

Questions and Answers

Effort: SVTC Convergence Room Upgrade

Notice ID: RFI-FA2835-1710

Questions	Answers
Are drawings available for the room?	Yes, Soft copy
Where is the person running the laptop for presentations sitting?	Rear corner at desk - stationary
Are there any problems with the Freeport?	Doesn't configure correctly on start up some times.
What is the age of the current system or components?	Some 2018, Some 2022
Are there any problems you would like addressed? i.e. anything not currently working	On start up, some times the mic lights wont go green. Would like a way to turn camera off on SVTC side. System locks up if keys are touched before configuration ends.
Is our company able to remote into the system to monitor for issues?	No
Is cleaning up/re-doing the cabling a requirement for this effort?	No, we believe cost will be too much.
Do you want visible cable lines?	No, Only red line needs to be visible
What specific items do you want replaced?	Any items no longer allowed by AF, see attached document
Does the Government have the current Control code for this system?	We have CDs for current code
Does the Government have the current as-built system drawings?	Yes, soft copy
In the SOW, "replacing or upgrading components as required". To clarify, is the contractor providing the components here or will these be purchased by the government seperately?	Contract company is purchasing all equipment
Is the site visit required to bid on the SOW?	No it is not
