INTRODUCTION

Responses to this RFI may be used to formulate final requirements and/or to identify qualified vendors capable of meeting those requirements. The description below outlines preliminary capabilities envisioned for Innovation supporting personnel vetting. Responses to the RFI should include detailed information on potential software and products and how the FBI could best implement them, as well as potential costs for implementation (e.g., licensing prices). The FBI may request demonstrations of proposed products and solutions after responses are received.

The information gathered may be used to formulate acquisition strategies for competitive solicitations.

REQUEST FOR INFORMATION (RFI)

BACKGROUND

The FBI currently has a data management solution consisting of multiple capabilities; however, the establishment of a new Enterprise Data Management solution is necessary to ensure the continued ability to meet the requirements of Federal Bureau of Investigation (FBI) and Department of Justice (DOJ) stakeholder divisions and programs, in support of the Government's mission. The desired data management solution should provide maximum flexibility for future enhancements. Respondents are requested to identify the products, appliances, and services that fall within their capabilities.

PURPOSE

The purpose of this Request for Information (RFI) is to canvas industry for entities with the following proven abilities:

The Government requires an Enterprise Solution for Data Management that meets the following requirements:

1. A system utilized for interfacing with the National Finance Center (NFC) to facilitate payroll processing for FBI personnel. This solution serves as a critical integration point with the NFC, enabling the execution of payroll functions for FBI employees. Without this system, the accurate disbursement of salaries and the processing of related payroll transactions for staff cannot be achieved. A product used to communicate with the National Finance Center (NFC) for payroll processing of employees.
2. A system/ product to facilitate the secure exchange of personnel vetting data with the Defense Counterintelligence and Security Agency (DCSA) to support background investigations and security screening for FBI personnel, contractors, and authorized visitors to FBI facilities. In the absence of this capability, critical threat intelligence and findings from other government agencies cannot be transmitted to FBI security teams for the detection and mitigation of potential insider threats.
3. Human Language Technology - Foreign names transliteration, which is the process of representing or intending to represent a word, phrase, or text in a different script or writing system.
4. To send and receive Data from the mainframes
5. Data ingestion /integration, Data processing /analytics Reporting and dashboards.
6. Data ingestion /integration Data processing /analytics Workflow automation.

7. Hybrid: On-Premises Government Environment, Federal Cloud.

The types of products and services needed to meet the requirements of the FBI and DOJ entities are capabilities in the hardware, software, and security management. There is also a possible need for remote consulting services which would include off-site personnel to provide expert advice and guidance to leverage the Data Management Solutions software to its fullest extent and trouble shoot any issues as issues arise.

The FBI is conducting market research, seeking available sources to provide alternative and/or comparable products, appliances, mainframes, and upgrade/maintenance renewals on all items currently utilized.

SEE ATTACHED PRODUCT LIST

The below are current systems, products, services, capabilities, and concepts of operation needed to meet stated requirements:

1. Work Management, Asset Management, Analytics, Monitoring capabilities and Automated Data Queries.
2. Batch processing, Real-time processing, Structured data, Large-scale datasets
3. Maximum response time Data throughput
4. Foreign names transliteration capabilities
5. Mainframe software: (1) zOTC perpetual software, (2) "Resolve Z" tools
6. Distributed Software: software that is not Mainframe software; sold as perpetual licensees.
7. Rational "Tokens": a type of term license model for the Rational Developer Tools used to run current Z Development and Test Environments.
8. Appliances: intenerated hardware and software products; includes DataPower appliances
9. TRIRIGA application suite an integrated workplace management system (Including non-production and production environments)
10. Statistical Package for the Social Sciences (SPSS) software tool suite
11. Aspera Applications (Including Aspera High-Speed Transfer Server and Endpoint)
12. Subscription and Support (S&S) licenses
13. Log collection/retention/archival/retrieval
14. Security Identity Management (ISIM) capabilities
15. Security Reporting Tools

16. System Reporting and Analytics
17. Customizable dashboards, analytics, visualizations, and reports
18. Ability to accommodate investigative data sources.
19. Remote Service Consultant integrated into licensing.
20. Contain editing, analysis, and mapping tools.
21. Integrate with expert labs product.
22. Subject Matter Expert (SME) training options integrated into licensing.
23. Help desk support 24/7
24. Robust help documentation (refers to detailed documentation on tools, use cases, and software updates.

Systems Assessments:

- The Vendor must conduct a comprehensive assessment of multiple technology systems currently available and in use at the FBI to determine the optimal set of systems that best align with the FBI's operational, strategic, and financial needs
- Vendor must also provide a separate comprehensive assessment of multiple technology systems currently available in the market and in use at the FBI to determine the optimal set of systems that best align with the FBI's operational, strategic, and financial needs.
- FBI will then coordinate with the Vendor on an agile implementation towards the optimal solution
- Perform System evaluation: Identify, review, and compare multiple systems relevant to the FBI's functional requirements

Requirements Alignment:

- Assess each system's ability to meet current and anticipated organizational needs, including scalability, interoperability, and compliance with applicable standards
- Deliver an assessment that considers a dual-enclave approach: Secret/Air Gap and Unclassified

Cost analysis:

- Provide a detailed breakdown of ongoing license costs, subscription fees, and any other recurring expenses associated with each system

FEDERAL BUREAU OF INVESTIGATION

FINANCE AND FACILITIES DIVISION | PROCUREMENT SECTION

REQUEST FOR INFORMATION (RFI)

- Evaluate maintenance and support costs, including upgrades, vendor support agreements, and internal resource requirements
- Present a Total Cost of Ownership (TCO) analysis of the full lifecycle costs of each system, including acquisition, implementation, training, licensing, and maintenance

Risk assessment

- Identify potential risks (financial, operational, technical) associated with each system
- Propose mitigation strategies to address identified risks

Recommendation Report:

- Deliver a final recommendation report with a clear recommendation of the optimal system(s), supported by quantitative and qualitative analysis
- Coordinate with the FBI on an agile implementation plan towards the optimal technology portfolio solution, focusing on a strategy and timeline to transition by October 1, 2026, as the priority.

Deliverables

- A written Assessment Report including system comparisons, cost models, and recommendation report
- A Presentation of Findings to FBI stakeholders, highlighting key insights and rationale for the recommended system(s)
- Supporting documentation of all data sources, assumptions, and methodologies used in the analysis

Performance Standards

- The Vendor must ensure that all analyses are objective, evidence-based, and free from conflicts of interest
- Recommendations must be actionable, financially sustainable, and aligned with the FBI's strategic goals

All deliverables must be provided in both electronic and print-ready formats.

The contractor must deliver a capabilities statement that includes a cover letter and technical approach as shown below.

REQUEST FOR INFORMATION (RFI)

- Presentations of findings to FBI stakeholders
- Supporting documentation of data sources, assumptions, and methodologies

TARGET AUDIENCE

This RFI is open to manufacturers for market research only to request input from potential providers of data management solutions that provide hardware, software and purchase new software licenses, training, and remote consulting services. Section 508 requires that Government Agencies ensure that their software is accessible by those with disabilities. This requirement requires all products to be 508 compliant.

The Government would like to know which firms can provide the product and services for the contemplated capabilities by identifying themselves and responding to this RFI. The Government requests the following information:

1. Company name and business size.
2. Provide evidence to show that your company can provide the requested services and/or products required (i.e., technical ability, personnel, and experience). Information provided shall be succinct and related to the requested information in this RFI. All submissions shall be unclassified. Responses shall not be a regurgitation of the FBI's requirements. Responses shall demonstrate your company's abilities to provide the requirements.
3. Address whether your company has a GSA Schedule and if they are capable of providing these services on schedule. If able to provide the services on schedule, provide the Schedule Name and Schedule Identification Name (SIN).
4. Any other assumptions, comments, concerns, and/or questions relating to the contemplated services.
5. Confirmation company is active in SAM
6. Company UEID
