- ☒ AMC 3. Acquire, for the second or subsequent time, directly from the manufacturer.
- ☐ AMC 4. Acquire, for the first time, directly from the manufacturer.
- ☐ AMC 5. Acquire directly from the sole source contractor, who is not the manufacturer.
- ☐ AMSC A. The Government's right to use data in its possession is questionable. This code is under review and will be updated when the review is complete.
- ☐ AMSC B. This must be acquired from a manufacturing source(s) specified on a source control drawing.
- ☐ AMSC C. This part required engineering source approval by the design control activity in order to maintain the quality of the part.
- ☐ AMSC D. The data needed to acquire this part is not economically available.
- ☐ AMSC H. The Government does not have sufficient, accurate, or legible data to purchase this part from other than the current source. This code is under review and will be updated when the review is complete.
- ☐ AMSC K. This part must be produced from class 1 castings under MIL-STD-2175.
- ☐ AMSC L. The annual buy value of this part falls below the screening threshold established by DoD.
- ☐ AMSC M. Manufacture of this part requires use of master or coordinated tooling.
- ☐ AMSC N. Manufacture of this part requires special test and/or inspection facilities to maintain function or system integrity.
- ☐ AMSC P. The rights to use the data needed to purchase this part from additional source(s) are not owned by the Government and cannot be purchased, developed, or otherwise obtained.

The Engineer, Mr. Nicholas Peterman, responded and indicated that: "I don't believe that requirement exists for "V" coded items. The item has been deemed "V" coded not because of a data rights posture, but because failure of the part would be unacceptable. Thus, it has been designated high reliability and placed in a formal reliability program."
