- 4. Basis of Award. Award will be made on the basis of price only in accordance with FAR 13.106-1(a)(2)(i). The following definitions for price completeness and reasonableness are outlined below:

- a. Completeness: The proposal will be reviewed to determine the extent to which all the price elements have been addressed. The review will determine the adequacy of the offeror's proposal in addressing and fulfilling the SAPR requirements.
- b. Reasonableness: The proposal will be reviewed to determine the reasonableness of the price and the offeror's understanding of and ability to fulfill the requirement. For a price to be reasonable, it must represent a price to the Government that a prudent person would pay in the conduct of competitive business. The Government will determine the prices fair and reasonable through the use of one or more of the price analysis techniques at FAR 13.106-3(a).

The Government intends to make award based on the initial proposal submissions without conducting interchanges. Therefore, each offer should contain the Offeror's best and complete price. However, the Government reserves the right to hold interchanges if, during the evaluation, it is determined to be in the best interest of the Government. Interchanges are fluid interaction(s) between the CO and the offerors that may address any aspect of the proposal and may or may not be documented in real time. However, the Government reserves the right to conduct interchanges using Interchange Notices (IN). Offeror responses to INs will be considered in making the award selection decision. Interchanges may be conducted with one, some or all offerors. The Government is not required to conduct interchanges with any or all offerors responding to this SAPR. This acquisition follows the procedures outlined in FAR 13, as supplemented.
