The final contract award will be based on a combination of factors - a combination of price, compliance review and technical acceptability.

A - Compliance review:

The Government will perform an initial review of proposals / quotations received to determine completeness and compliance with the terms of the solicitation to include:

1. **Proof of SAM registration to include the SAM UEI number.**
2. All offerors must include a completed copy of **FAR 52.212-3, Offeror Representations and Certifications - Commercial Items** with their offer. 4. Reasonableness: Price is fully justified and supported and is considered fair and reasonable under current market conditions. Reasonableness may be determined by one or more of the proposal analysis techniques identified in FAR 13.106-3(a)(2).

The Contracting Officer may either make a responsibility determination without requesting any additional information or require the offeror to provide information to substantiate that it satisfies the general responsibility standards of FAR 9.104-1. In determining responsibility the offeror shall be prepared, upon notification from the contracting officer, to provide the necessary information/documentation to be determined responsible.
