**FEDERAL SUPPLY SCHEDULE (FSS)
SOLE SOURCE JUSTIFICATION
DESCRIPTION OF ACTION: Six-Month
Extension**

Solicitation 47QFMA21Q0010

Manufacturing Technology Program
in support of:

**Office of the Under Secretary of Defense for
Research and Engineering (OUSD(R&E))**

**United States (U.S.) General Services Administration (GSA)
Federal Acquisition Service (FAS)
Assisted Acquisition Services (AAS) Army**

Interagency Agreement Number: 47QFMA20S0009-0002

Controlled by AAS Contracting Officer Linda Jacobsen: [REDACTED]

CUI//SP-SSEL

The General Services Administration (GSA) Assisted Acquisition Services (AAS) makes this Federal Supply Schedule (FSS) Sole Source Justification for orders pursuant to Federal Acquisition Regulation (FAR) 8.4 (GSA Class Deviation Revolutionary FAR Overhaul (RFO)-2025-08) and General Services Acquisition Regulation (GSAR) 538.7104-3 (GSA Class Deviation RFO-2025-FSS-GSAR 538).

1. Identification of Agency and Contracting Activity:**Agency:**

GSA AAS acting in support of the Office of the Secretary of Defense.

Contracting Activity:

GSA AAS Contracting Office (QFACB)

2. Nature and/or Description of Action Being Approved:

This document requests approval of an anticipated sole-source modification to PM2 Strategies LLC (PM2) under the GSA Multiple Award Schedule (MAS) – Professional Services for an extension period of April 06, 2026, through October 05, 2026, to task order: 47QFMA21F0017 awarded under MAS contract GS03F041GA. The task order was awarded on April 05, 2021, for a twelve (12) month base period, plus four (4) one-year options in the total amount of [REDACTED]. The dollar value of the extension is anticipated to be \$ [REDACTED]. The TO type is Combination Firm Fixed Price (FFP) and Time and Materials (T&M). As explained in further detail below, the services are for the continued innovation to manufacturing capabilities for producing defense systems and other critical products

3. The Authority and Supporting Rationale:

The acquisition is conducted under the authority of the Multiple-Award Schedule (MAS) Program. Consideration of schedule contractors will be restricted in accordance with:

- a. GSAR 538.7104-3(b)(ii) (GSA Class Deviation RFO-2025-FSS-GSAR 538) – Only one source is capable of providing the products, services, or solutions at the level of quality required because the products, services, or solutions are unique or highly specialized.

PM2 is currently overseeing the development of the following critical manufacturing processes:

- a. AIM Photonics: The use of light in lieu of electricity for transferring data between computers/chips (e.g., useful for technologies such as cars/jets as light travels faster than electricity and produces less heat, mitigating the need for cooling fans).
- b. America Makes: 3D-printing parts for weapon systems, robotics, aircraft carriers/vehicles, which enables soldiers to replace parts at their current locations.
- c. BioFabUSA: Increased biofabrication of cells, tissues, and organs to address the critical medical needs of the warfighter. Develops standards, tools, and workforce for this purpose.

CUI//SP-SSEL

- d. BioMade: The utilization of bio-based fuels, chemicals, and materials for green and domestic production. (E.g., agricultural waste for fuel; dandelion for rubber tires).
- e. MxD (Manufacturing x Digital): Lifecycle manager and cybersecurity arm. Attaches sensors to factory equipment (also produced items) and connects the sensors to software (visual versions) of the equipment to store useful data and monitor the functionality of the machines. Also responsible for protecting the factories' cyberspace to prevent adversarial manipulation of machines.
- f. NextFlex: Durable and flexible electronics (e.g., sensors built into bandages and uniforms to monitor health).

This effort requires tracking the progress of projects utilizing DoD's 10-step Manufacturing Readiness Level (MRL) criteria, which alone requires expertise in DoD manufacturing standards along with ManTech experience required by the task order. The MRL criteria encompasses the full evolution of a manufacturing process, from concept development to lab experiment to full-rate production. This makes PM2 heavily ingrained in ManTech operations, including providing technical, financial, and acquisition support. The contractor has current employees that possess the necessary skills and institutional knowledge required to seamlessly continue the required support amid current time constraints. Continued performance from PM2 is required to prevent any stoppage, disruption, or degradation to support services while the follow-on order is re-competed. No other contractor currently has in-place support staff available with the requisite knowledge of the aforementioned manufacturing processes.

OUSD (R&E) has experienced delays in recompeting this task order as a result of organizational and requirement changes necessitated by Presidential priorities contained in the 2025 legislation, "One Big Beautiful Bill Act (OBBA)". More specifically, OUSD (R&E) has had to make extensive revisions to the Performance Work Statement (PWS) to incorporate additional tasks to support the mission and scope of the ManTech requirement. Additionally, OUSD (R&E) has had to establish a new contracting office, which itself has undergone personnel changes. For these reasons, OUSD (R&E) requires an extension to the current task order to ensure continuation of services through award and transition of the recompeted task order.

To prevent a critical halt in production, a six-month extension is necessary to facilitate knowledge transfer and program awareness during the transition to a new contractor, especially given the task order's imminent expiration on April 05, 2026. This period is also essential for vetting personnel to ensure they meet security and certification requirements for handling sensitive information and products. Without this extension, a lapse in critical manufacturing processes would occur, severely undermining the readiness, sustainability, and safety of Warfighters, which are vital components of national security.

4. Determination by the Ordering Activity Contracting Officer that the Order Represents a Fair and Reasonable Price Consistent with GSAR 538.7102-2(d)(2) and

CUI//SP-SSEL

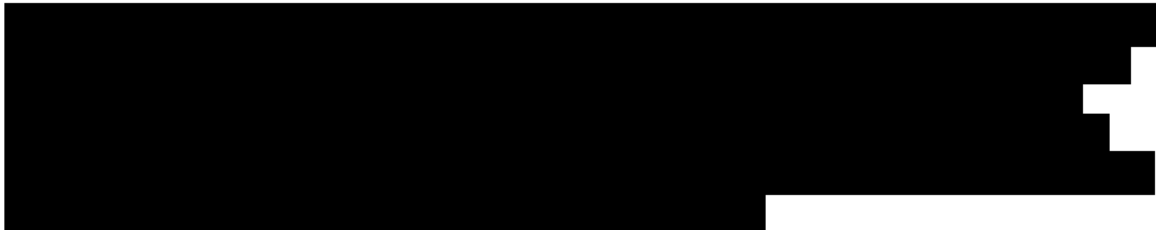

538.7104-2(a)(3) (GSA Class Deviation (GSA Class Deviation RFO-2025-FSS-GSAR 538)

The task order was awarded under PM2's FSS contract GS03F041GA at labor rates which were already determined to be fair and reasonable. However, per DFARS 208.404 (DoD CD 2014-O0011), that does not exempt the CO from making an additional F&R determination at the task order level IAW FAR 15.404-1. Accordingly, per FAR 15.404-1(b)(2) (GSA CD RFO-2025-15), the IPT will utilize invoice records on the CALC+ Quick Rate Prices Paid site to compare PM2's hourly rates to rates of other contractors utilizing the same labor categories to ensure PM2's rates fall within a reasonable price range. Also, per FAR 15.404-1(b)(4) (GSA CD RFO-2025-15), the IPT will ensure quoted hourly rates do not exceed PM2's negotiated schedule rates.

In addition to the rate analysis, a technical evaluation will be completed by the GSA PM and client TPOC on the proposed labor mix (labor categories and level of effort) to ensure they are acceptable for performing the PWS requirements.

This extension also represents the best value to the Government. Given PM2's ManTech expertise, there is no other contractor that can effectively perform the PWS requirements, at the level of quality required, by April 5, 2026. This, in conjunction with anticipated fair and reasonable pricing, makes the extension the best value solution to the Government's requirements.

5. **Description of the Market Research Conducted Among Schedule Holders and the Results of the Research:**

6. **Any Other Facts Supporting the Justification:**

No other facts.

7. **Statement of the Actions, if Any, the Agency May Take to Remove or Overcome any Barriers that Led to the Restricted Consideration Before Any Subsequent Acquisition for the Supplies or Services is Made:**

The client is currently in process of recompeting this requirement and anticipates a timely award upon expiration of the six-month extension to this task order.

8. **Contracting Officer Certification that the Justification is Accurate and Complete to the Best of the Contracting Officer's Knowledge and Belief:**

I hereby certify that this Justification is accurate and complete to the best of my knowledge, and I determine on the basis of the findings above that the limited sources approach is in accordance with the requirements and is in the best interest of the Government.
