

IDVRS May 2026 RFI Questions & Answers

Does the government require NSA-controlled COMSEC equipment, or industry standard NIST-approved FIPS 140-3? Note that NSA Type 1 (there is no longer a Type 2 category) requires COMSEC custodianship.

The government requires the industry standard NIST-approved FIPS 140-3.

Does the government require FIPS 140-3 Level 4, or industry standard NIST-approved FIPS 140-3 levels 2 or 3? Note that FIPS 140-3 Level 4 is normally associated with high security modules, not commercial products.

The government requires industry standard NIST-approved FIPS 140-3 levels 2 or 3.

Will the government provide an estimate of how much data will need to be transferred?

The estimated data that will need to be transferred will range from 200 TB to 850 TB dependent on a variety of factors, including date of transfer.
