The included signage schematic designs are based upon the newly released 2023 VA Signage Design Manual. The facility has requested that recent interior signage be used as the basis of aesthetic design. The VA interior signage standard has been adapted and added to where necessary to address the specific needs of VA West Palm Beach's needs.

PLANNING STRATEGY

The facility has recently deployed some room identity and wayfinding signage in various areas of the facility. Stakeholders have requested that this project use the recently deployed signage as the aesthetic benchmark for the new interior signage project. The communicated desire is to retain the recently deployed signage where practical. It has been observed that several of the recently deployed signs are installed at heights/positions that are not ADA-compliant and the VA would like to rectify these compliance issues as part of this project. To this end, the following strategies are proposed:

In spaces with older signs, the older signs will be specified for removal and new signs specified for deployment.

In spaces with newer signs, they will be evaluated for ADA-compliance and necessary corrective action will be specified as needed.

Existing facility directories will be specified for replacement with digital non-interactive directories.

Existing overhead directional signs will be specified for replacement as needed.

Newer wall-mounted eye-level directional signs will be evaluated for ADA-compliance and compatibility with the new signage design and necessary adjustments will be specified.

Stakeholders are encouraged to review this packet thoroughly and to provide any comments, concerns and thoughts to Wayfinding Associates.

1b - Personnel & Location(s)

Importance of a Thorough Review

A thorough review of the proposed signage is a very important responsibility for the client. It will provide the opportunity for the client to become familiar with the overall signage program and to identify any potential concerns that may translate into delays and/or costly corrections after fabrication and installation have occurred. The successful deployment of a sign program requires the involvement of numerous people processing a large amount of data, so the more involved the stakeholders are, the more accurate the final product will be.

The Basics

There are three main components that compose the signage plan documents:

- 1.The Sign Gallery which provides a convenient summary of all of the sign types included in the sign project.
- 2.The Sign Location Plan(s) which indicates the location of each sign.
- 3.The Message Schedule which indicates the content proposed for each sign as well as the hardware that is to be used for installation as well as the specific positioning for each sign.

Some projects may not have a sign message schedule.

The reviewer(s) will need to cross-reference these documents to check the content and locations of the signs.

Small Project Review

On smaller projects (less than 500 signs) it is strongly recommended that each sign be reviewed content, hardware and location.

Medium & Large Project Review

For larger projects (500 signs or greater) the reviewer may wish to identify critical areas and spaces that may be redundantly arranged and 'spot-check' those areas to determine is any adjustments are required. Where possible, have people most familiar with their space review the documents. Also, be sure to assign the review of signs in common spaces like hallways and lobbies to an individual or group.

Section 02

Fonts

Typeface Copyright Information
Typefaces are licensed by their creators and as such cannot be provided to project participants or the fabricator by Wayfinding Associates. Typefaces are commercially available for purchase and download from online font resellers like Fonts.com, MyFonts.com and others.

Helvetica Regular - 2010 ADA/ABA compliant tactile and visual text components

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 1234567890

Helvetica Bold - Emphasis text font (ADA/ABA visual compliant only)

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 1234567890

Helvetica Bold 77 Condensed - Overhead Sign Font (ADA/ABA visual compliant only)

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 1234567890

Helvetica Regular 57 Condensed - Gateway sign usage

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 1234567890

Symbols

Symbol Codes
Each symbol is assigned a code inside of brackets [], for example [parking] represents the parking symbol. These codes are included in the sign message schedule where the corresponding symbol is to be included on a sign. Selected sign vendor will be provided electronic artwork of symbols upon request.

Symbols with 'x' suffix vary in color, see corresponding sign type drawing for color specification.
Hairline outlines on outer boundary of symbols are to define shape only and are not to be included when produced on signs.

Mounts and Locations

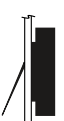

Mount hardware for each sign is specified in the message schedule“HARDWARE” column

 **A Pressure Sensitive Tape** - For smooth, hard surfaces. Not recommended for some vinyl wall coverings. Supplement with clear silicone on wall-covering or irregular surfaces. Sign not to exceed 100 square inches.

 **B Magnetic** - For steel surfaces. Sign not to exceed 100 square inches.

 **C Hook and Loop** - For fabric surfaces. Sign not to exceed 100 square inches.

 **D Screw** - For rough surfaces such as brick or drywall. Recommended for wall-mounted signs exceeding 100 square inches.

 **E Pin** - For fabric surfaces, including fabric on hard material and acoustic panels. Sign not to exceed 100 square inches.

 **F Hook** - For workstation panels. Clear bracket hooks over panel top; sign is suspended 2” down. *Specify panel manufacturer, model and thickness.*

 **G Freestanding Perpendicular** - For freestanding applications such as desks. Extruded aluminum bracket. Standard 2-sided sign sits perpendicular to work surface; maximum recommended sign height is 4”.

 **GL Freestanding Angle** - For freestanding applications such as desks. One-sided sign is mounted to “L” bracket at a 60° angle.

 **H Panel Top** - For top surface of furniture panel. Bracket is extruded aluminum affixed to panel top with pressure-sensitive tape. 8” maximum sign height.

 **i1.0 Suspended Ceiling** - For attaching to 1” ceiling grid. Connects with 2” extruded aluminum brackets. Sign should not exceed 1,440 square inches and 150 lbs.

 **i0.5 Suspended Ceiling** - For attaching to 1/2” ceiling grid. Connects with 2” extruded aluminum brackets. Sign should not exceed 1,440 square inches and 150 lbs.

 **J Cable Attachment** - Braided stainless steel cable for high or irregular ceilings. Attach cables to/around rafters, beams, duct work, piping, etc. Sign should not exceed 1,440 square inches and 150 lbs. Installer to determine and provide appropriate cable and fasteners.

 **K Perpendicular “Blade”** - For mounting 2-sided overhead “blade” signs to wall. Sign is mounted perpendicular to wall. Not available for signs wider than 15”.

 **L Glass** - For backside of glass windows, doors or walls. Clear acrylic bracket affixes to glass with clear pressure-sensitive tape.

 **M Ceiling Bracket** - For general-purpose ceiling mount applications. Extruded aluminum bracket affixes to ceiling with screws. Sign should not exceed 1,440 square inches and 150 lbs. Installer to determine and provide appropriate fasteners and anchors.

 **N Rigid Posts to Ceiling** - For general-purpose ceiling mount applications. Black 0.5” diameter aluminum rod suspends sign 6”, 12”, 18”, 24” from ceiling. Sign should not exceed 1,440 square inches and 150 lbs. Installer to determine and provide appropriate fasteners and anchors.

 **O Flexible Under-the-Top-Cap** - For workstation wall panels. Flexible black fabric device is held in place by panel top cap. Sign locates flush with panel top.

 **P Panel/Tile** - For workstation panels and tiles. Aluminum hook device hooks over the top of panel or tile and is concealed by panel top cap. Locates top of sign flush with top of panel. *Specify panel manufacturer, model and thickness.*

 **R Saddle** - For clear or frosted panels. Aluminum device hooks over panel top. Locates top of sign flush with panel top. Can be 1 or 2-sided. Maximum sign size is 4” high by 11” wide. *Specify panel thickness.*

 **S Round Surface** - For mounting to round/curved surface. Vertical brackets on each side of sign attach to curved surface. *Specify diameter of mounting surface.*

 **T Strap Bracket** - For mounting to existing poles. Sign panel mechanically fastened to steel bracket, bracket is secured to existing pole with adjustable metal straps.

 **U Fence** - For aluminum panels. Drill 4, 1/2” dia. holes. Installer to determine and provide appropriate mechanical fasteners

 **X Post(s) in Ground** - Post(s) in ground mount. Posts and concrete to extend to local frost-line. Fabricator to detail mounting in shop drawings.

Mount location for each sign is specified in the message schedule“LOCATION” column

Location 1

Identifier signs with tactile text

HORIZONTAL POSITION:

Where a tactile sign is provided at a door, the sign shall be located alongside the door at the latch side, 4.5” from edge of door.

Where a tactile sign is provided at double doors with one active leaf, the sign shall be located on the inactive leaf,

4.5” from edge of active door.

Where a tactile sign is provided at double doors with two active leaves, the sign shall be located on wall to the right of the right hand door,

4.5” from edge of door.

Where there is no wall space at the latch side of a single door or at the right side of double doors, signs shall be located on the nearest adjacent wall, 3” from corner (adjust as needed).

Signs containing tactile characters shall be located so that a clear floor space of 18 inches minimum by 18 inches minimum, centered on the tactile characters, is provided beyond the arc of any door swing between the closed position and 45 degree open position.

Signs with tactile characters shall be permitted on the push side of doors with closers and without hold-open devices._

Location 2

Wall signs with no tactile text

Mount as positioned on location plan, centered on surface where sensible or as noted in message schedule.

Location 3

Adjacent to corner

Mount 3” from inside or outside corner as shown on sign location plan. Adjust for obstacles as needed.

Location 4

Overhead wall mounted sign position

Mount as positioned on location plan, centered on surface where sensible.

Preferred height 84” above finished floor to bottom of sign (80” min.) adjust as needed._

Location 5

Side of hallway overhead sign position

Mount to ceiling 2” from wall.

Preferred height 84” above finished floor to bottom of sign, minimum 80” clearance required, adjust as needed._

Location 6

Center of hallway overhead sign position

Mount to ceiling centered on width of hallway at location specified on sign location plan.

Preferred height 84” above finished floor to bottom of sign, minimum 80” clearance required, adjust as needed._

Location 7

Non-standard sign position

Mount as described in notes column.

Location 8

Client-requested mount location

Mount centered on door frame above door

Purpose

The following drawings contain the information necessary for a fabricator to properly manufacture or update the signs in this project. Detailed information about size, colors, materials, processes are included.

How it Works

Each sign is assigned a unique 'Sign Type” designation which is referenced in the Sign Message Schedule.

Text and graphics are assigned 'Lines' which correspond to the 'Lines' in the 'Copy Line' column of the Sign Message Schedule (when included).

Text and graphics indicated in the Sign Message Schedule are to be deployed on the sign as specified on the sign type drawing.

The diagram illustrates the front and side views of a sign assembly. The front view (labeled '1 FRONT') shows a sign with a total height of 21 5/8" and a width of 17 3/4". It features a curved top section with a radius of R 41 3/8" and a width of 17". The sign is divided into eight horizontal lines (Line 1 to Line 8) and includes a wing icon, a right arrow, and text for 'Wings 1B 1C', 'Canteen / Retail', 'Imaging / Radiology', and 'Mental Health'. The side view (labeled '2 SIDE') shows the sign's profile with a height of 21 5/8" and a width of 17". It includes a wall mount bracket (A) and a spacer (i). Dimensions for the sign's components are provided, including 1/8" and 1/4" increments. The sign is mounted on a wall and includes a bottom trim (G) and a square corner screw mount end cap (F).

4 - Sign Message Schedule(s)	04
5 - Sign Location Plan(s)	05

Filtering

The message schedule in its electronic format has the ability to utilize Excel's filter utility for the purpose of displaying only the sign types that the viewer wants to see. Just click the dropdown arrow in the sign type header and select the sign type(s) that are to be displayed. Choose 'Select All' to show the full message schedule.

Tools for Pricing

The message schedule in its electronic format has the ability to aggregate all of the information in the message schedule into a matrix that quickly shows the quantity of each sign type and hardware so estimators can accurately quote the project. With the messages schedule open in Excel, select the 'Sign Counts' tab. Select the 'UPDATE' button on the top right of the spreadsheet to refresh the pivot table's information. Be advised that this functionality is provided for convenience only and it is the responsibility of each estimator to verify the information.

Copyright

The Sign Message Schedule has been created specifically for the project noted. The allowed usage of the Sign Message Schedule is limited to purposes related to the execution of the indicated project, solely. Any usage or copying of the Sign Message Schedule for other projects or purposes is prohibited.

The Basics

The message schedule is an important and powerful component in the sign specification process. It is created in Microsoft Excel 2010 and in its printed form indicates the following information:

- For interior signs it indicates the floor on which the sign is located.
- Assigns a reference number to each sign specified on the project.
- Indicates the specific sign type of each sign specified on the project.
- Identifies the mount hardware that is to be used to install each sign.
- Specifies a specific mount position for each sign.
- Includes notes related to each sign as needed.

Tools for Review

The message schedule in its electronic format has multiple tabs (pages) as follows:

- Project Contacts tab – List of contact information for project participants
- Sign Counts tab – A pivot table that summarizes the sign type quantities and hardware.
- Sign Message Schedule tab – Indicates sign number, type, content hardware and positioning and notes related to each sign.
- Sign Type tabs – Provides a drawing of each sign type. These can be seen by clicking on the sign type in the message schedule.

Changes to Sign Message Schedule Content

Changes to the Sign Message Schedule are to be performed only by Wayfinding Associates as certain adjustments may require other related updates elsewhere in the sign program. Additionally, Wayfinding Associates records all updates to the document to ensure that the fabricator uses only current documents to manufacture and install the signs.

Section 05

1a - Project Narrative 1b - Personnel & Location(s)	01
2 - Typefaces & Symbols Mounts and Locations Family of Signs	02
3 - Sign Specification Drawings	03
4 - Sign Message Schedule(s)	04
5 - Sign Location Plan(s)	05

Sign Location Plan(s)

General sign positions are indicated on plan. Single-faced signs are indicated by a capsule that indicates the type of sign and the sign reference number with a leader pointing to the surface on which the sign is to be mounted. Multi-face signs will have letters separated by a line within the capsule identifying the intended rotation of the sign in the environment.

Each sign project will have five sign categories and will have a unique color assigned to each, which is indicated on the sign location plan title block. The five categories include: Egress/Restroom, Wayfinding, Room Identity, Regulatory, and Notification.

When sign location plans are larger than 11" x 17", they will be provided separately from 11" x 17" documents.
