Basis For Decision That Only One Source Is Available

These components are mission-critical, direct replacements required for the preparation of the Electronics System and Sliding Padeye Assembly on USS HIGGINS (DDG 76). Introducing non-OEM, alternative products fails the rigorous form, fit, and function parameters and introduces unacceptable operational risk, including potential system failure or degradation of shipboard capabilities.

Glenair Inc. holds exclusive ownership of the engineering drawings (637-010 and 760-060), technical specifications, and inspection requirements. Because the design and production characteristics are the intellectual property of Glenair Inc., there are no other companies authorized to supply these specific items or provide functional alternatives.
