(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate offers:

Price, and Technical Capability

Price: Quotes will be arranged according to their total price and reviewed for technical capability on an Acceptable/Unacceptable basis. Quotes will be ordered from lowest to highest.

Technical Capability: Technical capability of the item offered to meet the Government requirement, evidenced by the quote's adherence to the Statement of Work. Offerors will be evaluated as either Acceptable or Unacceptable for Technical Factors. Proposals shall not simply rephrase or restate the SOW or contain general statements such the technical portion of the offer meets solicitation requirements. Offerors shall assume the Government has no prior knowledge of the quoter's experience. The Government will base its evaluation on the information presented in the quote.

(b) *Options (if applicable)*. The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. The evaluation of options does not obligate the Government to exercise the option(s).

(c) *Notice of award*. A written notice of award or acceptance of an offer furnished to the successful Offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.
