Reviews: I have reviewed this justification and find it adequate to support other than full and open competition.

Program Manager:

Department of the Army
Justification for Exception to Fair Opportunity - Brand Name
Under Multiple Award Indefinite Delivery Contracts

1. Requiring Activity: Assistant Secretary of the Army (Acquisition, Logistics and Technology), Assistant Deputy for Acquisition and Systems Management (Data, Engineering and Software), 2530 Crystal Drive (Crystal City) Arlington, VA 22202.

2. Contracting Activity: Army Contracting Command-Aberdeen Proving Grounds, ATTN: Digital Capabilities Center of Excellence (DC3oE), 6472 Integrity Court, Building 4401, Aberdeen Proving Grounds MD 21005

3. Description of Action: Request is for a new estimated  Competitive Firm-Fixed Price Delivery Order for Exiger, 1Exiger Subscription brand name under Computer Hardware, Enterprise Software and Solutions (CHESS/Digital Market) with a period of performance from 9 March 2026 through 8 March 2027. Fiscal Year 2026 funding under Research, Development, Test, and Evaluation, Army (RDT&E) will be used.

4. Description of Supplies/Services:

1Exiger is a FedRAMP and IL4 accredited provider focused exclusively on supply chain risk management and third-party risk management for the Governments and commercial markets.

1Exiger transforms raw seed data, including BOMs, NSNs, part numbers, and technical data packages, into decision-ready intelligence through automated risk scoring, live event alerts, and configurable dashboards.

The 1Exiger subscription capabilities includes (but is not limited to):

- Data Ingestion
- Vendor Visibility to the Lowest Tiers
- Supply Chain Even Alerts
- Critical Raw Materials Identification
- Data Transformation, Visualization, and Reporting
- Alerting and Workflow Automation:
- Integration with WS360 Platform and Vantage

1Exiger's core functions include:

- Real-Time Alerts and Risk Monitoring – Exiger provides continuous monitoring

[REDACTED]

and configurable alerts tied to mission-relevant parts, suppliers, and programs. These real-time Indications & Warnings (I&W) empower Army stakeholders to detect adversarial threats, material disruptions, and supplier instability before they impact readiness.

- **Integrated, Multi-Domain Risk Intelligence** – Exiger fuses financial, cybersecurity, operational, and geopolitical risk data to deliver a comprehensive, cross-disciplinary view of supply chain threats. This supports data-centric fusion for AMP Fusion Cell operations and NCODE-aligned protection initiatives across PMOs.
- **Actionable Insights for Tactical and Strategic Decision-Making** – Exiger's AI-driven platform enables tailored, program-specific risk analysis, scalable from R&D through sustainment. Army PEOs and ASA(ALT) can prioritize investments, validate supplier integrity, and plan mitigation strategies using DoD-compliant metrics and portfolio-level visibility.
- **Lifecycle Alignment with Army Modernization Objectives** – Exiger's tools support AAF-aligned protection requirements and scale across the acquisition lifecycle—from source selection and SBOM vetting to long-term part surveillance and obsolescence risk. This alignment ensures modernization efforts remain secure, adaptive, and resilient.

The total estimated value for this procurement is [REDACTED] for a one year base period Firm-Fixed-Priced (FFP) delivery order under a multiple award Indefinite Delivery / Indefinite Quantity (IDIQ) contract for the procurement of Commercial Off-the-Shelf (COTS) brand name.

Estimated Quantity:

Product	Estimated QTY
Exiger - Due Diligence for risk & compliance (DDIQ)	800.00
Exiger - Supply Chain Explorer (SCE)	1.00
Exiger - Supply Chain Illumination	1.00
Exiger - SW-SCRM	600.00
Exiger - SCRM Manager	1920.00

5. Authority Cited: 10 United States (U.S.) Code 3406(c)(5) as implemented) by FAR 16.505(b)(2)(i)(B) and FAR 16.505(a)(4), "Only one awardee is capable of providing the supplies or services required at the level of quality required because the supplies or services ordered are unique or highly specialized".

[REDACTED]

6. Reason for Authority Cited:

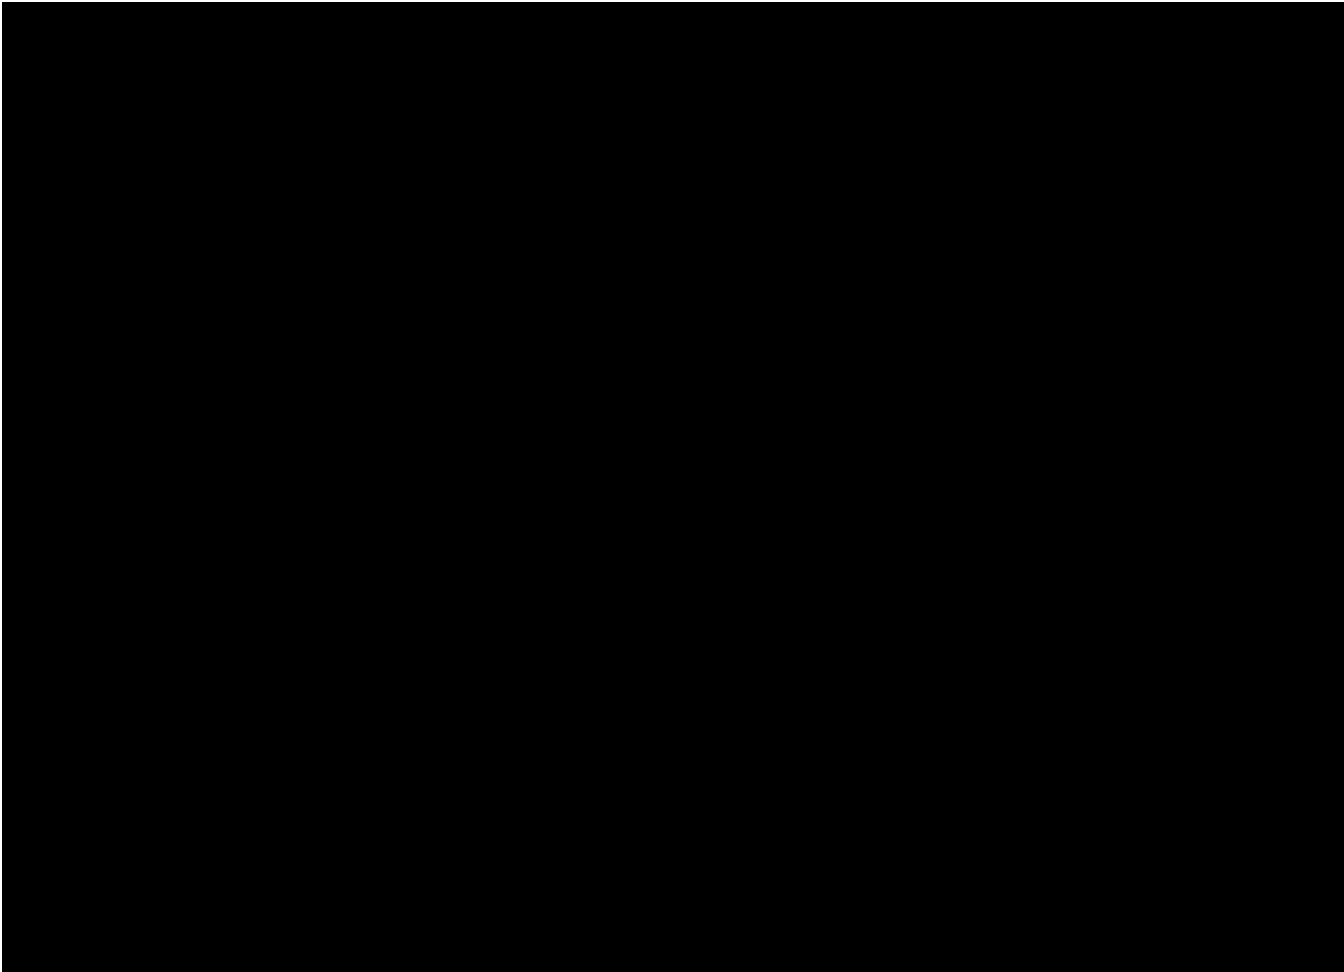

- a. **Background:** The proposed contractor, Exiger, possesses unique qualifications that necessitate the use of the exception to fair opportunity under FAR 16.505(b)(2)(i)(B), as only one awardee can provide the supplies or services required at the level of quality required because the supplies or services ordered are unique or highly

b.

7. Actions to Increase Competition: ASA(ALT) DES CSI will continuously conduct market research to identify the availability of alternative solutions.

8. Market Research:

Market research for all LOEs and commercial capabilities included capabilities demonstrated and included in SCRIPTS BPA (Supply Chain Risk Illumination Professional Tools and Services Blanket Purchase Agreements), in addition to technical application analysis, demos, and proofs of concept at the ASA(ALT) level that date back to October 2024, and additional Program Executive Office Program Protection analysis. Specific alternatives researched included [REDACTED]

[REDACTED] None of these providers were able to provide each of the unique capabilities of Exiger in the modular way and at the scale Exiger is able to provide. Most also had cost models that would make it impossible to provide sufficient coverage for ASA(ALT)'s portfolio of technologies and programs. Additionally, none had a robust SW components or SBOM analysis capability as mature as Exiger's that did not require time-intensive and un-scalable hands on hardware teardown analysis, which is often not possible to resource, or not in a timely and scalable way for the extensive Army portfolio which

[REDACTED]

undermines the enterprise -level triage and enablement of the PAEs, and rapid innovation adoption risk decisions required for the Army Acquisition Transformation, and ultimately the warfighter to succeed.

Market research included reviewing the available solution offered in the commercial marketplace from 30 June 2025 through 17 February 2026. This included online searches and receiving information from requiring activities and industry partners. Online searches provided evidence of the required software being available through Exiger's GSA SCRIPTS BPA, 47QTCA25A0002. (<https://www.gsa.gov/technology/it-contract-vehicles-and-purchasing-programs/multiple-award-schedule-it/scripts-bpas>)

In accordance with Army Regulation (AR) 25-1 and Army Federal Acquisition Regulations Supplement (AFARS) Part 5139, the Army's Computer Hardware, Enterprise Software and Solutions (CHESS) is the mandatory source for commercial information technology hardware and software purchases. An RFI, RFI #557068 was posted to CHESS and no responses were received.

10. Technical Certification: I certify that the supporting data under my cognizance which are included in the justification are accurate and complete to the best of my knowledge and belief.

[Redacted]

11. Requirements Certification: I certify that the supporting data under my cognizance which are included in the justification are accurate and complete to the best of my knowledge and belief.

[Redacted]

12. Fair and Reasonable Cost Determination: I hereby determine that the anticipated price to the Government for this contract action will be fair and reasonable. Competition is expected on this requirement in order to determine reasonableness. However, if reasonableness is unable to be determined by competition, a price analysis, comparison to Independent Government Cost Estimate, comparison to historical prices, and/or comparison to commercial prices may be done. Additionally, certified cost or pricing data will not be required in accordance with FAR 15.403-1(b)(3), as a commercial item is being acquired.
