Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

A. Overview

Please note: This BAA constitutes a 3 step process to possible award:

STEP I: Submission of White Papers

STEP II: Submission of Technical Proposal by Invitation Only

STEP III: Submission of Cost Proposal by Invitation after submission of Tech Proposal

A.1 Introduction

This notice constitutes a Broad Agency Announcement (BAA) for the acquisition of research and development in accordance with Federal Acquisition Regulation (FAR) 35.016, Broad Agency Announcement (BAA) as supplemented with additional information included in this notice. No other solicitation will be issued. Only the information provided in this notice is available. Requests for other solicitations shall be disregarded.

Subject to availability of funds, the Government plans to invest approximately \$35 million during Fiscal Years 2022-2027 for funding research in response to this BAA.

This Subsistence Research and Development (R&D) BAA will remain open for five (5) years. During this time, the Government may accept white papers from any interested respondent. A SUBNET white paper is an abbreviated document (limited to 7 pages) in which the respondent describes a project concept that is within the scope of one of the technical Areas of Interest set forth in Section C, Areas of Interest, in this BAA. A vendor may propose separate white papers on more than one area of interest. Offerors should focus on one requirement per paper. There is no limit to the number of white papers that an offeror may submit. The purpose of the white paper is to preclude respondents from incurring substantial technical proposal preparation costs on proposed research that is not of interest to DLA. Respondents are encouraged to submit white papers as a way to determine DLA's interest prior to investing in technical proposal development. DLA will select white papers that are most promising for further consideration and once selected then request technical proposals from the respondents. Requests for proposals are by invitation only. A request for a technical proposal does not guarantee contract award.

NOTE: Neither submission of a white paper nor an invitation to submit a proposal is an authorization to begin work.

The Government anticipates making, but is not obligated to make, multiple contract awards under this BAA. The Government reserves the right to select for award all, some, or none of the proposals requested. The primary basis for selecting proposals for acceptance shall be technical merit, importance to agency programs, and funds availability. The proposals will also be evaluated based on research management and organizational structure, past performance, capabilities, and related experiences, as specified in the Technical Proposal, Section E. Cost realism and reasonableness will also be considered. Awards will be subject to funds availability.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Offerors responding to this BAA will propose a R&D short-term project in the form of a white paper related to the Subsistence Supply Chain that addresses one or more of the Areas of Interest in Section C. Offerors are encouraged to propose innovative solutions within the scope of the SUBNET Program as outlined herein. Equal consideration will be given to all approaches that enable improved military subsistence and combat rations products and processes in terms of shorter lead times, higher throughput, reduced inventory and overhead cost, and improved quality.

SUBNET white papers that include a new technology or potential future trend must be vetted through the respective material developer (e.g., the Natick Soldier Research, Development and Engineering Center (NSRDEC), Combat Feeding Directorate (CFD) for combat rations, field food service equipment and related technologies to determine and assess the maturity of the technology or future trend and readiness for SUBNET involvement. This will be completed via the Program Manager.

A.2. Background

The Defense Logistics Agency (DLA) seeks interested parties to participate in the Subsistence Network Research and Development (R&D) Program, (hereinafter referred to as SUBNET). The SUBNET Program is a DLA-Sponsored DoD Manufacturing Technology Program and is the successor to the previous Combat Rations Network (CORANET) R&D program.

CORANET was established in 1996 to develop and introduce modern manufacturing processes into the U.S. industrial base to assure timely availability of affordable, high quality, high variety combat rations to the warfighters. The scope of the CORANET program included all of the manufacturing technologies related to the production, storage and distribution of combat rations.

Unlike its predecessor, SUBNET will have a wide-spread focus on solutions to develop and promote manufacturing improvements in the subsistence supply chain. The program goals are to leverage the latest technologies, encourage innovation and modernization, and to maximize capability and capacity in subsistence. The program engages all elements of the supply chain including the DoD combat ration producers, commercial food suppliers, academia, and other industry and federal agencies to research, leverage, implement, and transition improved technologies in the subsistence supply chain. The research seeks the

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

identification and test of low-risk, high-impact technology, quality and process improvements of the individual and group combat rations, and improvements in subsistence products or equipment. The SUBNET short term projects that are awarded from this BAA are anticipated to result in such measures as reduced cost, increased efficiencies, and improved surge demand capabilities. These improvements will transition to industrial base suppliers, military services, and the warfighters. Research projects shall involve current trends related to combat rations, field feeding solutions, food equipment, food footprint, food innovations, food safety and defense; garrison feeding, nutrition and health, storage and packaging solutions, and water security (see Section C).

SUBNET contracts will require participation in the execution of specified research projects. Unlike the previous CORANET program, there will be no “partnership” contracts providing only for participation in program planning activities such as workshops and meetings.

B. General Information

B.1. Competitive Procedures

Selection of projects for award under this BAA fulfills the requirement of full and open competition using “other competitive procedures” in accordance with FAR 6.102(d)(2)(i) and (ii). White papers and resulting proposals will not be evaluated against each other since they are not submitted in accordance with a common work statement. Evaluation of proposals shall be accomplished through a detailed technical review of each proposal.

B.2. Preparation Cost

DLA shall not be responsible or liable for any costs incurred by any parties in the preparation and submission of any white paper, technical proposal or cost proposal in response to this BAA.

B.3. Eligibility Information

This is an unrestricted acquisition. Any responsible (see FAR Subpart 9.1) source (respondent) capable of satisfying DLA’s needs may participate. All responsible sources capable of satisfying the Government's needs may submit a white paper, which will be considered by DLA. Technical Proposals in lieu of white papers, will also be accepted, **but are not recommended**. DLA encourages industry, educational institutions, small businesses, small disadvantaged business concerns, historically black colleges (HBCU) and universities and minority institutions (MI) to submit white papers under this BAA. Small business teaming is encouraged. However, no portion of this BAA shall be set aside for any type of small business participation due to the impracticality of reserving discrete or severable areas of research in this technology. For purposes of this acquisition, the small business size standard is 1000 employees and the North American Industry Classification System (NAICS) code is 541715, Research and Development in the Physical, Engineering and Life Sciences.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

B.4. BAA Response Submission

In accordance with FAR 3.104-4, your company is required to mark all material that may be Source Selection Information as described at paragraph (10) of the “Source Selection Information” definition in FAR 2.101, to include the cover page and each page that may contain source selection information with the legend “Source Selection Information – See FAR 2.101 and 3.104”. Although the information in paragraphs (1) through (9) of the definition in 2.101 is considered to be Source Selection Information whether or not marked, all reasonable efforts must be made to mark such material with the same legend. If you are unsure if particular information is Source Selection Information as defined in FAR 2.101, consult your Agency Officials.

Note: Source Selection markings are required for all documents submitted in response to this BAA, which includes White Papers and Technical/Price Proposals (when applicable).

Vendors may respond to this BAA by submitting a white paper by e-mail to the Contracting Officer, Andrea E. Nicolucci, andrea.nicolucci@dla.mil and Contract Specialist Gary Carson, gary.carson@dla.mil and cc the DCSO R&D Mailbox at RandD.DCSO@dla.mil as a portable document format (.pdf) file. Because of limitations in the DLA e-mail system, attachments cannot exceed 15 megabytes. No other electronic submissions will be accepted. If a submitter has difficulty submitting through the mail box, submitters may use (<https://safe.apps.mil/>) and notify the POC’s of so doing.

B.5. Additional Information Requests

Respondents may be contacted to provide additional information required for technical proposal evaluation and cost realism analysis. Respondents may be removed from the proposal evaluation process if the respondent and the contracting officer fail to negotiate mutually agreeable terms within a reasonable period of time.

Offerors may submit formal written general questions to the contracting officer. No telephone questions will be answered.

All relevant BAA clarification question(s) will be posted as an amendment to this solicitation on Sam.gov. Offerors are advised to monitor Sam.gov for amendments to the solicitation.

B.6. Notifications

All offerors submitting a White Paper in response to this BAA will receive an email message acknowledging receipt.

Full Proposals

Offerors invited to submit full proposals will receive an email providing instructions for the submission of

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

a full technical proposal or an email advising that the White Paper was not selected for invitation. Email notification will also be sent out if the technical proposal is not acceptable.

Cost Proposal

Offerors selected to submit Cost proposals will be so notified by email after Technical proposal submission. Email notification will also be sent out if the cost proposal is not acceptable.

Debriefs

White paper evaluation will not entitle the offeror to a debrief as no award can result from a White Paper.

B.7. Representations and Certifications

Respondents shall have a valid registration with no exclusions in the System for Award Management website at <http://www.sam.gov>. Annual representations and certifications must be completed via the website and valid for the proposed performance period.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

B.8. Contract Type

DLA intends award of cost-reimbursement contracts (FAR Subpart 16.3) resulting from this BAA. Proposals should be based on the cost-reimbursement contract type: cost-plus-fixed-fee. DLA reserves the right to award a firm fixed price, level of effort term contract (FAR Subpart 16.202) or fixed price level of effort contract (FAR Subpart 16.207), if the Contracting Officer deems it to be in the Government's best interests. If DLA awards a firm fixed price level of effort contract, performance standards will be included at that time.

C. Subsistence Network Areas of Interest

C.1 Combat Rations. This refers to operational rations, which are individual or group rations. Individual Rations are packaged, pre-cooked, shelf stable food items that provide troops a nutritionally balanced diet either in complete individual meals or a daily ration. Group Rations are nutritionally complete, unitized or pre-configured in group modules to support small or large group feeding in 18 or 50 person modules depending on the specific group ration type. Contractor Teaming with one or more combat rations assemblers (also see section 5 last two sentences) on projects in this Area of Interest is encouraged, but is not required.

C.2 Food Equipment. Seeking technology-based solutions that improve the energy efficiency, mobility, maintainability, or usability of current field feeding procedures and operations.

C.3 Field Feeding Solutions. Field Feeding refers to the method or system utilized to provide food to troops training or serving in combat operations. The solutions involved should help improve efficiencies along with reducing production and transportation lead times.

C.4 Food Footprint. Also referred to as “foodprint”, food footprint refers to the greenhouse gas emissions produced by growing, rearing, farming, processing, transporting, storing, cooking and disposing of the food you eat. We seek solutions that will reduce food waste, reduce size, optimize storage capacity, and reduce cost such as lowering current food footprint levels.

C.5 Food Innovations. This refers to making inventive changes to current established food production, products, etc. Innovations may be incremental, involving gradual marked changes to the current food supply system, or disruptive where it almost immediately changes existing food production. Proposals should be focused on existing fielded ration products. Introduction of new food products or technologies must be done in collaboration with the material developer, the Natick Soldier Research Development and Engineering Center (NSRDEC) Combat Feeding Directorate (CFD). This will be completed via the Program Manager.

C.6 Food Safety and Defense. Food Safety involves risk-assessment, prevention, and monitoring activities associated with protecting the food supply from incidental contamination from the source ingredients of a product, through production, distribution, and consumption. Food Defense involves activities associated with protecting the nation's food supply from deliberate or intentional acts

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

of contamination or tampering. Solutions should address effective and efficient ways to combat food contamination whether incidental or intentional. Solutions should be researched in collaboration with the U.S. Army Public Health Center and CFD.

C.7 Garrison Feeding. Food service provided to troops at a permanent military installation.

C.8 Nutrition and Health. Advancements to food product that will increase the nutritional value of food products and the accessibility of healthy food options for active duty troops in the field or in garrison.

C.9 Storage and Packaging Solutions. Improvements to the materials used to wrap or protect food or assist in the packing or form of packages. Examples of solutions would be technologies that will extend the product's shelf life or packaging that will improve the overall food quality.

C.10 Surge and Sustainment Support: Refers to innovations in production of food, operational rations or equipment, which will result in increased output thereby improving support to the warfighter during a surge event.

C.11 Water Security. Refers to technology innovations in water (bottled) or hydration alternatives.

***C.12 Subsistence Supplies Condition Monitoring During Shipments:**

This particular area of interest may involve becoming part of a Cybersecurity Maturity Model Certification (CMMC) pilot program. Interested parties should be willing to participate in the CMMC level 1 program and acceptance. Additional information will be provided via formal amendment with the final decision and instructions for submission.

C.13 Additional Topics. Respondents may propose emerging or innovative research efforts that are not within one of the listed areas of research interest, but that fulfill the objectives of this Subsistence Network BAA, with a clear statement describing the proposed area of research interest.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

D. White Papers

D. 1. White Paper Information

Interested parties are required to submit a white paper as described in this section. The white paper will be reviewed to determine its relevance to the DLA mission, objective, and Area(s) of Interest. It shall include the following: the specific technical Area(s) of Interest (as stated in the BAA), technical description of the effort and identification of risks, project duration, preliminary schedule, and approximate total cost. The period of performance of proposed projects should be from 6 months to 3 years. White paper submissions with a total cost in excess of one million dollars will not be considered. Major equipment purchases, maintenance, and repairs will not be funded by DLA.

To ensure all white papers receive proper consideration, DLA requires all respondents to follow the same format. White papers that do not conform to the format will not be reviewed. White papers shall not exceed seven (7) single-sided pages (NOT including the cover page). The white paper must provide the information listed in each section below.

Cover Page

- (1) BAA Number
- (2) NAICS Code
- (3) BAA Area(s) of Interest from Section C above
- (4) Respondent's Technical Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)
- (5) Respondent's Administrative/Contracting Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)
- (6) Contractor's business type selected among the following categories: Large Business, Small Disadvantaged Business (SDB), Other Small Business, HBCU, MI, Other Educational, or Other Nonprofit.
- (7) CAGE Code
- (8) Subcontractors participating in the research (if none state "not applicable")
- (9) Small businesses participating in the research (if none state "not applicable")
- (10) Historically Black Colleges and Universities or Minority Institutions participating in the research (if none state "not applicable")
- (11) Performance Period
- (12) Contract type selected from one of the cost-reimbursement contract types (cost-plus-award-fee).
- (13) Approximate total cost
- (14) Project Title

Section 1 – Abstract of the Proposed Project: brief abstract with information explicitly pertinent to the proposed research and development effort.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Section 2 – Introduction: The introduction section shall include a problem statement, objective, scope, and proposed benefits of the proposed project. This section shall also clearly define how the proposed project relates to one or more Areas of Interest in this BAA and how it will provide a quantifiable benefit to DLA and DoD.

Section 3 – Technical Approach and Scientific Merit: Respondents shall provide a plan for executing the project that includes a detailed description of the scientific merit of the project and the technical maturity of the technology. The technical approach should also clearly define how the proposed project will improve fielded products and current processes in the subsistence supply chain. Each white paper shall describe: (1) the improvement to be established; (2) tasks to be performed; (3) new and creative solutions; (4) application of the proposed technology; (5) how the technology will address long and short-term needs of DLA; (6) expected benefits and (7) research duration.

Section 4 – Expected Outcomes of the Proposed Project: Respondents shall define benchmarks or milestones and goals of the proposed project. This section should include the deliverables, schedule, transition plan, and the estimated return on investment (ROI) or business case and quantifiable benefits to DLA and DoD. The project shall also identify risks that could prevent the project from being successful.

Section 5 – Research Management and Organizational Structure: Respondents shall describe (1) how the research will be managed, (2) the organizational structure that will support the research, and (3) key personnel who are qualified to perform the research. Respondents shall also provide how it will ensure performance stability and reliable customer service and commitment to DLA and the program for the duration of the contract performance period. State whether the proposed project includes partnering with one or more combat rations Assemblers (i.e., AmeriQual, Sopakco, or Wornick Foods). If so, describe how the respondent intends to work with the Assembler on the proposed project.

Section 6 – Cost Estimate and Period of Performance: The respondent shall include an estimate of the total cost, period of performance, and an outline of milestones for the proposed project. The respondent shall also include sub-total cost estimates for management, labor, and materials for the proposed project. This should not be a full cost proposal, since one will only be requested if the full technical proposal is found to be acceptable.

D.2. White Paper Selection.

DLA intends to select white papers that are the most promising for further consideration. Respondents shall assume that DLA has no prior knowledge of the respondent's facilities and experience, and DLA will base its review exclusively on the merits and content of the information presented in the white paper. DLA will make a determination of whether the merits and content of the white paper are acceptable or not acceptable. DLA reserves the right to request technical proposals from any, all, some, or none of the respondents submitting white papers. Any such request for technical proposals does not guarantee award. Respondents may not submit a technical proposal until DLA has received and reviewed their white paper and explicitly requests a technical proposal as provided herein.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

White papers presenting non-innovative, marginal improvements are inappropriate under this BAA and will receive no further consideration. White papers will not be evaluated but will be reviewed to determine whether, based on the Area(s) of Interest, the white papers present research of sufficient interest to DLA to warrant submission of technical proposals.

E. Technical Proposals

E.1. Technical Proposal Information

If DLA requests a technical proposal from a respondent, the respondent shall follow the format detailed in this section. DLA reserves the right to select all, some, or none of the proposals requested and received.

E.2. Technical Proposal Format

To ensure that all technical proposals receive proper consideration, DLA requires all respondents to follow the same format. Technical proposals that do not conform to the format will not be evaluated and will not be eligible for award. Respondents shall submit technical proposals in the following format: (1) up to twenty (20) single-sided pages including, body, appendices, and attachments; (2) 8.5" x 11" page size; (3) a header on each page to identify page content and page number; and (4) type font 12 point Times New Roman with one inch margins around the page. Any project Gantt charts may be submitted on larger pages (e.g., legal size), as required to be readable. This is included in the total page count. There is no penalty for submitting a technical proposal of less than 20 pages, as long as the technical proposal covers all the required material. Résumés and certifications for technical data and computer software will not be counted as part of the 20-page limit. Technical proposals must be clear and concise, and must include sufficient detail for substantiating the validity of the research. Information deemed by respondent to be proprietary shall be clearly marked as such. Technical proposals must address the evaluation factors provided in Section E. **Technical proposals may NOT contain cost or pricing information.**

Respondents shall assume that DLA has no prior knowledge of respondent's facilities and experience, and DLA will base its evaluation exclusively on the merits and content of the information presented in the technical proposal. The only exception is that DLA reserves the right to evaluate relevant past performance from other sources in addition to information included in the technical proposal.

Proposals must identify all proprietary claims in support of, or required for the use of the research. Each page containing proprietary information shall be marked "proprietary." If there are no proprietary claims, the proposal shall so state.

Technical proposals shall consist of five parts:

Part 1 - Proposal Cover Sheet

Part 2 - Executive Summary

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Part 3 - Scientific and Technical Merit

Part 4 - Research Management and Organizational Structure

Part 5 - Past Performance, Capabilities and Related Experience

Part 1 – Proposal Cover Sheet: respondents shall provide the following information:

- (1) BAA Number
- (2) NAICS code
- (3) BAA Area of Interest from Section C above
- (4) Respondent's Technical Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)
- (5) Respondent's Administrative/Contracting Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)
- (6) Contractor's business type selected from the following categories: Large Business, Small Disadvantaged Business (SDB), Other Small Business, HBCU, MI, Other Educational, or Other Nonprofit.
- (7) CAGE Code
- (8) Subcontractors participating in the research (if none state "not applicable")
- (9) Small businesses participating in the research (if none state "not applicable")
- (10) Historically Black Colleges and Universities or Minority Institutions participating in the research (if none state "not applicable")
- (11) Performance Period
- (12) Contract type selected from one of the cost-reimbursement contract types (cost-plus-award-fee)
- (13) Approximate total cost
- (14) Research type (applied research or development)
- (15) Research title
- (16) **Proposal prices and terms and conditions shall remain valid for 180 days from the submission date of the full proposal.**

Part 2 – Executive Summary

The Executive Summary will not be evaluated but will be reviewed to gain an understanding of the overall technical proposal content. It shall identify and highlight significant features, summarize innovative claims and unique contribution(s) of the technical proposal, include the salient points of the proposed research, and the expected outcome improvement associated with the research. The respondent shall submit the Executive Summary on one page or less.

Part 3 – Scientific and Technical Merit

Respondents shall provide research plans that explain the scientific and technical merit of the research. Research plans, using active voice, shall be developed in an orderly progression and presented in

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

sufficient detail to establish the methodology and feasibility of accomplishing the research. Respondents shall submit research plans that include, at a minimum, the 21 sections listed below.

Section 1 – Research Description: Respondents shall address one or more BAA Areas of Interest from Section C above in terms of outcomes that will be a manufacturing technology improvement to DLA's operations or processes.

Section 2 – Research Background: Respondent shall include any information that is necessary to understand the history and need for the research.

Section 3 – Objective: A description of the goal or anticipated achievement of the research.

Section 4 – Proprietary Data: State whether proprietary data is included in the research plan. If yes, provide a description of all proprietary claims to results, prototypes, or systems supporting and/or necessary to perform the research

Section 5 – Assumptions: State whether assumptions are included in the research plan. If yes, provide a description of any assumptions that were used to develop the research plan.

Section 6 – New and Creative Solutions: Explain what new and creative solutions the research will develop that will be an enhancement to DLA's operations or processes.

Section 7 – Technology Application: Discuss the application of the proposed technology.

Section 8 – Short-term Needs: Explain how the technology will address short-term needs of DLA.

Section 9 – Long-term Needs: Explain how the technology will address long-term needs of DLA.

Section 10 – Expected Benefit: Explain the expected benefit to DLA.

Section 11 – Research Approach: Provide a detailed description of the approach to conducting the research including a detailed description of all research tasks to be performed during the research. Also provide a detailed description of contractor teaming approach or subcontractor relationship.

Section 12 – Impediments or Risks: Explain the impediments or risks to implementing the research plan and how they will be overcome, including constraints and planned responses for each.

Section 13 – Business Case: Provide a business case with specific metrics for measuring progress and success.

Section 14 – Work Breakdown Structure: Submit a detailed work breakdown structure for all research tasks, not including costs, in a table format.

Section 15 – Performance Period and Schedule: Submit a detailed schedule with milestones that confirms the performance period is realistic. Include a Program Evaluation Review Technique (PERT) chart, Gantt chart, or other appropriate format that displays all research tasks, their schedule and dependency relations.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Section 16 – Contract Deliverables: The QASP lists the deliverables, as stated below, that are required, under the terms of any resultant contract for contract performance and payment. The QASP will identify the necessary information needed by the contractor to deliver acceptable deliverables to DLA. QASP will be provided in the resultant contract.

Deliverable	Description	Due Date
1	Contractor's Progress, Status and Management Report (Monthly Report)	15 th of every Month
2	Contract Funds Status Report (Monthly Report)	15 th of every month
3	Scientific and Technical Report (Final Report)	30 calendar days after completion of contract

Section 17 – Resources: Provide a description of resources (personnel involved, labor categories, hours, material, etc.) allocated against all research tasks.

Section 18 – Key Personnel: List the key personnel along with the percentage of effort to be expended by each person to perform each research task. Respondents shall provide a one-page resume for each key person, describing the specific experience and qualifications each individual has to perform their assigned research task(s). Résumés submitted will not be counted as part of the 20 page limit.

The contractor shall make no substitutions of key personnel unless the substitution is necessitated by illness, death, or termination of employment. The contractor shall notify the contracting officer within fifteen (15) calendar days after the occurrence of an event that warrants a substitution. The contractor shall provide a detailed explanation of the circumstances necessitating the proposed substitutions, complete resumes for the proposed substitutes, and any additional information requested by the contracting officer. Proposed substitutes shall have comparable qualifications to those of the persons being replaced. The contracting officer will notify the contractor within a reasonable time frame of the key personnel acceptance decision. The contract will be modified to reflect any approved changes of key personnel.

Section 19 – Equipment: State whether equipment will be purchased. If yes, provide a description of any equipment to be purchased in order to perform the research. Please note, projects requiring substantial investment in equipment are generally not appropriate under the BAA.

Section 20 – Material: State whether material will be purchased. If yes, provide a description of any material to be purchased in order to perform the research.

Section 21 – Contractor-acquired property: State whether contractor-acquired property will be purchased. If yes, provide a description of the property that will be acquired by the contractor to perform the research.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Section 22 – Technical Data: State whether technical data will be developed. If yes, state what technical data is to be developed as a result of the research and whether it will be delivered to DLA with unlimited, limited, or government purpose rights, and submit a signed certification per Defense Federal Acquisition Regulation Supplement (DFARS) 252.227-7013, Rights in Technical Data – Noncommercial Items, that certifies the identification and delivery of data to be furnished with restrictions on use, release, or disclosure.

Section 22 - Computer Software: State whether computer software will be developed. If yes, state what computer software is to be developed and delivered to DLA with unrestricted and restricted rights as a result of the research and submit a signed certification per DFARS 252.227-7014 Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation that certifies the identification and delivery of computer software and computer software documentation to be furnished with restrictions on use, release, or disclosure. Refer to DLAD 39.9001(k)(4)(i) Procedures for IT procurement if internal use software is developed.

Section 23- Combat Rations Assemblers: State whether the proposed project includes partnering with one or more combat rations Assemblers (i.e., AmeriQual, Sopakco, or Wornick Foods). See also section 5 above last two sentences. If yes, provide details of how the respondent intends to work with the Assembler on the proposed innovative technology short term project.

Part 4 - Research Management and Organizational Structure

Respondents shall describe how the described research will be managed and show how the proposed organizational structure will ensure performance stability, reliable customer service and commitment to DLA for the duration of the performance period.

Part 5 - Past Performance, Capabilities and Related Experience

Section 1 - Work Experience: Respondents shall provide information pertaining to prior significant and related research, work experience, and expertise for the proposed research. The information shall include an explanation of how this experience or expertise will be beneficial to the proposed research. Respondents shall identify not less than 3 but no more than five contracts along with the performance period and a brief performance history for each contract within the last three years for which they have provided services and/or supplies of a nature that is consistent with the Area(s) of Interest and relevant to the proposed research. In addition, to the 3-5 prior contracts submitted, respondents shall provide all contracts terminated for cause or in process of termination within the timeframe. Contract information for all contracts shall include the contract number, the proposed dollar value and the final dollar value; the period of performance proposed and the final POP. For terminated contracts, provide the reasons for termination.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Section 2 - Points of Contact: Respondents shall provide point-of-contact information for each contract identified in response to Part 5, Section 1, above, including the company name, point of contact names, e-mail addresses, and phone numbers.

Section 3 – Contracting Teaming Arrangements: State whether respondent is intending to include a teaming partners. The contractor shall advise if they have experience in using teaming arrangements and where the related teaming partner work will be performed. The teaming arrangement monitoring and contractual responsibility remains with the Prime contractor and not the Government. Respondents shall also provide points of contact for team members, including company name, individual names, e-mail addresses, and phone numbers.

Section 4 - Bibliography: Respondents shall include a bibliography of relevant technical papers and research, published and unpublished, which documents the technical ideas upon which the research is based.

E.3. Technical Proposal Evaluation

DLA will evaluate technical proposals in accordance with this section through a peer or scientific review process. DLA will not evaluate technical proposals against each other since they are not submitted in accordance with a common work statement. Technical proposals will be evaluated for an overall technical capability, which is innovative, logical, well-defined and meaningful, along with a sound research plan that provides a solution to one or more Areas of Interest listed in Section C of this BAA and shows promise to improve manufacturing technologies for fielded products and existing processes for DLA. Evaluation of proposals shall be accomplished through a detailed review of each proposal, using the following criteria listed in descending order of relative importance:

Technical Factors:

1. Scientific and Technical Merit
2. Research Management and Organizational Structure
3. Past Performance, Capabilities and Related Experience

E.3.1 Factors 1 - Scientific and Technical Merit

Technical proposals will be evaluated on overall technical capability and a sound research plan, which must be innovative, logical, well-defined, and meaningful, that provides a solution in one or more Areas of Interest listed in Section C of this BAA and addresses: (1) the ability of the proposed research to improve DLA's operations; (2) the degree to which the plan presents new and creative solutions to improve the subsistence supply chain; (3) the degree to which the research will address short and long term operational needs of DLA; (4) the expected benefits to DLA; (5) the likelihood of successfully accomplishing the innovative approaches and achieving the proposed solutions in the research plan; and (6) the potential contribution and relevance to the DLA mission.

E.3.2 Factor 2 - Research Management and Organizational Structure

Technical proposals will be evaluated on how the proposed research as described in the research plan will be managed and how the organizational structure will ensure performance stability, reliable customer service, and the degree to which the proposed key personnel will successfully accomplish the proposed research.

E.3.3 Factor 3 - Past Performance, Capabilities and Related Experience

Technical proposals will be evaluated on (1) relevant experience and expertise of the respondent; (2) relevant technical papers and research published and unpublished, which document the technical ideas and projects upon which the proposed research is based; and (3) the degree to which current and previous, within the past three years, contracts indicate the probability of the respondent successfully accomplishing the proposed research during the performance period. The recency, relevancy, source, and context of the past performance will be considered. In the case of a respondent without a record of relevant past

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

performance or for whom information on past performance is not available, the respondent will not be evaluated either favorably or unfavorably on past performance.

E.4 Technical Proposal Selection

DLA may select technical proposals that are most promising for further consideration. DLA reserves the right to request cost proposals from any, all, some, or none of the respondents submitting technical proposals. Any such request for cost proposals does not guarantee award. Technical proposals for non-innovative, marginal improvements are inappropriate under this BAA and will receive no further consideration and a cost proposal will not be requested. The contracting officer will provide only one of the following three responses to a respondent submitting a technical proposal: (1) a statement that the described research will not be pursued by DLA at this time; (2) a request for additional information, or (3) a request to submit a cost proposal.

Evaluation Rating Scheme

Proposals will be assigned a rating based on the adjectival ratings below.

Factor 1 – Overall Scientific and Technical Merit (Feasibility)

Acceptable (A): Response demonstrates generally satisfactory scientific and technical merit and soundness of the technical concept to advance the state-of-the-art or increase knowledge or understanding in an Area of Interest related to Metal Casting. Probability of success is reasonable as the offeror's response includes strengths and weaknesses. Any weaknesses identified in the offeror's response are not substantial enough to adversely impact respondent's strengths and may be corrected through negotiations or clarifications. No deficiencies are identified in the response.

Not Acceptable (NA): Response demonstrates generally unsatisfactory scientific and technical merit and soundness of the technical concept to advance the state-of-the-art or increase knowledge or understanding in an Area of Interest related to Metal Casting. Response may contain some strengths, but probability of success is low as the offeror's response contains significant weaknesses or deficiencies that are unlikely to be corrected through negotiations or clarifications.

Factor 2 – Viability

Acceptable (A): The proposed effort is viable and somewhat likely to transition into an operational capability. The offeror demonstrates a reasonable understanding of working with DLA and DoD and of relevant DLA and DoD policy. Response may contain strengths. Weaknesses of the offeror's response,

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

where and if applicable, are not substantial enough to conversely impact respondent's strengths. Weaknesses identified may be corrected through negotiations or clarifications. No deficiencies are identified in the response.

Not Acceptable (NA): Viability of the proposed effort is questionable and it is not likely to transition into an operational capability. The offeror demonstrates little or no understanding of working with DLA and DoD and of relevant DLA and DoD policy. Response may contain some strengths, but identified significant weaknesses and/or deficiencies are determined as having a critical impact on successfully fulfilling the Government's requirement.

Factor 3 – Desirability

Acceptable (A): The proposed solution offers some evidence of benefits to DLA and has characteristics such as low barriers to transition, simplicity, ease of use, physical dimensions, etc. that make it somewhat likely to be adopted by DLA and industry. Response may contain strengths. Weaknesses of the offeror's response, where and if applicable, are not substantial enough to conversely impact respondent's strengths. Weaknesses identified may be corrected through negotiations or clarifications. No deficiencies are identified in the response.

Not Acceptable (NA): The proposed solution offers little or no evidence of benefits to DLA and has few or no characteristics such as low barriers to transition, simplicity, ease of use, physical dimensions, etc. that make it somewhat likely to be adopted by DLA and industry. Response may contain some strengths, but identification of significant weaknesses and/or deficiencies are determined as having a critical impact on successfully fulfilling the Government's requirement.

Factor 4 – Past Performance, Capabilities, and Related Experience

Acceptable (A): Response demonstrates generally satisfactory experience which is relevant to an area of research interest in the BAA. Response demonstrates satisfactory past performance in implementing or sustaining systems or processes which are similar to those being proposed. Response generally demonstrates satisfactory overall past performance as it relates to meeting technical, schedule, cost and/or other objectives/requirements. Reasonable probability of successfully accomplishing the DLA requirement based on experience and past performance.

Not Acceptable (NA): Response demonstrates generally unsatisfactory overall experience which is not relevant in managing and performing tasks pertinent to an area of research interest in the BAA, and unsatisfactory experience in implementing or sustaining systems or processes to those being proposed. Generally, demonstrates unsatisfactory overall past performance. Low or no probability of successfully accomplishing the DLA requirement based on past performance.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Neutral: The respondent has no relevant record of past performance. Respondent will not be rated favorably or unfavorably.

Factor 5: Cost Realism

A cost realism analysis will be performed in accordance with FAR 15.404-1(d) *Cost realism analysis*. Realism will be based on an evaluation of the respondent's cost proposal to determine whether the estimated cost elements are realistic for the work to be performed; reflect a clear understanding of the requirements and are consistent with the respondent's technical proposal (inclusive of cost management techniques). In addition, funds availability will be a basis for selection.

Overall Consensus Ratings

Acceptable (A): Response addresses the minimal level of information requested in the BAA. Respondent's response may contain strengths and weaknesses. Weaknesses in the offeror's response, where and if applicable, are not substantial enough to adversely impact respondent's strengths. Weaknesses identified may be corrected through negotiations or clarifications.

Not Acceptable (NA): Response did not address even the minimal level of information requested in the BAA. The offeror's response did not demonstrate an understanding of the BAA and ability to meet applicable program objectives and/or performance parameters. It is unlikely that significant weaknesses and/or deficiencies can be corrected through negotiations or clarifications.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

F. Cost Proposal Information

The request for cost proposal instructions and cost proposal format is listed below. Cost proposals shall not be provided until DLA has requested them based on evaluation of the technical proposal. Once requested, vendors may submit cost proposals to the following by e-mail to the Contracting Officer, Andrea E. Nicolucci, andrea.nicolucci@dla.mil and Contract Specialist Gary Carson, gary.carson@dla.mil and cc the DCSO R&D Mailbox at RandD.DCSO@dla.mil as a portable document format (.pdf) file. Because of limitations in the DLA e-mail system, attachments cannot exceed 15 megabytes. No other electronic submissions will be accepted. If a submitter has difficulty submitting through the mail box, submitters may use (<https://safe.apps.mil/>) and notify the POC's of so doing.

**DO NOT submit a cost proposal unless it is requested by DLA.
Any cost proposal submitted without being requested by DLA will be
discarded without review.**

F.1 Cost Proposal Format

To ensure all cost proposals receive proper consideration, DLA requires all respondents to follow the same format. Cost proposals that do not conform to the format will not be analyzed and will not be eligible for award. Respondents shall submit cost proposals within 30 calendar days of contracting officer's request in the following format: (1) 8.5" x 11" page size; (2) a header on each page to identify page content and page number; and (3) type font 12 point Times New Roman with 1 inch margins around the page. No page limits apply to cost proposals. The cost proposal must reflect an understanding of the research, perception of risks, and ability to organize and perform the task(s) stated in the technical proposal. Respondents shall submit the following information:

- Part 1 – Overview
- Part 2 - Cost or Pricing Data (certified when requested by the Contracting Officer)
- Part 3 - Work Breakdown Structure
- Part 4 – Proposal Adequacy Checklist (provided at the end of the BAA)

Part 1 – Overview

F1.1 Cost Proposal Cover Sheet: respondents shall provide the following information:

- (1) BAA Number
- (2) NAICS code
- (3) BAA Area(s) of Interest from Section C above
- (4) Respondent's Technical Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

-
- (5) Respondent's Administrative/Contracting Point of Contact, including name, telephone number, e-mail address, and mailing address (no post office box)
 - (6) Contractor's business type selected among the following categories: Large Business, Small Disadvantaged Business (SDB), Other Small Business, HBCU, MI, Other Educational, or Other Nonprofit.
 - (7) CAGE Code
 - (8) Subcontractors participating in the research and estimated cost (if none state "not applicable")
 - (9) Small businesses participating in the research and estimated cost (if none state "not applicable")
 - (10) Historically Black Colleges and Universities or Minority Institutions participating in the research (if none state "not applicable")

 - (11) Performance Period
 - (12) Contract type selected from one of the cost-reimbursement contract types (cost-plus-award-fee).
 - (13) Research title
 - (14) Brief research description
 - (15) Total Estimated Cost
 - (16) Fixed Fee Amount - the fee shall not exceed 10% of the estimated cost of the contract, not including the fee (if proposal is for a cost-plus-fixed-fee contract).

F1.2 Accounting System

Respondent shall provide a description of the accounting system proposed for this research and a copy of accounting system approval from Defense Contract Audit Agency (DCAA) or the Department of Health and Human Services (HHS).

F1.3 Approved Rates

Respondents shall provide a statement regarding current negotiated DCAA or HHS rates, factors, forward pricing agreements, and/or other related cost factors and considerations being used in the cost proposal.

F1.4 Audit or Forward Pricing Agreement

Respondents shall provide a copy of the latest audit or forward pricing agreement from DCAA or HHS.

Part 2 – Certified Cost or Pricing Data and Data Other Than Certified Cost or Pricing Data

Respondents shall submit certified cost or pricing data when requested by the contracting officer to support a determination of cost realism for cost proposals with a total estimated value of \$750,000.00 or more in accordance with FAR 15.403-4. If the total estimated value is under \$750,000.00, respondents shall submit data other than certified cost or pricing data to support a determination of cost realism in accordance with FAR 15.403-3. Respondents shall submit data in accordance with FAR 52.215-20 Requirements for Certified Cost or Pricing Data and Data Other Than Certified Cost or Pricing Data. Respondents shall submit certified cost or pricing data, data other than certified cost or pricing data, and supporting attachments in accordance with the instructions contained in Table 15-2 of FAR 15.408.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Respondents shall submit subcontractors' certified cost or pricing data, data other than certified cost or pricing data, and supporting attachments. If the subcontractor will not submit this information to the respondent, this information must be submitted directly to the contracting officer for cost realism analysis.

Part 3 – Work Breakdown Structure

Respondents shall submit a detailed work breakdown structure including all costs in a table format for all research tasks. Respondent shall include at a minimum, the costs provided above in Part 2.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Part 4 – Proposal Adequacy Checklist regarding Cost and Pricing Information

Sufficient information should be provided in supporting documents to evaluate the reasonableness and realism of the proposed costs. A cost proposal adequacy checklist from DFARS 252-215-7009, has been included at the end of this BAA for guidance.

F.2 Cost Realism Analysis

DLA will perform a cost realism analysis on cost proposals in accordance with FAR 15.404-1(d), Cost Realism Analysis . Realism determination will be based on an evaluation of the cost proposal (inclusive of cost management techniques) to determine whether the estimated cost elements are realistic for the proposed research; reflect a clear understanding of the applicable BAA Area(s) of Interest, and are consistent with the proposal research plan.

F2.1 Labor Mix and Other Direct Costs

Offerors are required to provide their proposed labor rates and total cost for each labor category. In addition, offerors are required to provide applicable other direct cost (ODC) rates, which should include, but may not be limited to, G&A, Fringe, Overhead, and Sub-contractor “burden” or “pass through rate.” Offerors are additionally required to provide labor category descriptions that include minimum education, experience and certification requirements.

- Direct Labor: Individual labor categories or person with associated labor hours and unburdened direct labor rates.
- Indirect Costs: Fringe benefit, Overhead, G&A, etc. (must show base amount and rate)
- Travel: Estimated number of trips, destinations, durations, etc.
- Subcontracts: A cost proposal is required to be submitted for any proposed subcontractor, and “burden” or “pass through rate” shall be clearly stated.
- Materials: Specifically itemize and identify as estimated or actual costs.

Cost proposals shall include the following summary tables in addition to the vendor’s other cost proposal information:

Labor Category (identify)	Hours	Unburdened Labor Rate	Overhead	G&A	Burdened Labor Rate
Totals:					

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

ODCs – Other Direct Costs (%)	
ODC Rate	
1. G&A	
2. Overhead	
3. Fringe	
4. Subcontractor Burden Rate	

F2.2. Subcontracting Plan

Any respondent, other than small businesses, submitting a cost proposal that exceeds \$750,000.00 shall submit a subcontracting plan in accordance with FAR 19.702, Statutory requirements, and FAR 19.704, Subcontracting plan requirements. Respondents shall use the format in FAR 19.704 and include the following: (1) BAA Number; (2) NAICS code; (3) Area(s) of Interest; (4) performance period; (5) contract type selected from one of the cost-reimbursement contract types (cost-plus-award) (6) research title; and (7) brief research description.

Respondents shall demonstrate how small business concerns will be used in the performance of the proposed research. The subcontracting plan must also specify how the respondent will identify small business concerns throughout contract performance that can be added to the contract team. The emphasis of the plan must be to maximize small business participation to the maximum extent practicable.

Pursuant to Section 8(d) of the Small Business Act (15 U.S.C. § 637(d)), it is the policy of the Government to enable small business and small disadvantaged business concerns to be considered fairly as subcontractors to contractors performing work or rendering services as prime contractors or subcontractors under government contracts, and to assure that prime contractors and subcontractors carry out this policy. A subcontracting plan identifies the respondent's approach to awarding subcontracts to small business, small disadvantaged business, women-owned small business, service-disabled veteran owned small business, and HUBZone small business concerns, HBCU, and MI for the research described in the technical proposal. A Defense Contract Management Agency approved master plan may be submitted in lieu of an individual contract plan.

G. Award Decision

G.1 Basis for Contract Award

The Government anticipates making, but is not obligated to make, more than one award under the BAA. The Government reserves the right to select for award all, some, or none of the proposals. The primary basis for selecting proposals for acceptance shall be technical importance to agency programs and funds availability. Cost realism and reasonableness will also be considered.

Award(s) will be made to one or more responsible vendors whose proposal conforms to the requirements of the BAA, is in the best interest of the government, and whose cost proposal offers fair and reasonable pricing.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

A cost/price analysis will be performed that confirms/verifies that the proposed estimated cost elements are realistic for the work proposed, reflect a clear understanding of the requirements, and are consistent with the offeror's technical proposal.

G.2 Basis for Award without Discussion

DLA may evaluate technical proposals and conduct cost realism analysis on cost proposals and make award without discussions. Proposals should contain the offeror's best terms. Additionally, DLA reserves the right to conduct discussions and request revisions to proposals if it is determined by DLA to be necessary. Offerors may be removed from the proposal evaluation process if the offeror and the contracting officer fail to negotiate mutually agreeable terms within a reasonable period of time.

G.3 Basis for No Award

DLA reserves the right not to make an award as a result of this BAA if such award is determined to be contrary to the best interest of DLA.

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

Appendix

PROPOSAL ADEQUACY CHECKLIST

DFARS 252.215-7009

	<u>REFERENCES</u>	<u>SUBMISSION ITEM</u>	<u>PROPOSAL PAGE No.</u>	<u>If not provided EXPLAIN (may use continuation pages)</u>
<u>GENERAL INSTRUCTIONS</u>				
1.	FAR 15.408, Table 15-2, Section I Paragraph A	Is there a properly completed first page of the proposal per FAR 15.408 Table 15-2 I.A or as specified in the solicitation?		
2.	FAR 15.408, Table 15-2, Section I Paragraph A(7)	Does the proposal identify the need for Government-furnished material/tooling/test equipment? Include the accountable contract number and contracting officer contact information if known.		
3.	FAR 15.408, Table 15-2, Section I Paragraph A(8)	Does the proposal identify and explain notifications of noncompliance with Cost Accounting Standards Board or Cost Accounting Standards (CAS); any proposal inconsistencies with your disclosed practices or applicable CAS; and inconsistencies with your established estimating and accounting principles and procedures?		
4.	FAR 15.408, Table 15-2, Section I, Paragraph C(1) FAR 2.101, “Cost or pricing data”	Does the proposal disclose any other known activity that could materially impact the costs? This may include, but is not limited to, such factors as— (1) Vendor quotations; (2) Nonrecurring costs; (3) Information on changes in production methods and in production or purchasing volume; (4) Data supporting projections of business prospects and objectives and related operations costs; (5) Unit-cost trends such as those associated with labor efficiency; (6) Make-or-buy decisions; (7) Estimated resources to attain business goals; and (8) Information on management decisions that could have a significant bearing on costs.		
5.	FAR 15.408, Table	Is an Index of all certified cost or pricing data		

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

	15-2, Section I Paragraph B	and information accompanying or identified in the proposal provided and appropriately referenced?		
6.	FAR 15.403-1(b)	Are there any exceptions to submission of certified cost or pricing data pursuant to FAR 15.403-1(b)? If so, is supporting documentation included in the proposal? (Note questions 18-20.)		
7.	FAR 15.408, Table 15-2, Section I Paragraph C(2)(i)	Does the proposal disclose the judgmental factors applied and the mathematical or other methods used in the estimate, including those used in projecting from known data?		
8.	FAR 15.408, Table 15-2, Section I Paragraph C(2)(ii)	Does the proposal disclose the nature and amount of any contingencies included in the proposed price?		
9.	FAR 15.408 Table 15-2, Section II, Paragraph A or B	Does the proposal explain the basis of all cost estimating relationships (labor hours or material) proposed on other than a discrete basis?		
10.	FAR 15.408, Table 15-2, Section I Paragraphs D and E	Is there a summary of total cost by element of cost and are the elements of cost cross-referenced to the supporting cost or pricing data? (Breakdowns for each cost element must be consistent with your cost accounting system, including breakdown by year.)		
11.	FAR 15.408, Table 15-2, Section I Paragraphs D and E	If more than one Contract Line Item Number (CLIN) or sub Contract Line Item Number (sub-CLIN) is proposed as required by the RFP, are there summary total amounts covering all line items for each element of cost and is it cross-referenced to the supporting cost or pricing data?		
12.	FAR 15.408, Table 15-2, Section I Paragraph F	Does the proposal identify any incurred costs for work performed before the submission of the proposal?		
13.	FAR 15.408, Table 15-2, Section I Paragraph G	Is there a Government forward pricing rate agreement (FPRA)? If so, the offeror shall identify the official submittal of such rate and factor data. If not, does the proposal include all rates and factors by year that are utilized in the development of the proposal and the basis for those rates and factors?		
<u>COST ELEMENTS</u>				
MATERIALS AND SERVICES				

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

14.	FAR 15.408, Table 15-2, Section II Paragraph A	Does the proposal include a consolidated summary of individual material and services, frequently referred to as a Consolidated Bill of Material (CBOM), to include the basis for pricing? The offeror's consolidated summary shall include raw materials, parts, components, assemblies, subcontracts and services to be produced or performed by others, identifying as a minimum the item, source, quantity, and price.		
SUBCONTRACTS (Purchased materials or services)				
15.	DFARS 215.404-3	Has the offeror identified in the proposal those subcontractor proposals, for which the contracting officer has initiated or may need to request field pricing analysis?		
16.	FAR 15.404-3(c) FAR 52.244-2	Per the thresholds of FAR 15.404-3(c), Subcontract Pricing Considerations, does the proposal include a copy of the applicable subcontractor's certified cost or pricing data?		
17.	FAR 15.408, Table 15-2, Note 1; Section II Paragraph A	Is there a price/cost analysis establishing the reasonableness of each of the proposed subcontracts included with the proposal? If the offeror's price/cost analyses are not provided with the proposal, does the proposal include a matrix identifying dates for receipt of subcontractor proposal, completion of fact finding for purposes of price/cost analysis, and submission of the price/cost analysis?		
<u>EXCEPTIONS TO CERTIFIED COST OR PRICING DATA</u>				
18.	FAR 52.215-20 FAR 2.101, "commercial item"	Has the offeror submitted an exception to the submission of certified cost or pricing data for commercial items proposed either at the prime or subcontractor level, in accordance with provision 52.215-20? a. Has the offeror specifically identified the type of commercial item claim (FAR 2.101 commercial item definition, paragraphs (1) through (8)), and the basis on which the item meets the definition? b. For modified commercial items (FAR 2.101 commercial item definition paragraph (3)); did the offeror classify the modification(s) as either— i. A modification of a type customarily available in the commercial marketplace (paragraph (3)(i)); or		

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

		ii. A minor modification (paragraph (3)(ii)) of a type not customarily available in the commercial marketplace made to meet Federal Government requirements not exceeding the thresholds in FAR 15.403-1(c)(3)(iii)(B)? c. For proposed commercial items “of a type”, or “evolved” or modified (FAR 2.101 commercial item definition paragraphs (1) through (3)), did the contractor provide a technical description of the differences between the proposed item and the comparison item(s)?		
19.		[Reserved]		
20.	FAR 15.408, Table 15-2, Section II Paragraph A(1)	Does the proposal support the degree of competition and the basis for establishing the source and reasonableness of price for each subcontract or purchase order priced on a competitive basis exceeding the threshold for certified cost or pricing data?		
INTERORGANIZATIONAL TRANSFERS				
21.	FAR 15.408, Table 15-2, Section II Paragraph A.(2)	For inter-organizational transfers proposed at cost, does the proposal include a complete cost proposal in compliance with Table 15-2?		
22.	FAR 15.408, Table 15-2, Section II Paragraph A(1)	For inter-organizational transfers proposed at price in accordance with FAR 31.205-26(e), does the proposal provide an analysis by the prime that supports the exception from certified cost or pricing data in accordance with FAR 15.403-1?		
DIRECT LABOR				
23.	FAR 15.408, Table 15-2, Section II Paragraph B	Does the proposal include a time phased (i.e.; monthly, quarterly) breakdown of labor hours, rates and costs by category or skill level? If labor is the allocation base for indirect costs, the labor cost must be summarized in order that the applicable overhead rate can be applied.		
24.	FAR 15.408, Table 15-2, Section II Paragraph B	For labor Basis of Estimates (BOEs), does the proposal include labor categories, labor hours, and task descriptions, (e.g.; Statement of Work reference, applicable CLIN, Work Breakdown Structure, rationale for estimate, applicable history, and time-phasing)?		
25.	FAR subpart 22.10	If covered by the Service Contract Labor		

Subsistence Network (SUBNET) Research & Development Broad Agency Announcement

Source Selection Information—See FAR 2.101 and 3.104.

		Standards statute (41 U.S.C. chapter 67), are the rates in the proposal in compliance with the minimum rates specified in the statute?		
<u>INDIRECT COSTS</u>				
26.	FAR 15.408, Table 15-2, Section II Paragraph C	Does the proposal indicate the basis of estimate for proposed indirect costs and how they are applied? (Support for the indirect rates could consist of cost breakdowns, trends, and budgetary data.)		
<u>OTHER COSTS</u>				
27.	FAR 15.408, Table 15-2, Section II Paragraph D	Does the proposal include other direct costs and the basis for pricing? If travel is included does the proposal include number of trips, number of people, number of days per trip, locations, and rates (e.g. airfare, per diem, hotel, car rental, etc)?		
28.	FAR 15.408, Table 15-2, Section II Paragraph E	If royalties exceed \$1,500 does the proposal provide the information/data identified by Table 15-2?		
29.	FAR 15.408, Table 15-2, Section II Paragraph F	When facilities capital cost of money is proposed, does the proposal include submission of Form CASB-CMF or reference to an FPRA/FPRP and show the calculation of the proposed amount?		
<u>FORMATS FOR SUBMISSION OF LINE ITEM SUMMARIES</u>				
30.	FAR 15.408, Table 15-2, Section III	Are all cost element breakdowns provided using the applicable format prescribed in FAR 15.408, Table 15-2 III? (or alternative format if specified in the request for proposal)		
31.	FAR 15.408, Table 15-2, Section III Paragraph B	If the proposal is for a modification or change order, have cost of work deleted (credits) and cost of work added (debits) been provided in the format described in FAR 15.408, Table 15-2.III.B?		
32.	FAR 15.408, Table 15-2, Section III Paragraph C	For price revisions/redeterminations, does the proposal follow the format in FAR 15.408, Table 15-2.III.C?		
<u>OTHER</u>				
33.	FAR 16.4	If an incentive contract type, does the proposal include offeror proposed target cost, target profit or fee, share ratio, and, when applicable, minimum/maximum fee, ceiling price?
