Officer's Representative:

Name: TBD

Technical Point of Contact:

Name: TBD

G.2 INVOICE SUBMISSION

The contractor shall submit Requests for Payments in accordance with PWS section G.3 and GSAM 552.212-4 to be considered proper for payment. In addition, the following data elements shall be included on each invoice.

Task Order Number: *(from GSA Form 300, Block 2)*

Paying Number: *(FIN) (From GSA Form 300, Requisition/Reference Number Block or Form SF30 Block 4)*

Procurement Instrument Identifier (PIID): **TBD**

Project Title: **Information Assurance/Mission Assurance and Program Life Cycle Management Framework (IA/MA-PLMF) for Air Force Executive Aircraft Division (EAD)**

The contractor shall submit invoices as follows:

The contractor shall utilize ASSIST to submit invoices. The contractor shall manually enter CLIN charges into the ASSIST Invoice Service. Summary charges on invoices shall match the charges listed in ASSIST for all CLINs.

The contractor shall submit invoices electronically by logging into the ASSIST portal (assist.gsa.gov), navigating to the appropriate award, and creating the invoice for that award. Do NOT mail or electronically submit any invoices directly to the GSA Finance Center (neither by mail nor via electronic submission).

- a. Log into ASSIST using your assigned Identification (ID) and password.
- b. Complete login by entering your one-time authentication code to complete the multifactor authentication.
- c. Click on the Award Administration menu option from the ASSIST Acquisition menu tab.
- d. Locate the order against which you want to invoice.
- e. Open the order by clicking on the Award PIID hyperlink.
- f. Click on the left-hand Invoice Summary navigator link.
- g. Click on the Create New Invoice button.

By utilizing this method, no paper copy of the invoice shall be submitted to GSA AAS or the GSA Finance Center. The contractor shall provide invoice backup data, as an attachment to the invoice, in accordance with the contract type, including detail such as labor categories, rates, and quantities of labor hours per labor category. The AFLCMC/WVV COR may require the contractor to submit a written “hardcopy” invoice with the client’s certification prior to invoice payment. A paper copy of the invoice is required for a credit.

The contractor is certifying, by submission of an invoice in ASSIST, that the invoice is correct and proper for payment.

For additional assistance or if there are any issues submitting an invoice, contact the ASSIST Service Desk for support at 877-472-4877 (toll free) or by email at assist.servicedesk@gsa.gov.

G.3 INVOICE REQUIREMENTS

The contractor shall submit a draft copy of an invoice backup in Excel to the AFLCMC/WVV COR for review prior to its submission to ASSIST. The draft invoice shall not be construed as a proper invoice in accordance with FAR Subpart 32.9 and GSAM Subpart 532.9. The contractor shall provide receipts on an as-requested basis.

Regardless of contract type, the contractor shall report the following data:

- a. GWAC Number
- b. Task Order Award Number (NOT the Solicitation Number).
- c. Contractor Invoice Number.
- d. Contractor Name.
- e. Point of Contact Information.
- f. Current Period of Performance.
- g. Amount of Invoice Subcontracted.

The amount of invoice that was subcontracted to a small business shall be made available upon request.

G.3.1 INVOICING/PROCEDURES FOR PAYMENT

At the invoice phase, the Contractor shall have already notified the CO and GSA PM/Client Interface, in writing, whenever it had reason to believe the Labor Category hours have met 75% of the proposed hours per Option Period/Line Item Number.

Note The Government reserves the right to audit, thus; the Contractor shall keep on file all backup support documentation for travel and ODCs.

G.3.1.1 INVOICING INSTRUCTIONS BASED ON ORDER TYPE

The Contractor shall submit only two invoices per month per order. The appropriate GSA office will receive the invoices by the twenty-fifth calendar day of the month after either:

- The end of the invoiced month (for services) or
- The end of the month in which the products (commodities/materials) or deliverables (fixed-priced services) were delivered and accepted by the Government.

G.3.1.2 INVOICE CONTENT

The Contractor's invoice(s) will be submitted monthly for work performed the prior month. The Contractor may invoice only for the hours, travel and unique services ordered by the client and actually used in direct support of the client representative's project. The invoice(s) shall be submitted on official letterhead and shall include the following information at a minimum.

Note: All supporting documentation must be submitted in an organized and logical manner with all documents upright facing the same direction. All scanned pages must be readable. If supporting documentation is not in an organized, logical, and easy to read manner, the invoice(s) may be rejected.

- GSA Task Order Number
- Task Order ACT Number (see the front of the SF300 document)
- Prompt Payment Discount terms
- Remittance Address
- Period of Performance for Billing Period
- Point of Contact and Phone Number
- Invoice Amount
- Skill Level Name and Associated Skill Level Number (for T&M or Labor Hour)
- Actual Hours Worked During the Billing Period (for T&M or Labor Hour)
- Travel Itemized by Individual and Trip (if applicable)
- Training Itemized by Individual and Purpose (if applicable)
- Material/ODC Itemized per Item

Note: The Government reserves the right to audit, thus; the Contractor shall keep on file all backup support documentation for travel and ODCs.

Support Items to be attached to Invoice Itemized by Specific Item and Amount (if applicable)

- ODC - use CTP form (Attachment 4 (dependent on purchase threshold, support items include approved CTP form, cost/price analysis, award decision, competitive quotes, receipt documentation))
- Training – Use CTP form
- Travel – Use CTP form (support items include receipts)

G.3.2 TIME-AND-MATERIALS (T&M) CONTRACT LINE ITEM NUMBERS (CLINs) (for LABOR)

The contractor may invoice monthly on the basis of hours incurred for the T&M CLINs. The invoice shall include the period of performance covered by the invoice (all current charges shall be within the active period of performance) and the CLIN number and title. All hours and costs shall be reported by CLIN element (as shown in Section B), by contractor employee, and shall be provided for the current billing month and in total from project inception to date. The contractor shall provide the invoice data in spreadsheet form with the following detailed information. The listing shall include separate columns and totals for the current invoice period and the project to date.

- a. Employee name (current and past employees).
- b. Employee company.
- c. Employee labor category.
- d. Monthly and total cumulative hours worked.
- e. Corresponding proposed TO ceiling rate.
- f. Hours incurred not billed reported by CLIN.
- g. Total amount paid (lump sum) by CLIN.
- h. Corresponding labor rate from Section B.

G.3.2.1 INVOICING FOR T&M/SEVERALE ORDER:

The Period of Performance (POP) for each T&M invoice shall be for one calendar month. For T&M orders each invoice shall list the labor category as awarded on the order, the hours worked per skill level/labor category, the rate per skill level/labor category and the extended amount for that invoice period. It shall also show the total cumulative hours worked (inclusive of the current invoice period) per skill level, the hourly rate per skill level, the total cost per skill level, the total travel costs incurred and invoiced, and the total of any other costs incurred and invoiced, as well as the grand total of all costs incurred and invoiced.

For T&M orders each invoice shall clearly indicate both the current invoice's monthly "burn rate" and the total average monthly "burn rate".

The Contractor shall submit all required documentation (unless exempted by the order) as follows:

- Travel shall be approved per the terms and conditions of the task order. Signed/approved (or documentation showing coordination/approval if done in a manner in lieu of signature) Consent to Purchase (CTP) forms--including the travel details tab--shall be submitted with

the invoice. All receipts for airfare, rental car, lodging, and all receipts directly being charged for over \$75.00 shall be submitted as support/back up documentation with the invoice submittal. NO PAYMENT WILL BE MADE WITHOUT DOCUMENTATION/RECEIPTS. NO PAYMENT WILL BE MADE for travel that is non-conforming to the JTR.

- Refer to PWS Section 7.0 Travel

Note: Invoices and CTPs will be rejected if supporting documentation is not included in an organized, legible, and logical order.

G.3.3 FIRM-FIXED-PRICE (FFP) CONTRACT LINE ITEM NUMBERS (CLINs)

The contractor may invoice as stated in Section B for the FFP CLINs. The invoice shall include the period of performance covered by the invoice (all current charges shall be within the active period of performance) and the CLIN number and title. All prices shall be reported by CLIN element (as shown in Section B) and shall be provided for the current invoice and in total from project inception to date. The contractor shall provide the invoice data in spreadsheet form with the following detailed information. The listing shall include separate columns and totals for the current invoice period and the project to date.

- a. FFP period of performance.
- b. Total amount paid (lump sum) by CLIN.

G.3.4 OTHER DIRECT COSTS (ODCs)

The contractor may invoice monthly on the basis of cost incurred for the ODC CLINs. The invoice shall include the period of performance covered by the invoice and the CLIN number and title. In addition, the contractor shall provide the following detailed information for each invoice submitted, as applicable. Spreadsheet submissions, in MS Excel format, are required.

- a. ODCs purchased.
- b. Consent to Purchase (CTP) number or identifier.
- c. Date delivery accepted by the Government.
- d. Associated CLIN.
- e. Project-to-date totals by CLIN.
- f. Cost incurred not billed by CLIN.
- g. Remaining balance of the CLIN.
- h. Any applicable fee.
- i. Approved CTP cost and variance from actual costs.
- j. Explanation of variances exceeding ten percent of the approved versus actual costs.
- k. Any costs exceeding DoD micro-purchase threshold shall include documentation.

Other Direct Costs will include material and travel. Material shall be priced and invoiced at cost with an approved material handling rate applied. Travel will be priced and invoiced at cost and shall comply with the Federal Travel Regulations with an approved travel markup rate applied.

Material handling and travel markup rates will be considered fixed at time of award and shall not be subject to DCMA/DCAA or other finalized audited rates.

G.3.5 TRAVEL

The Contractor shall negotiate travel costs prior to each trip. Contractor costs for travel will be reimbursed at the limits set in the following regulations (see FAR 31.205-46):

- a. Federal Travel Regulation (FTR) for travel in the continental United States (U.S.).
- b. Joint Travel Regulations (JTR) for travel in Alaska, Hawaii, and outlying areas of the U.S.
- c. Department of State Standardized Regulations (DSSR) (Government Civilians, Foreign Areas), Section 925, Maximum Travel Per Diem Allowances for Foreign Areas for travel in areas not covered in the FTR or JTR.

The contractor may invoice monthly on the basis of cost incurred for cost of travel comparable with the JTR, FTR, and DSSR. The invoice shall include the period of performance covered by the invoice and the CLIN number and title. Separate worksheets, in MS Excel format, shall be submitted for travel.

CLIN/Task Total Travel: This invoice information shall identify all cumulative travel costs billed by CLIN/Task. The current invoice period's travel details shall include separate columns and totals and include the following:

- a. Travel Authorization Request (TAR) identifier, approver name, and approval date.
- b. Current invoice period.
- c. Names of persons traveling.
- d. Number of travel days.
- e. Dates of travel.
- f. Number of days per diem charged.
- g. Per diem rate used.
- h. Total per diem charged.
- i. Transportation costs (e.g., rental car, air fare).
- j. Any costs exceeding DoD micro-purchase threshold shall include documentation.
- k. Total charges.
- l. Approved TAR cost and variance from actual costs.
- m. Explanation of variances exceeding ten percent of the approved versus actual costs.

G.3.6 LIMITATION OF FUNDS

The Contractor shall not perform work resulting in charges to the Government that exceed obligated funds. The Contractor shall notify the CO in writing, whenever it has reason to believe that in the next 60 days, the charges to the Government will exceed 75% of the obligated funds. The notice shall state the estimated amount of additional funds required to complete performance of this task. The Government is not obligated to reimburse the Contractor for charges in excess of the obligated

funds and the Contractor is not obligated to continue performance or otherwise incur costs that would result in charges to the Government in excess of the amount obligated under this order.

G.7 TASK ORDER (TO) CLOSEOUT

The Government will unilaterally close out the TO no later than six years after the end of the TO period of performance if the contractor does not provide final Defense Contract Management Agency (DCMA) rates by that time.

The Government may unilaterally close out the TO 20 months after TO completion.

Interim Closeouts: The Government will attempt to close each Performance Period at completion and will use Quick-Closeout Procedures IAW FAR 42.708 when possible. The contractor shall submit a final invoice within 180 calendar days after the end of each Performance Period.

G.8 RECEIVING/CLIENT AGENCY'S ACCEPTANCE

The Client Agency must accept the services and/or products provided under the terms of the task order.

The client agency will accept and certify services electronically via GSA's electronic Web-Based Order Processing System, currently ASSIST, by accepting the Acceptance Document generated by the Contractor. Electronic acceptance of the invoice by the client COR and GSA PM/client interface is considered concurrence and acceptance of services.

The Client Agency may also generate a hard copy acceptance document. Regardless of the method of acceptance the Contractor shall seek acceptance and electronically post the acceptance document in GSA's electronic Web-based Order Processing System, currently ASSIST/ITSS. (Written acceptances will be posted as an attachment along with any other supporting documentation.)

Note: The acceptance of the authorized Client Agency representative (which is normally the COR) is REQUIRED prior to the approval of payment for any invoice submitted.

G.9 Final Invoice

Invoices for final payment must be so identified and submitted to ASSIST/ITSS within 60 days from task order completion (end of PoP), and no further charges are to be billed. A copy of the written acceptance of task completion must be attached to final invoices. All invoices shall be received within this period. The Contractor shall request from GSA an extension for final invoices that may exceed the 60-day time frame; however, the CO shall **not** extend the period of performance or the invoice submittal period in order to wait on subContractors to bill the prime Contractor. All rates are negotiated at the time of award, and the Contractor shall control and account for all time by their own personnel and their subContractor or CTA personnel to allow for

timely billing in accordance with the terms expressed in this section. (Deliverable 66: Final Invoice)

Any invoice not submitted to ASSIST/ITSS (with all required attachments or supporting documentation if applicable) within sixty (60) calendar days from task order completion (end of PoP), unless extended in writing by the CO, will be rejected as untimely. The Government considers such time as adequate for the production of a final invoice, since no labor rates are subject to DCAA audit.

It is the Contractor's responsibility to route and manage final invoice and other closeout-related documentation to the correct personnel or organization(s) within their own business (if for instance they have a separate person or team assigned to work final invoices or closeouts); and to submit the final invoice to ASSIST/ITSS (with all required attachments or supporting documentation if applicable) in sufficient time to comply with the 60-day timeframe.

The terms of the task order and this PWS serve as notice that upon task order completion (end of PoP), the final invoice (with all required attachments or supporting documentation if applicable) is due within sixty (60) calendar days, and GSA is not required to further remind any employee of the Contractor's team of this requirement and deadline, nor to request the final invoice from any employee of the Contractor's team. If the Government does choose to remind the Contractor about final invoicing or otherwise correspond about the final invoice or other closeout issues, the timeframe of sixty (60) calendar days is not in any way changed by the date(s) that the Government chooses to correspond with the Contractor concerning the final invoice or closeout. The only circumstance that would extend the time to submit a final invoice is a written extension by the CO. If an extension is granted in writing by the CO, the final invoice must be submitted to ASSIST/ITSS (with all required attachments or supporting documentation if applicable) within the timeframe established by the CO; otherwise, if the final invoice is not submitted within the timeframe established in writing by the CO, it will be rejected as untimely.

Any invoice not submitted to ASSIST/ITSS (with all required attachments or supporting documentation if applicable) within sixty (60) calendar days from task order completion (end of PoP), or within the timeframe established by written extension by the CO, will be rejected as untimely, will not be paid, and cannot be resubmitted for payment.

The Government reserves the right to require certification by a GSA PM/client interface before payment is processed.

****NOTE:** No rates agreed to under the terms of this order are subject to DCAA or other "final" audited rates.

G.10 UNILATERAL MODIFICATIONS FOR FUNDS MANAGEMENT

The standard verbiage in FAR 52.212-4 (c), which is the paragraph titled "Changes," relating to "Contract Terms and Conditions – Commercial Items Clause" which states: "Changes to the terms

and conditions of this contract may be made only by written agreement of the parties,” is hereby tailored to allow unilateral modifications to be issued after award of this task to obligate funding. The acceptance of the task award by the vendor constitutes written agreement of both parties that all future modifications issued for the obligation of funding will be issued by the GSA CO unilaterally. The vendor has responsibility for funds monitoring and tracking so by acceptance of this change, the vendor is agreeing to obtain in a timely manner the unilateral modifications from ASSIST/ITSS for the purpose of ensuring that funding totals are not exceeded and to ensure the vendor’s responsibility for tracking and reporting deficits in funding can be accomplished per the terms of the SOW/PWS.

G.11 ORDER CLOSE-OUT PROCEDURES

The Contractor shall submit a final invoice within sixty (60) calendar days after the end of the Performance Period. All invoices shall be received within this period. The CO shall not extend the period of performance or the invoice submittal period, in order to wait on subContractors to bill the prime Contractor. All rates are negotiated at the time of award, and the Contractor shall control and account for all time by their own personnel and their subContractor or CTA personnel to allow for timely billing in accordance with the terms expressed in this section. After the final invoice has been paid the Contractor shall furnish a completed and signed Release of Claims form to the CO. This release of claims is due within fifteen (15) calendar days of final payment. (Deliverable 67: Release of Claims)

If no final invoice is submitted to ASSIST/ITSS (with all required attachments or supporting documentation if applicable) within sixty (60) calendar days from task order completion (end of PoP), or within the timeframe established by written extension by the CO, and is therefore by the terms of this task order rejected as untimely, the release of claims is due within fifteen (15) calendar days of the expiration of either the sixty (60) calendar day deadline for a final invoice or the deadline established in writing by the CO if an extension was approved, whichever is later. The release of claims is to be submitted to ASSIST/ITSS. If the release of claims is not submitted in good order to ASSIST/ITSS by within fifteen (15) calendar days of the expiration of either the sixty (60) calendar day deadline or the deadline established in writing by the CO if an extension was approved (whichever is later), then the Government may unilaterally close the task order without any further notice to, or correspondence with, the Contractor.

The terms of the task order and this PWS serve as notice that the release of claims is due within fifteen (15) calendar days of the expiration of either the sixty (60) calendar day deadline for a final invoice or the deadline established in writing by the CO if an extension was approved, whichever is later, and GSA is not required to further remind any employee of the Contractor’s team of this requirement and deadline, nor to request the release of claims from any employee of the Contractor’s team. If the Government does choose to remind the Contractor about the release of claims or otherwise correspond about closeout issues, the timeframe of fifteen (15) calendar days is not in any way changed by the date(s) that the Government chooses to correspond with the Contractor concerning the release of claims or closeout. The only circumstance that would extend the time to submit a release of claims is a written extension by the CO. If an extension is granted in

writing by the CO, the release of claims must be submitted in good order to ASSIST/ITSS within the timeframe established by the CO; otherwise if the release of claims is not submitted within the timeframe established in writing by the CO, the Government may unilaterally close the task order without any further notice to, or correspondence with, the Contractor.

The Government reserves the right to require a release of claims at the end of each performance period, after all payments have been completed. ****NOTE:** No rates agreed to under the terms of this order are subject to DCAA or other “final” audited rates.

G.12 Unilateral Close-Out Modifications:

FAR clause 52.212-4(c) is hereby amended as follows: The Government reserves the right to issue unilateral closeout modifications to close out commercial contractual agreements, after the Contractor has acknowledged the order is closed and that no further liability exists on behalf of the parties. The Government also reserves the right under the unilateral closeout modification to deobligate money after full payment has been made to the Contractor for their services/materials under this order.

G.13 CONTRACT PERFORMANCE EVALUATION

While past performance is not a formal evaluation factor for this procurement, the CO will review the Excluded Parties List System (within System for Award Management) information on the awardee in order to make a past performance responsibility determination in accordance with FAR 9.105-1, “Obtaining Information.”

In accordance with FAR 8.406-7, Contractor Performance Evaluation and FAR 42.15, Contractor Performance Information, the Government will provide and record Past Performance Information for acquisitions over the simplified acquisition threshold, utilizing the Contractor Performance Assessment Reporting System (CPARS). The CPARS process allows Contractors to view and comment on the Government's evaluation of the Contractor's performance before it is finalized. Contractors are required to register in the CPARS, so Contractors may review and comment on past performance reports submitted through the CPARS.

CPARS <https://www.cpars.csd.disa.mil/>

G.13.1 OTHER CONSIDERATIONS

Note: The CO will designate a Contracting Officer Representative (COR) to perform specific administrative or technical functions. The specific rights and responsibilities of the COR for the task order shall be described in writing. A COR has no actual, apparent, or implied authority to bind the Government. CORs will be appointed in writing and the Contractor will receive a copy of the appointment letter(s).

Accomplishment of all work included in this PWS will require the resultant awardee to coordinate with and work cohesively with other Contractors on site. The awardee shall work with all other onsite Contractors to develop work schedules that will ensure all work under this task is completed by the specified ultimate completion date stated in each individual task in the most efficient manner possible. The Contractor shall arrange their crew's schedule, and perform this work so as not to interfere with operations of the Government and the operations of other Contractors. The Government is not responsible for, nor is it responsible for paying for, delays caused by a lack of coordination with other Contractors or subContractors. The Government will not pay for delays or other damages due to lack of coordination with other onsite Contractors and subContractors.

If the CO determines that the Contractor is failing to coordinate its work with the work of other Contractors as directed, the CO may upon written notice:

- a. Withhold any payment otherwise due hereunder until his/her directions are complied with by the Contractor.
- b. Direct others to perform portions of the task order and charge the cost of work to task order amount.
- c. Terminate any and all portions of this task order for his failure to perform in accordance with the task order requirements.

Failure to work cooperatively and cohesively with other Contractors on site will result in the occurrence being documented on the Contractor's Performance Assessment Report, which could have a negative impact on winning future work where Past Performance is an evaluation factor.

The CO may consider time extensions and equitable adjustments only if he/she can determine the delays affecting the ultimate completion date were solely caused by the Federal Government.

G.14 THIRD PARTY SCHEDULE DELAYS

GSA does not warrant and cannot guarantee that the site will remain free from interference by third parties, with whom the Federal Government has no contractual relationship. Only delays determined to be caused by the Federal Government that affect the Contractor's ability to complete the task order work on time will be considered for time extensions and equitable adjustments.

[END SECTION G]

H.1 NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)

The applicable NAICS Code for this TO is 541511.

H.2 PRODUCT SERVICE CODE (PSC)

The PSC is R425 – Support - Professional: Engineering/Technical.

The contractor shall enter the PSC in the Federal Acquisition Service (FAS) Sales Reporting Portal (SRP).

H.3 KEY PERSONNEL

The following are the minimum personnel who shall be designated as “Key.” The Government does not intend to dictate the composition of the ideal team to perform this TO.

(Minimum One (1) FTE) - Program Manager (PM)

(Minimum One (1) FTE) - VC-25 Engineer

The Government desires that Key Personnel be assigned for the duration of the TO.

H.3.1 PROGRAM MANAGER (PM)

The contractor shall identify a Program Manager (PM) by name who shall provide management, direction, administration, quality assurance (as defined in Sections C.4 and C.5), and leadership of the execution of this TO.

- a. It is required that the PM has the following qualifications:
 1. Be an employee of the prime contractor.
 2. Top Secret security clearance
 3. LCAT: Management Analyst (SME).
 4. At least 8 years of EAD experience.
- b. It is desired that the PM has a Defense Acquisition Workforce Improvement Act Program Manager or Engineer certification OR a Project Management Professional (PMP) certification.

H.3.2 OTHER KEY PERSONNEL: VC-25 ENGINEER

- a. It is required that the VC-25 Engineer has the following qualifications:
 1. At least 8 years of EAD and/or PAG experience.
 2. Top Secret security clearance
 3. LCAT: Engineer (SME).

H.3.3 KEY PERSONNEL SUBSTITUTION

The contractor shall not replace any personnel designated as Key Personnel in the proposal without the written concurrence of the AAS CO. Prior to utilizing other than the Key Personnel specified in its proposal in response to the PWS, the contractor shall notify the AAS CO and AFLCMC/WVV COR. This notification shall be no later than ten (10) calendar days in advance of any proposed substitution and shall include justification (including resume(s) and labor category of proposed substitution(s)) in sufficient detail to permit evaluation of the impact on TO performance. In the event that the contractor is unable to provide advance notice (e.g., unexpected departure of employee), the contractor shall provide notification as soon as the departure is known.

Substitute Key Personnel qualifications shall be equal to, or greater than, those of the Key Personnel substituted. If the AAS CO and the AFLCMC/WVV COR determine that a proposed substitute Key Personnel is unacceptable, or that the reduction of effort would be so substantial as to impair the successful performance of the work under the TO, the contractor may be subject to default action as prescribed by FAR 52.249-8.

H.4 MINIMUM CONTRACTOR PERSONNEL EXPERIENCE

A minimum of eight (8) personnel, of any labor category, to be assigned to work on the requirement, shall have a total of ten (10) or more years in any of the following areas (please note that the years of experience requirement is a combined total of ten (10) years, not ten (10) years in each area): 10+ years of experience in the following areas in any combination:

- Fielding or modernizing airborne information technology systems that directly support the nation's senior leaders (e.g., President, Vice President, Secretary of State, Secretary of Homeland Security);
- Presidential Airlift Group (PAG);
- Presidential Airlift Squadron (PAS);
- Presidential Logistics Squadron (PLS);
- 89th Airlift Wing (AW);
- 1st Airlift Squadron (ALS);
- 99th ALS;
- Air Mobility Command (AMC)

H.5 GOVERNMENT PROPERTY

H.5.1 GOVERNMENT-FURNISHED PROPERTY (GFP)

Government-Furnished Items Incidental to the Place of Performance:

Government shall grant Contractor access to site or installation and items incidental to the Place of Performance such as phone, computer, desk, chair, fax machine, etc. Such items provided to the Contractor remain accountable to the Government.

Government-Furnished Property (GFP):

The Government may provide the Contractor GFP which consists of Government-Furnished Equipment (GFE), Government-Furnished Material (GFM), Government-Furnished Facilities (GFF), Special Tooling, and similar GFP as necessary to perform the PWS/task order. At this time, however, the Government does not anticipate providing any GFP to the Contractor other than use of facilities. The Government will provide the Contractor access to necessary Government-Furnished Information.

* Note: The Government may allow the Contractor access to Government Property during performance of the contract; in this scenario, however, the Contractor would never be in possession of the property and the Government would always remain titled to the property.

H.5.2 CONTRACTOR ACQUIRED GOVERNMENT FURNISHED PROPERTY

The Contractor shall furnish all supplies, equipment, facilities and services required to perform work under this contract that are not specifically listed in this PWS, please see section Appendix C, section A1.1 Contractor Furnished or Acquired Items and Services for additional information.

H.6 GOVERNMENT-FURNISHED INFORMATION (GFI)

[RESERVED]

H.7 SECURITY REQUIREMENTS

Security requirements will be documented using the Department of Defense (DD) Form 254.

1. Visitor Group Security Agreement (VGSA). The Contractor shall enter into a long-term visitor group security agreement if service performance is on base. This agreement shall outline how the Contractor integrates security requirements for service operations with the Air Force to ensure effective and economical operation on the installation. The agreement shall include:

- a. Security support provided by the Air Force to the Contractor shall include storage containers for classified information/material, use of base destruction facilities, classified reproduction facilities, use of base classified mail services, security badging, base visitor control, investigation of security incidents, base traffic regulations and the use of security forms and conducting inspections required by DoD 5220.22-R, Industrial Security Regulation, Air Force Policy Directive 16-14, Security Enterprise Governance, and Air Force Instruction 16-1406, Air Force Industrial Security Program.
 - b. Security support requiring joint Air Force and Contractor coordination includes packaging classified information, mailing and receiving classified materials, implementing emergency procedures for protection of classified information, security checks and internal security controls for protection of classified material and high-value pilferable property.
 - c. On base, the long-term visitor group security agreement may take the place of a Standard Practice Procedure (SPP).
2. Obtaining and Retrieving Identification Media. As prescribed by the AFFAR 5352.2429000, Contractor access to Air Force installations, the Contractor shall comply with the following requirements:
- a. The Contractor shall obtain installation access passes for all Contractor personnel who make frequent visits to or perform work on the Air Force installation(s) cited in the contract. Contractor personnel are required to present the installation access pass while visiting or performing work on the installation.
 - b. No later than ten working days prior to contract commencement, the Contractor shall submit a written request on company letterhead to the contracting officer, listing the following: contract number, location of work site, start and stop dates, and names, dates of birth, driver's license number and state of issue for the Contractor employees needing access to the base. The authorized security manager will endorse the request and forward it to the issuing installation pass and registration office or security forces for processing. Contractors will present Government (state or federal) issued ID, before being issued a pass to enter the installation. Before being issued a pass to enter the installation, a criminal history check will be conducted for every individual requesting a pass. Personnel employed by the Contractor and operating a motor vehicle on the installation must possess proof of the following:
 - (1) Liability Insurance
 - (2) Current License Plates
 - (3) Current State Inspection Sticker (If Required)
 - (4) Valid State Driver License
 - (5) A phone number for sponsor on base

- c. Vehicles owned by the Contractor with the company name permanently printed on them are not required to obtain a pass as long as a current work order is presented at the time of entry. However, current liability insurance, state inspection sticker, and registration is required. The person driving the vehicle must have a valid operator license for the type of vehicle.
 - d. Upon completion or termination of the contract or expiration of the identification passes, the Contractor shall ensure that all base identification credentials issued to Contractor employees are returned to the issuing office. If a Contractor employee has been terminated, the credentials will need to be retrieved and returned to issuing activity so that employee does not have base access. If the credential is not retrieved, then SF will need to be notified so base access is not allowed.
 - e. Failure to comply with these requirements may result in withholding of final payment.
3. Pass and Identification Items. The Contractor shall ensure the following pass and identification items required for service performance are obtained for employees and nonGovernment owned vehicles:
 - a. Installation Access Pass (IAP) (DBIDS), Visitor/Vehicle Pass (AFMAN 31-116), used for contracts for less than six months to include one-day visits (i.e. warranty work).
 - b. Installation Access Card (IAC) (DBIDS), (AFMAN 31-113), used for contracts for more than six months or more.
 - c. DoD Common Access Card (CAC), (AFI 36-3026), used for contracts for more than six months and requirement exists for access to the Government computer systems and software. CAC applications are accomplished by Trusted Agents via the Trusted Agent Sponsorship System (TASS).
4. Security Clearance Requirements. The Contractor requires access to classified information. A facility security clearance is required. For personnel working on the PLMF requirement, the security clearance requirements are as follows:
 - Minimum Clearance: Eighty-five percent (85%) of personnel must possess a minimum clearance of Top Secret at the time of task order start.
 - Yankee White (YW) Clearance: These Top Secret cleared personnel must also have the ability to obtain Yankee White (YW) clearance for VC-25 aircraft.
 - Mandatory YW Clearances: A minimum of 14 personnel must hold YW clearances at the time of task order award and maintain them throughout the life of the requirement. Any changes to this number must be approved by the COR and CO.
 - Pre-adjudicated Staff: The Government will accept nominated and pre-adjudicated staff who meet the YW clearance requirements.

- Information Security Analyst Positions: Security Fundamentals Professional Certification (SFPC), Security Asset Protection Professional Certification, or Information Assurance Management Level II/III is required for all Information Security Analyst positions.
 - Loss of Clearance: If personnel are unable to retain Top Secret or YW clearance (as applicable), or obtain YW clearance, they cannot continue working on the requirement and must be replaced.
 - Top Secret Sensitive Compartmented Information (SCI): Designated personnel must be provided with Top Secret Sensitive Compartmented Information (SCI) in support of program requirements. An SCI Nomination Request must be submitted in accordance with Attachment 7 of the DD254 for each nominee.
 - Badges and Entry: All security clearances and badges for entry into controlled areas must be obtained in accordance with local policy.
 - Per Appendix C – Government and Contractor Furnished Property, Equipment, and Services - A1.1 – Contractor Furnished Items and Responsibilities:
 - General: The Contractor shall furnish all supplies, equipment, facilities, and services required to perform work under this contract that are not specifically listed in the PWS; and
 - Secret Facility Clearance: The Contractor shall possess and maintain a TOP SECRET facility clearance from the Defense Security Service with Secret safeguarding at the Contractor's facility. The Contractor's employees performing work under this contract must have been granted a TOP SECRET security clearance from the Defense Industrial Security Clearance Office.
5. List of Employees. Per PWS Appendix D – Security Requirements, paragraph 5., the Contractor shall maintain a current list of employees, including their name and level of security clearance. As per PWS Section 5.7.2, a minimum of 14 personnel must have YW clearances at the time of TO award, and the COR and CO must approve any changes to the number of staff requiring YW clearances. A Visit Request for all employees with a security clearance must be submitted through the Joint Personnel Adjudication System (JPAS) and must be updated at least annually. The Contractor shall notify the Information Protection Office at each operating location 30 days before on-base service performance. The notification must include:
- a. Name, address, and telephone number of company key management representatives.
 - b. The contract number and contracting agency.
 - c. The highest level of classified information to which employees require access.
 - d. The location(s) of service performance and future performance, if known.
 - e. The date service performance begins.
 - f. Any change to information previously provided under this paragraph.
6. Suitability Investigations. Contractor personnel not requiring access to classified shall successfully complete, as a minimum, a Tier 1 (T1) investigation, before operating Government furnished workstations. The Contractor shall comply with the DoD 5200.2-R, Personnel Security Program, AFMAN 33-152, User Responsibilities and Guidance for Information Systems, and AFI 33-200, Information Assurance (IA) Management,

requirements. T1 investigation requests are initiated using the Standard Form (SF) 85 and are submitted to the installation Information Protection Office through the using agency's Unit Security Manager. T1 investigations are different from the Wants and Warrants checks and are provided by the Government at no additional cost to the Contractor.

7. **Security Monitor Appointment.** The Contractor shall appoint a security representative for the on base long term visitor group. The security representative may be a full-time position or an additional duty position. The security representative shall work with the host organization to provide employees with training required by DoDM 5200.01, Information Security Program, AFPD 16-14, Security Enterprise Governance, and AFI 16-1404, Air Force Information Security Program. The Contractor shall provide initial and follow-on training to Contractor personnel who work in Air Force controlled/restricted areas. Air Force restricted and controlled areas are explained in AFI 31-101, Integrated Defense.
8. **Additional Security Requirements.** In accordance with DoDM 5200.01, Information Security Program and AFI 16-1404, the Contractor shall comply with AFSSI 7700, Emission Security (EMSEC) Program; applicable AFKAGs, AFIs, and AFSSIs for Communication Security (COMSEC); and AFI 10-701, Operations Security (OPSEC) Instructions. The Contractor will comply with DoD Standard 22/Force Protection Condition Measures, DoD Standard 25/Level I-AT Awareness Training, and associated tasking contained in AFI 10-245, Antiterrorism (AT) standards. Level I AT Awareness training is available for Contractor personnel and can be requested by calling the local installation AT Office.
9. **Freedom of Information Act Program (FOIA).** The Contractor shall comply with DoD Regulation 5400.7-R/Air Force Supplement, DoD Freedom of Information Act Program, requirements. The regulation sets policy and procedures for the disclosure of records to the public and for marking, handling, transmitting, and safeguarding For Official Use Only (FOUO) material. The Contractor shall comply with AFI 33-332, Privacy Act Program, when collecting and maintaining information protected by the Privacy Act of 1974 authorized by Title 10, United States Code, and Section 8013. The Contractor shall remove or destroy official records only in accordance with AFI 33-322 Records Management, or other directives authorized in AFI 33-364, Records Disposition—Procedures and Responsibilities
10. **Reporting Requirements.** The Contractor shall comply with AFI 71-101, Volume- 1, Criminal Investigations, and Volume-2, Protective Service Matters, requirements. Contractor personnel shall report to an appropriate authority, any information or circumstances of which they are aware may pose a threat to the security of DoD personnel, Contractor personnel, resources, and classified or unclassified defense information. Contractor employees shall be briefed by their immediate supervisor upon initial on-base assignment and as required thereafter.
11. **Physical Security.** Areas controlled by Contractor employees shall comply with base Operations Plans/instructions for FPCON procedures, Random Antiterrorism Measures

(RAMS) and local search/identification requirements. The Contractor shall safeguard all Government property, including controlled forms, provided for Contractor use. At the close of each work period, Government training equipment, ground aerospace vehicles, facilities, support equipment, and other valuable materials shall be secured. During increased FPCONs, Contractors may have limited access to the installation and should expect entrance delays.

12. Operating Instructions. For controlled areas used exclusively by the Contractor, the Contractor shall develop an Operating Instruction (OI) for internal circulation control, protection of resources and to regulate entry into Air Force controlled areas during normal, simulated and actual emergency operations. The OI shall be written in accordance with AFI 31-101, the local base Operations Plan usually referred to as an OPLAN and AFI 10-245, Air Force Antiterrorism (AT) Standards, and coordinated through the Information Protection (IP) office.
13. Key Control. The Contractor shall establish and implement key control procedures in the Quality Control Plan to ensure keys issued to the Contractor by the Government are properly safeguarded and not used by unauthorized personnel. The Contractor shall not duplicate keys issued by the Government. Lost keys shall be reported immediately to the contracting officer. The Government replaces lost keys or performs re-keying. The total cost of lost keys, re-keying or lock replacement shall be deducted from the monthly payment due to the Contractor. The Contractor shall ensure its employees do not allow Government issued keys to be used by personnel other than current authorized Contractor employees. Contractor employees shall not use keys to open work areas for personnel other than Contractor employees engaged in performance of duties, unless authorized by the Government functional area chief.
14. Lock Combinations. The Contractor shall establish procedures in local OIs ensuring lock combinations are not revealed to unauthorized persons and ensure the procedures are implemented. The Contractor is not authorized to record lock combinations without written approval by the Government functional area chief. Records with written combinations to authorized secure storage containers or Secure Storage Rooms (SSR), shall be marked and safeguarded at the highest classification level as the classified material maintained inside the approved containers. The Contractor shall comply with DoDM 5200.01, Vol 3 security requirements for changing combinations to storage containers used to maintain classified materials.
15. Traffic Laws. The Contractor and their employees shall comply with base traffic regulations.
16. Healthcare. Healthcare is provided at the local military treatment facility on an emergency reimbursable basis only.
17. Privacy Act Work on this project may require that personnel have access to Privacy

Information. Personnel shall adhere to the Privacy Act, Title 5 of the U.S. Code, Section 552a and applicable agency rules and regulations.

18. Transition Plan (Phase In and Out of Task Order) The Contractor is expected to begin working on the requirement fully on the task order start date. The Contractor shall already be approved at the required clearance levels at the time of award.

The outgoing Contractor, as applicable, shall be fully compliant to the Government at the end of the life of the requirement and shall fully coordinate duties, process, and functions with the onboarding Contractor as approved by the COR.

H.7.1 INFORMATION ASSURANCE

The contractor may have access to sensitive (including privileged and confidential) data, information, and materials of the Government. These printed and electronic documents are for internal use only and remain the sole property of the Government. Some of these materials are protected by the Privacy Act of 1974 (As Amended). Unauthorized disclosure of Privacy Act covered materials is a criminal offense.

H.7.2 SECURITY CLEARANCES

In general, all necessary facility and employee security clearances shall be at the expense of the contractor. The contractor shall comply with all security requirements.

The contractor shall possess a final Top Secret (TS) security clearance with Sensitive Compartmented Information (SCI) eligibility prior to being assigned to the TO. For all contractor personnel assigned to this TO, SCI eligibility means the individual is eligible for immediate SCI nomination and indoctrination upon TO award and approval of the DD Form 254.

H.7.3 FACILITY CLEARANCE (FCL)

The Contractor shall possess and maintain a TOP SECRET facility clearance from the Defense Security Service with Secret safeguarding at the Contractor's facility. The Contractor's employees performing work in support of this contract shall have been granted a TOP SECRET security clearance from the Defense Industrial Security Clearance Office.

H.7.4 DD254

The Contractor shall fully cooperate on all security checks and investigations by furnishing requested information to verify the Contractor employee's trustworthiness and suitability for the position. This requirement will also include a Contract Security Classification Specification, (i.e., DD Form 254). Each newly Government approved DD Form 254 shall be included in the task order via unilateral modification by the Government.

The Government has full and complete control over granting, denying, withholding or terminating security clearances for employees. The granting of a clearance shall not prevent, preclude, or bar the withdrawal or termination of any such clearance by the Government.

H.7.4 HOMELAND SECURITY PRESIDENTIAL DIRECTIVE-12 (HSPD-12)

Homeland Security Presidential Directive 12 (HSPD-12) was issued to implement the policy of the United States to enhance security, increase Government efficiency, reduce identity fraud, and protect personal privacy by establishing a mandatory, Government-wide standard for secure and reliable forms of identification issued by the Federal Government to its employees and Contractors (including Contractor employees). Under this directive, the heads of executive departments and agencies are required to implement programs to ensure that identification issued by their departments and agencies to Federal employees and Contractors meets the Standard. This policy can be found at the following website:

<http://www.whitehouse.gov/news/releases/2004/08/20040827-8.html>

In performance of services under this task, the Contractor shall ensure all its personnel who require physical access to federally controlled facilities and access to federally controlled information systems by no later than 14 days after being briefed onto the contract have been issued identification in compliance with HSPD-12 policy. In their solicitation response packages, offerors shall confirm they will comply with the Government client's identification procedure that is implementing HSPD-12 policy. The Security/Identification point of contact for the client agency that is responsible for implementing their HSPD-12 compliant policy is:

POC - Name	TBD
Office Symbol	TBD
Address	TBD
City, State, Zip	TBD
Telephone #	TBD
Email	TBD

All costs associated with obtaining necessary clearances shall be borne by the Contractor.

H.7.5 SECURITY

Security clearances for Contractor employees, including subcontractor employees, require clearances as specified in Section 5.7- Contractor Staffing of this PWS. The Contractor, at its own expense, is responsible for providing and maintaining personnel with the appropriate security clearances to ensure compliance with Government security regulations, as specified in this PWS.

Federal Information Security Management Act (FISMA) of 2002 compliance is accessed through annual accreditation and certification as required by the DoD Risk Management Framework for DoD Systems, governed by DoDI 8510.01, dated July 19, 2022.

Note: This requirement must be met on any procurement where the Contractor will have access to Government electronic information.

In order to satisfy this requirement, GSA requires the FISMA point of contact for the client agency that is responsible for maintaining their annual FISMA accreditation and certification: Provide your agency official for FISMA compliance below:

POC - Name	TBD
Office Symbol	TBD
Address	TBD
City, State, Zip	TBD
Telephone #	TBD
Fax #	TBD

H.8 CYBER-SUPPLY CHAIN RISK ASSESSMENT

The Government may perform a cyber-supply chain risk assessment of the awarded contractor at any time during the period of performance. The Government may review any information provided by the contractor to the Government as part of this contract action, along with any other information available to the Government from any other source, to assess the cyber-supply chain risk associated with the contractor. The Government may monitor the following cyber-supply chain risk information, including, but not limited to:

- a. Functionality and features of awarded products and services, including access to data and information system privileges.
- b. The ability of a source to produce and deliver products and services as expected.
- c. Foreign control of, or influence over, a source, product, or service (e.g., foreign ownership, personal and professional ties between a source and any foreign entity, legal regime of any foreign country in which a source is headquartered or conducts operations).
- d. Security, authenticity, and integrity of products and services and their supply and compilation chains.
- e. The contractor's capacity to mitigate identified risks.
- f. Any other considerations that would factor into an analysis of the security, integrity, resilience, quality, trustworthiness, or authenticity of products, services, or sources.

In the event supply chain risks are identified during contract administration and corrective action becomes necessary, mutually agreeable corrective actions will be sought based upon specific identified risks. Failure to resolve any identified risk may result in Government action, including not extending the period of performance, not exercising remaining option periods, and contract termination.

H.9 PERSONNEL REQUIREMENTS

H.9.1 Contractor Employee Guidelines

Contractor personnel shall show clear, continuous evidence of a professional workforce. The Contractor's personnel shall present a neat and well-groomed appearance, and exhibit professionalism. Contractor personnel must wear a badge that clearly indicates that they are Contractor personnel and must have the company logo on it or their apparel. Personnel must clearly identify themselves as Contractor employees in emails, over the phone, and in meetings. Contractor personnel, although recognized as Contractor employees and under the complete control of the Contractor, shall be required to comply with directives of the base commander or authorized representative as to safety and security standards and regulations applicable to the work site. Contractor personnel involved in crimes and/or other incidents of misconduct may be barred from the base by the base commander. The CO may require dismissal from work those employees which he deems incompetent, careless, insubordinate, unsuitable or otherwise objectionable, or whose continued employment he/she deems contrary to the public interest or inconsistent with the best interest of national security.

The Contractor shall not employ persons on this task order if such employees are identified to the Contractor by the client representative as a potential threat to the health, safety, security, general wellbeing, or operational mission of the installation and its population.

The Contractor shall provide experienced and fully trained personnel to perform the required services.

H.9.1.1 Key Cards: Identification of Contractor Employees: All contract personnel will wear issued photo ID electronic key cards. All contract personnel attending meetings, answering Government telephones, and working in other situations where their Contractor status is not obvious to third parties are required to identify themselves as such to avoid creating an impression in the minds of members of the public that they are Government officials. They must also ensure that all documents or reports produced by Contractors are suitably marked as Contractor products or that Contractor participation is appropriately disclosed. Contractor personnel will obtain a vehicle pass for access to the military installation and Common Access Cards (CAC) for computer access, if applicable.

H.9.1.2 Common Access Card Turn-In. Upon completion of the Contractor's employment or termination of the task order itself and to prevent delay in payment to the Contractor, the vendor's

Program Manager will ensure CACs are turned into the COR. Revoked or terminated Government credentials must immediately be returned to Government personnel as Government property.

H.9.1.3 Access and General Protection/Security Policy and Procedures. Contractor and all associated sub-contractor employees shall comply with applicable installation, facility and area commander installation/facility access and local security policies and procedures (provided by Government representatives). The Contractor shall also provide all information required for background checks to meet installation access requirements to be accomplished by installation Provost Marshal Office, Director of Emergency Services or Security Office. Contractor workforce must comply with all personal identity verification requirements as directed by DoD, AF, and/or local policy. In addition to the changes otherwise authorized by the changes clause of this task order, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in Contractor security matters or processes.

H.9.1.4 Common Access Card Issuance. Before CAC issuance, the Contractor employee requires, at a minimum, a favorably adjudicated clearance in accordance with PWS Section 5.7 Contractor Staffing. The Contractor employee will be issued a CAC only if duties involve one of the following: (1) Both physical access to a DoD facility and network access, via logon, to DoD networks on-site or remotely; (2) Remote access, via logon, to a DoD network using DoD approved remote access procedures; or (3) Physical access to multiple DoD facilities or multiple non-DoD federally controlled facilities on behalf of the DoD on a recurring basis for a period of 6 months or more. At the discretion of the sponsoring activity, an initial CAC may be issued based on a favorable review of the FBI fingerprint check and a successfully scheduled NACI at the Office of Personnel Management. -

H.9.1.5 Access to a DoD facility or installation. Contractors require access to military installations and will conform to all entry requirements. Installations may differ on some requirements.

H.9.1.6 Cyber Awareness (Information assurance (IA)/information technology (IT)) training. All Contractor employees and associated sub-contractor employees must complete the DoD Cyber awareness training before issuance of network access and annually thereafter.

H.9.1.7 Handling and/or access to classified information. The contractor shall comply with FAR 52.204-2, Security Requirements.

H.10 MISSION-ESSENTIAL SERVICES

The requirements of this TO have been identified by the U.S. Government as being essential to the mission and operational readiness of the U.S. Armed Services operating worldwide; therefore, the contractor may be required to perform this TO during crisis situations (including war or a state of emergency), contingencies, or exercises in the identified area of operations, also known as theater of operations, subject to the requirements and provisions listed below. These requirements apply to all personnel deployed to the Area of Responsibility (AOR), regardless of if they are temporary travelers or permanently deployed/stationed.

DFARS 252.237-7023 has been incorporated into this TO in Section I. The services identified by the Government as mission essential are provided in (**Section H.8**). Additionally, as required by DFARS 252.237-7023, a contractor-provided Final Mission-Essential Contractor Services Plan will be incorporated into the TO. The contractor shall provide an Updated Mission-Essential Contractor Services Plan at the Project Kick-Off Meeting for Government review and approval in accordance with Section E. The contractor shall maintain and update its plan as necessary.

The contractor shall be responsible for performing all requirements of this TO notwithstanding crisis situations, contingencies, or exercises including the existence of any state of war, whether declared or undeclared, or state of emergency, by the U.S. or the host nation, commencement of hostilities, internal strife, rioting, civil disturbances, or activities of any type which would endanger the welfare and security of U.S. Forces in the host nation. The contractor shall ensure its personnel have completed all the required screenings and training to perform the tasks of this requirement. Failure by the contractor to perform all requirements of this TO may subject the contractor to a termination of this TO for cause.

The contractor shall ensure all contractor personnel participate in any required and/or necessary pre-deployment qualification training. Contractor personnel will be integrated into Government contingency plans, and afforded the same rights, privileges, protection, and priority as U.S. Government personnel. The Government may provide security, housing, and messing facilities for contractor personnel should conditions warrant.

H.11 TRAINING AND PERMITS

The Contractors shall have a current Cyber Awareness (Information assurance (IA)/information technology (IT)) Training completion certificate on file with AFLCMC WVV – EAD to gain and maintain system access. All Contractor employees and associated sub-contractor employees must complete the DoD Cyber awareness training before issuance of network access and annually thereafter.

H.12 ORGANIZATIONAL CONFLICT OF INTEREST (OCI) AND NON-DISCLOSURE REQUIREMENTS

H.12.1 ORGANIZATIONAL CONFLICT OF INTEREST (OCI)

Contractor and subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent Organizational Conflicts of Interest (OCI) as defined in FAR Subpart 9.5. The Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential OCI and shall promptly submit a plan to the Contracting Officer to avoid or mitigate any

such OCI. The Contractor's mitigation plan will be determined to be acceptable solely at the discretion of the Contracting Officer and in the event the Contracting Officer unilaterally determines that any such OCI cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the OCI. The Contractor is also required to complete and sign an OCI certification statement in which the Contractor (and any subContractors, consultants, or teaming partners) agrees to disclose information concerning the actual or potential conflict(s) with any proposal for any solicitation relating to any work in the contract.

NOTE: This certification regarding OCI awareness shall be provided by each offeror within Portfolio 1 of their Performance Work Statement (PWS) form Attachment 1- Vendor Information Sheet.

The Vendor Information Sheet, including the OCI certification, shall become a part of the award.

H.12.2 NON-DISCLOSURE REQUIREMENTS

If the contractor acts on behalf of, or provides advice with respect to any phase of an agency procurement, as defined in FAR 3.104-4, then the contractor shall execute and submit a Corporate Non-Disclosure Agreement (NDA) Form and ensure that all its personnel (including subcontractors, teaming partners, and consultants) who will be personally and substantially involved in the performance of the TO:

- a. Are instructed in the FAR 3.104 requirements for disclosure, protection, and marking of contractor bid or proposal information, or source selection information.
- b. Are instructed in FAR Part 9 for third-party disclosures when acting in an advisory capacity.

All proposed replacement contractor personnel shall also be instructed in the requirements of FAR 3.104. Any information provided by contractors in the performance of this TO or obtained from the Government is only to be used in the performance of the TO. The contractor shall put in place appropriate procedures for the protection of such information and shall be liable to the Government for any misuse or unauthorized disclosure of such information by its personnel, as defined above.

H.13 SECTION 508 COMPLIANCE REQUIREMENTS

All Information and Communication Technology (ICT) products, platforms, and services (e.g., hardware, software, websites, multimedia) procured, developed, maintained, delivered, and used as part of this TO, shall fully comply with Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794d) and Revised Section 508 Standards in 36 Code of Federal Regulations (CFR) § 1194.1 and Appendices A, C, and D.

The contractor shall identify all ICT products, platforms, and services to be used and the degree of compliance with the applicable standards. Additionally, the contractor shall clearly indicate where the information pertaining to Section 508 compliance can be found (e.g., vendor's or other exact

web page location). The contractor shall ensure that the list is easily accessible by typical users beginning at time of award.

The Industry Partner shall support the Government in its compliance with Section 508 throughout the development and implementation of the work to be performed. Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794d) requires that when Federal agencies develop, procure, maintain, or use electronic information technology, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees who do not have disabilities, unless an undue burden would be imposed on the agency. Section 508 also requires that individuals with disabilities, who are members of the public seeking information or services from a Federal agency, have access to and use of information and data that is comparable to that provided to the public who are not individuals with disabilities, unless an undue burden would be imposed on the agency. Applicable standards are 1194.21-1194-26.

The Industry Partner should review the following websites for additional 508 information:

<http://www.section508.gov/index.cfm?FuseAction=Content&ID=12>

<http://www.access-board.gov/508.htm>

<http://www.w3.org/WAI/Resources>

The Contractor must indicate in its response package where full details of compliance to the identified standards can be found, such as the vendor's website, etc.

H.14 TRAVEL

The Contractor will be required to travel within the continental United States (CONUS) in the performance of this work, including trips to Oklahoma City, OK, for Contractor meetings; San Antonio, TX, for aircraft evaluations; and Andrews AFB, MD, for operational unit support. Travel to OCONUS may also be authorized on a case by case basis. The only OCONUS locations currently authorized for travel and Contractor performance are Belgium, Japan and Germany. All other OCONUS location travel requests must be sent to GSA for scope review before submitting a TAR/CTP.

The Contractor is responsible for accounting for all travel associated with their code testing and training in fulfilling the PWS. The Contractor shall comply with all travel rules and restrictions. All work entails unarmed personnel. The Contractor shall submit to the COR cost estimates for such travel. All requests for CONUS and OCONUS travel shall be approved by the COR prior to commencement of travel. Joint Travel Regulations apply. The Contractor shall be responsible for all travel arrangements including airline, hotel, and rental car reservations. The Contractor shall make every commercially reasonable effort to schedule travel far enough in advance to take advantage of reduced airfares. Travel will be priced and invoiced at cost and shall comply with the Federal Travel Regulations with an approved travel markup rate applied. Travel markup rates will be considered fixed at time of award and shall not be subject to DCMA/DCAA or other finalized audited rates.

Historical travel sites are listed below (this is for informational purposes only and are estimated based on historical information). Additional conferences or meetings are not included. Please see Section 10.5 for potential additional travel sites.

Table H.14.A Historical Travel Sites (PWS Table 7.1.3)

ORIGIN	DESTINATION	TRIPS Per POP	TRAVELERS	DURATION
Tinker AFB, OK	Greenville, TX	2	7	4 Days
Tinker AFB, OK	Greenville, TX	4	5	4 Days
Tinker AFB, OK	San Antonio, TX	2	10	5 Days
Tinker AFB, OK	Andrews AFB, MD	2	1	3 Days
Andrews AFB, MD	San Antonio, TX	3	2	5 Days
Andrews AFB, MD	Greenville, TX	2	1	5 Days
Norfolk, VA	Andrews AFB, MD	1	1	2 Days
Scott AFB, IL	San Antonio, TX	4	1	5 Days
Scott AFB, IL	Andrews AFB, MD	2	1	3 Days

Table H.14.B Total Travel Costs (PWS Table 7.1.4)

Period of Performance	Travel Costs
Base	TBD
Option 1	TBD
Option 2	TBD
Option 3	TBD
Option 4	TBD
Total	TBD

H.14.1 OCONUS TRAVEL REGULATIONS

H.14.1.1 Travel to Japan: Contractor eligibility and logistical support is governed by the US Japan Status of Forces Agreement (SOFA) as implemented by US Forces Japan Instruction 64100 found at:

<https://www.usfj.mil/Resources/SOFA-Contract-Performance-in-Japan/>

H.14.1.2 Travel to Germany: Use *Army Europe (AE) Regulation 715-9 (April 2022)*, referenced for policies, procedures and guidance relating to current and future employment of Contractor personnel in Germany.

<https://media.defense.gov/2022/Apr/06/2002970812/-1/-1/0/AER715-9.PDF>

H.14.1.3 Travel to Belgium: Contractor eligibility and logistical support is governed by the North Atlantic Treaty Organization (NATO) SOFA found at:

https://www.nato.int/cps/ic/natohq/official_texts_17265.htm

H.14.2 Trip Reports.

For all travel required under the terms of this PWS, the Contractor shall submit Trip Reports once a month when invoices are updated to ASSIST. (Deliverable 62: Trip Report)

The Trip Report shall include the following information:

- Personnel traveled
- Dates of travel
- Destination(s)
- Purpose of Trip
- Task order effort supported
- Task Order ID number
- MAJCOM supported
- Training (be specific)
- Actual Trip Costs
- Approval Authority
- Summary of events

H.14.3 Travel Requirements

Travel Time: In support of this task order, Contractor personnel may be required to travel to various locations. During performance, only actual travel costs are reimbursed in accordance with the Joint Travel Regulation (JTR) and other applicable regulations, subject to the Government's approval. On the first and last day of approved Contractor personnel travel, the rate is 75 percent of the appropriate Meals and Incidental Expenses (M&IE) rate regardless of the departure and return time.

H.14.4. Approval for Travel

All CONUS travel shall be scheduled and booked at least two weeks in advance if possible.

OCONUS travel shall be scheduled and booked at least a month in advance if possible. Emergency requirements shall be defined by the COR or ACOR and if exceeding the micro purchase threshold (MPT), approved by both the COR or ACOR and GSA. All travel shall be in accordance with the

Joint Travel Regulation (JTR) and shall be at or below per diem rate. The Contractor is required to ensure good stewardship of travel funds and shall seek rates lower than per diem whenever possible. The Contractor shall make every effort to locate the airport that will provide the lowest cost of air travel possible. The COR or ACOR may require a cost benefit analysis to support any travel, as deemed necessary. The Contractor shall submit a Consent to Purchase (CTP) form (Attachment 4) with a complete explanation of the trip and costs for all travel. For routine travel, the form should be submitted at least two weeks in advance of the anticipated booking date to allow for processing and obtaining approvals.

For COR or ACOR review/signature approval, the CTPs will be uploaded to PLMF as the preferred coordination method (in lieu of email which may still be used in emergencies). For travel above the MPT, after COR or ACOR approval, the Contractor shall then upload into ASSIST via Collaborations to obtain the approval of the GSA CO and PM prior to the Contractor engaging in travel or making reservations or plans. This CTP form will only be considered approved when the vendor receives a copy of the CTP form with COR or ACOR, CO and PM signatures, as applicable. In certain cases, the COR, ACOR, or GSA may provide verbal or email approval of travel prior to having a CTP with all required signatures. In this case the Contractor may engage in making travel plans, reservations and travel as necessary. Availability of adequate funding must still be confirmed first. Travel charges over and above per diem without proper approval, shall be at the expense of the Contractor. (Deliverable 63: Consent to Purchase (CTP) for Travel)

NOTE: The Government reserves the right to audit, thus; the Contractor shall keep on file all backup support documentation for travel, materials, and ODC procurements (travel) made on behalf of the Government under the terms of the contract.

H.14.5 TRAVEL REGULATIONS

Contractor costs for travel will be reimbursed at the limits set forth in the following regulations (see FAR 31.205-46):

- a. FTR for travel in the continental U.S.
- b. JTR for travel in Alaska, Hawaii, and outlying areas of the U.S.
- c. DSSR (Government Civilians, Foreign Areas), Section 925, Maximum Travel Per Diem Allowances for Foreign Areas, for travel in areas not covered in the FTR or JTR.

As all contractor personnel are DoD-sponsored contractor personnel, the contractor shall ensure that all official and leisure travel complies with the requirements stipulated in the DoD Foreign Clearance Guide (FCG), host-country-specific requirements (e.g., BACO-90 (Request for Confirmation of Exemption from the Requirement to Obtain a Work Permit) in Germany), and other applicable regulations.

H.14.6 TRAVEL AUTHORIZATION REQUESTS (TAR)

Before undertaking long-distance travel to any Government site or any other site in performance of this TO, the contractor shall have this long-distance travel approved by, and coordinated with, the

AFLCMC/WVV COR and accepted by GSA-FAS-AAS. Notification shall include, at a minimum, the number of persons in the party, traveler name(s), destination, duration of stay, purpose, and estimated cost. Prior to any long-distance travel, the contractor shall prepare a TAR for Government review and approval. Long-distance travel will be reimbursed for cost of travel comparable with the JTR and DSSR.

Requests for long-distance travel approval shall ensure the TAR template is updated to match:

- a. Be prepared in a legible manner.
- b. Include a description of the travel proposed including a statement as to purpose.
- c. Be summarized by travelers.
- d. Identify the TO number.
- e. Identify the CLIN associated with the travel.
- f. Be submitted in advance of the travel with sufficient time to permit review and approval.

The contractor shall use only the minimum number of travelers and rental cars needed to accomplish the task(s). Long-distance travel shall be scheduled during normal duty hours whenever possible.

TARs shall be submitted for approval using ASSIST Collaborations.

H.14.7 PASSPORTS, VISAS, AND CUSTOMS

The contractor shall obtain, at its own expense, all passports unless considerations for exceptions are coordinated with the AFLCMC/WVV COR and approved by the AAS CO. The contractor shall obtain visas or other documents necessary to enter and/or exit any area(s) identified by the AFLCMC/WVV COR for contractor personnel. The contractor shall obtain these at its own expense.

All contractor personnel shall be subject to the customs processing procedures, laws, agreements, and duties of the country to which they are deploying or traveling and the procedures, laws, and duties of the U.S. upon re-entry.

The contractor shall register all personnel with the appropriate U.S. Embassy or Consulate where possible.

H.14.8 FLAT RATE PER DIEM FOR LONG-TERM TEMPORARY DUTY (TDY)

In order to encourage contractors to take advantage of cost saving opportunities available for long-term travel, contractors performing TDY for more than 30 days in one location (CONUS and OCONUS) will receive a flat rate per diem. The following rules apply:

On the travel day to the TDY location, the contractor receives up to 100 percent lodging per diem at the locality rate and 75 percent Meals and Incidental Expenses (M&IE).

For long-term TDY lasting 31 - 180 days (in a single location), the authorized flat rate is 75 percent of the locality rate (lodging plus M&IE) payable for each full day of TDY at that location.

For long-term TDY of 181 days or greater (in a single location), the authorized flat rate is 55 percent of the locality rate (lodging plus meals and incidental expenses (M&IE)) payable for each full day of TDY at that location. Normally, TDY over 180 days is prohibited, but may be authorized at a very senior level when justified.

When using a flat rate per diem, contractors are not required to submit a lodging receipt but are required to validate to the AFLCMC/WVV COR that they did incur lodging costs.

If the contractor is unable to find suitable commercial lodging at the reduced per diem rate, they should contact the AFLCMC/WVV COR. If both the contractor and the AFLCMC/WVV COR determine that lodging is not available at the reduced per diem rate, the AFLCMC/WVV COR may then authorize actual cost lodging (not to exceed the locality per diem rate). However, the contractor will receive M&IE at the reduced rate (75 percent for TDY of 31 - 180 days and 55 percent for TDY of 181+ days).

H.15 OTHER DIRECT COSTS (ODCs)

The Government may require the contractor to purchase ODCs and Materials, including hardware, software, and related supplies critical and related to the services being acquired under the TO. Such requirements will be identified at the time a PWS is issued or may be identified during the course of a TO by the Government or the contractor. If the contractor initiates a purchase within the scope of this TO, the contractor shall submit to the AAS CO or AFLCMC/WVV COR a CTP. The CTP shall:

- a. Be prepared in a legible manner.
- b. Include the purpose of the purchase.
- c. Specify the items being purchased.
- d. Show the estimated cost of the purchase.
- e. Include a cost comparison.
- f. Show the rationale behind the purchase.

FAR 51 deviation allows for contractors to procure items (including IT equipment) from the GSA Schedule and GSA Global Supply Programs when deemed appropriate for fulfillment of agency requirements. If FAR 51 deviation authority is used, the contractor shall submit a CTP, and the AAS CO will issue written authorization to the contractor in accordance with FAR 51.102. The contractor shall not make any purchases without an approved CTP from the AFLCMC/WVV COR or an approved CTP from the AAS CO. CTPs shall be submitted for approval using ASSIST Collaborations.

H.16 MATERIALS/EQUIPMENT/SUPPLIES

The Contractor shall be required to provide online server services (i.e. cloud computing platform) throughout the duration of the requirement. Historically, capacity requirements are approximately 16 servers, 35 central processing units (CPUs), 10 terabytes (TB) of storage, and 250 gigabytes (GB) of Random Access Memory (RAM). The capacity requirements and needs are estimated to grow

over the life of the requirement. The server services shall be approved by the COR and CO prior to usage to ensure proper security threshold are in place.

Requirements for ODCs are projected to increase from the previous task order due to evolving mission needs, DoD lifecycle program requirements, and federal administration changes. This will necessitate new requirements on this Task Order to ensure continued, uninterrupted support for the Presidential missions. Historical examples on the previous Task Order are electromagnetic test materials to support VC-25B and Euler materials to fulfill a Presidential requirement. Another example is computer equipment purchases to support Virtual Reality requirements which increased the actual aircraft's availability for the President's use.

The total material/hardware costs are estimated at the levels described in Table H.16.A.

Table H.16.A Total Material/Hardware Costs

Period of Performance	Material/Hardware Costs
Base	TBD
Option 1	TBD
Option 2	TBD
Option 3	TBD
Option 4	TBD
Total	TBD

NOTE: This information is provided for estimating purposes only.

H.16.1 Methods of Material/ODC Procurement

H.16.1.1 Consent to Purchase Procedures for Other Direct Costs (Deliverable 64: Consent to Purchase (CTP) for ODCs)

- Under DoD MPT – Written notification to and concurrence of (PLMF upload or email is satisfactory) the COR with a CTP documenting the need for the material/service and the availability of adequate funding currently obligated on the associated Task Order. CO, and GSA PM approval is not required under this MPT. If coordinated via upload in PMLF or email, the Contractor shall upload documentation of the coordination and approval with the associated invoice.
- Over DoD MPT - Written evidence (signed CTP) form – Attachment 4 or approved alternative) including COR and GSA CO approval/signature of the need for the material/service, the fairness of pricing and the availability of adequate funding currently obligated on the associated Task Order is required.

- Submit 3 quotes when competition is available.
- When competition is not available, a Brand Name or Sole Source/Limited Source (i.e., only two quotes instead of three) Justification and Approval document will be required from the Contractor.
- When over the DoD MPT, specific restrictions require the Contractor to prepare a justification, with input from the COR, which will be maintained with the approved CTP form and all accompanying documentation. Brand name-specific requirements should not be the norm. Instead, the COR should include in the requirement's description, salient characteristics so that an "or equal" substitute brand can be considered rather than restricting to one specific brand item. The GSA CO will require that the awardee provide adequate support for the pricing. This may include historical data or historical sales data including company/date of order/quantity/unit price/descriptive info matching the requirement, etc. to support the reasonableness of the price.

H.16.1.2 The Contractor will be required to provide materiel/ODC throughout the life of this task order. The majority of these items are unknown to the Government at the time of award. Materials which are not officially awarded/incorporated into the base contract yet are within scope of the task as an integral part of the overall solution, are considered "Other Direct Costs" or ODCs.

H.17 PRESS/NEWS RELEASE

The contractor shall not make any press/news release pertaining to this TO without prior Government approval and only in coordination with the AAS CO.

H.18 INTELLECTUAL PROPERTY RIGHTS

The existence of any patent, patent application, or other intellectual property right that encumbers any deliverable shall be disclosed in writing on the cover letter that accompanies the delivery. If no such disclosures are provided, the data rights provisions in DFARS and 252.2277014 apply.

H.18.1 RECORDS/DATA

The Government will have unlimited rights under this task order pursuant to data rights clauses, including FAR 52.227-14, to all information and materials developed under this contract and furnished to the Government and documentation thereof, reports and listings, and all other items pertaining to the work and services pursuant to this agreement including any copyright. Unlimited rights under this task order are rights to use, duplicate, or disclose data, and information, in whole or in part in any manner and for any purpose whatsoever without compensation to or approval from the Contractor. The Government will at all reasonable times have the right to inspect the work and will have access to and the right to make copies of the above-mentioned items. Data owned by the Government and provided to the Contractor remains the property of the Government. The Government will consider accepting restricted or limited restricted or limited rights if deemed in its best interests.

H19 Additional Considerations

H19.1 Data Rights

In accordance with the data rights 52.227-14, any and all source code, models, prototypes, programming, language, licensure, enterprise-wide rights, software, Contract Data Requirement Lists (CDRLs), manuals, training documents and other similar products and related data developed, modified or created exclusively at the United States (U.S.) Government's expense under the task order, whether derived from commercial off the shelf (COTS) applications or otherwise, shall be deliverable to the U.S. Government and must be delivered to the U.S. Government with unlimited rights; this condition shall apply to all services performed and all data deliverables compiled or submitted pursuant to the PWS and resulting task order.

The Government has unlimited rights to all documents/material produced under this task order. All documents and materials, to include the source codes of any software, produced under this task order shall be Government owned and are the property of the Government with all rights and privileges of ownership/copyright belonging exclusively to the Government. These documents and materials may not be used or sold by the Contractor without written permission from the CO. All materials supplied to the Government shall be the sole property of the Government and may not be used for any other purpose. This right does not abrogate any other Government rights.

H19.2 Applicable Publications and References:

The Contractor must have the ability to get access (through clearance and CAC card) to governing Air Force Instructions (AFIs), Joint Capabilities Integration and Development System (JCIDS), Department of Defense Instructions (DoDIs), and any other governing regulations that may be applicable to work being done. These documents may be found by going to the following link as a reference:

www.e-publishing.af.mil

H.20 CONTRACTOR IDENTIFICATION

As stated in 48 CFR 211.106, Purchase Descriptions for Service Contracts, contractor personnel shall identify themselves as contractor personnel by introducing themselves or being introduced as contractor personnel and by displaying distinguishing badges or other visible identification for meetings with Government personnel. Contractor personnel shall appropriately identify themselves as contractor employees in telephone conversations and in formal and informal written correspondence.

H.21 COMMON ACCESS CARD (CAC)

The contractor shall provide a written status of issued security badges and CACs at closeout

(Section F, Deliverable 68) and at the end of each option period, provide a CAC Report (Section F, Deliverable 69) containing the following:

TO requires contractor personnel and/or subcontract personnel to have routine physical access to a Federally controlled facility and/or routine access to a Federally controlled information system as identified in the PWS/SOW.

The contractor understands its responsibility of complying with the agency's CAC procedures applicable to the installation where performance will occur. The contractor shall account for all forms of Government-provided identification issued to the contractor employees and/or subcontractor employees in connection with performance under this contract/order. The contractor shall provide a report to the AFLCMC/WVV COR stating the total number of CACs issued under this TO as required in Section 5. Each report shall include the following information, at a minimum:

1. Contractor employee's name and title.
2. Date the CAC credential/security badge is required under the contract.
3. Date the CAC credential is issued.
4. Unique CAC credential number.
5. Date CAC credential is no longer needed.
6. Date CAC credential is returned.

The contractor shall return all identification to the issuing agency immediately when any of the following apply:

1. CAC is no longer needed for contract performance.
2. Upon completion of the contractor employee and/or subcontractor employee's employment.
3. Upon completion or termination of TO.

The contractor understands the AAS CO may delay final payment under the TO if the contractor fails to comply with these requirements.

H.22 NATIONAL SECURITY AGENCY (NSA) REQUIREMENTS

Technologies for IA/MA-PLMF shall be procured in accordance with Committee on National Security Systems Policies (CNSSP) No. 11, National Policy Governing the Acquisition of Information Assurance and IA-Enabled Information Technology Products. In addition, technologies shall be procured which have been validated by Common Criteria Testing Labs, in accordance with the National Information Assurance Partnership (NIAP) Protection Profiles (PPs). Where a PP exists but the desired product has not been validated against it, IA/MA-PLMF shall direct the desired vendor to have its product validated against the appropriate, corresponding PP. For National Security Systems (NSS) where classified data is being protected at rest or in transit by commercial products, technologies from the Commercial Solutions for Classified (CSfC) Components List shall be used, in accordance with NSA's published CSfC Capability Packages. Capability Packages and the CSfC Components List can be found by visiting the following webpage:

nsa.gov/Resources/Commercial-Solutions-for-Classified-Program

NIAP-validated products can be found at the NIAP website on the page:

niap-ccevs.org/Product

H.23 ENERGY STAR AND FEMP-DESIGNATED ENERGY EFFICIENT PRODUCTS

The Energy Policy Act (EPA) of 2005 requires Federal agencies to purchase Energy Star and Federal Energy Management Program (FEMP)-designated energy efficient products. The contractor shall provide products that earn the Energy Star and meet the Energy Star specifications for energy efficiency. The contractor is encouraged to visit energystar.gov for complete product specifications and updated lists of qualifying products.

Additionally, the Energy Independence and Security Act of 2007 (EISA) requires Federal agencies to purchase products that use low wattage during standby mode. The contractor shall use low wattage products wherever possible or as required under this TO.

The Electronic Product Environmental Assessment Tool (EPEAT) was created to define what it means for electronic products to be “environmentally preferable.” The EPEAT standard has three tiers: Bronze, Silver, and Gold. Bronze means the product meets the mandatory criteria, Silver means the product meets the mandatory criteria plus 50 percent of the optional criteria, and Gold means the product meets the mandatory criteria plus 75 percent of the optional criteria. The contractor shall ensure that for those products covered by an EPEAT standard, 95 percent of the products are EPEAT-registered.

H.23.1 GREEN/SUSTAINABLE PROCUREMENT PRACTICES/REQUIREMENTS

In accordance with FAR 23.103, “Sustainable Acquisitions,” federal agencies shall advance sustainable acquisition by ensuring that 95 percent of new contract actions for the supply of products and for the acquisition of services (including construction) require that the products are (1) Energy-efficient (ENERGY STAR® or Federal Energy Management Program (FEMP) designated); (2) Water-efficient; (3) Bio-based; (4) Environmentally preferable (e.g., EPEAT registered, or non-toxic or less toxic alternatives); (5) Non-ozone depleting; or (6) Made with recovered materials; and that the required products in the contract actions for services include products that are (1) Delivered to the Government during performance; (2) Acquired by the Contractor for use in performing services at a Federally-controlled facility; or (3) Furnished by the Contractor for use by the Government.

The purpose of the statutes and executive orders is to create, demonstrate the viability of, and sustain markets for green products and services. Green purchasing requirements apply to direct purchase of products by the Government, products supplied or used in the performance of a Government contract, micro-purchases, simplified acquisitions, and the purchases of commercial items. Below is a chart representing the elements of FAR Part 23 that apply to the requirements defined in this PWS. If for any reason the Government has failed to identify an applicable requirement in the chart below,

the Contractor shall notify the Government immediately and a modification to the PWS clauses and the chart below shall be completed. The Contractor shall comply with the Executive Orders, and applicable Laws/official “Acts” and Government timelines that are enacted/in place at the time of contract award, without exception.

Designated Sustainable Procurement Categories	Reference Materials	Applicable/Not Applicable to PWS Requirements
CONTRACTOR PERSONNEL SUPPORTING U.S. ARMED FORCES DEPLOYED OUTSIDE THE UNITED STATES	<u>252.225-7040</u> CONTRACTOR PERSONNEL SUPPORTING U.S. ARMED FORCES DEPLOYED OUTSIDE THE UNITED STATES (OCT 2015)	Applicable
Environmental Protection Agency (EPA) designated recycled content products (Eight EPA categories are: vehicles, construction, transportation, parks and recreation, non-paper office products, paper and miscellaneous products (e.g., awards, bike racks, industrial drums, signage, sorbents, plaques, etc.)	FAR 11.002(d), Resource Conservation and Recovery Act section 6002, Executive Order (E.O.) 13423 and 13514; FAR 52.223-17; www.epa.gov/cpg	Applicable
Information technology related Energy Star® energy products (e.g., fluorescent lamps, exit signs, transformers, etc.)	FAR 11.002(d), FAR 23.204, FAR 52.223- 15, Energy Independence and Security Act of 2007 http://www.energystar.gov	Applicable

Federal Energy Management Program (FEMP) designated energy efficient low standby power products	FAR 11.002(d), E.O.s 13423, 13514, and 13221, http://www.energystar.gov	Applicable
Department of Agriculture designated biobased/bio preferred products (examples of USDA designations: Mobile equipment hydraulic fluids, Urethane roof coatings, Water tank coatings, Diesel fuel additives, Penetrating lubricants, Bedding, bed linens, towels, sorbents, hand cleaners and sanitizers, adhesives/mastic removers, composite panels, etc.)	FAR 11.002(d), FAR 52.223-1 (P), FAR 52.223-2, Farm Security and Rural Investment Act of 2002 section 9002, E.O. 13423; http://www.usda.gov/biopreferred	Applicable
Environmentally preferable products (e.g., green cleaning products, cafeteria ware (biobased disposable plates, forks, etc., furniture, electronic office equipment, green meetings and conference services, etc.)	FAR 11.002(d), E.O.s 13423 and 13514; www.epa.gov/ozone/snap/lists/index.html	Applicable
Electronic Product Environmental Assessment Tool (EPEAT) registered products	FAR 11.002(d), E.O. 13423 and 13514, FAR 52.223-16 (for EPEAT bronze registered products or higher) or Alt I for purchasing EPEAT silver rated products or higher; For more information about the standards: http://www.epeat.net	Applicable

Water-efficient products	FAR 11.002(d); E.O. 13514 Section 2	Applicable
Non-ozone-depleting substances (e.g., refrigeration, foam blowing agents, sterilants, aerosols, adhesives, etc.)	FAR 11.002(d); E.O. 13514 www.epa.gov/ozone/snap/lists/index.html	Applicable
Non or low toxic or hazardous constituents	FAR 11.002(d), FAR 52.223-17	Applicable
Printed or Copied Double Sided on Recycled Paper (All deliverables shall be submitted electronically to the Government, no paper copies necessary)	FAR 4.303, FAR 11.303, FAR 52.204-4	Applicable
Pollution Prevention	FAR 23.1005, FAR 52.223-5 (Alt I or Alt II as applicable).	Applicable if work is being performed on a Government facility.

H.23.2 WARRANTY SERVICES

The standard commercial warranties shall apply per the terms and conditions of the task order.

OCONUS Sections

H.24 SYNCHRONIZED PREDEPLOYMENT AND OPERATIONAL TRACKER (SPOT)

The SPOT system is used to generate Letters of Authorization (LOAs) which define specific U.S. Government services and support that all contractor personnel are authorized to receive in a deployment area or Temporary Duty (TDY) location. Contractor personnel must have a SPOT generated LOA signed by the AFLCMC/WVV COR in order to process through a deployment center or to travel to, from, or within the designated operational area when applicable. The contractor shall process LOAs in SPOT as applicable for contractor personnel deploying under the TO or traveling to designated TDY locations and provide the additional documentation required with each LOA. The contractor shall fully execute all SPOT requirements. The AFLCMC/WVV COR is authorized to approve LOAs in SPOT on behalf of the AAS CO.

The contractor shall accurately maintain SPOT with up-to-date information for its personnel throughout the duration of the TO. Any changes to status of individual contractor personnel (e.g., arrival date, duty location, deployment closeout) shall be annotated within the SPOT database in accordance with SPOT business rules.

H.25 STATUS OF FORCES AGREEMENTS (SOFA)

A SOFA defines the legal status of DoD personnel, activities, and property in the territory of another nation and sets forth rights and responsibilities between the U.S. and the host government. The contractor shall comply with the individual country SOFAs, Supplementary and Shell Agreements, and other applicable documents and regulations.

Invited Contractor (IC) and Technical Representative (TR) status shall be governed by the SOFAs negotiated and implemented by DoS and DoD. The contractor shall coordinate with the U.S. Government to satisfy all requirements mandated by the governing regulations for the specified country or theater. The contractor shall be responsible for determining what requirements are applicable. It is agreed that the withdrawal of IC or TR status, or the withdrawal of or failure to provide any of the privileges associated therewith by the U.S., shall not constitute grounds for excusable delay by the contractor in the performance of the TO and will not justify or excuse the contractor defaulting in the performance of this TO. Furthermore, withdrawal of SOFA status for any reason shall not serve as a basis for the contractor filing any claims against the U.S.

The contractor shall notify the AFLCMC/WVV COR within 24 hours when an individual's status under SOFA must be terminated for any reason. This includes all subcontractors, consultants, and other personnel supporting the contractor. The contractor shall ensure that all personnel, including subcontractors, are legally able to work in each identified place of performance. In countries where SOFA or other similar statuses apply, the contractor shall not employ personnel without the requisite status under this TO unless the request has been coordinated with the AFLCMC/WVV COR and approved by the AAS CO.

The contractor is responsible for ensuring it understands the procedures, regulations, and guidance applicable to each place of performance under this TO. The U.S. Government will not reimburse the contractor for any costs associated with failing to follow applicable procedures, regulations, and guidance that apply to obtaining visas, permits, or legal status. The U.S. Government will not become a party to any contractor residence or tax issues.

H.25.1 NORTH ATLANTIC TREATY ORGANIZATION (NATO) STATUS OF FORCES AGREEMENTS (SOFA)

There is one SOFA for NATO nations and the terms of that SOFA apply to all NATO allies and most Partnership for Peace nations. In Germany, the NATO SOFA has been supplemented by an additional international agreement, called the Supplementary Agreement (SA), signed by Germany and six “sending states” (U.S., United Kingdom (UK), Canada, France, Belgium, and the Netherlands). The SA further defines the rights and responsibilities of the sending and the receiving states. In Italy, the U.S. and Italy have signed the bilateral “Shell Agreement” of 1995, which serves to define the rights and responsibilities of the sending and the receiving states (the U.S. and Italy). Outside of NATO, the U.S. has entered into “stationing agreements” with the host country anywhere U.S. Forces are stationed.

H.25.1.1 GERMANY

The DoD Contractor Personnel Office (DOCPER) is responsible for implementing the Agreements of March 27, 1998, and the Agreements of June 29, 2001, signed by the U.S. Embassy and German Foreign Ministry, establishing bilateral implementation of Articles 72 and 73 of the SA to the NATO SOFA. These two Articles govern the use in Germany of DoD contractor employees as Technical Experts (TEs), Troop Care (TC) providers, and Analytical Support (AS) contractor personnel. Because this TO proposes to employ TE and AS personnel in Germany, the TO itself and the applications of individuals seeking TE/TC/AS status under the TO are required to be submitted through DOCPER for approval before performance under the TO can commence in Germany.

The contractor shall comply with Army in Europe (AE) Regulation 715-9 (Contractor Personnel in Germany – Technical Expert, Troop Care, and Analytical Support Personnel); AE Regulation 600-700 (Identification Cards and Individual Logistics Support); and with all guidance provided by the U.S. Government, including, but not limited to, DOCPER.

DOCPER is responsible for receiving, evaluating, and approving contractor employment applications before providing those applications to the German government for final approval. Contractor personnel who receive a Technical Expert Status Accreditation (TESA) or Analytical Support Status Accreditation (ASSA) will be permitted to work in Germany under the terms and conditions of the SOFA and applicable AE regulations. Contractor personnel who have approved status under either Article 72 or 73 of the SA to the NATO SOFA will be eligible for Individual Logistic Support (ILS) in accordance with AE Regulation 600-700.

H.25.2.3 JAPAN STATUS OF FORCES (SOFA) PROVISION

IC and TR status shall be governed by the U.S. - Japan SOFA as implemented by United States Forces Japan (USFJ) Instruction 64-100. Contract personnel may be classified as members of the “civilian component” under Article I-(b) of the SOFA between Japan and the U.S. This classification may be available, upon application, to all of the contractor personnel who are U.S. citizens, who do not ordinarily reside in Japan, and whose presence is requested through a Letter of Authorization from the AAS CO, following the procedures in USFJ Instruction 64-100.

To be eligible for designation as a member of the civilian component under Article I(b) of the SOFA, a contractor employee must be of U.S. nationality, not ordinarily resident in Japan, whose presence in Japan must be at the official invitation of the U.S. Government and solely for official purposes in connection with the U.S. armed forces. The SPOT LOA is the official USFJ document recognized and accepted by the U.S. Government and Government of Japan (GOJ) as evidence of a contractor employee’s status as a member of the civilian component under Article I(b) of the SOFA. All contractor employees who are eligible to become members of the civilian component under Article I(b) must register in SPOT and possess a valid LOA issued by the AAS CO from the SPOT system.

H.26 INTERNATIONAL TRAFFIC IN ARMS REGULATIONS (ITAR)

The contractor and/or its subcontractors may be required to generate, or need access to, export controlled items. It is the responsibility of the contractor, as the exporter, to obtain the appropriate export license or exemption(s). The contractor shall comply with all U.S. laws, policies, and regulations applicable to the exchange of information with foreign nationals and foreign countries including, but not limited to, the ITAR, the Export Administration Regulations (EAR), Arms Export Control Act (AECA), International Emergency Economic Powers Act (IEEPA), Office of Foreign Assets Control (OFAC), Executive Orders (EOs), and policies of the requiring activity’s foreign disclosure office, in accomplishing the requirements. The contractor shall refer to DFARS 252.225-7048 for compliance. The contractor may be required to release, share, and/or exchange information with representatives of Five Eyes, NATO, and all countries/nation states within the following U.S. Department of Defense (DoD) combatant commands: U.S. Northern Command (NORTHCOM), U.S. European Command (EUCOM), and U.S. Indo-Pacific Command (INDOPACOM). INDOPACOM includes United States Forces Japan (USFJ) as a subordinate command under INDOPACOM.

[END OF OCONUS SECTION]
