MEMORANDUM FOR USPFO for Washington, Attn: Purchasing and Contracting

SUBJECT Brand Name Justification for other than Full and Open Competition

1. Agency and Contracting Activity: USPFO for Washington, Purchasing and Contracting.

2. Control Number: FY26-JA-008

3. Nature and/or Description of Action:

This action is to procure one Model 8.0 Heavy Duty Tiger Tug. This equipment is required to move and reposition the unit's UH-72A/B aircraft fleet within the Army Aviation Support Facility. The unit's current aircraft tow bars are no longer contractually supported for maintenance or replacement, and the reserve stock of associated ground handling wheels is depleted and unreliable. This procurement is necessary to ensure the continued safe ground handling of UH-72 A/B aircraft and mitigate risks to personnel and equipment.

4. Description of Product:

Model 8.0 Heavy Duty Tiger Tug for LUH-72A/B / EC145. The tug is configured with a center notch in its top frame to provide clearance for the helicopter's MEPS (Mission Equipment Packages) system. Compared to the standard model, the Heavy Duty version incorporates a 36V system with a more powerful electric motor and transaxle, designed for high-frequency use and longer travel distances. It is a walk-behind, battery-powered unit that allows a single operator to safely maneuver aircraft while minimizing stress on the airframe.

Total Estimated Cost: \$36065.00

5. Statutory Authority Permitting Other than Full and Open Competition:

- ☒ FAR 6.302-1 Only One Responsive Source and No Other Supplies or Services will Satisfy Agency Requirements. Authority: 10 U.S.C. 2304(c)(1) or 41 U.S.C. 3304(a)(1).
- ☐ FAR 6.302-2 Unusual and Compelling Urgency. Authority: 10 U.S.C. 2304(c)(2) or 41 U.S.C. 3304(a)(2).
- ☐ FAR 6.302-3 Industrial Mobilization; Engineering, Developmental, or Research Capability; or Expert Services. Authority: 10 U.S.C. 2304(c)(3) or 41 U.S.C. 3304(a)(3).
- ☐ FAR 6.302-4 International Agreement. Authority: 10 U.S.C. 2304(c)(4) or 41 U.S.C. 3304(a)(4).

- ☐ FAR 6.302-5 Authorized or Required by Statute. Authority: 10 U.S.C. 2304(c)(5) or 41 U.S.C. 3304(a)(5).
- ☐ FAR 6.302-6 National Security. Authority: 10 U.S.C. 2304(c)(6) or 41 U.S.C. 3304(a)(6).
- ☐ FAR 6.302-7 Public Interest. Authority: 10 U.S.C. 2304(c)(7) or 41 U.S.C. 3304(a)(7).

Justification of Authority Cited:

The current method of moving aircraft using manually operated tow bars is no longer sustainable. The contractor (AHI) no longer supports the maintenance or replacement of these items, and the unit has no serviceable replacements. This creates an unacceptable risk to operational readiness. The Tiger Tug 8.0 is uniquely suited for this requirement as it is specifically designed and configured for the Army's UH-72A/B aircraft, including a custom notch for the MEPS system. Its specialized design prevents damage to the aircraft, a critical feature that generic tugs do not offer. Therefore, only this specific brand name product can satisfy the agency's minimum requirements.

6. Efforts to Promote Competition: Description of efforts made to ensure offers are solicited from as many potential sources as practicable.

Market research was conducted to identify solutions for moving the UH-72A/B aircraft. While other aircraft tugs exist, none are designed for the specific requirements of the UH-72A/B with the MEPS system. The Tiger Tug 8.0 is the only product identified that is manufactured for the express purpose of safely maneuvering this specific airframe. While multiple vendors may sell the item, TigerTugs is the sole manufacturer that can produce this configuration and reduce lead times for fielding.

a. Requirement to publicize the approved action:

This action will be publicized in accordance with all Federal regulations as prescribed by FAR 6.305, FAR 5.102 (a) (6) and FAR 13.106-1(b) in addition to any local Army Acquisition policy.

b. Actions to remove or overcome barriers before acquisition:

7. Market Research Conducted for Procurement and Interested Sources:

Market research confirmed the failure of the current solution (unsupported tow bars) and focused on finding a replacement that ensures safety and sustainability. A formal quote was obtained directly from the manufacturer, TigerTugs, which details the specific configuration required for Army Aviation Support Facility #2 and confirms its unique suitability. The features described in the attached quote make the Tiger Tug 8.0 the only responsible source to meet the units needs.

8. Interested Sources:

Name of Vendor: TigerTugs

Point of Contact: Scott Mills

Mailing Address: 2895 SW 13th St, Redmond, OR 97756

Telephone: (541) 585-4041

Email: Info@tigertugs.com

9. Other Facts Supporting the Justification:

Safety: The primary justification for this procurement is safety. Using the Tiger Tug 8.0 Heavy Duty eliminates the risks associated with failing manual tow bars, preventing potential injury to personnel and costly damage to multi-million dollar aircraft and is specifically designed for the UH-72 A/B.

Operational Readiness: The lack of serviceable tow bars presents a critical point of failure. The acquisition of a reliable tug ensures that aircraft can be moved as required for missions and maintenance, guaranteeing operational readiness.

Efficiency: The Tiger Tug allows a single operator to move an aircraft, whereas manual tow bars often require multiple personnel, freeing up soldiers for other critical tasks.

10. Program / Requester Certification: I, the undersigned, certify that this justification and any supporting information referenced or contained herein, that I have provided, or that I am responsible for, is accurate and complete to the best of my knowledge and belief.
