

JUSTIFICATION FOR AN EXCEPTION TO FAIR OPPORTUNITY

1. **Contracting Activity:** Department of Veterans Affairs (VA)
Office of Procurement, Acquisition, and Logistics
Technology Acquisition Center
23 Christopher Way
Eatontown, NJ 07724
2. **Description of Action:** The proposed action is for a Firm-Fixed-Price (FFP) Delivery Order issued under the National Aeronautics and Space Administration (NASA) Solutions for Enterprise-Wide Procurement (SEWP) V Government-Wide Acquisition Contract (GWAC) for Informatica software maintenance.
3. **Description of the Supplies or Services:** The Department of Veterans Affairs (VA), Office of Finance, Financial Services Center (FSC) has a requirement to procure brand name Informatica Premium Success Level Maintenance and Support. Informatica licenses are currently in use at VA FSC to extract, transfer, load, and data clean so VA can attain dependable numbers and reporting of Incurred but Not Reported data for the Office of Community Care (IBNR/OCC) and Office of Management (OM). Data sets are in disparate systems that need to be integrated. Informatica allows the FSC to provide OCC and OM information for budgeting, forecasting, and financial management to support the actuarial models that balance the Financial Management System (FMS). The software ensures matching payments adjudicated within the claims systems against the FMS General Ledger (GL) transactions. The Period of Performance is 12 months, with two twelve-month option periods. The total estimated value of the proposed action is [REDACTED]
4. **Statutory Authority:** Pursuant to Revolutionary Federal Acquisition Regulation (FAR) Overhaul (RFO) 16.507-7, the following brand name requirement is being justified and approved as an exception to fair opportunity under the statutory authority of Section 41 U.S.C. 4106(c)(2) as implemented by RFO 16.507(b)(2), entitled "Only one awardee is capable of providing the supplies or services required at the level of quality required because the supplies or services ordered are unique or highly specialized".
5. **Rationale Supporting Use of Authority Cited Above:** The current VA claims processing system for OCC and OM uses Informatica software. Due to the proprietary nature of that source code, no other vendor can provide patches and maintenance for the currently fielded software without access to the Informatica source code. Failure to acquire the maintenance subscription and support for this software would leave VA without the necessary updates, bug fixes, and certified technical support to ensure the software remains operational. VA does not possess the proprietary technical data required to maintain and upgrade the Informatica software in use at FSC. VA contacted Informatica in February 2026 to ascertain if this proprietary source code is for sale and was advised it is not. Therefore, only Informatica or its resellers can provide maintenance that is compatible with current

Informatica software installed and deployed. In addition, based on the proprietary nature of Informatica software, no other brand name software license would be able to integrate and communicate with the currently fielded software due to a lack of interoperability or compatibility with the currently fielded software. Due to these interoperability and compatibility issues, use of any other brand name software would result in a complete redesign and redevelopment of the existing infrastructure which would result in extensive delivery delays and duplicated costs that would not be recovered through competition.

6. Efforts to Obtain Competition: Market research was conducted, details of which are in Section 8 of this document. This effort did not yield any additional resources that could meet the Government's requirements. However, the undersigned VA technical representative determined that limited competition is available among authorized resellers for brand name Informatica. In accordance with RFO 16.507-6(f)(1) this justification will be made publicly available within 14 days of award.

7. Actions to Increase Competition: The Government will continue to conduct market research to ascertain if there are changes in the marketplace that would enable future actions to be competed.

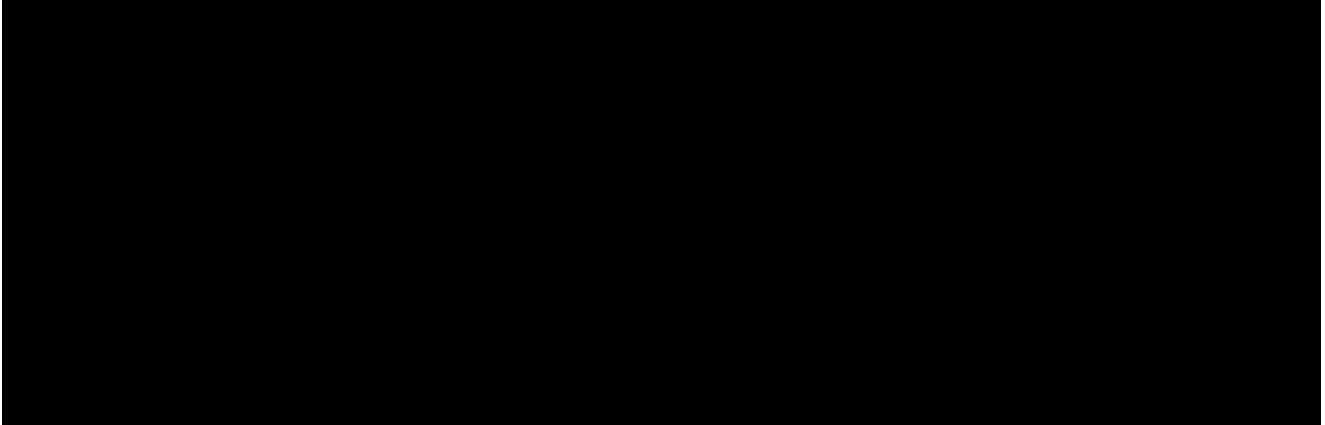

8. Market Research: Market research was conducted in January 2026 by the Government's technical experts to ascertain if other products could satisfy VA's requirements. Specifically, VA technical experts reviewed [REDACTED] and [REDACTED] brands and determined that neither product could seamlessly integrate into the existing VA applications. Although both of these brand names provide similar maintenance capabilities, they do not have access to the Informatica proprietary source code and therefore could not provide the required maintenance to sustain the existing Informatica software. As a result, it was determined that only Informatica or its authorized resellers can provide software maintenance for the Informatica software and meet all of VA's needs. FSC's technical experts concurred on February 2026 that the above information is still accurate.

NASA SEWP Manufacturer lookup indicated several SDVOSB Informatica authorized resellers in the marketplace.

9. Other Facts: N/A

Technical/Requirements Certification

I certify that the supporting data under my cognizance, which are included in this justification, are accurate and complete to the best of my knowledge and belief.

Fair and Reasonable Cost Determination

I hereby determine that the anticipated price to the Government for this contract action will be fair and reasonable based on competition and comparing to previous purchases.

Contracting Officer Certification/Approval

I certify that this justification is accurate and complete to the best of my knowledge and belief. This contract action exceeds the simplified acquisition threshold, but does not exceed \$900,000, therefore, the certification required by RFO 16.507-6(e)(1) serves as the Contracting Officer's approval.
