

INDUSTRY REQUEST FOR INFORMATION (RFI)

Silver Bullets (SB)

31 March 2026

Note: This questionnaire/survey is for obtaining information only. Companies are encouraged to provide responses to this questionnaire but are advised that their participation is voluntary only. Contractors responding to this Request for Information (RFI) are placed on notice that participation in this survey does not ensure participation in future solicitations or contract awards. The government will not reimburse participants for any expenses associated with their participation in this survey.

INSTRUCTIONS:

1. Attached is the draft PWS for the F-15 Engineering Services effort requirement and a contractor capability survey, which allows you to provide your company's capability.
2. If, after reviewing these documents, you desire to participate in the market research, you should provide documentation that supports your company's capability in meeting these requirements. Failure to provide documentation may result in the government being unable to adequately assess your capabilities. If you lack sufficient experience in a particular area, please provide details explaining how you would overcome the lack of experience/capabilities in order to perform that portion of the requirement (i.e., teaming, subcontracting, etc.)
 - a. Identify any areas of work that your organization believes should be broken out exclusively for Small Business.
3. Both large and small businesses are encouraged to participate in this Market Research.
4. Questions relative to this market survey should be addressed to Tyler Law, tyler.law.4@us.af.mil.

Requirements Description

Silver Bullets (SB)

PURPOSE/DESCRIPTION

The Government is conducting market research to identify potential sources that possess the expertise, capabilities, and experience to meet qualification requirements for the sustainment of all F-15 engineering services areas. All engineering tasks issued within the period of performance are intended to be short-term projects, estimated at typically less than 1000 hours.

The projected period of performance for this engineering service is five-years (basic plus 4 option years) and will continue through FY32.

These services have been performed sole source by Boeing for roughly 25 years, at which point it was with McDonnell Douglas which merged with Boeing in 1997. Over the past several years, F-15 Engineering has used a FFP pricing arrangement, with a most recent 12 month period of performance. Reports are delivered as tasks are completed via email and Boeing's BPN website. Thorough technical, price and/or cost analyses have been and will be performed as necessary by the F-15 System Program Office (SPO), Defense Contract Audit Agency (DCAA) and/or the Defense Contract Management Agency (DCMA).

A complete description of work is provided in the attached draft Performance-Work-Statement (PWS): Silver Bullet (SB) Requirements.

CONTRACTOR CAPABILITY SURVEY

Silver Bullets (SB)

Part I. Business Information

Please provide the following business information for your company/institution and for any teaming or joint venture partners:

- Company/Institute Name:
- Address:
- Point of Contact:
- CAGE Code:
- Phone Number:
- E-mail Address:
- Web Page URL:
- Size of business pursuant to North American Industry Classification System (NAICS) Code: **541330.**

Based on the above NAICS Code, state whether your company is:

- Small Business (Yes / No)
- Woman Owned Small Business (Yes / No)
- Small Disadvantaged Business (Yes / No)
- 8(a) Certified (Yes / No)
- HUBZone Certified (Yes / No)
- Veteran Owned Small Business (Yes / No)
- Service Disabled Veteran Small Business (Yes / No)
- Central Contractor Registration (CCR). (Yes / No)
- A statement as to whether your company is domestically or foreign owned (if foreign, please indicate the country of ownership).

Please provide email responses to Tyler Law, tyler.law.4@us.af.mil and Tominica Pines, tominica.pines@us.af.mil, no later than, 12 May 2026.

Part II. Capability Survey Questions

1. Describe briefly the capabilities of your facility and the nature of the goods and/or services you provide. Include a description of your staff composition/experience and management structure.
2. Describe your company's past experience on previous projects similar in complexity to this requirement. Include contract numbers, a brief description of the work performed, period of performance, agency/organization supported, and individual point of contact (Contracting Officer or Program Manager).
3. Describe your company's experience in developing, validating, and utilizing engineering expertise for military aircraft.
4. Describe your company's experience in troubleshooting, problem analysis, and performance and supportability improvement issues on fielded aircraft, support equipment, and trainers for fighter aircraft.
5. Describe your company's capabilities and experience in testing, simulation, modeling, problem analysis, training, parts substitution analysis, risk assessments, inspection advisories and corrective actions to resolve field operational problems and improvement requirements, for military aircraft. Include a description of your staff's composition and experience levels.
6. Describe your company's capabilities in supporting accident and incident investigations- (to include technical support for In-Flight Emergency (IFE) assistance requests and technical assistance in analyzing and/or recreating the accident/incident in order to determine the cause). Please detail your experience with the following: review of exhibits and failed components, computer simulation, failure analysis, participation in Mishap Investigation Boards, and input to associated reports.
7. Describe your company's capabilities and experience in providing laboratory, ground and flight testing as needed to support field problem investigations and development activities.
8. Describe your company's capabilities and experience in designing novel and complex repairs of aircraft.
9. Describe your company's capabilities and experience in generating technical data, engineering drawings and repair procedures.

10. Are there specific requirements in the documentation that was provided that would currently preclude your company from being a viable solution in meeting the requirement?
11. Is your company's cost and accounting system certified by Defense Contract Auditing Agency (DCAA) as adequate?
