ADDENDUM TO CLAUSE 52.212-4

5352.201-9101 **OMBUDSMAN** (JUN 2023)
(IAW DAFFARS 5301.9103)

(a) An ombudsman has been appointed to hear and facilitate the resolution of concerns from offerors, potential offerors, and others for this acquisition. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman does not affect the authority of the program manager, contracting officer, or source selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of protests or formal contract disputes. The ombudsman may refer the interested party to another official who can resolve the concern.

(b) Before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution. Consulting an ombudsman does not alter or postpone the timelines for any other processes (e.g., agency level bid protests, GAO bid protests, requests for debriefings, employee-employer actions, contests of OMB Circular A-76 competition performance decisions).

(c) The Competition Advocate (CA) at each contracting activity/office (as defined in DLAD 2.101) shall act as the ombudsman and attempt to resolve contractor complaints. DLA AVIATION – AOCA's CA/ombudsman can be reached at 385-591-1672, facsimile (405) 734-8129. Complaints which cannot be so resolved shall be forwarded to the HQ through J-72 for resolution by the DLA competition advocate. Each activity is responsible for developing procedures for executing the duties and responsibilities of its local ombudsman.

(d) The ombudsman has no authority to render a decision that binds the agency.

(e) Do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the contracting officer.

(a) At the conclusion of all applicable closeout requirements of Federal Acquisition Regulation 4.804, the Government and Contractor shall mutually agree on the residual dollar amount remaining on the contract. Both the Government and Contractor agree to waive payment of any residual dollar amount of \$1,000 or less to which either party may be entitled at the time of contract closeout.

52.209-1 **QUALIFICATION REQUIREMENTS** (FEB 1995)
(IAW FAR 9.206-2)

(a) *Definition:* "Qualification Requirement," as used in this clause, means a Government requirement for testing or other quality assurance demonstration that must be completed before award.

(b) One or more qualification requirements apply to the supplies or services covered by this contract. For those supplies or services requiring qualification, whether the covered product or service is an end item, the product, manufacturer, or source must have demonstrated that it meets the standards prescribed for qualification before award of this contract. The product, manufacturer, or source must be qualified at the time of award whether or not the name of the product, manufacturer, or source is actually included on a qualified products list, qualified manufacturers list, or qualified bidders list. Offerors should contact the agency activity designated below to obtain all requirements

that they or their products or services, or their subcontractors or their products or services, must satisfy to become qualified and to arrange for an opportunity to demonstrate their abilities to meet the standards specified for qualification.

Item No	Agency Name/Address
0001	
0002	
0003	
0004	
0005	

(c) If an offeror, manufacturer, source, product or service covered by a qualification requirement has already met the standards specified, the relevant information noted below should be provided.

Offeror's Name _____

Manufacturer's Name _____

Source's Name _____

Item Name _____

Service Identification _____

Test Number _____ (to the extent known)

(d) Even though a product or service subject to a qualification requirement is not itself an end item under this contract, the product, manufacturer, or source must nevertheless be qualified at the time of award of this contract. This is necessary whether the Contractor or a subcontractor will ultimately provide the product or service in question. If, after award, the Contracting Officer discovers that an applicable qualification requirement was not in fact met at the time of award, the Contracting Officer may either terminate this contract for default or allow performance to continue if adequate consideration is offered and the action is determined to be otherwise in the Government's best interests.

(e) If an offeror, manufacturer, source, product, or service has met the qualification requirement but is not yet on a qualified products list, qualified manufacturers list, or qualified bidders list, the offeror must submit evidence of qualification prior to award of this contract. Unless determined to be in the Government's interest, award of this contract shall not be delayed to permit an offeror to submit evidence of qualification.

(f) Any change in location or ownership of the plant where a previously qualified product or service was manufactured or performed requires reevaluation of the qualification. Similarly, any change in location or ownership of a previously qualified manufacturer or source requires reevaluation of the qualification. The reevaluation must be accomplished before the date of award.

252.204-7024 **NOTICE ON THE USE OF THE SUPPLIER PERFORMANCE RISK SYSTEM**
(MAR 2023)
(IAW DFARS 204.7604)

(a) *Definitions.* As used in this provision—

Item risk means the probability that a product, based on intended use, will introduce performance risk resulting in safety issues, mission degradation, or monetary loss.

Price risk means a measure of whether a proposed price for a product or service is consistent with historical prices paid for that item or service.

Supplier risk means the probability that an award may subject the procurement to the risk of unsuccessful performance or to supply chain risk (see Defense Federal Acquisition Regulation Supplement 239.7301).

(b) The Supplier Performance Risk System (SPRS), available at <https://piee.eb.mil/>, will be used in the evaluation of the Quoter or Offeror's performance. SPRS retrieves item, price, quality, delivery, and contractor information on contracts from Government reporting systems in order to develop risk assessments.

(c) The Contracting Officer will consider SPRS risk assessments during the evaluation of quotations or offers received in response to this solicitation as follows:

- (1) Item risk will be considered to determine whether the procurement represents a high performance risk to the Government.
- (2) Price risk will be considered in determining if a proposed price is consistent with historical prices paid for a product or a service or otherwise creates a risk to the Government.
- (3) Supplier risk, including but not limited to quality and delivery, will be considered to assess the risk of unsuccessful performance and supply chain risk.

(d) SPRS risk assessments are generated daily. Quoters or Offerors are able to access their risk assessments by following the access instructions in the SPRS user's guide available at <https://www.sprs.csd.disa.mil/reference.htm>. Quoters and Offerors are granted access to SPRS for their own risk assessment classifications only. SPRS reporting procedures and risk assessment methodology are detailed in the SPRS user's guide. The method to challenge a rating generated by SPRS is also provided in the user's guide. SPRS evaluation criteria are available at https://www.sprs.csd.disa.mil/pdf/SPRS_DataEvaluationCriteria.pdf.

(e) The Contracting Officer may consider any other available and relevant information when evaluating a quotation or an offer.

- (1) ☐ **Are**, ☐ **are not** presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;
- (2) ☐ **Have**, ☐ **have not**, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: Commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating criminal tax laws, or receiving stolen property;

- (4) ☐ **Have**, ☐ **have not**, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104–5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

- (A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.
- (B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

- (A) The taxpayer has received a statutory notice of deficiency, under I.R.C. section 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. section 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals Contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (C) The taxpayer has entered into an installment agreement pursuant to I.R.C. section 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.
- (D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. section 362 (the Bankruptcy Code).

(IAW DFARS 225.771-5)

52.229-11 TAXES ON CERTAIN FOREIGN PROCUREMENTS - NOTICE AND REPRESENTATION (JUN 2020)
(IAW FAR 29.402-3(a))

(a) *Definitions.* As used in this provision—

Foreign person means any person other than a United States person.

Specified Federal procurement payment means any payment made pursuant to a contract with a foreign contracting party that is for goods, manufactured or produced, or services provided in a foreign country that is not a party to an international procurement agreement with the United States. For purposes of the prior sentence, a foreign country does not include an outlying area.

United States person as defined in 26 U.S.C. 7701(a)(30) means—

- (1) A citizen or resident of the United States;
- (2) A domestic partnership;
- (3) A domestic corporation;
- (4) Any estate (other than a foreign estate, within the meaning of 26 U.S.C. 701(a)(31)); and
- (5) Any trust if—
 - (i) A court within the United States is able to exercise primary supervision over the administration of the trust; and
 - (ii) One or more United States persons have the authority to control all substantial decisions of the trust.

(b) Unless exempted, there is a 2 percent tax of the amount of a specified Federal procurement payment on any foreign person receiving such payment. See 26 U.S.C. 5000C and its implementing regulations at 26 CFR 1.5000C-1 through 1.5000C-7.

(c) Exemptions from withholding under this provision are described at 26 CFR 1.5000C-1(d)(5) through (7). The Offeror would claim an exemption from the withholding by using the Department of the Treasury Internal Revenue Service Form W- 14, Certificate of Foreign Contracting Party Receiving Federal Procurement Payments, available

via the internet at www.irs.gov/w14. Any exemption claimed and self-certified on the IRS Form W-14 is subject to audit by the IRS. Any disputes regarding the imposition and collection of the 26 U.S.C. 5000C tax are adjudicated by the IRS as the 26 U.S.C. 5000C tax is a tax matter, not a contract issue. The IRS Form W-14 is provided to the acquiring agency rather than to the IRS.

(d) For purposes of withholding under 26 U.S.C. 5000C, the Offeror represents that—

(1) It ☐ is ☐ is not a foreign person; and

(2) If the Offeror indicates “is” in paragraph (d)(1) of this provision, then the Offeror represents that—

I am claiming on the IRS Form W-14 ☐ a full exemption, or ☐ partial or no exemption
[Offeror shall select one] from the excise tax.

(e) If the Offeror represents it is a foreign person in paragraph (d)(1) of this provision, then—

(1) The clause at FAR 52.229-12, Tax on Certain Foreign Procurements, will be included in any resulting contract; and

(2) The Offeror shall submit with its offer the IRS Form W-14. If the IRS Form W-14 is not submitted with the offer, exemptions will not be applied to any resulting contract and the Government will withhold a full 2 percent of each payment.

(f) If the Offeror selects “is” in paragraph (d)(1) and “partial or no exemption” in paragraph (d)(2) of this provision, the Offeror will be subject to withholding in accordance with the clause at FAR 52.229-12, Tax on Certain Foreign Procurements, in any resulting contract.

(g) A taxpayer may, for a fee, seek advice from the Internal Revenue Service (IRS) as to the proper tax treatment of a transaction. This is called a private letter ruling. Also, the IRS may publish a revenue ruling, which is an official interpretation by the IRS of the Internal Revenue Code, related statutes, tax treaties, and regulations. A revenue ruling is the conclusion of the IRS on how the law is applied to a specific set of facts. For questions relating to the interpretation of the IRS regulations go to <https://www.irs.gov/help/tax-law-questions>.

1. APPLICATION

- 1.1. This MQR applies to CSI and CAI with an Acquisition Method Suffix Code (AMSC) of C, D, K, M, N, P, Q, R, S, V, and Z within the Propulsion Sustainment Division. This MQR does not apply to items with an AMSC of G, A, B, H, L, U, and Y.
- 1.2. This MQR establishes technical requirements, which Potential Sources (PS) must satisfy in order to obtain Engineering Support Activity (ESA) approval to manufacture propulsion items.

2. SCOPE

- 2.1. The PS must have a valid Company Profile on record with the ESA in order to gain source approval status. If one does not exist the PS must submit one. Company Profile requirements are described in section 7.
- 2.2. In order to gain source approval status, the PS must submit a SAR. The SAR requirements are described in section 8.
- 2.3. The Company Profile and SAR will be reviewed by the ESA and the PS will either be made an approved source, or denied source approval. See section 10.
- 2.4. Source approval status expires after 3 years for CSI, and 7 years for CAI. Sources that deliver parts on government contract, maintain source approval status. See section 11.
- 2.5. Approved sources shall submit a Source Resubstantiation Request (SRR) prior to expiration of the current approval period (recommended 60 days) in order to renew the approval status duration. See section 12.
- 2.6. Any time a change to the SAR documentation occurs, the approved source must submit a Process Change Request (PCR) for review by the ESA. See section 13.
- 2.7. The ESA may revoke the approval status of a PS at any time per FAR 9.207.

3. SUBMITTAL CONSIDERATION

- 3.1. The PS should consider submitting a SAR for evaluation after determining that the USAF is in need of the subject item. This can be done by considering the following:
 - 3.1.1. Has the United States Air Force (USAF) listed a requirement in the System for Award Management (SAM) at <https://beta.sam.gov> or DLA Bid Board System (DIBBS) at <https://www.dibbs.bsm.mil/>?

3.1.2. Has the procurement history for the item been researched and determined to be active?

3.1.3. Is the subject item listed in the Requirement Projection on the Web (RPOW)?

3.1.3.1. The RPOW can be found on the Strategic Alternative Sourcing Program Office (SASPO) website: www.tinker.af.mil/Home/429SCMSSASPO/.

3.1.3.2. The forecasts contained on the RPOW may or may not generate due to variability in customer demands and priorities. The forecast data is for planning purposes only and does not constitute an invitation for bid or request for proposal and is not a commitment by the government to purchase the described items.

3.2. Any questions regarding SAR submission or the RPOW should be directed to either the Air Force Small Business Office (SBO) or SASPO.

4. TECHNICAL DATA REQUEST

4.1. Requests related to any procurement announcement should be submitted to the announcing Contracting Officer.

4.2. If no procurement announcement exists, requests should be submitted to the Tinker Engineering Drawing Public Sales Office at the following address/email:

AFLCMC/LZPEF
Tinker Engineering Drawing Public Sales
3001 Staff Drive, Suite 1AB82A
Tinker AFB, OK 73145-3041
Phone: 405-736-4676
Email: OCALC.LGLDO.PUBLIC@US.AF.MIL

4.3. Requests should identify the specific drawing(s) and specification(s) being requested, along with the solicitation information (if a procurement announcement exists).

4.4. Requests should be made on company letterhead along with an approved DD Form 2345 or Export Control License.

5. FORMAT FOR ALL SUBMITTED DOCUMENTATION

- 5.1. All financial data must be redacted from submitted documentation.
- 5.2. Packages should be submitted on a Compact Disk-Recordable (CD-R), Digital Versatile Disc Recordable (DVD-R), or through an approved government file transfer system, in a .pdf file format.
 - 5.2.1. The package can be a single .pdf file with indexes linked to each element, or a series of files/folders for each element.
 - 5.2.2. If the PS is submitting Company Profile documents at the same time as a SAR package, the Company Profile documents should be provided in a separate .pdf file and/or in a separate and clearly identified folder.
 - 5.2.3. All documents should be scanned for viruses prior to submission.
 - 5.2.4. If the CD-R is encrypted or password protected, provide a point of contact that can give access to the documentation. Zip files cannot be encrypted.
- 5.3. Packages submitted on a Compact Disk-Rewritable (CD-RW), Digital Versatile Disc Rewritable (DVD-RW), or flash drive will not be accepted.
- 5.4. Company Profile and SAR packages must follow the order called out in Tables 1 and 2.
- 5.5. For all Company Profile and SAR submissions, a table of contents is expected.
- 5.6. Certain elements may not be required depending on the circumstances of the submittal. If an element is not applicable, the PS must provide a statement explaining why this is the case. Do not leave any element blank.

6. USE OF PROPRIETARY DATA

- 6.1. The PS is not to utilize intellectual property (IP) of any third parties without appropriate authorization of the IP owner. The PS is cautioned that no part of the government MQR is intended to endorse or encourage the improper use of IP developed by the Original Equipment Manufacturer (OEM) or any other third party.

7. COMPANY PROFILE

Note: Any PS seeking source approval must have a valid Company Profile on record with the ESA. Initial submission of a Company Profile should include all of the requirements listed in Table 1 and described in Elements 1-9. Company Profiles can be submitted at any time, standalone or in conjunction with a SAR. All information provided in the Company Profile may be kept by the ESA for use in future SAR reviews. A Company Profile is required for each unique CAGE code.

7.7. Element 7, QUALITY HISTORY

Note: Nonconformance is not necessarily perceived as an increase in risk when considering source approval. Identification of nonconformance can illustrate a successful quality assurance program.

- 7.7.1. Provide a PS quality history summary of Deficiency Reports (DR) experienced for the last 36 months including but not limited to: internal deficiencies, commercial deficiencies, FAA Service Bulletins, Maintenance Review Board (MRB) actions, Quality Deficiency Reports (QDR), Laboratory Quality Review Orders (LQRO), Offeror Report of Nonconformance (ORON), Supplier Reports of Nonconformance (SRON), Material Deficiency Reports (MDR), statistical reports of nonconformance and nonconforming material rejection reports. If the PS facilities have not experienced any quality deficiencies within the last 36 months, provide a document stating as such.
 - 7.7.1.1. If government source inspections were conducted, the Government Quality Assurance Representative will coordinate on the summary. Otherwise, an authorized binding company official (i.e. President, Facility General Manager, or Quality Assurance Manager) must coordinate on the summary.
 - 7.7.1.2. The summary will include the following data: part number, nomenclature, feature, deficiency, quantity, date, and corrective action.

- 7.7.2. Provide an example corrective action request and corrective action plan or resolution for an identified deficiency, if one exists.

Note: Elements 8 and 9 may be reviewed during the SAR, SRR, and PCR evaluation processes. If the PS claims the use of a SIP or STS in any of these requests, the referenced SIP or STS must be included in, or added to the Company Profile at that time.

7.8. Element 8, SIGNIFICANT INDUSTRIAL PROCESS (SIP) CERTIFICATIONS

- 7.8.1. Provide any SIP certifications possessed by the PS with a valid expiration date.

7.11.2. Company Profile amendments can be submitted per section 9.

7.11.3. If the PS is bought or sold by a third party the PS must submit a novation letter detailing the specifics of this change in company makeup/structure.

8. SOURCE APPROVAL REQUEST (SAR)

Note: Any PS seeking source approval must have a valid Company Profile on record with the ESA. If one does not exist, the PS cannot be awarded source approval. See section 7 for details.

8.1. SAR Categories Determination

8.1.1. CATEGORY I (Actual Item)

- 8.1.1.1. This category covers PS who manufacture the exact subject item, using OEM technical data, for the prime contractor, OEM, DOD, civil agency, foreign government, or the civil sector under Federal Aviation Administration (FAA).

8.1.2. CATEGORY II (Similar Item)

- 8.1.2.1. This category covers PS who have not previously manufactured the exact subject item, but have manufactured other items similar in material, coatings, design features, industrial processes, etc. for the prime contractor, OEM, DOD, civil agency, foreign government, or the civil sector under FAA. Multiple similar items may be used to demonstrate relevant experience. Similarity is not limited to aerospace applications.

Note: Category III (No Experience) and IV (Reverse Engineering) SARs as defined by the AFMCI 23-113 are not covered by this QR document. The ESA will direct sources when a need arises for reverse engineered components and will provide relevant requirements at that time. Category III and IV SARs submitted under this QR will not be evaluated.

8.2. A SAR consists of two (2) packages of information:

8.2.1. SUBJECT ITEM PACKAGE (Elements A-I)

- 8.2.1.1. Includes all of the required engineering data, proposed manufacturing plan, and other legal documents required to manufacture the subject item.

8.2.2. DEMONSTRATION PACKAGE (Elements J-M)

- 8.2.2.1. Demonstrates that the PS has recently manufactured and delivered either the subject item, or part(s) of similar complexity compared to the subject item.

- 8.2.2.1.1. For Category II SARs, if more than one similar item is required to demonstrate relevant experience, the PS must submit a demonstration package for each unique similar item.

8.3. ASSEMBLY SAR REQUIREMENTS

- 8.3.1. Any SAR package submitted for an assembly, module, or whole engine must meet all of the additional requirements called out in Appendix D. Submit the source of supply matrix in Element A along with the cover letter.

8.4. SAR WAIVERS

- 8.4.1. The ESA may decide to waive certain requirements in special circumstances. If the PS has a letter from the ESA waiving them of certain SAR requirements, provide this letter in place of said requirements.

8.7.1.2. Must include any and all proprietary production documents.

8.7.1.2.1. The process description may be redacted for proprietary processes.

8.7.1.3. Must establish traceability.

8.7.1.3.1. Proper traceability connects the work being performed to the facility, performing operator, specific part, and the date that the work is being performed.

8.7.1.3.2. An example of adequate traceability is the use of page numbers along with a unique document number that is present on each page. On the first page of the document, the date, company name, cage code is present, and the travelers have stamp blocks that allow the operator to indicate the work that is accomplished by the specific operator.

8.7.1.4. Any sub-vended process listed must identify the STS by name and CAGE at each applicable operational step with clearly identified process or procedure.

8.7.1.4.1. Any STS referenced in the production documents must be included in Element D, and the PS Company Profile.

8.7.2.2.3. Tracked disposition of all parts during the entire manufacturing operation to include rejects and laboratory samples.

8.7.2.2.4. References to specific IMS or POS in applicable steps.

Note: Travelers enclosed in this section are not to be considered a replacement for detailed Process Operation Sheets (POS). Lack of detailed POS pertaining to manufacture may be cause for disapproval of the PS's SAR.

8.7.3. PROCESS OPERATION SHEETS (POS)

8.7.3.1. POS are a detailed description of the process being performed.

8.7.3.2. POS should include an identification of the equipment/tooling used in the process, material handling procedures, set-up procedures, necessary safety precautions, any process specific drawings/graphics and a description of the in-process parameters used (i.e. speed and feed rates).

8.7.4. INSPECTION METHOD SHEETS (IMS)

8.7.4.1. IMS are a detailed step-by-step account of the proper sequenced procedures necessary to inspect the subject item.

8.7.4.2. Must include part number(s), exact dimensions and proper units.

8.7.4.3. Pass/Fail dimensions are not acceptable, except when using a part specific “go-no-go” gage. This type of gage must be included in Element F.

8.7.4.4. If a sampling plan is used, provide the sampling plan to be reviewed.

8.8. Element D, SUB-TIER SUPPLIER (STS) LIST

Note: All STS identified in this section must be included in the PS Company Profile, or the SAR will not be approved until the issue is resolved. If a new STS must be added to the PS Company Profile, submit a Company Profile amendment per sections 7.9 and 7.11 of this document.

If a new SIP certification must be added to the PS Company Profile, submit a Company Profile amendment per sections 7.8 and 7.11 of this document.

8.9.1. Provide a matrix (Appendix B) indicating the performing cage code (PS or STS) for any and all SIP performed during the manufacturing of the subject item.

8.10. Element F, CALIBRATED EQUIPMENT LIST

8.10.1. Provide a matrix listing all equipment/tooling requiring calibration to include: part number, serial number, location, and date of calibration and expiration for each item used in the manufacturing of the subject item.

8.10.1.1. This includes any “go-no-go” gages referenced in section 8.7.4.

8.11. Element G, TECHNICAL DATA RIGHTS CERTIFICATION STATEMENT

8.17.1.1. These documents must be from the same contract as the demonstration production documents provided in Element L.

8.17.1.2. Contracts must be with the Prime/OEM, DOD, foreign government, or other commercial customers.

8.17.1.3. These documents must be from a date within three (3) years for CSI, and seven (7) years for CAI, as evidenced by the latest shipping document provided. The threshold will be evaluated against the date that the SBO receives the SAR.

8.17.1.3.1. Highlight the date on all documents in this section.

8.17.1.4. All financial information must be removed, else the SAR may be returned.

8.17.1.5. If a contract was terminated, state the reason for the termination.

10. EVALUATION METHODS

10.1. The ESA will evaluate the submitted SAR package using the criteria specified within this requirements document.

10.1.1. If the ESA identifies any issues, missing data, or discrepancies during the evaluation of the submitted package, the ESA will provide the PS with a list of issues that need to be resolved.

10.1.1.1. The PS will be given a Data Submission Date (DSD) of 5 working days to provide the requested data. A longer DSD may be provided upon the PS request, if determined acceptable by the ESA.

10.1.1.1.1. If the DSD is met and the PS provides all missing/required data then the ESA will approve the package per section 10.1.2.

10.1.1.1.2. If the DSD is not met, or the PS cannot provide the required missing data, then the ESA will complete the evaluation and forward a disapproval letter with a list of issues that need to be resolved. The PS will be encouraged to resubmit the request once all identified issues have been resolved.

10.1.2. If the PS provides all of the specified data in the required format, the ESA will issue an approval letter with an expiration date in accordance with section 11 and update the approved source list accordingly.

10.2. All transactions required to evaluate the approval request will be documented. All necessary artifacts will be recorded and retained in an ESA designated information system.

10.3. The PS is responsible for retaining all disposition letters received from the government.

10.4. The ESA retains the right to request an on-site audit of the vendor's facility during Company Profile, SAR, SRR, or PCR evaluation, or at any time during the vendor's approval period.

11. APPROVAL DURATION

11.1. ESA source approval expiration is three (3) years for CSI and seven (7) years for CAI. The expiration date will be based off of the date printed on the ESA approval letter.

11.2. Prior to source approval expiration, the approved source must submit an SRR in accordance with section 12 in order to renew their approval status.

11.3. Sources that are delivering the subject item on a government contract maintain their approval status and do not require source resubstantiation until there is a lapse in delivery/contract award of greater than three (3) years for CSI and seven (7) years for CAI.

11.4. The ESA may decide to revoke source approval status at any time per FAR 9.207.

12. SOURCE RESUBSTANTIATION REQUEST (SRR)

Note: Only sources that are currently approved to manufacture the subject item (must have been approved through the USAF SAR process and be listed on the AFMC Form 761) may submit an SRR. Sources that are delivering the subject item on government contract maintain their approval status and do not require source resubstantiation until there is a lapse in delivery/contract award of greater than three (3) years for CSI and seven (7) years for CAI (this does not include sources who were awarded government contracts without going through the USAF SAR process).

12.1. The SRR provides an approved source the opportunity to renew the approval status of a previously approved SAR through the review of any and all changes to the contents of the referenced SAR since the time of approval.

12.2. Provide the SRR (Appendix G).

12.2.1. Describe any and all changes made to the contents of the referenced SAR package since the time of approval.

12.2.2. The original SAR approval letter should be attached to the SRR.

12.2.3. The SRR must be in the format provided in Appendix G and signed on company letterhead by an authorized binding company official (i.e. President, Owner, or Facility General Manager).

12.2.4. Any SAR element identified as “Updated” must be submitted for review.

12.2.4.1. All changes within the submitted documents should be highlighted.

12.3. For sources that previously delivered the subject item on a government contract, submit the quality history, any DRs, and the latest purchase orders and shipping documents from the referenced contract.

12.4. Upon review of the SRR, the ESA may request additional information and documentation for review.

12.5. If the changes are determined to be acceptable, the ESA will issue a new approval letter.

13. PROCESS CHANGE REQUEST (PCR)

13.1. The approved source is responsible for submitting a PCR any time a change to the contents of the Subject Item Package occurs.

13.1.1. This may include, but is not limited to: changes to the STS list, using different equipment/tooling, and/or changing the sequence of operations on the travelers.

13.1.2. Failure to provide a formal PCR when a significant change occurs could result in a revocation of the source’s approval status.

13.2. Provide the PCR (Appendix G) in accordance with section 12.2.

13.3. Upon review of the PCR, the ESA may request additional information and documentation for review.

13.4. If the changes are determined to be acceptable, the ESA will issue a new approval letter.

APPENDIX D: SOURCE OF SUPPLY MATRIX FOR MODULES/ASSEMBLIES

1. SAR package submissions for parts that are made up of multiple embedded items, such as modules or assemblies, must include a matrix (see table below) that describes the PS's method of procurement for all of the embedded items. Approved methods include:
 - 1.1. Organic – The PS is an approved source of supply or has submitted a SAR package for the embedded item. Provide the SAR approval letter or SAR control number.
 - 1.2. OEM – The PS will purchase the embedded item from the OEM. Provide the company name and CAGE code along with an offer letter, on company letterhead, stating that the parts are available for procurement to the PS.
 - 1.3. USAF Approved Source – The PS will purchase the embedded item from a SAR approved source (must be listed on the AFMC Form 761). Provide the company name and CAGE code along with an offer letter, on company letterhead, stating that the parts are available for procurement to the PS.
 - 1.4. Common Part – The embedded item is common and does not have any critical design elements requiring procurement from an approved source and is readily available.
2. The Assembly SAR does not qualify the PS to manufacture any of the embedded items. If the PS wishes to become an approved source of supply for any of the embedded items, a unique SAR package must be submitted for each embedded item.
3. Include the matrix in Element A of any SAR submitted for a Module/Assembly.

APPENDIX H: DEFINITIONS

AFMC Form 761 – The “Screening Analysis Worksheet” that lists all USAF approved sources of supply for a specific NSN. The document also lists the AMSC code for the NSN.

Company Profile – A collection of all quality assurance documentation, SIP certification, and STS network that fully describes the capability of the PS at the time of submittal. The Company Profile is reviewed during SAR review to ensure agreement with any STS and SIP certification called out in the SAR. All relevant certificates must not be expired in order to receive SAR approval.

Critical Application Item (CAI) – An item, part, assembly, installation, or production system that is essential to weapon system performance or operation, or the preservation of life or safety of operating personnel, as determined by the military services.

Critical Characteristic – Any feature throughout the life cycle of a Critical Item, such as dimension, tolerance, finish, material, or assembly, manufacture, manufacture or inspection process, operation, field maintenance, or depot overhaul requirement that if non-conforming, missing, or degraded may cause the failure or malfunction of the item.

Critical Safety Items (CSI) – An item, part, assembly, installation or production system with one or more critical characteristic that, if missing or not conforming to the design data or quality requirements, would result in an unsafe condition that could cause loss or serious damage to the end item or major items, loss of control, uncommanded engine shutdown, or serious injury or death to personnel. Unsafe conditions relate to hazard severity categories I and II of MIL-STD-882, System Safety Requirements. The determining factor in CSI is the consequence of failure, not the probability that the failure or consequence would occur.

Engineering Support Activity (ESA) – The Military Service organization assigned responsibility and authority to perform and approve engineering and quality assurance actions necessary to evolve detail design disclosures for systems, subsystems, equipment and components exhibiting attributes essential for products to meet specific military requirements. During the operational phase, it includes any engineering activity, the results of which would add to or alter the design of equipment in such a manner, or to such an extent, as to change its operational capabilities or its design attributes of performance, reliability, maintainability and parts interchangeability, or to render it capable of alternative or additional use. For the purpose of this QR, the ESA is synonymous with the Designated Air Force Single Manager for the Weapon System, Design Control Activity, the Cognizant Engineering Authority (CEA) and the USAF Propulsion Division Engineering Chief.

Inspection Method Sheets (IMS) – document used to describe the steps involved in executing an inspection or series of inspections to include tooling, gages, fixtures, dimensions and other parameters necessary to execute the required inspections(s). Sheets must be certified by an authorized representative empowered to comply with the inspection process.

Material – A general term referring to material at any stage in the manufacture/repair process.

National Aerospace & Defense Contractors Accreditation Program (NADCAP) – The accreditation program through which the Performance Review Institute (an independent, non-profit trade association affiliated with the Society of Automotive Engineers), accredits subcontractors and sub-tier suppliers to aerospace and defense industry consensus standards.

Original Equipment Manufacturer (OEM) –An individual, activity, or organization that performs the physical fabrication processes that produce the deliverable part or other items of supply for the prime contractor and performed the original development of the subject item or assembly. The OEM must produce the part in-house. The OEM may or may not be granted design responsibility by the prime contractor for preparation and technical currency of technical data.

Potential Source – Any potential offeror who wants to be considered as a source for a given part, but who has not yet been approved/disapproved. A source of this type would normally be required to meet prequalification requirements prior to contract award and may also be subjected to production inspection or surveillance if a contract is received.

Prime Contractor – A contractor having responsibility for design and/or delivery of a system, subsystem, or equipment such as aircraft, engines, ships, tanks, vehicles, guns and missiles, ground communications and electronics systems and test equipment.

Process Operation Sheets (POS) – documents used to describe the steps involved in executing an operation or series of operations to include tooling, machinery, dimensions, speeds, feed rates, coolants, cutters, tape numbers and other operating, process and/or set-up parameters necessary to execute the operation. Includes detailed shop sketches. At a minimum, significant processes in Appendix B shall be fully defined.

Repair – Necessary preparation, fault correction, disassembly, inspection, replacement of parts, adjustment, reassembly, calibration, or tests accomplished in restoring items to serviceable status.

Significant Industrial Process – A process which is capable of producing alterations in the material structure of a part which cannot normally be evaluated without destructive testing and which can compromise the mechanical properties and ultimately the reliability of the part. Examples of processes that are considered to be significant by AFLCMC/LPS are listed in Appendix B.

Similar part – A part fabricated from the same or a similar material that is equivalent or more difficult than the subject item to form and finish. The similar part must demonstrate the ability of the prospective source, in conjunction with their STS, to perform all requisite significant manufacturing/repair processes applicable per the technical data and sub-tier specifications. Significant processes are defined in Appendix B.

Subject Item – The actual item or assembly that the PS is attempting to be qualified for by submitting a SAR.

Sub-Tier Supplier (Sub-Vendor) (STS) – A source supplying material, products and/or services to the PS as required in the performance of the contract. This term applies to all facilities other than the PS's facility including those of the same company with a separate cage code.

Technical Data – Data required for the accomplishment of logistics and engineering processes in support of the contract end item. Includes drawings, operating and maintenance instructions, provisioning information, specifications, inspection and test procedures, instruction cards and equipment placards, engineering and support analysis data, special purpose computer programs and other forms of audio visual presentation required to guide personnel in the performance of operating and support tasks.
