

DEPARTMENT OF VETERANS AFFAIRS

**SOLE SOURCE JUSTIFICATION UNDER SIMPLIFIED PROCEDURES FOR CERTAIN COMMERCIAL
ITEMS IN ACCORDANCE WITH REVOLUTIONARY FEDERAL ACQUISITION REGULATIONS
OVERHAUL (RFO) 12.102(b)**

Acquisition Plan Action ID: 36C244-26-AP-1162

1. **Contracting Activity:** Department of Veterans Affairs, NCO 4, H.J. Heinz III VA Medical Center, located at 1010 Delafield Road, Pittsburgh, PA 15240-1005 on behalf of VISN 4, VA Pittsburgh Healthcare System, University Drive C, Pittsburgh, PA 15240-1000

646-26-1-633-0008

Total Dollar Value: [REDACTED]

2. **Nature and/or Description of the Action Being Processed:**

This action is establishing the acquisition strategy to procure Stryker System 9 saws under Acquisition Plan 36C244-26-AP-1162.

3. **Description of Supplies/Services Required to Meet the Agency's Needs:**

The VA Pittsburgh Healthcare System (VAPHS) has a new Brand Name Only requirement for thirteen (13) each of Stryker System 9 Sagittal and Reciprocating Saw, along with components, for Surgical Services. The Stryker System 9 is the current system in use at Pittsburgh VAMC.

4. **Statutory Authority Permitting Restricted Competition:**

RFO 12.201-1 Simplified Procedures for Certain Commercial Items. The statutory authority for applying the Simplified Procedures for Commercial Items of RFO 12.201-1 is 41 U.S.C. § 1901 and is implemented by RFO 12.201-1 for restricting competition on this procurement. **Competition is restricted on this procurement for the reason below:**

(X) Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements **(Brand Name Only, Stryker)**

5. Demonstration that the Contractor's Unique Qualifications or Nature of the Acquisition Requires the Use of the Authority Cited Above (applicability of authority):

To maintain full compatibility with the existing surgical equipment, the Stryker brand name is required for this procurement. Procuring a different brand would be uneconomical and operationally disruptive, as the Pittsburgh VAMC currently utilizes a large number of Stryker System 9 units and has been engaged in an ongoing effort to replace legacy System 8 devices during FY 2022 and FY 2023. In FY 2025, the facility procured two replacement systems, and additional units are required this year to support increased clinical demand and to ensure Sterile Processing Service (SPS) turnaround times remain efficient. Standardizing on the Stryker platform ensures interoperability, minimizes training burden, and supports continuity of operations.

The Stryker System 9 is a highly specialized, integrated surgical power system designed to meet the demanding requirements of orthopedic, spine, and trauma procedures. Its advanced torque control, battery performance, ergonomic design, and compatibility with the facility's existing surgical instrumentation make it uniquely suited to the clinical needs of the Pittsburgh VAMC. Procuring a different manufacturer's system would result in substantial duplicative costs, as an alternative platform would require the purchase of new handpieces, attachments, sterile processing trays, chargers, and battery ecosystems that are not interoperable with the current Stryker inventory. In addition to the direct equipment expense, transitioning to a different system would impose significant indirect costs, including expanded SPS workflow requirements, new staff training, increased maintenance complexity, and the need to maintain parallel sets of sterilization cycles and replacement parts. These factors would collectively create operational inefficiencies and elevate the total cost of ownership well beyond that of continuing with the Stryker System 9 platform. Standardizing on Stryker therefore provides the most economical and operationally sound path forward, ensuring compatibility, minimizing risk, and supporting continuity of surgical operations.

6. Description of Efforts Made to ensure that offers are solicited from as many potential sources as deemed practicable:

There are no alternative products available that would satisfy the Government requirement. The Contracting Specialist contacted the Original Equipment Manufacturer (OEM, Stryker) requesting a list of authorized distributors of Stryker products to ensure as many potential sources are recorded. The potential sources are the OEM (large business) and two Service Disabled Veteran Owned Small Businesses (SDVOSBs). This information directly aligns with other surgical power tool purchases.

7. Determination by the CO that the Anticipated Cost to the Government will be Fair and Reasonable:

The CO anticipates a Fair and Reasonable cost based on price analysis conducted with vendor competition, comparison of pricing with historical purchases and the IGCE, and technical evaluation by subject matter experts.

8. Description of the Market Research Conducted and the Results, or a Statement of the Reasons Market Research Was Not Conducted:

The assigned contract specialist recently awarded two similar purchases for VISN 4. During the acquisition planning phases, no other comparable system was discovered during market research. While the VA Rule of Two is met by the OEM confirming two SDVOSB sources of supply, the Non-Manufacturer Rule decision tool directs contracting teams to issue the solicitation as unrestricted. <https://search.certifications.sba.gov/> was used to certify OEM authorized Service-Disabled Veteran-Owned Small Business.

Regarding the Buy American/Trade Agreements Acts, the Original Equipment Manufacturer confirmed the device and the majority of its accessories are manufactured in the United States.

As described in Section 6 above, market research, in accordance with FAR Part 10, was conducted by synopsis of the proposed acquisition, advising industry of the pending acquisition and soliciting inquiries from interested parties.

9. Any Other Facts Supporting the Use of Other than Full and Open Competition: None.

10. Listing of Sources that Expressed, in Writing, an Interest in the Acquisition:

- a. Stryker (OEM), Large Business, 1901 Romence Road Pkwy, Portage, MI 49002
- b. Trillamed LLC, SDVOSB distributor, 20300 W. 12 Mile, Suite 103, Southfield, MI 48076
- c. Beacon Point Associates, SDVOSB distributor, 1216 SW 4th Street, Suite 4, Cape Coral, FL 33991

11. A Statement of the Actions, if any, the Agency May Take to Remove or Overcome any Barriers to Competition before Making subsequent acquisitions for the supplies or services required:

The nature of this brand-name request limits available sources to those previously identified. The USG may consider competing Stryker brand name requirements as full and open to include the OEM, however this approach would negatively impact the SDVOSB distributors with advantageous pricing without small business additional costs. In the future, the acquisition team will conduct additional market research to determine if barriers to competition can be lowered and/or if alternate products can fulfill the Government's requirements.

VHAPG Part 813.5 Simplified Acquisition Procedures for Certain Commercial Items
Attachment 1: Request for Sole Source Justification Template >SAT-SAP under RFO 12

12. **Requirements Certification:** I certify that the requirement outlined in this justification is a Bona Fide Need of the Department of Veterans Affairs and that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

Acquisition Utilization Specialist
Pittsburgh VA Healthcare System

3/9/2026

Date

13. **Approvals in accordance with the [VHAPM Part 806.3 OFOC SOP](#):**

- a. **Contracting Officer or Designee's Certification (required):** I certify that the foregoing justification is accurate and complete to the best of my knowledge and belief.
