

FA8604-25-R-B021

Mechanized Material Handling System at Dover Air Force Base, Delaware Bldg. 1202

Question Set #1

30 April 2025

1. Could you please provide a drawing of the facility?

Drawings that should match the construction of the facility can be found at the following link. Note that there may be minor deviations to this standard design.

[https://www.wbdg.org/FFC/DOD/AEM/ARCHIVES/BOX_D_WITH_PLATFORM %20092612.pdf](https://www.wbdg.org/FFC/DOD/AEM/ARCHIVES/BOX_D_WITH_PLATFORM_%20092612.pdf)

2. Could you please provide information about any height differences within the building?

Reference the drawings provided in response to question 1.

3. Could you please provide sectional drawings?

Reference the drawings provided in response to question 1.

4. Could you please provide sketches, pictures, data sheets, and the operation procedure of the sliding doors?

Reference the drawings provided in response to question 1.

5. Could you please provide the height of the ramp where the k-loader interfaces shall be installed?

Reference the drawings provided in response to question 1.

6. Could you please provide the conveying height of the system?

Conveying height is not explicitly specified. The system will need to accommodate pallets up to 96 inches high (1.3.1.1. of the Cover PD) and the roller height will need to be a minimum of 44 inches above the concrete where K-loaders will park (3.2.2.8.3. of Appendix A).

7. Can we get a CAD drawing of the project?

The CAD format (.dwg) of AF Drawing LDV401-01 can be provided upon request. We are unable to attached via SAM.

8. What are the maximum and minimum weights and sizes of the pallets being conveyed? What pallet types are you expecting to use?

This information is provided in paragraph 1.3.1. and it's subparagraphs of the Cover Purchase Description (PD).

9. Is there a speed in which you need to move the pallets though the system?

Transfer speed is specified in paragraph 3.2.1.4. of Appendix A for Powered 463L Pallet Conveyors.
