

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity: 460 CONS / PKC Buckley SFB, CO

Project/Program Name: FSS Fitness Center Wifi

Purchase Request / Local ID Number: F1K3GA6069AC01

Estimated Contract Cost (including Options):

Section B: Description of the Supplies/Services Required

This high-density managed Wi-Fi solution is designed for a large, active fitness facility, providing 1 Gbps fiber internet, professional installation, and fully managed, warranted hardware for 1500+ users.

- Internet Service: 1 Gbps (1000 Mbps) symmetrical fiber optic Internet circuit (down/up).

- Infrastructure & Hardware:

1. Firewall/Controller: Enterprise-grade security gateway providing 24/7 monitoring, security, and traffic prioritization for staff and guest traffic.

2. Switching: 24-Port Managed PoE (Power over Ethernet) Switch to power Access Points, front desk computers, and IoT equipment.

3. WiFi Extenders (Access Points): High-density, dual-band Wi-Fi 6 or 6E Access Points designed to cover large, open areas.

- Installation: Professional on-site survey, network design, and installation of structured cabling and hardware.

- Warranty: Commercial warranty covering repair or replacement of broken, damaged, or outdated equipment.

Section C: Justification for Soliciting from a Single Source or Brand Name

Following market research conducted via a sources sought notice, a sole-source award to Lumen Technologies is the most advantageous path for the government. This conclusion is based on a comparison of Rough Order of Magnitude (ROM) estimates from interested vendors against the known five-year costs of the incumbent provider, Lumen. Every alternative to Lumen involves substantial upfront costs and significant installation delays. The known five-year pricing and zero-day transition offered by the incumbent, Lumen Technologies, presents a clear and justifiable case for a sole-source award, ensuring both fiscal prudence and uninterrupted mission support.

Cost and Operational Analysis (5-Year Projections)

- Lumen Technologies (Incumbent): As the incumbent, Lumen provides immediate service continuity with zero installation delay. Their established pricing requires no upfront equipment costs and results in the lowest total contract value over five years at \$107,580.00.

Single Source Justification (Simplified Acquisition)

- [REDACTED] submitted complete ROMs with total five-year values of \$154,700.00 and \$277,048.83, respectively. Both require considerable upfront equipment costs (\$50,000 and \$109,698.27) and involve lengthy installation periods of 49-120 days, which would disrupt operations at the start of the contract period.
- [REDACTED] provided a ROM with a total five-year value of \$224,955.52. Their estimate is characterized by a high upfront equipment cost of \$140,058.52 and a monthly recurring fee of \$1,414.95.
- [REDACTED] response focused on an upfront equipment cost of \$149,679.77, without detailing the recurring or total five-year contract value.

Sole-sourcing to the incumbent, Lumen Technologies will save the government a minimum of \$47,120 over five years, avoid \$50,000 in upfront costs, and prevent a 49-day installation delay.

Given Lumen's significant price advantage as the incumbent, it is highly probable that a full and open competition using a Lowest Price Technically Acceptable (LPTA) evaluation would result in an award to them regardless. Therefore, proceeding with a sole-source award is an act of good faith, preventing other contractors from expending time and resources on a proposal with a low probability of success.

Because these savings are equivalent to 43.8% of the total contract value, it is the Contracting Officer's recommendation to proceed with a sole-source award.

Section D: Efforts to Obtain Competition

Market Research was conducted in accordance with RFO Part 10 by the CO/CS in February of 2026. A Sources Sought notice was posted the SAM.gov from February 17-27, 2026 and a site visit to the Fitness Center was offered to any interested parties on February 25, 2026. Eleven (11) responses were received during the Sources Sought period, with only one attending the site visit. A review of available company websites and Internet searches were conducted to gather additional information on capabilities, prior projects of a similar nature, industry awards, and customer feedback on the listed vendors. Additional information and clarification was gained through the 460th Force Support Squadron IT Specialist. On March 16, 2026, a follow-up request for a Rough Order of Magnitude (ROM) on the initial installation timeline and cost was submitted to the eleven (11) vendors who responded to the sources sought notification. By the ROM request closing date on March 25, 2026, six (6) vendors had responded with data.

460 CONS intends to publicize this requirement, prior to award, as required by RFO subpart 5.2.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

This requirement is anticipated to be an ongoing need for 460 FSS in future years. New market research will be conducted prior to the expiration of the current award to determine if new manufacturers or sources are available to avoid limitation of competition in future years.

Single Source Justification (Simplified Acquisition)

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
