This method may be used for commercial products or commercial services including those “of a type” or when requiring minor modifications for commercial products.
- c. Use of parametric estimating methods/application of rough yardsticks (such as dollars per pound or per horsepower, or other units) to highlight significant inconsistencies that warrant additional pricing inquiry.
- d. Comparison with competitive published price lists, published market prices of commodities, similar indexes, and discount or rebate arrangements.
- e. Comparison of proposed prices with independent Government cost estimates.
