APPENDIX 3
SPACE BASE DELTA 1, CHEYENNE MOUNTAIN SPACE FORCE STATUIB (CMSFS), CO

REQUIRED LOCAL
TELECOMMUNICATIONS SERVICES

1.0 Local services, required from the Contractor, are initial installation and cutover service requirements for the Government under the scope of this contract. The Contractor shall provide the following baseline of local commercial communications services for Space Base Delta 1 (SBD 1) Cheyenne Mountain SFS (CMSFS), CO Point of Presence (POP) at, CMSFS CO at cutover. The quantity of these initial service requirements will be incorporated into Appendix 3, see below. The installation service requirement will be identified here.

This telephone switching system is currently a SL-100 with the SD-09 software version. But a new Avaya CM 10 is being installed and will replace the SL-100. The migrations has started but may not be completed by the award of this contract.

The Government will provide Government Furnished Equipment and Government Furnished Facilities and the contractor will have access to CMSFS POPs as needed. The government will escort the contractor into this location as needed to support access to areas to connect equipment, fiber, and other requirements to provide communications links to various buildings on base, exact space will be determined at award. The government will provide access to government fiber as required to support mission requirements.

Cutover for this site is: 30 days from award.
