APPROVALS (RFO 6.104-2(a) Table 6-1 & R-DFARS 206.104-72 Table 206.1)

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

Agency: AFLCMC/HNJT
Contracting Activity: AFLCMC/HNJK

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

This document approves the award of a contract on a sole source basis to Parallax Advanced Research for commercial coworking space as a service to Special Access Programs (SAPs) being executed by HNJT-OL. This justification is made on an Individual basis.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

(U) This individual J&A focuses on necessary services to support operations of the program office including turnkey services, security services, and management of an off-base facility.

(U) AFLCMC/HNJT-OL is responsible for deploying level 3, 4, and 5 Secure Voice Services (SVS) to offices executing DAF SAPs, both government and defense industrial base, to enable secure communications at program levels and thus accelerate the development & deployment/improvement of various SAP products used by the warfighter.

[REDACTED]

See Sec. VIII of this J&A for significant additional factors precipitating this action.

The period of performance for this effort is anticipated to be three years from date of award. AFLCMC/HNJT intends to fund this contract with FY26 - FY 28 O&M 3400 Funds. The contract will be structured as a base year and two 12-month option periods.

[REDACTED]

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

AFLCMC/HNJT anticipates that the subject services will be provided by Parallax Advanced Research at [REDACTED]
[REDACTED]

Utilizing a coworking space other than this would incur significant duplication of cost valued at approximately [REDACTED] not expected to be recovered through competition and unacceptable delays of 4-8 weeks of down time for mission critical support functions.

This building currently houses infrastructure needed for classified and unclassified communication enabling HNJT-OL to

Department of the Air Force: Justification for Other Than Full and Open Competition

work on a Special Access Program Portfolio. To relocate, the Government would have to conduct a review of the site and submit a DD254 for the support contractors on site. HNJ security personnel have confirmed that each of these process will take up to 3 weeks and have to be performed by Government security teams.

This process would result in a period where the HNJ personnel stationed at Wright Patterson would not be able to work on their classified workload.

The action of moving from one facility to another, should the new facility get accredited, will represent a significant cost, estimated at [REDACTED] accounting for laborers with TS security clearances; secure transportation, packing materials, equipment insurance, and reinstallation of all fiber and IT equipment. A full breakdown of the cost can be found below. During the moving process, HNJT-OL would experience a complete mission shutdown on both SAP and non SAP requirements.

Transportation costs

Specialized Labor: Burdened labor rates for cleared personnel holding a TS clearance are estimated to be \$[REDACTED] per hour per person. To move the entirety of the infrastructure it would require 6-10 movers and 2 weeks. The total estimate for the labor portion of this move is approximately [REDACTED]

Destruction and Secure Transportation: The cost to transport 10 pallets for a classified material destruction run is [REDACTED]. To move the remaining large quantity of classified equipment and materials 30 miles via secure transportation methods IAW the SCG, it is estimated to cost the Government \$40,000. The total cost for destruction and secure travel is estimated at [REDACTED]

Packaging materials and Insurance [REDACTED]

Secure Fiber Installation at New Location: Similar requirement within the HNJ portfolio is budgeted for [REDACTED] for 107 desks. Estimate for HNJT Wright Patterson OL requires 50% less fiber installation resulting in a estimate of [REDACTED] for this requirement.

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

A sources sought, Notice ID HNJTOL202603, was posted to GPE IAW RFO 6.104-1(a)(6). Two vendors, Parallax Advanced Research Corp, located in Beavercreek, OH, and Advent Business Company Inc., located in Naperville, IL, responded as interested. A number of programs across AFMC have surveyed the local area for SAP/SCI accredited space and the corresponding service to operate such a facility. There have been efforts led by AFLCMC/XP that identified the Parallax Advanced Research facilities and services described herein. As described in Section IV, the Parallax Advanced Research facilities and services uniquely meet the requirements of AFLCMC/HNJT-OL. Parallax Advanced Research's unique capabilities were initially verified through market research conducted by security, information technology, program management, and contracting personnel via site visits, interviews, and Internet searches.

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

1. Program requirements, organizational relationships, and the physical location of SAP program activities off-base cannot

Department of the Air Force: Justification for Other Than Full and Open Competition

be documented appropriately for full and open competition due to the security restrictions associated with this activity.

2. The program currently occupies the subject facility. The program's plan was to vacate the facility at the end of the lease term and move to the Enhanced Use Facility (EUF), currently under construction at WPAFB, for which it has been accepted as a tenant. However, on 18 December 2025 88th Civil Engineering Group advised the program that EUF construction is behind schedule due to limited FYCP MILCON funding and will not be ready for occupancy until Spring 2028. This delay, combined with the lease's expiration date of 6 June 2026 caused the need for the program to secure an interim location until the EUF is ready for occupancy. The program coordinated with GSA, 772nd ESS, and AFCEC. As a result of these conversations, the program learned that, beyond its current facility and the market research responses described in Sec. VI, there are no facilities suitable for the program's type of Special Access Program (SAP) work that are available by the time the program's lease expires. The program scoped the period of performance of the proposed commercial lease to align with the EUF's currently-predicted occupancy date. Note also, while Parallax describes its building SAP space as "coworking", the program has exclusive use of the designated space within the building for SAP operations.

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11):

Due to the stringent security requirements of the program, only contractors with security compliant capabilities can be considered as potential sources. If new sources capable of satisfying the requirement are identified, those sources will be given consideration for future acquisitions. Assuming the EUF is available IAW the revised occupancy forecast, there will not be need to renew the commercial lease or seek an alternative lease in the future.
