2. Answer the following vendor questions:
  - a. Question: Could you confirm if a 30" film carriage is needed for both machines?  
**Answer: Yes, both machines must be able to use 30" film.**
  - b. Question: The requirement associated with the section "Operator, Parts and Service Manual(s) and Training" states: "The Contractor shall provide with delivery, one (1) complete set of manuals with each machine." but does not therein mention about unpackaging the delivery crates or lifting/assembling the towers (not difficult, by the way) or anything specific to on-site set-up /training, could you confirm that live remote

telephone factory service walkthrough and trouble shooting is sufficient to meet the "Training" requirement for this RFQ?

**Answer: We only require the machines be shipped to DDWG (FOB Destination) and a complete set of manuals be provided. No other training is required.**

- c. Question: Different scale packages are available (including a basic platform scale vs a fully integrated built-in load cell scale package), can you specify if DDWG is needing?

**Answer: A fully integrated built-in load cell is required.**

- d. Question: Could you confirm the standard 80" tower is sufficient?

**Answer: The standard 80" tower is sufficient.**

- e. Question: Could you confirm if a Cousin ramp is required? And if so, does that need to be only the 48" x 60" standard ramp that accommodates manual pallet jack loading? Or, if powered power jack will be used, does DDWG desire the heavy duty 24" x 48" ramp with porch extension or the longer 40" L x 48" W ramp (also with porch extension)?

**Answer: The standard ramp is all that is required.**

- f. Question: Besides the scale and 30" carriage, would DDWG require any optional parts or features such as: the recommended Starter Spare Parts Kit with the minimum quantity of parts to stock for your specific machine; a pallet lock Roping Device allowing film to be "roped" and applied to pallets for max load securement (as needed -- with easy programming in the machine's touchscreen) -- also prevents film breakage on pallet corners -- see also the Air Flow next > ; an Air Flow film splitter to split the stretch wrap into equal 10" webs before the film gets applied to the pallet -- for manual adjustment of the roping action; or a Cold Weather Package (to protect the machines down to 33 degrees F); or, finally, a Safety Beacon Light (to indicate run / clear or fault conditions)?

**Answer: No optional parts are requested or required.**

3. Extend the closing date of this solicitation to Monday, May 11<sup>th</sup>, 2026, at 5:30PM EDT.

This amendment makes no other changes.
