

Justification and Approval (J&A) for Other than Full and Open Competition
 Revolutionary Federal Acquisition Regulation (FAR) Overhaul (RFO) Parts 6 and 12
 Implemented by Class Deviation 2026-O0017, Revision 1

1. Identification of the Agency and Contracting Activity: Defense Health Agency (DHA), DHA Contracting Activity (DHACA), Healthcare Contracting Division (HCD) - South

2. Nature and/or Description of Action being Approved: We are requesting the approval of a one-year firm-fixed-price contract for the renewal of brand name software maintenance and support. This contract will cover the D-Scope Workstations, Servers, Electronic Health Records Integration Modules, and Digital Imaging and Communications in Medicine Integration Modules(DICOM) for the Otolaryngology (ENT) clinics at Wilford Hall Ambulatory Surgical Center and Brooke Army Medical Center.

3. Description of Supplies/Services and Estimated Value: This requirement is for the brand name procurement of software support services for sixteen (16) D-Scope Workstations, three (3) D-Scope servers, three (3) D-Scope EHR integration modules and three (3) D-Scope Digital Imaging and Communications in Medicine Integration modules.

VENDOR CATALOG NUMBER	ITEM DESCRIPTION	Quantity
WSSUP-1	1 Year extension of support services for a single D-Scope Workstation.	16
SERVUPSSUP-1	1 Year extension of support services for a single D-Scope Server	3
EHRSUP-1	1 Year extension of support services for a single D-Scope EHR Integration Module	3
DICOMSUP-1	1 Year extension of support services for a single D-Scope DICOM Integration Module	3

The proposed brand name is:

Medical Digital Developers LLC
 DBA D-Scope Systems
 270 North Avenue, Suite 810
 New Rochelle, NY 10801
 UEI: XVV1HL5S1ND5

Controlled by: Defense Health Agency (DHA)
 Controlled by: HCD-S
 CUI Category(ies): Source Selection
 Limited Dissemination Control: *FED Only*
 POC: *Jorge M. Canavati, 676-892-3929*

Period	Period of Performance or Required Delivery Date	Estimated Value	Type of Funding
Base Period	1 May 26 – 30 April 27	\$39,750.00	Operation and Maintenance
FAR 52.217-8	1 May 27 – 31 Oct 27	\$19,875.00	Operation and Maintenance
Total		\$59,625.00	

4. Statutory Authority Permitting Other Than Full and Open Competition: RFO 6.103-1
(b) one responsible source

5. Rationale Justifying Use of Authority Cited: D-Scope VIA is the essential imaging capture, storage, and collaboration system currently in use at JBSA-Lackland and Brooke Army Medical Center, operating across three servers and 16 endoscopy carts. A sole-source procurement from D-Scope Systems is justified as it is the only vendor that can provide the required support as the OEM. See Paragraph 8, below, for more information.

The D-Scope Integrated Video and Image Sharing System (IVSS) is a commercial off-the-shelf (COTS) product that functions as a network of digital medical devices, servers, and workstations for effective medical imaging management. Its hardware-agnostic application allows for HD-quality video and image recording, which automatically integrates with patient electronic medical record (DICOM) and PACS/VNA (HL7) systems. The platform also features a secure archive that facilitates remote and local file review and consultations with HIPAA-compliant authorization, automating the medical process from patient scheduling through discharge.

The system adheres to stringent security protocols, categorized as Confidentiality-Moderate, Integrity-High, and Availability-Moderate with a privacy overlay. A Privacy Impact Assessment (PIA) has been completed, and the system is federal information processing standards 40-2 validated for unclassified information. Sensitive data-at-rest is encrypted using Bitlocker with AES-128, while data-in-transit is protected by transport layer security configured to use 3DES encryption and a DoD-issued certificate.

In addition to its current use, the D-Scope VIA server is successfully deployed at other major facilities, including Wilford Hall, Carl R. Darnall Army Medical Center, Navy Medical Center, and Madigan Army Medical Center, enabling data synchronization and integration across the military health system. Switching software in an ENT clinic can significantly disrupt patient care, by cancelling or rescheduling appointments due to the lack of support. Any new software would have to be approved via the aforementioned means. A sole-source procurement is justified and in the government's best interest, as D-Scope is the exclusive provider of service for the software.

6. Efforts to Obtain Competition: In accordance with federal acquisition procedures, a notice of intent to award this contract on a sole-source basis was publicly posted to the Governmentwide Point of Entry (GPE), SAM.gov, on 24 February 2026 (see Attachment 2). The notice provided a 15-day response period, closing on 11 March 2026, to allow any interested parties to submit a statement of their capabilities. One response was received from Dream Catchers, LLC on 10 March 2026, whom merely provided a capabilities statement and confirmed that they could not support the maintenance of DSCOPE software and servers.

7. Actions to Increase Competition/Remove or Overcome any Barriers to Competition: In its effort to procure the most suitable software, the Government will continue to survey the market for software that meets its needs. The Defense Health Agency's Solution Delivery Division is working on an enterprise solution, which may allow for competition.

8. Market Research: Comprehensive market research was conducted from 5 March 2026 to 23 March 2026 in accordance with FAR Part 10 and DFARS 210.001. This research confirmed that D-Scope, the Original Equipment Manufacturer (OEM), and its GSA distributor, FOUR LLC, are the only sources capable of providing the required support services for D-Scope's proprietary software and servers. While orders may be placed with FOUR LLC through the GSA schedule, D-Scope is the sole entity that can service the software.

9. Other Facts:

a. Procurement History:

(1) Is this a new requirement? No

(2) If 9.a.(1) is No, was the action just prior to this one competed? No

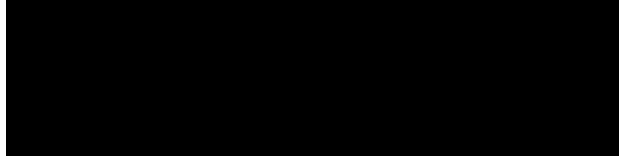

(3) If 9.a.(2) is Yes, what has changed where this action cannot be competed? Not applicable.

- b. Additional Information: This requirement was initially fulfilled by the IVISS enterprise system, which was under the purview of the Defense Health Agency's Solution Delivery Division. The corresponding contract, SPE2D120D0004, has expired and is no longer funded. As a replacement, the division is developing the EEVIS enterprise system to address the software requirements of the sites. In the interim, a brand name award to DSCope is required to maintain continuity of support.

10. Interested Sources: there has not been any interest in this requirement.

11. Technical Certification:

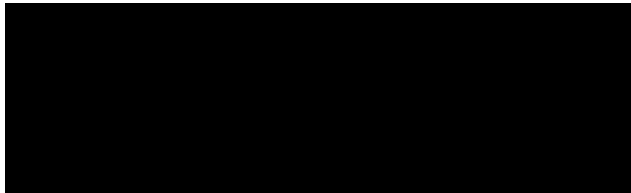

I certify the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

Mr. David Bourassa
Chief Technology Officer
59th Medical Wing

12. Requirements Certification:

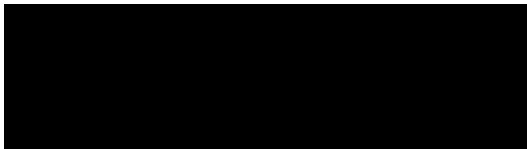

I certify the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

Mr. David Bourassa
Chief Technology Officer
59th Medical Wing

13. Legal Review:

I have reviewed this justification and have found it to be legally sufficient.

Mr. Frank Yoon
General Counsel
Office of General Counsel

14. Contracting Officer Determination of Fair and Reasonable Pricing and Certification of Accuracy and Completion.

Fair and Reasonable Cost Determination: I hereby determine the anticipated cost to the Government for this contract action will be fair and reasonable.

Basis for Determination: The price analysis techniques in FAR 15.404-1(b)(2) and (6) shall be used to determine the price fair and reasonable.

Contracting Officer Certification:

I certify this justification is accurate and complete to the best of my knowledge and belief.

COREY A. BLACK
Contracting Officer
Bravo Branch HCD-S
