

JUSTIFICATION FOR SOLE SOURCE or BRAND NAME SOLE SOURCE (For Simplified Acquisitions < \$250K)

PLEASE CHECK ALL APPLICABLE BOXES AND FILL IN ALL APPLICABLE BLOCKS BELOW. A NARRATIVE MUST BE ADDED TO ALL APPLICABLE SECTIONS. IF A SECTION DOES NOT APPLY, TYPE "N/A" IN THE BOX.

Requisition Number / Document Number:	R098155364R006	
The material and/or service listed on this form is (<u>please mark one</u>):	☐ Sole Source	☒ Brand Name Sole Source

Restricted to the following manufacturer or source:

- Manufacturer Name: General Dynamics Mission System (GDMS)
- Manufacturer POC and Phone Number: [REDACTED]
- Manufacturer Address: 8220 E. Roosevelt Street M/D R3163, Scottsdale, AZ 85257
- Dealer Name (if applicable):
- Dealer POC and Phone Number (if applicable):
- Dealer Address (if applicable):

1. Description of the item(s) or service(s) required and the estimated cost(s):

Item#	MFG Name	MFG Part#	Description	Qty	U/I	
1	GDMS	01-P58646R001	Black Backpack System	4	each	[REDACTED]
2	GDMS	30-P58549R001	DC Power Cable	4	each	
3	GDMS	53-P58597R001	AC/DC Power Supply (10W systems)	4	each	
4	GDMS	V4-10796	Headset	8	each	
5	GDMS	V2-10497	H-250 Handset	8	each	

Note: If additional items are required, please list on a separate spreadsheet using the sa

2. Required Delivery Date (RDD) or Period of Performance (POP): 10 September 2026 (120 days from projected date of award)
3. Specific characteristics of the material or service that limit the availability to a sole source/brand product (unique features, function of the item, etc.). Describe in detail why only this source/brand can furnish the requirements to the exclusion of other sources/brands.

This is a request to execute a brand-name-only procurement for the URC-300 VHF/UHF Software-Defined Transceiver and associated accessories, which is a proprietary product manufactured by General Dynamics Mission Systems (GDMS). The equipment is required to provide highly reliable ground-to-air, and line-of-sight communications for critical mission operations. In accordance with FAR 6.302-1(c), the required supplies are available from only one manufacturer due to unique proprietary features and required interoperability with existing fielded systems.

A sources sought notice posted by the Contract Specialist revealed there are two small businesses, Carroll Woods, Inc. and ACG Systems, Inc., who are authorized distributors of GDMS and capable of providing the URC-300 system at a fair and reasonable price.

4. The requested material or service represents the minimum requirements of the Government.

Unique RF Performance & Cosite Capabilities: The URC-300 features a proprietary, highly specialized RF architecture that allows multiple transceivers to operate as close as 6.5 feet apart without frequency interference. Competing tactical man-pack radios require up to 50 feet of separation, which is tactically and physically unfeasible for the unit's restricted operational footprint (e.g., emergency grab-and-go and rapid multi-channel operations and working within the confines of small control towers, expeditionary towers, and dynamic expeditionary landing zones).

5. The material or service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment and/or functionality you have now and how the new item/service must coordinate, connect or interface with the existing system.

The requested URC-300 systems must be fully compatible in form, fit, and function with the Government's existing, heavily fielded URC-300 family of equipment. Currently, the operational infrastructure and ground-to-air communications architecture are built entirely around the URC-300 ecosystem. This existing system includes highly specialized and integrated peripheral inventories, specifically: power supplies, remote control units, backpack systems, antennas, and permanently installed RF wiring.

6. A patent, copyright or proprietary data limits competition:

GDMS has Proprietary Interoperability (Legacy Integration) for the URC-300.

7. The items are "direct replacement" parts/components for existing equipment. Provide the information about the Next Higher Assembly (NHA)/equipment which the replacement parts are going into (e.g. description, model, part number, Original Equipment Manufacturer (OEM), etc.).

The NHA is the Ground-to-Air Communication Suite and there are mandatory certifications that the URC-300 system meets. The URC-300 meets stringent DoW/FAA requirements and military certifications (MIL-STD-461G EMI/EMC) required for authorization to operate within the National Airspace System and DoW spectrums.

8. Other information to support sole source/brand name sole source procurement. The rationale must then justify "either" substantial duplication of cost to the Government that is not recovered through competition or unacceptable delays in fulfilling the mission of the agency.

In accordance with FAR 6.302-1, procuring an alternative radio system would result in a substantial duplication of cost to the Government that is not expected to be recovered through competition. The existing tactical infrastructure and ground-to-air ecosystem are specifically engineered for compatibility with the URC-300. Selecting an alternative manufacturer would render the current inventory of peripheral equipment—including power supplies, remote control units, backpack systems, and antennas—technically obsolete. The cost to replace this ancillary equipment, coupled with the labor required to overhaul existing RF wiring and supporting hardware, creates a financial burden that far outweighs any potential savings achieved through a competitive award.

REQUIRING ACTIVITY TECHNICAL or REQUIREMENTS CERTIFICATION

I certify that the statements checked, and information provided above, are complete and correct to the best of my knowledge. I understand that the processing of this sole source/brand name sole source justification precludes the use of full and open competition.
