3. Section C - Description/Specifications/Work Statement

STATEMENT OF WORK (SOW) Replacement of X-Ray Screening Systems Government Publishing Office (GPO)

1. BACKGROUND:

The U.S. Government Publishing Office (GPO) currently operates legacy X-ray screening systems that are obsolete and no longer meet current security, safety, reliability, or operational requirements. These systems present increased risk due to reduced detection capability, limited parts availability, and diminished performance.

This project will replace existing systems with modern, high-performance X-ray screening equipment that enhances detection capabilities, improves operational efficiency, and ensures compliance with applicable federal standards. The upgraded systems will provide improved image resolution, increased reliability, and advanced functionality to support GPO's security mission.

2. SCOPE:

The Contractor shall provide all labor, materials, equipment, supervision, and transportation necessary to furnish, deliver, install, configure, test, and provide training for X-ray screening systems at multiple GPO locations.

The scope includes, but is not limited to:

- Removal and proper disposal of existing X-ray equipment (if directed)
- Delivery and installation of new X-ray systems
- System configuration and calibration
- Integration of all required components and accessories
- Operational testing and certification
- On-site user training
- Provision of documentation, warranties, and support plans

All systems must be fully operational and accepted by the Government prior to project completion.

This project includes the procurement, delivery, installation, testing, and training associated with replacing X-ray screening systems across multiple GPO entry points, mail rooms, and screening areas. Work includes removal of existing systems, installation of new units, verification of operational readiness, and user training.

3. Critical Requirement:

Dimensions provided represent the Government's available space constraints based on existing facility layouts and operational requirements. Offerors shall propose systems that fit within these constraints.

Minor dimensional variances may be considered only to the extent that the proposed system can be fully accommodated within the intended installation space without requiring structural modifications or impacting operational use.

Systems that meet or exceed performance requirements will be considered, provided they are compatible with installation locations.

4. APPLICABLE DOCUMENTS:

All equipment shall comply with applicable federal, state, and industry standards, including but not limited to:

- FDA Radiation Safety Standard: 21 CFR 1020.40
- OSHA safety requirements
- Applicable electrical and safety codes
- Manufacturer safety and radiation emission certifications

Specifications represent minimum requirements. Offerors may propose systems with equivalent or superior capabilities, even if individual characteristics vary, provided all operational needs are met.

5. TECHNICAL REQUIREMENTS

5.1 General Requirements (All Units)

All X-ray systems shall:

- Meet or exceed 20–30 mm steel penetration capability (minimum baseline)
- Operate at 100% duty cycle
- Include safety interlocks and visual/audible X-ray emission indicators
- Provide high-resolution imaging with threat detection capability
- Include self-diagnostic functionality
- Provide local image storage and image review capability
- Be user-friendly with intuitive operator controls
- Demonstrate high reliability and low failure rates
- Include roller tables or extensions where applicable

The Contractor shall also provide:

- Manufacturer safety documentation
- Preventive maintenance requirements
- Lifecycle cost profile (including warranty and sustainment)
- Long-term support plan (parts, consumables, service availability)

5.2 Location-Specific Requirements

A. Five (5) Units – Washington, DC (Posts 10, 11, 22, 35, 41)

Intended Use: Personnel and package screening in high-traffic urban security environments

C. Two (2) Units – Main GPO (DC) and Stennis, MS

Intended Use: Screening luggage, backpacks, and medium parcels

Unit Dimensions (Allowable Range):

- Length: 81–88 in.
- Width: 34–39 in.
- Height: 55–58 in.

Tunnel Dimensions (Allowable Range):

- Width: 25–30 in.
- Height: 17–22 in.

Duty Cycle: 100%

Power: 120V

D. One (1) Unit – Loading Dock (Pallet X-ray System)

Intended Use: Screening palletized cargo and large freight

Maximum Unit Dimensions:

- Length: ≤ 252 in.
- Width: ≤ 96 in.
- Height: ≤ 100 in.

Maximum Tunnel Dimensions:

- Width: ≤ 68 in.
- Height: ≤ 72 in.

Maximum Object Size:

- Width: ≤ 57 in.
- Height: ≤ 67 in.

Conveyor Requirements:

- Height: ≤ 13 in.
- Load Capacity: $\geq 4,400$ lbs

Performance Requirements:

- Resolution: 36–38 AWG
- Minimum Penetration Capability: ≥ 30 mm steel
- Duty Cycle: 100%
- Power: 208V, 60 Hz

6. GPO RESPONSIBILITIES

- Provide escorts for contractor personnel while on GPO property.
- Provide access to water and electricity during installation.

12. Section L - Instructions, Conditions and Notices to Offerors

L.1 GENERAL INSTRUCTIONS

All questions regarding this solicitation shall be submitted in writing via email to: Tawanda Mizelle, Contract Specialist tmizelle@gpo.gov and the Contracting Officer, Jasmin Webb jwebb@gpo.gov. Please include the solicitation number in the subject line of the email. The cut-off date and time for submitting questions is **May 4, 2026 at 10:00 AM EST**. A response to all questions received will be provided by an Amendment and will be posted on SAM.gov NLT **May 5, 2026**. All questions shall be submitted in the following format: Page Number, "Document Section," "Sub Section," "Paragraph" and "Question"

Offerors shall submit quotes in accordance with this Request for Quotation (RFQ). The Government intends to evaluate quotes and make award **without discussions**. Therefore, Offerors are encouraged to submit their best terms from both a technical and price standpoint. The Government intends to award **one contract** for all required X-ray systems.

Offerors must submit quotes covering **all required system categories**. Partial quotes will not be evaluated.

L.2 QUOTE SUBMISSION REQUIREMENTS

Offerors shall submit quotes in two (2) volumes:

1. **Volume I – Technical Quote (Compliance-Based)**
2. **Volume II – Price Quote**

VOLUME I – TECHNICAL QUOTE (COMPLIANCE-BASED)

The Technical Quote shall provide sufficient detail to demonstrate compliance with the Statement of Work (SOW). The Government will evaluate the Technical Quote on an **Acceptable/Unacceptable** basis.

L.2.1 TECHNICAL SUBMISSION REQUIREMENTS

For each proposed system (Sections 5.2 A–D), Offerors shall provide:

Product Identification

- Manufacturer name
- Model number
- Product data sheets or specifications

Dimensional Information (CRITICAL)

Offerors shall provide:

- Unit dimensions (Length × Width × Height)
- Tunnel dimensions (Width × Height)
- Conveyor height

Compliance Statement

Offerors shall clearly state:

- The proposed system meets all SOW requirements

OR

- Identify any **minor dimensional variance**, including:
 - Specific deviation
 - Explanation of how the system:
 - Fits within the intended installation space
 - Does not require structural modification
 - Does not impact operational use or safety

Installation Approach (Brief)

Provide a concise description of:

- Delivery and installation process
- System setup and configuration

- Testing and certification
- User training

L.2.2 IMPORTANT TECHNICAL NOTES

- Failure to provide sufficient detail to evaluate compliance may result in a rating of **Unacceptable**
- The Government will not accept systems that require modification of existing facilities
- Offerors are responsible for ensuring their proposed systems can be installed within the identified locations

VOLUME II – PRICE QUOTE

Offerors shall provide pricing for all required systems, including:

- Equipment
- Delivery
- Installation
- Training
- Warranty and support

Pricing shall include all costs necessary to meet the requirements of the SOW.

L.3 BASIS OF AWARD (REFERENCE TO SECTION M)

Award will be made in accordance with Section M.

The Government will:

Evaluate Technical Capability on an **Acceptable/Unacceptable** basis

1. Consider only those quotes rated **Technically Acceptable**
2. Select the quote with the **lowest evaluated price** that is determined fair and reasonable

END OF SECTION L

13. Section M - Evaluation Factors for Award

M.1 Basis of Award:

The Government will evaluate quotes and make award on a **Lowest Price Technically Acceptable (LPTA)** basis.

Award will be made to the responsible Offeror whose quote:

- Is determined Technically Acceptable, and
- Has the lowest evaluated price, and
- Is determined fair and reasonable

M.2 Technical Capability

The Government will evaluate the Offeror's technical quote to determine whether it meets the requirements of the Statement of Work (SOW) and solicitation instructions.

To be rated ACCEPTABLE, the quote must:

- Demonstrate compliance with **all SOW requirements (Section C)**
- Provide complete and sufficient technical information as required in **Section L**
- Clearly identify proposed system specifications, including:
 - Unit dimensions
 - Tunnel dimensions
 - Conveyor height
- Demonstrate the proposed systems:
 - Fit within the specified dimensional constraints **OR**
 - Include any minor variances that can be accommodated without:
 - Structural modification
 - Impact to operations
 - Safety concerns

A quote will be rated UNACCEPTABLE if:

- It fails to meet any material SOW requirement
- It does not provide sufficient information to evaluate compliance
- The proposed system cannot be installed within the required space
- Dimensional variances would require modification of Government facilities or impact operations

Technical Rating Definitions

<u>Rating</u>	<u>Description</u>
ACCEPTABLE	Quote clearly meets all SOW requirements and solicitation instructions
UNACCEPTABLE	Quote fails to meet one or more SOW requirements or lacks sufficient detail

M.3 Price

Price will be evaluated to determine:

- **Total evaluated price** (sum of all CLINs)
- Whether the price is **fair and reasonable** in accordance with **MMAR 15.404-1(b)**

The Government may use price analysis techniques including, but not limited to:

- Comparison of prices received
- Comparison with the Independent Government Cost Estimate (IGCE)

M.4 Responsibility Determination

(a) The Contracting Officer will conduct a responsibility determination for the selected contractor per MMAR Part 9.103.
