

JUSTIFICATION FOR SOLE SOURCE (\$15,000 TO \$350,000)

Reference: FAR 13.106-1(b)

The service or material listed on _____ is the sole source and competition must be restricted to one source, or only one brand name for reasons indicated below. There are no substitutes available for this material.

Restricted to the following source or brand name. Provide the original manufacturer's name.

Note: If a sole source manufacturer distributes via dealers, also provide dealer information.

Manufacturer Creaform Ametek

Manufacturer POC Name Zac Puffer

Phone Number 1.206.295.2534

Manufacturer Address 4700 rue de la Pascaline, Levis, QC, Canada

Manufacturer's Dealer/Rep. Zac Puffer

Phone Number 1.206.295.2534

Dealer/Rep.'s Address

1) Description of the item or service required

Faro Arm Quantum X.E 3.5m 6-axis, MFR CREAFORM USA INC. PN ARM-0070-6FE

2) Estimated cost

3) Required delivery date

Specific characteristics of the material or service that limit the availability to a sole source or particular brand name (unique features, function, of the item, etc.). Describe in detail **why** only this suggested source can furnish the requirements to the exclusion or other sources:

The Faro Arm is the single-point probe CMM of choice for the US Navy, already approved by USN installations and is recognized by the Navy MetCal program. PSNS has an engineer-approved training program per the Corporate Nuclear Power Manual PCMM and NSTEP to qualify users with this model and TRF 56A pipefitters are qualified under such approved program. This item is already in use at PSNS.

☒ ☐ The requested material or service represents the minimum requirements of the government.
Yes No

Check & Fill in all Applicable Blanks Below

☒ ☐ The material/service must be compatible in all aspects (form, fit, and function) with the existing systems presently installed. Describe the equipment you have **now** and **how** the new item/service must coordinate, connect, or interfere with the existing system:
Yes No We already acquired Spatial Analyzer (SA) as the primary CAD program to run the equipment. SA is also part of PSNS's training program. 56A employees are trained to use the Faro Arm only inside SA. This particular model is in the most current line of Faro products and has been determined suitable for 56A's applications.

☒ ☐ A patent, copyright, or proprietary data limits competition. The proprietary data is:
Yes No Existing Navy-approved training programs and controls are already in place for this equipment.

☒ ☐ These are "direct replacements" parts/components for existing brand name equipment.
Yes No

☒ ☐ Other information to support a sole-source buy:
Yes No The Faro Arm is service-proven. It is the go-to single point probe for PSNS pipe fitters, and was recently used at TRF by PSNS pipe fitters to verify bend data against a scan of an existing component from Yokosuka. Acquiring a Faro Arm for 56A provides more autonomy and flexibility while operating under existing Navy programs.

I certify that statements checked, and information provided about, are complete and correct to the best of my knowledge and do not contain classified information. I understand the processing of this sole-source justification precludes the use of full and open competition.
