NOTE 1: NEW/UNUSED, will be considered for procurement only if it meets the following requirements:

Other than NEW and UNUSED condition is not acceptable for procurement. The material is required to be in, original shipping container/package and marked with original pertinent data. Only new/unused material is acceptable due to configuration and the operating environment. Modification/inspection and extensive testing to ensure configuration and serviceability of surplus material will offset any cost savings. This item is used on the J85 series engine and once air borne, it is considered safety of flight. Misrepresentation of this statement by any vendor shall be cause for rejection and returned of the item at NO COST to the government.

Parts that are new/unused gov't/commercial surplus showing no sign of rust, corrosion or evidence of deterioration from age, improper packing or preservation nor evidence of disassembly or reconditioning in any manner are acceptable. Failure of this

part can cause unsafe and unreliable engine operation. The effects of reconditioning, modifying, and wear on these parts remaining life cannot adequately be determined. Therefore new/unused parts are the only acceptable surplus category.

5352.201-9101 OMBUDSMAN (JUN 2023)
(IAW DAFFARS 5301.9103)

(a) An ombudsman has been appointed to hear and facilitate the resolution of concerns from offerors, potential offerors, and others for this acquisition. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman does not affect the authority of the program manager, contracting officer, or source selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of protests or formal contract disputes. The ombudsman may refer the interested party to another official who can resolve the concern.

(b) Before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution. Consulting an ombudsman does not alter or postpone the timelines for any other processes (e.g., agency level bid protests, GAO bid protests, requests for debriefings, employee-employer actions, contests of OMB Circular A-76 competition performance decisions).

(c) The Competition Advocate (CA) at each contracting activity/office (as defined in DLAD 2.101) shall act as the ombudsman and attempt to resolve contractor complaints. DLA AVIATION/AOCA's CA/ombudsman can be reached at (405) 855-3552. Complaints which cannot be so resolved shall be forwarded to the HQ through J-72 for resolution by the DLA competition advocate. Each activity is responsible for developing procedures for executing the duties and responsibilities of its local ombudsman.

(d) The ombudsman has no authority to render a decision that binds the agency.

(e) Do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the contracting officer.

NOTICE ON THE USE OF THE SUPPLIER PERFORMANCE RISK SYSTEM
(MAR 2023)
(IAW DFARS 204.7604)

(a) *Definitions.* As used in this provision—

Item risk means the probability that a product, based on intended use, will introduce performance risk resulting in safety issues, mission degradation, or monetary loss.

Price risk means a measure of whether a proposed price for a product or service is consistent with historical prices paid for that item or service.

Supplier risk means the probability that an award may subject the procurement to the risk of unsuccessful performance or to supply chain risk (see Defense Federal Acquisition Regulation Supplement 239.7301).

(b) The Supplier Performance Risk System (SPRS), available at <https://piee.eb.mil/>, will be used in the evaluation of the Quoter or Offeror's performance. SPRS retrieves item, price, quality, delivery, and contractor information on contracts from Government reporting systems in order to develop risk assessments.

(c) The Contracting Officer will consider SPRS risk assessments during the evaluation of quotations or offers received in response to this solicitation as follows:

- (1) Item risk will be considered to determine whether the procurement represents a high performance risk to the Government.
- (2) Price risk will be considered in determining if a proposed price is consistent with historical prices paid for a product or a service or otherwise creates a risk to the Government.
- (3) Supplier risk, including but not limited to quality and delivery, will be considered to assess the risk of unsuccessful performance and supply chain risk.

(d) SPRS risk assessments are generated daily. Quoters or Offerors are able to access their risk assessments by following the access instructions in the SPRS user's guide available at <https://www.sprs.csd.disa.mil/reference.htm>. Quoters and Offerors are granted access to SPRS for their own risk assessment classifications only. SPRS reporting procedures and risk assessment methodology are detailed in the SPRS user's guide. The method to challenge a rating generated by SPRS is also provided in the user's guide. SPRS evaluation criteria are available at https://www.sprs.csd.disa.mil/pdf/SPRS_DataEvaluationCriteria.pdf.

(e) The Contracting Officer may consider any other available and relevant information when evaluating a quotation or an offer.

52.207-4

ECONOMIC PURCHASE QUANTITY--SUPPLIES (AUG 1987)
(IAW FAR 7.203)

(a) Offerors are invited to state an opinion on whether the quantity(ies) of supplies on which bids, proposals or quotes are requested in this solicitation is (are) economically advantageous to the Government.

(b) Each offeror who believes that acquisitions in different quantities would be more advantageous is invited to recommend an economic purchase quantity. If different quantities are recommended, a total and a unit price must be quoted for applicable items. An economic purchase quantity is that quantity at which a significant price break occurs. If there are significant price breaks at different quantity points, this information is desired as well.

OFFEROR RECOMMENDATIONS

<u>ITEM</u>	<u>QUANTITY</u>	<u>QUOTATION</u>	<u>PRICE TOTAL</u>

(c) The information requested in this provision is being solicited to avoid acquisitions in disadvantageous quantities and to assist the Government in developing a data base for future acquisitions of these items. However, the Government reserves the right to amend or cancel the solicitation and re-solicit with respect to any individual item in the event quotations received and the Government's requirements indicate that different quantities should be acquired.

SECTION M

EVALUATION FACTORS FOR AWARD USING BEST VALUE PROCESS, PERFORMANCE PRICE TRADEOFF (PPT) SOURCE SELECTION PROCEDURES

A. Basis for Contract Award

This acquisition will utilize the Best Value Process, Performance price Tradeoff source selection procedures in accordance with Federal Acquisition Regulation (FAR) Part 15.101-1, as supplemented, to make an assessment for a best value award decision. Tradeoffs will be made only between price and past performance among those offerors who have been determined technical acceptable. Award will be made to the offeror who is deemed responsible in accordance with FAR Part 15.101, as supplemented, whose quote conforms to the solicitation requirements and is judged, based on the evaluation factors, to represent the best value to the Government. The Government seeks to award to the offeror who gives the Defense Logistics Agency the greatest confidence that it will best meet the requirements affordably. This may result in an award to a higher rated, higher priced offeror, where the decision is consistent with the evaluation factors and the Source Selection Authority (SSA) reasonably determined that the technical acceptable offeror, superior past performance of the higher price offeror outweighs the cost difference. While the Government source selection evaluation team and the SSA will strive for maximum objectivity, the source selection process, by its nature, is subjective and, therefore, professional judgement is implicit throughout the entire process. The Government intends to award without discussions/reserves the right to award without discussions. Therefore, each initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if determined necessary by the Contracting Officer.

B. Number of Contracts to be Awarded

The Government intends to select one contractor for the program. However, the Government reserves the right to award no contract at all, depending on the quality of the quotes and prices submitted and the availability of funds.

C. Rejection of Unrealistic Offers

The Government may reject any quote that is evaluated to be unrealistic in terms of program commitments, including contract terms and conditions, or unrealistically high or low in cost/price when compared to Government estimates, such that the quote is deemed to reflect an inherent lack of competence or failure to comprehend the complexity and risks of the program.

D. Correction Potential of Quotes

The Government will consider, throughout the evaluation, the "correction potential" of any deficiency or quote inadequacy. The judgment of such "correction potential" is within the sole discretion of the Government. If an aspect of an offeror's quote not meeting the Government's requirements is not considered correctable, the offeror may be eliminated from the competitive range.

PRE-AWARD SURVEY

The Government may conduct a pre-award survey (PAS) as part of this source selection. Results of the PAS (if conducted) will be evaluated to determine each offeror's capability to meet the requirements of the solicitation.

PLANT VISITS

In the event discussions are necessary, plant visits may be conducted during the evaluation phase to develop knowledge for judging the potential for correction of the deficiencies.

SOLICITATION REQUIREMENTS, TERMS AND CONDITIONS

Offerors are required to meet all solicitation requirements; such as terms and conditions, representations and certifications, and technical requirements, in addition to those identified as factors, subfactors to be eligible for award. Any aspect of the quote judged to be unacceptable would render the entire quote unacceptable. Failure to comply with the terms and conditions of the solicitation may result in the offeror being removed from consideration for award. Any exceptions to the solicitation's terms and conditions must be fully explained and justified.

EVALUATION CRITERIA FOR AWARD

(IAW FAR 13.106-2(b), 14.201-5(c), and 15.204-5(c))

For the purposes of award, offers will be evaluated for acceptability of evaluation factors described below:

FACTOR 1: Technical

FACTOR 2: Cost/Price

FACTOR 3: Past Performance

Order of Importance

For this solicitation, technical acceptability is a prerequisite to the best value analysis and potential trade-off between Price and Past Performance. The Order of importance is used to explain how the other factors will be traded off on technically acceptable quotes.

For all technically acceptable quotes, Factor 2 (Cost/Price) will be evaluated on a basis approximately equal to Factor 3 (Past Performance). Tradeoffs may only be made between price and past performance among those offerors who have been determined technically acceptable.

b. Evaluation Methodology

All quotes will first be evaluated for technical acceptability. Second, price and past performance will be evaluated. A decision will then be made as to which quote provides the best value to the Government.

c. Technical Factor

Technical quotes are not required. Technical acceptability will be determined based on the offerors compliance with the requirement as stated in Section B Schedule and/or any referenced specifications, engineering notes and all other attachments herein.

The delivery schedule will be evaluated based on the dates established in Section B of the solicitation. It should be noted that the Government's required delivery is based on the Requirements' need date and may not be attainable. Therefore, if a quoted delivery does not meet the Government's required delivery, the quoted delivery may be considered responsive.

Acceptable – The quote meets specified minimum requirements necessary for acceptable contract performance.

Unacceptable – The quote fails to meet specified minimum requirements necessary for contract performance. Quotes with an unacceptable rating are not awardable.

d. Cost/Price Factor (IAW 5315.305(a)(1))

(1) The offeror's cost/price quote will be evaluated for award purposes by multiplying the quoted unit price by the total quantity. The quantity utilized for evaluation will be based on the firm quantity incorporated in Schedule B.

(2) Unrealistically low quoted costs or prices, initially or subsequently, may be grounds for eliminating a quote from competition either on the bases that the offeror does not understand the requirement or the offeror has made an unrealistic quote.

(3) Offerors are cautioned against submitting an offer that contains unbalanced pricing. Unbalanced pricing may increase performance risk and could result in payment or unreasonably high prices. Unbalanced pricing exists when, despite an

acceptable total evaluated price, the price of one or more contract line items is significantly over or understated as indicated by the application of cost or price analysis techniques. The Government shall analyze offers to determine whether they are unbalanced with respect to separately priced line items or subline items. Offers that are determined to be unbalanced may be rejected if the contracting officer determines that the lack of balance poses an unacceptable risk to the government.

(4) Cost/price quotes submitted by vendors shall be evaluated by multiplying the quoted unit price by the quantity desired by the Government to determine the contractor's total price.

(5) If incidental or miscellaneous expenses not related to specific CLIN structure accompany vendor quotes, these charges shall be added to the total CLIN cost/price to reach the final total cost/price quoted to the Government. In addition, 'Price Analysis' shall be conducted in accordance with FAR 15.404-1, to determine 'Reasonableness' on all offers submitted by vendors.

e. Past Performance Factor

The Past Performance Evaluation is accomplished by reviewing aspects of an offeror's (1) relevant past performance and (2) recent past performance, focusing on and targeting performance, which is relevant to the technical requirement. In determining relevance, consideration will be given to the likeliness and similarity of the effort to include contract scope, contract type, and contract schedule. This information may include data on parts manufactured by other divisions, critical subcontractors, or teaming contractors, if such resources significantly influence the quoted requirement. The Government may consider relevant work as those performed for agencies of the federal, state, or local governments and commercial customers. Where relevant performance record indicates performance problems, the Government will consider the number and severity of the problems and the appropriateness and effectiveness of any corrective actions taken (not just planned or promised). The Government may review more recent contracts or performance evaluations to ensure corrective actions have been implemented and to evaluate their effectiveness.

The Government will evaluate the offeror's past performance by reviewing the offeror's record of supplying products that comply with contract requirements, including cost and schedule. Under the Past Performance factor, a Performance Confidence Assessment Rating represents the evaluation of an offeror's present and past work record to assess the Government's confidence in the offeror's probability of successfully performing as quoted. The offeror is not required to provide Past Performance information. Past performance information will be determined primarily based on the offeror's "Supplier Risk Score" in the Supplier Performance Risk System (SPRS) at the time of the close of the solicitation period. Past performance may also be obtained through the contractor Performance Assessment Reporting System (CPARS), similarly systems of other Government departments and agencies (MOCAS, etc.), questionnaires tailored to the circumstances of this acquisition, Defense Contract Management Agency (DCMA) channels, interviews with program managers and contracting officers, and other sources known to the Government, including commercial sources.

Each offeror will receive an integrated Performance Confidence Assessment rating, which is the rating for the Past Performance factor. Although the past performance evaluation focuses on performance that is recent and relevant to the technical requirement, the resulting Performance Confidence Assessment is made at the factor level and represents an overall evaluation of contractor performance. The Past Performance factor will receive one of the following performance confidence assessment ratings IAW the Department of Defense (DoD) Source Selection Procedures.

Rating	Description
SATISFACTORY CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort.
NEUTRAL CONFIDENCE	No recent/relevant performance record is available or the offeror's performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The offeror may not be evaluated favorably or unfavorably on the factor of past performance.
LIMITED CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has a low expectation that the offeror will successfully perform the required effort.
NO CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has no expectation that the offeror will be able to successfully perform the required effort.

Note: With regards to the best value award decision, all offerors receiving the same past performance rating will be considered equal for the Past Performance Factor.

Offerors without a record of relevant past performance or for whom information on past performance is not available will not be evaluated favorably or unfavorably on past performance and, as a result, will receive a "Neutral confidence" rating for the Past Performance factor. In the context of acceptability/unacceptability, a neutral rating shall be considered "acceptable."

Offerors with adverse past performance information to which they have not previously had an opportunity to respond will be given the opportunity to provide clarifications concerning the adverse information.

E. Discussions

It is the Government's intent to award without discussions, therefore, it is imperative that offeror's submit their best terms initially. However, if during the evaluation period, it is determined to be in the best interest of the Government to hold discussions, offeror responses to Evaluation Notices (ENs), and the Final Quote Revisions (FPRs) will be considered in making the source selection decision.
