

12760426Q0005-2 Aircraft Computer Maintenance Management System (CMMS)

Amendment 01

1. **Question:** Attachment 2: Bill of Materials there is in the QTY. 35 prefilled in. However, in the aircraft description there are 23 active aircraft with 4 on CAMPS subscription to be added later... for a total of 27. Would you like the Bill of Materials to stay at the pre-filled number of 35 or 27?

Response: The Bill of Materials refers to user licenses, not number of aircraft. Please see revised Attachment 1 Bill of Materials which lists 50 user licenses in accordance with the PWS. The Government intends to have a total of 27 aircraft but currently has a total of 23.

2. **Question:** Please provide clarification on paragraph 3, page 3 of the Performance Work Statement (PWS), specifically the "Legacy" section.
- Please confirm the total number of facilities included in this requirement and provide the location of each facility.
 - Additionally, would the Government consider granting an extension to the current proposal due date to allow sufficient time to incorporate this information into our submission?

Response:

- The Government has 7 facilities at the locations listed below. While these are the home locations of the physical aircraft, they are seldom there. The Government will need to have online access to the aircraft data.

Juneau Alaska

Redmond Oregon

Missoula Montana

Redding California

Ogden Utah

Ely Minnesota

Broomfield Colorado

- The due date is extended to Monday, May 5, 2026, at 3pm EST.
