

Price Appendix FAQ

1. BPA

- a. Make sure to read through the Formulary Notes at the top of the spreadsheet. These will help you understand the P&T committee's decision making process for formulary status.
- b. Fill in all yellow cells. All other cells will be locked from editing.
- c. Once you enter the Package Size (column G) for each NDC, it will auto populate for the remaining cells in the table.
- d. If you wish to not submit a quote for a condition set, the Price per NDC (column F) will highlight red. This will indicate to the P&T committee you do not wish to submit a quote for the given Formulary Category Description.
- e. The Price per Unit (column H) will be auto calculated for your convenience.
 - i. Calculation is Price per Unit = $\frac{\text{Price per NDC}}{\text{Package Size}}$
- f. We have provided tables for 10 different NDCs. You only need to fill out the tables for your NDCs.
 - i. For example, if you have 5 NDCs you wish to submit, you only need to fill out the first 5 tables.
- g. If you wish to submit more than 10 NDCs, contact the POCs on the RFQ document with the number of NDCs you would like to submit a quote for and we will send you a spreadsheet with an adequate number of NDC tables.
- h. If you have questions/concerns about filling out the table, contact the POCs on the RFQ document outlining the issue.

2. ADP

- a. Make sure to read through the Formulary Notes at the top of the spreadsheet. These will help you understand the P&T committee's decision making process for formulary status.
- b. Fill in all yellow cells. All other cells will be locked for editing.
- c. Once you input the first non-FAMP price of a drug (column F), all subsequent rows in the table will auto populate with the same non-FAMP price.
- d. Once you input the first Current Annual Federal Ceiling Price (column H), all subsequent rows in the table will auto populate with the FCP price.
- e. If you submit a 0.0000% Additional offered refund (column G), the cell will highlight red. This will indicate to the P&T committee you do not wish to submit a quote for the given Formulary Category.
- f. Columns I and J will be auto calculated for your convenience. You can view the formula being used to calculate both columns.
 - i. $\text{Total Calculated Refund} = ((\text{non-FAMP-FCP}) + (\text{non-FAMP} * Y\%))$
 - ii. We have also provided the formula for the Total Calculated Refund in the Formulary Notes at the top of the spreadsheet.
- g. We have provided tables for 10 different NDCs. You only need to fill out the tables for your NDCs.
 - i. For example, if you have 5 NDCs you wish to submit, you only need to fill out the first 5 tables.
- h. If you wish to submit more than 10 NDCs, contact the POCs on the RFQ document with the number of NDCs you would like to submit a quote for and we will send you a spreadsheet with an adequate number of NDC tables.
- i. If you have questions/concerns about filling out the table, contact the POCs on the RFQ document outlining the issue.
