Unlisted classifications needed for work not included in the scope of the classifications listed may be added only as provided in the labor standards contract (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classifications and wage rates that have been found to be prevailing for each type(s) of construction and geographic area covered by the determination. The classifications are listed in a

order under rate identifiers indicating whether the rate is a union rate (current union negotiated rate, a weighted union average rate, a state adopt supplemental classification rate.

Union Rate Identifiers

A four-letter identifier beginning with characters "SU", "UAVG", "SA", or "SC" denotes that a union prevailing for that classification in the survey. PLUM0198-005 07/01/2024. PLUM is an identifier of whose collectively bargained rate prevailed in the this classification, which in this example would be 0198 indicates the local union number or district number where applicable, i.e., Plumbers Local 0198 number, 005 in the example, is an internal number processing the wage determination. The date, 07/01 example, is the effective date of the most current rate.

Union prevailing wage rates are updated to reflect over time that are reported to WHD in the rates in the collective bargaining agreement (CBA) governing classification.

Union Average Rate Identifiers

The UAVG identifier indicates that no single rate those classifications, but that 100% of the data in the classifications reflected union rates. EXAMPLE UAVG-OH-0010 01/01/2024. UAVG indicates that the rate is a weighted union average rate. OH indicates the State. The next number, 0010 in the example, is an internal number used in producing the wage determination. The date in the example, indicates the date the wage determination was updated to reflect the most current union average

A UAVG rate will be updated once a year, usually to reflect a weighted average of the current rates in collective bargaining agreements on which the rate

Survey Rate Identifiers

The ""SU"" identifier indicates that either a single rate prevailed (as defined in 29 CFR 1.2) for this classification in the survey or that the rate was computed as a weighted average rate based on all the rates reported in the survey for that classification. As the average rate includes all rates reported in the survey, it includes both union and non-union rates. Example: S6/27/2024. SU indicates the rate is a single non-union prevailing rate or a weighted average of survey data for that classification. FL indicates the State of Florida. 2023 is the year of the survey on which these classifications are based. The next number, 007 in the example, is an internal number used in producing the wage determination. T6/27/2024 in the example, indicates the survey completion date for the classifications and rates under that identifier.

?SU? wage rates typically remain in effect until a new survey is conducted. However, the Wage and Hour Division has the discretion to update such rates under 29 CFR 1.6(c).

State Adopted Rate Identifiers

The ""SA"" identifier indicates that the classification prevailing wage rates set by a state (or local) government have been adopted under 29 C.F.R. 1.3(g)-(h). Example: SAME201/03/2024. SA reflects that the rates are state adopted. 01 refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 01/03/2024 in the example, reflects the date the classifications and rates under the ?SA? identifier took effect under state law in the state from which the rates were adopted.
