*Battery Sold Separately

The TASER X26P is our smallest and most compact Smart Weapon, and its ergonomically designed handle is made with ease of performance in mind. The TASER X26P is larger where it matters—in the handle.

The TASER X26P is a single-shot device, with its compact size and familiar shape, the TASER X26P can be conveniently carried.

Axon Yellow

The TASER X26P is available in Axon Yellow, the iconic yellow color synonymous with the confidence and quality built by decades of technological advancements under the TASER brand.

Product Details

The Dataport Download Cable is specifically designed to plug into the TASER X2 or X26P CEW via the battery well and connects to a PC using an available USB port.

This cable allows for:

- the upload of firing data from the X2 or X26P CEW to [Evidence.com](https://evidence.com) via Online SYNC
- the download of the firing data to a local computer via Offline SYNC
- a simple, easy, and quick process

Optional download kits are available to permit departments to access the encrypted deployment information in the X2 and X26P CEW memory through the [Evidence.com](https://evidence.com) services or the Sync Offline Client software (Online or Offline). The X2 and X26P CEW uses a USB adapter to connect to any Windows® XP SP3 or better computer.
