INTRODUCTION AND OVERVIEW

National Aeronautics and Space Administration (NASA) requires comprehensive and effective protective services to protect the people, property, operations, and information associated with the NASA mission.

This PWS addresses the scope and requirements for protective services in the following areas:

- Information Security (INFOSEC) and Communications Security (COMSEC)
- Emergency Management
- Protective Services Communication Center (PSCC)
- Physical Security Support
- Security Operations
- Identity Credential and Access Management (ICAM)
- NASA Protective Services Training Academy (NPTSA)

The South Region includes Kennedy Space Center (KSC), Johnson Space Center (JSC), Marshall Space Flight Center (MSFC), Stennis Space Center (SSC), and Ames Research Center (ARC), as well as all nearby component facilities, including White Sands Test Facility (WSTF) and White Sands Complex (WSC), and Michoud Assembly Facility (MAF), and other areas directed by the Government. Note: Some tasks in this PWS such as the NPTSA supports all Centers throughout the Agency.

1. GENERAL CONTRACT REQUIREMENTS

The requirements outlined below are applicable to all functions identified in this PWS.

The Contractor is responsible for performing the overall and day-to-day operations of the Protective Services requirements in this PWS. The Contractor shall provide all labor, personnel, uniforms, range facilities (when indicated in Annex), materials, Electronic Controlled Device (ECD) batteries and cartridges, equipment (including safety equipment), supplies (including office supplies), transportation (including shipping expenses), supervision, management, and any other items necessary to successfully perform the requirements and task associated with this PWS, at the frequency and hours specified for NASA on a 24-hour, 7 days per week basis, unless otherwise specified or indicated as Government Furnished in this PWS or Annexes. The Contractor is also responsible for purchasing and providing training, non-lethal marking ammunition rounds, duty ammunition and targets for both armed contract personnel and NASA Special Agents. All training and ammunition must comply with NASA Procedural Requirements (NPR) standards and utilize the NASA Standard Target (Form 1832). Range ammunition must meet both range requirements and NASA standards.

The Contracting Officer's Representative (COR) and the Annex Contracting Officer's Representatives (Annex COR) (for their respective annex) have been delegated authority by the Contracting Officer (CO) to provide written technical direction to provide clarification of the contract's general description of the scope of work to include approaches, solutions, designs, refinements or shifts within tasks, or inquiries related to the general tasks and requirements in the PWS and Annexes.

The Contractor shall possess and maintain a Top-Secret facility clearance from the Defense Counterintelligence and Security (DCSA). Employees performing work under this contract shall have been granted personnel security clearance commensurate with the required access identified in Appendix TBD, Position Table, prior to working the position, unless otherwise approved in writing by the Annex COR.

The Contractor may be requested to deploy personnel Agency-wide and support surges of activities and tasks that are considered above normal workload fluctuations. Special circumstances such as but not limited to launch and landing support for aerospace vehicles, mutual aid to surrounding community, emergency assistance to other NASA Centers, security threats, and special events. The labor and travel costs incurred in support of surge activities shall be processed through the Task Order (TO) funding review and approval process.

The Contractor shall be prepared to implement increased security safeguards and countermeasures in response to elevated threat levels based on the Department of Homeland Security National Threat Advisory System or other credible threat indicators.

Specific requirements for each location may be detailed in the applicable Annex attached to this PWS. All services listed in this PWS shall be provided to each Annex, unless otherwise noted in the Ordering Matrix. Additional requirements, if necessary, are noted in the Ordering Matrix and identified in the appropriate line item within the Annex.

The Government considers the actions, activities and behaviors described in Appendix TBD, Deduction Schedule for Non-Conforming Services, as serious non-conformances requiring immediate corrective action by the Contractor and evaluation by the Government.

The Contractor shall safeguard all Government equipment, information, and property provided for Contractor use.

All positions shall be filled as prescribed in Appendix TBD, Position Table. Employees are not permitted to cover more than one post simultaneously, unless approved in writing by the Annex COR. The Contractor shall submit a continuity of service plan to the Contracting Officer (CO), COR, and Annex COR for approval in accordance with DRD TBD to ensure uninterrupted service.

All Government-required travel shall be processed through the TO funding review and approval process, except for travel related to NASA Basic Training Standard (NBTS). Training and any associated travel costs for NBTS shall be borne by the Contractor. NBTS training schedules shall be coordinated through NPSTA and approved by the NASA HQ NPSTA Program Manager. Note: NBTS training is not conducted during the months of November through January.

Unless otherwise specified by the Annex CO or Annex COR, the Contractor shall adhere to established work processes in effect at the time of contract phase-in and full performance, including Post Orders, Standard Operating Procedures (SOP), and Emergency Action Checklists (EAC).

Business days are defined as Monday through Friday, excluding weekends, and federal holidays.

Business hours are defined as those listed for each position in Appendix TBD, Position Table, and shall follow the time zone of the applicable Annex. Hours may not be altered without prior written approval from the Annex COR.

In the event of a Center closure, delayed opening, or early dismissal, the Contractor shall seek technical guidance and follow Annex COR direction regarding post requirements.

1.1. Contract Management

The Contractor shall:

- A. Establish, document, and maintain an adequate hierarchical command structure with full authority to meet all requirements of this PWS. The structure may include up to three tiers, consisting of the following ranks: Commander (Site Manager), Captain, and Lieutenant, in accordance with DRD TBD, Management Plan. The Contractor shall define staffing levels, procedures, and practices to ensure effective fulfillment of contract requirements by submitting a Protective Services Staffing Plan in accordance with DRD TBD, Staffing Plan.
- B. Designate a Program Manager (PM) which must be physically/geographically located at KSC, who is responsible for the administration of each Annex (through Site Managers (SM)) covered by this PWS for the administration and technical supervision

of the Contractor's employees. The PM shall be the primary representative and have full autonomous authority to act on matters pertaining to the services under this contract and Annexes, across all functions and acts as primary interface between the Contractor, the CO, and COR. The PM shall not also serve as a Site Manager. The PM must promptly notify the CO and COR of any situations that may adversely impact the timely and cost-effective delivery of quality products and services under this contract.

- C. Require the PM to be available to the CO and COR(s) 24 hours a day, 7 days a week, return calls or messages within 60 minutes, and work from their on-site office each business day, or from one of the locations included in this PWS, unless otherwise approved by the Regional COR.
- D. Designate a Site Manager (SM) as the single point of contact at each Annex covered by this contract. The SM must be physically located at the Annex and is responsible for: the administration and technical supervision of Contractor employees, acting as the Program Manager's (PM) primary representative at the Annex and operating location. The SM shall have the PM's full autonomous authority to act on matters pertaining to the services under the respective TO across all functions and acts as the primary interface with the Annex CO, and Annex COR. The SM must promptly notify the Annex CO and Annex COR of any situation that could adversely impact the timely and cost-effective delivery of quality products and services under the Annexes to this contract.
 - 1. The NPSTA Annex does not require a Site Manager. However, the NPSTA Supervisor shall serve as the single point of contact and hold the same authority as an SM.
- E. Require the SM to be available to the Annex CO and Annex COR 24 hours a day, 7 days a week, and shall return calls and messages within 60 minutes, be physically on-site each business day during the hours designated in the Position Table, unless otherwise approved by the Annex COR.
- F. During non-business hours, require the SM to respond to the site within four (4) hours when requested by the Annex COR, or Center Chief of Protective Services (CCPS).
- G. Require the PM and SM to participate in meetings to discuss contract and business management as it relates to their Annexes and other contract-related meetings when directed by the CO, COR, or the Annex COR.
 - 1. Reserved
- H. In the event the PM or the SM is absent for any reason, the Contractor shall submit Letter of Delegation to the COR or Annex COR identifying the designated authority. The PM may authorize an SM to act in their absence for a period not to exceed 30 consecutive days and no more than TBD days in a calendar year.
- I. Submit to the Annex COR a business continuity plan for all vacant positions to the Annex COR in accordance with DRD TBD, Business Continuity Plan.

- J. Provide resumes of any essential personnel being proposed to fill a vacancy that meets PM and SM qualifications.
 - 1. For initial placement of the PM and SMs: Submit resumes 30 calendar days prior to the personnel action for review and concurrence by the Annex COR, CO, and Annex CO. Resumes shall not exceed 4 pages, using no smaller than 12-point Times New Roman.
 - 2. Reserved.
 - 3. Annex COR may waive time limits at their discretion.
- K. Provide a management plan in accordance with DRD TBD, Management Plan

1.2. Business Management

The Contractor shall:

- A. Provide a Resource Management Plan in accordance with DRD TBD, Monthly Task Order Price Report.
- B. Notify the involved Annex COR, Annex CO, and CO of any issues that could impact the successful performance of contract requirements or negatively reflect on the Government or of any situations that may adversely impact the timely and cost-effective delivery of quality products and services under this contract. Participate in periodic meetings scheduled by the Protective Services Office, CO, COR, and/or Annex COR.
- C. Provide notice to the Government in accordance with: DRD TBD, Advanced Notification of Workforce Reductions Report and DRD TBD, Strike Contingency Plan.
- D. Ensure the proper accountability, control, use, and maintenance of Government Furnished Property (GFP) in compliance with FAR Part 45. GFP includes equipment owned by the Government and delivered to or made available to the Contractor.
- E. Serve as the property custodian for all GFP provided or acquired under this contract. The Contractor's custodial responsibilities are defined in the Center property requirements and NPR 4200.1, NASA Equipment Management Procedural Requirements, and NPR 4500.1, Administration of Property in the Custody of Contractors, and any identified Center property requirements. Obtain, track, maintain, and provide inventory accountability for all equipment, including all GFP. Submit reports in accordance with DRD TBD, Government Property Management.
- F. Utilize the Center Shipping and Receiving Facility, as the receiving agent.
- G. Assist the Government in managing and overseeing facilities assigned under this contract and Annexes by identifying and tracking facility requirements, requesting

facility services, maintenance, and repairs from the Government, and notifying the Annex COR when a work order is placed for a work area assigned to the Contractor.

- H. Provide estimated travel costs, coordinate, and obtain COR approval for Government directed travel. All Government-directed travel shall meet the Government rates for per diem and travel and be conducted and reimbursed in accordance with the Federal Travel Regulations.
- I. Provide to the Annex COR ongoing assessment and evaluation to identify protective service weaknesses and vulnerabilities. Recommend appropriate corrective action and participate in After Action Reviews.
- J. Maintain awareness of current protective services issues, emerging trends, and technologies. Continuously monitor proposed and implemented changes to all compliance documents including all applicable laws, regulations, policies, and directives. Identify and promptly notify the Annex COR of any impacts to Contractor requirements, processes, and practices. Provide recommendations to the Government on trade-offs for new or changing requirements to minimize cost impacts. Strategies for addressing changes, whether driven by NASA mission adjustments, threat level variations, regulatory updates, budgetary constraints, or other factors, must be coordinated with and approved in writing by the CO and the involved Annex COR.
- K. Ensure contractor deliverables and all associated data only use markings authorized by the contract. "Proprietary" is not an authorized marking for delivered technical data under the contract.
- L. Ensure all employees possess and maintain the required National Security Clearance level as specified in Appendix TBD, Position Table, prior to performing any work under this PWS. Employees shall have been granted a clearance commensurate with the access requirements identified on the Qualifications Tab of Appendix TBD, Position Table, prior to working the position, unless otherwise approved in writing by the Annex COR. The Contractor shall provide evidence of the required clearance or an interim clearance level required for their designated position, prior to the employee beginning work, DRD TBD, Contractor Employee Clearance Document. This requirement does not relieve the Contractor from their performance obligations. For employees working under an interim clearance, the Contractor shall ensure the final clearance is granted within 180 calendar days of employment. If an employee or incumbent requires an exception to the 180-day limit, the Contractor will submit written waiver request to the COR and Annex COR prior to the employee exceeding the 180-calendar day threshold. Additionally, the Contractor shall immediately prohibit any employee whose clearance had been denied, suspended, or revoked from performing work under this PWS that requires a clearance, until the clearance is restored, or a written waiver is granted by the COR and Annex COR.
 - 1. Report (including self-reporting) any security violation or derogatory information of an employee to the Contractor Facility Security Officer (FSO) and the involved Annex COR within 24 hours of being notified of such violations.

(Security Violations and Derogatory Information are defined in the National Industrial Security Program Operating Manual).

- M. Provide the Government, or its authorized representatives who possess the appropriate authority, immediate access to any site or areas where work under this contract is performed for the purpose of audits, assessments, surveillance, inspections, or any other official purpose identified by the Government's representatives in the performance of their official duties.
- N. Manage the total work effort associated with this PWS to ensure timely and adequate completion of all requirements. Included in this function will be a full range of management and administrative duties including program management, phase-in planning, scheduling, report preparation, risk management, establishing and maintaining records, and quality control.
- O. Ensure all employees are medically, physically, and psychologically fit for duty in accordance with this PWS and Appendix TBD, Screening Standards for Armed Personnel. For any medical absence of five consecutive working days or more, ensure employees are medically cleared to return to work through a licensed medical professional (Nurse Practitioner, Physician Assistant or Medical Doctor).
- P. Upload initial and revised documentation (i.e., DRDs) to the Government-provided electronic collaboration platform (SharePoint) for the review and resolution of comments, in accordance with the DRD. Once finalized and approved, documents shall be converted to PDF and uploaded to the collaboration platform for official use. The CO, COR, and Annex COR shall have access to the PWS deliverables stored on the Government collaboration platform.
- Q. Maintain and update SOP's and EAC's, for specific Annexes and contract operations in accordance with DRD TBD, Standard Operating Procedure. When warranted, develop and maintain new processes for improved effectiveness and efficiency. Coordinate with the Annex COR for all proposed content changes or new processes.
- R. Conduct annual reviews of the center security requirement documents and propose revisions to the Annex COR for approval.
- S. Submit its Standards of Conduct policy to maintain professional employee conduct, ethics, and integrity (reference FAR 3.1002).
- T. Implement and enforce a standard dress code policy in accordance with Appendix TBD, Uniforms, Equipment and Grooming Requirements, ensuring that all personnel performing work under this PWS comply with the uniform requirement for the position that they are working in. Reference to Appendix TBD, Position Table, to determine the applicable uniform type for each position.
- U. Provide a Work Control Plan with processes to track and report all PWS work activity, including subcontractors in accordance with DRD TBD, Self-Assessment and Metrics Report.

- V. Perform work in such a manner that causes minimal or no interruption to/or interference with site operations.
- W. Comply with Agency Standards as outlined in the applicable attachments.
- X. Provide a Training Plan in accordance with DRD TBD, Training Plan.

1.3. Safety and Health

The Contractor shall:

- A. Serve as an advocate for safety by establishing and maintaining a comprehensive safety and health plan for this PWS, including subcontractors. Ensure compliance with applicable Federal, state, local, NASA, and Center safety and health laws, regulations, policies, directives, and industry standards. Maintain awareness of proposed and implemented changes to those requirements. Provide timely notification to employees regarding any changes or modifications to policies, procedures, or systems designed to control exposure to safety and health hazards.
- B. Conduct frequent safety and health inspections of all Contractor occupied spaces considering the risk of the operations. The Contractor shall document and report all safety and health findings and track to closure, in accordance with DRD TBD, Mishaps and Safety Statistics. Notify the Annex COR of safety and occupational health concerns.
- C. Submit DRD TBD, Risk Management Plan, in accordance with NPR 8000.4, Agency Risk Management Procedural Requirements. Ensure the plan implements a structured process to identify, track, and mitigate risks—including cost, schedule, safety, and technical performance—and to assess and manage hazards in compliance with the safety requirements defined in this PWS.
- D. Provide the authorized Government representatives, immediate access to personnel and sites or areas where work under this contract is being performed to complete safety, health, and mission assurance audits, assessments, surveillance, inspections, and investigative activities. Provide all audit, assessment, surveillance, inspection, and investigation records to such Government representatives upon request.
- E. Prepare for and participate in internal or external audits as requested (e.g., Institutional Safety Program Audit (ISPA), Quality Audit, Assessment, and Review (QAAR), and Voluntary Protection Program (VPP). Review Annexes for Center specific VPP requirements.
- F. Comply with NPR 8621.1, NASA Procedural Requirements for Mishap and Close Call Reporting, Investigating, and Recordkeeping; NFS 1852.223-70, Safety and Health Measures and Mishap Reporting; and applicable Center requirements as defined in the Annexes in the event that any activity during the performance of this contract results in a NASA mishap or close call. The Contractor shall use the NASA Mishap Information System (NMIS) to electronically report mishaps, close calls, and hazards as defined by

NPR 8621.1, NASA Procedural Requirements for Mishap and Close Call Reporting, Investigating, and Recordkeeping. The Contractor shall encourage all employees located onsite to report hazardous conditions and/or situations which, if not corrected, have the potential to result in an injury to personnel or damage to equipment/property. Contract personnel may also report concerns anonymously about hazards through the NMIS.

- G. Support Center safety and health meetings including working groups and panels, as indicated in the Annexes. The Contractor shall participate in safety and health meetings including working groups and panels as requested.
- H. Develop, submit, and maintain DRD TBD, Safety and Health Plan, as required by NFS 1852.223-73, Safety and Health Plan.
- I. Submit Safety Statistics and Mishap Reporting in accordance with DRD TBD, Mishaps and Safety Statistics.
- J. Appoint, in writing to the COR, at least one safety and health representative for each Annex to support Center requirements.
- K. Comply with additional safety and health requirements identified in the involved Annexes.
- L. Provide reporting of Hazardous Items purchased in accordance with DRD TBD, Hazardous Item Procurement Report.

1.4. Quality Plan

The Contractor shall:

- A. Develop and Implement a Quality Management System (QMS) that is compliant with the ANSI, International Organization for Standardization (ISO), American Society for Quality (ASQ) 9001-2015, QMS – Requirements, and develop a Quality Management Plan in accordance with DRD TBD, Quality Control Plan.
 - 1. Implement the QMS at contract start to identify, prevent, and ensure that defective services do not occur.
 - 2. Continually improve the QMS throughout the life of the contract and update the quality management plan accordingly. The Contractor shall submit all proposed QMS changes to the COR for review and acceptance in writing prior to implementation.
 - 3. Assess potential sources of supply to determine the risk of receiving nonauthentic parts.
- B. Assess potential sources of supply to determine the risk of receiving nonauthentic parts. When feasible, obtain supplies through an Original Component Manufacturer

(OCM)/Original Equipment Manufacturer (OEM), or through an OCM/OEM authorized distributor chain.

1. Note: OCM/OEM authorized distributor chain (e.g., franchised distributors), and authorized aftermarket manufacturers are considered to have low risk of supplying nonauthentic parts.
- C. Mitigate risks of procuring counterfeit parts from sources other than OCM/OEM or authorized suppliers. If suspect or counterfeit parts are furnished under this agreement and are found on the site, such items shall be impounded by site.
- D. Notify NASA Office of Protective Services (OPS) and Safety and Mission Assurance (S&MA) personnel of nonconforming products or failures that affect safety, security, reliability, or functionality, in accordance with DRD TBD, Safety and Health Plan.
- E. Identify a point-of-contact to support the Center Government-Industry Data Exchange Program (GIDEP) Coordinator, and the Contractor shall:
 1. Participate in the GIDEP in accordance with:
 - a. SO300-BT-PRO-010, GIDEP Operations Manual
 - b. SO300-BU-GYD-010, GIDEP Requirement Guide
 2. Review and disposition GIDEP Notices and NASA Advisories in the NASA Advisories, Notices, and Alerts Distribution and Response Tracking System to determine if they affect the Contractor's products or services provided to the Government. DRD TBD, GIDEP.
 3. Respond by documenting whether GIDEP Notices and NASA Advisories affect the Contractor's products and services provided to the Government.
 4. Notify the Government if GIDEP Notices and NASA Advisories affect the subcontractor's products and services provided to the Government. For GIDEP Notices and NASA Advisories that affect the Contractor's products and services provided to the Government, the Contractor shall take action to eliminate or mitigate any negative effect and inform the Government of such actions to ensure GIDEP Notices and NASA Advisories adhere to closed-loop reporting.
 5. Generate GIDEP Notices in accordance with the GIDEP Operations Manual and GIDEP Requirements Guide whenever failed or nonconforming items, available to other buyers, are discovered.

1.5. Environmental Management

The Contractor shall:

- A. Ensure that all contract operations, activities, and assigned systems, facilities, and equipment are in compliance with federal, state, and local environmental laws, regulations, ordinances, executive orders, permits, and licenses as well as all NASA environmental policy, plans, and requirements documents, including the most recent versions of the following documents:
 1. NASA Policy Directive (NPD) 8500.1, NASA Environmental Management
 2. NASA Procedural Requirement (NPR) 8510.1, NASA Cultural Resources Management
 3. NPR 8530.1, NASA Sustainable Acquisition
 4. NPR 8553.1, NASA Environmental Management System
 5. NPR 8570.1, NASA Energy Management Program
 6. NPR 8580.1, Implementing the National Environmental Policy Act and Executive Order 12114
- B. Appoint, in writing to the COR, at least one environmental representative for each Annex to support Center requirements.
- C. Implement internal policies, procedures, and oversight as necessary to ensure environmental compliance (reference DRD TBD, Safety and Health Plan).
- D. Participate in regulatory agency inspections and NASA internal inspections, audits, and Environmental and Energy Functional Reviews when requested by the Government. Provide Government personnel or authorized Contractor representatives with access to Contractor sites and work areas to conduct surveillance activities and to ensure compliance with environmental laws, regulations, and permits. Implement corrective actions for findings and deficiencies identified by the Government. Submit written corrective action plans and finding closure documentation when requested by the Government.
- E. Ensure that environmental regulatory agency interactions or correspondence relating to NASA activities or contract activities are performed by or coordinated through the applicable Center Environmental Office.
- F. Respond to environmental data calls regarding contract operations and activities, and Contractor-assigned systems, facilities, and equipment when requested by the Government. Submit responses in the format outlined in the data call. Examples include, but are not limited to, environmental compliance records, regulatory agency requests for information, hazardous and controlled waste site information, waste

management training records, air emission source inventories, storage tank inventories, and chemical usage and storage records.

- G. Comply with additional environmental requirements identified in each Annex.
- H. Perform environmental reviews of Protective Services operations at each Annex including hazardous and controlled waste management requirements.
 - 1. Ensure that all employees who are responsible for hazardous waste management activities receive annual hazardous waste training and where applicable, have job descriptions that meet the requirements of 40 CFR 265.16, Personnel Training.
 - 2. Allow NASA environmental personnel full access to conduct internal inspections of all facilities, systems, materials, records, and waste for compliance with environmental laws, regulations, and permits. Violations, findings, or deficiencies identified in the inspection shall be reported to the Annex COR and immediately corrected.
 - 3. Incorporate sustainable elements and practices in operations in accordance with Executive Order (EO) 13423, Strengthening Federal Environmental, Energy and Transportation Management and EO 13514, Federal Leadership in Environmental, Energy and Economic Performance. Include areas of energy efficiency, use of renewable energy, reduction in water consumption intensity, acquisition of green products and services, pollution prevention, waste prevention, recycling, waste diversion, use of alternative fuels and vehicles, and electronic stewardship.
 - 4. Respond to data calls (e.g., chemical usage and storage, pollution prevention, and sustainable practices).
- I. Take measures to prevent the release of hazardous materials to the environment and report hazardous materials spills and releases immediately in accordance with Center procedure.
- J. Coordinate with appropriate agencies/wildlife services for any dangerous animals/reptiles (e.g. rabid coyotes, poisonous snakes, alligators) or hurt animals at Center. The Contractor will document the incident to include disposition of the animal.
 - 1. For onsite employee safety concerns related to unsafe animal behavior or immediate threats, refer to NPR 1600.1 Appendix H, Section H.2 Discharge of Firearms, H.2.2 Exceptions.

1.6. Information Technology (IT)

The Contractor shall:

- A. Obtain all IT products and services needed to process NASA data.
- B. Comply with the information security requirements of NPD 2810.1, NASA Information Security Policy; NPR 2810.1, Security of Information and Information Systems; and the IT Security Handbooks identified in Appendix TBD, Compliance Documents List.
- C. Comply with information protection requirements in accordance with NPD 1382.17, NASA Privacy Policy; NPR 1382.1, NASA Privacy Procedural Requirements; and the IT Security Handbooks identified in Appendix TBD, Compliance Documents List. Assess all information collections to ensure compliance with Federal regulations and privacy protection requirements using the NASA-provided assessment tool, Risk, Information Security Compliance System (RISCS). Access to RISCS may be granted through a NASA Access Management System request.
- D. Manage information security and implement security controls in accordance with NPR 2810.1 and DRD TBD, Security Requirements for Unclassified IT Resources.
- E. Ensure successful completion of the following for all Contractor personnel:
 1. NASA Information Security Awareness and Privacy Training.
 2. Other IT Security Training, as required by the Government and provided in the System for Administration, Training, and Educational Resources for NASA (SATERN).
 3. NASA IT User Agreement
- F. Provide support to Office of the Chief Information Officer (OCIO) for Contractor IT security incidents or investigations.
 1. Notifications: Upon discovery of an incident involving Sensitive But Unclassified (SBU)/Controlled Unclassified Information (CUI), Personally Identifiable Information (PII), or Export Control information, within one hour notify the Security Operations Center (SOC) followed by the Chief Information Security Officer (CISO) and the Annex COR.
 2. Response:
 - a. Submit an encrypted email with the initial assessment of event impacts and plan for mitigation within eight (8) hours after acknowledgement after notifying the SOC, CISO and Annex COR.
 - b. Provide continued support and status until the incident is resolved.

- G. Protect all sensitive information in accordance with NPR 2810.7, Controlled Unclassified Information.
- H. Encrypt sensitive information (e.g., SBU/CUI, PII, Export Control) at the file and electronic mail levels using a Government-approved solution.
- I. Obtain all desktop and workstations used for office automation from the current NASA approved service providers. The Contractor shall request through the Annex COR and the OCIO approval of any exemption from the use of the NASA-provided IT products and services.
- J. Comply with NPR 2810.2, Possession and Use of NASA Information and Information Systems Outside of the United States, is followed by getting OCIO approval before taking any electronic devices outside the U.S. and Territories, including any personal devices that includes NASA data.
- K. Comply with NPD 2540.1, Acceptable use of Government Furnished Information Technology Equipment, Services, and Resources.
- L. Comply with the Use of Personally Owned Device memorandum and ensure that all IT devices have an approved Authorization to Operate (ATO) from a NASA Authorizing Official (AO) prior to the use of the IT device to store, process, or transmit NASA data. A Personally Owned Device includes but is not limited to a mobile phone, tablet, computer, Universal Serial Bus (USB) drive, external drives, Internet of Things (IoT) device, wearable technology, or any other device that is capable of connecting to a NASA's network or systems, or storing or processing NASA data and does not have a valid ATO from a NASA AO, regardless of who provided or owns the device.

1.7. Records Management

The Contractor shall:

- A. Ensure accurate and complete records of Government business are maintained in accordance with the NPR 1441.1, NASA Records Management Program Requirements. Information and records include electronic and paper records, including but not limited to legacy records inherited from previous contracts. Records of Government business shall be segregated from company-owned records and from non-record materials. Provide the Government access to Government records in accordance with FAR Subpart 4.7, Contractor Records Retention. The Government reserves the right to inspect, audit, and copy record holdings.
 - 1. Note: Ensure all new records are managed in an electronic format.
- B. Develop, implement, and maintain a Records Management Program Plan in accordance with the following DRDs:
 - 1. DRD TBD, Records Management Program Plan

2. DRD TBD, File Plan
3. DRD TBD, Contract Records Closeout Plan

1.8. Vehicle Management

The Contractor shall:

- A. Perform vehicle management functions in accordance with NPR 6200.1, NASA Transportation and General Traffic Management; NPD 6000.1, Transportation Management; Center requirements; NASA Official Fleet Management Handbook; EO 13693, Planning for Federal Sustainability in the Next Decade; and EO 13834, Efficient Federal Operations as it relates to greenhouse effects.
- B. Operate and maintain all General Services Administration (GSA) leased vehicles. There is no Government-furnished facility for maintaining the Contractor-provided vehicles.
- C. Ensure all drivers have and maintain proper state licenses with applicable endorsements for equipment they operate and are insured under the Contractor's insurance for operating a motor vehicle for the duration of their employment.
- D. Input the required fleet data into the Federal Automotive Statistical Tool (FAST) for any GSA-leased and Government-furnished vehicles annually, as scheduled by the NASA Agency Transportation Manager.
- E. Comply with the vehicle manufacturer's normal service schedule for all Government furnished vehicles and take full advantage of manufacturer warranty repairs when applicable.
- F. Provide a Vehicle Utilization Plan, in accordance with DRD TBD, Vehicle Utilization Plan.
- G. Provide a GSA/NASA Vehicle Damage Report in accordance with DRD TBD, GSA/NASA Vehicle Damage Report
- H. Provide gate vehicles, patrol vehicles, technical support vehicles, and other necessary vehicles to support the security requirements and conditions as required in the Annexes, to include, but not limited to: security patrols; locksmiths; electronic security support; perimeter fence inspections; K-9 and emergency response vehicles to provide services. All vehicles are to be properly marked and outfitted in accordance with the requirements of Appendix TBD, Vehicle Requirements.
- I. Vehicles (both Contractor owned and GSA) are authorized to go off NASA property while traversing to authorized locations or in an emergency. All GSA-leased and NASA-provided vehicles shall be used for official Government business only.

- J. The Contractor is responsible for the fuel costs for all Contractor-provided vehicles unless noted in the Annex as Government provided.
- K. Notify the Annex COR within one (1) hour of any GSA-leased or NASA-provided or Contractor-provided vehicle that has been damaged or placed out of service for any reason.
- L. Notify the Annex COR immediately when a traffic accident involves members of the Contractor staff. The Annex COR will advise the Contractor as to investigative responsibility.

2. INFOSEC AND COMSEC

INFOSEC and COMSEC concern the safeguarding and transmission of Classified National Security Information (CNSI) in accordance with Federal law, including but not limited to, EO 13526, Classified National Security Information; the National Industrial Security Program Operating Manual, Information Security Oversight Office; and NPR 1600.6, NASA Communication Security. Some of these tasks require a Top Secret/Sensitive Compartmented Information (TS/SCI) and COMSEC briefing

The Contractor shall:

- A. Review and provide input for SATERN Security Education and Training courses for both clearance holders and non-clearance personnel at the individual Centers in accordance with NPR 1600.1, NASA Security Program Procedural Requirements and NPR 1600.2, NASA Classified National Security Information (CNSI). Required training/briefings include but are not limited to new employee initial security orientation, initial and refresher training for cleared personnel, classified custodian briefing, derivative classifier training, material/training to meet triennial security training for all non-cleared personnel, and security awareness information/products, as needed. The Security Training Program shall meet NPR 2190.1, NASA Export Control Program.
- B. Serve as the primary liaison for SATERN Security Education and Training courses, ensuring accurate training, and timely updates of training records for both clearance holders and non-clearance holders within the SATERN system.
- C. Ensure proper storage of various levels of classified documents and COMSEC materials in storage containers and devices.
- D. Provide COMSEC services in accordance with Presidential Decision Directives and applicable Committee on National Security Systems (CNSS) Directives, Instructions, Manuals, Advisories, as well as NASA policies and procedures governing intelligence, security, technology protection, and operations security to support Annex requirements.
- E. Support COMSEC voice and Secure Terminal Equipment (STE) or updated versions.

- F. Review and provide input for the annual COMSEC training. Additionally, track, and administer for the training for both civil servants and participating contractors.
- G. Report any COMSEC violations in writing to the NASA Central Office of Record within two (2) hours.
- H. Maintain, review, and provide input for the training program that ensures all personnel granted a security clearance are trained to comply with EO 13526 Classified National Security Information. Additionally, track the completion to ensure clearance holders remain in compliance with the training.
- I. Attend the annual NASA COMSEC Conference if deemed necessary by Annex COR.
- J. Provide COMSEC support for dignitary/Very Important Person (VIP) visits.
- K. Ensure the destruction of CUI/SBU/For Official Use Only (FOUO) material used/ held by OPS, (this includes all forms of media and is not limited to paper, all types of film and memory storage devices) in accordance with NPR 2810.1, Security of Information and Information Systems, the National Institute of Standards and Technology (NIST) Special Publication (SP) 800-88, Revision 1, Guidelines for Media Sanitization and National Archives and Records Administration (NARA) CUI Notice 2019-03, Destroying Controlled Unclassified Information (CUI).
- L. Attend NASA COMSEC Office of Record training and certification virtually. Contractor employees shall attend in-person if directed by the Annex COR.
- M. Require SPOs to respond immediately to any alarm associated with a NASA Sensitive Compartmented Information Facility (SCIF) and conduct an initial assessment of the area to identify if penetration has occurred. Maintain a continuous presence until the SCIF custodian arrives to assess the situation. Ensure a response by the SCIF custodian in accordance with Intelligence Community Directive (ICD) 705, Sensitive Compartmented Information Facilities and SOPs.
- N. Provide annual and periodic security briefings and/or training as directed by the COR or Annex COR. Topics for briefings and/or training include, but are not limited to, classification management and Special Access Programs.
- O. Provide destruction services for sensitive and classified waste in accordance with the appropriate Annex SOP, to include pick-up, storage, transportation, and destruction of all sensitive and classified documents.

3. EMERGENCY MANAGEMENT

Emergency Management personnel shall operate under the following four tenets of Emergency Management framework as described below and in each annex: Emergency Preparedness, Emergency Operations, Continuity of Operations, and Test, Training and Exercise. Additionally, the Comprehensive Emergency Management Plan (CEMP) provides detailed guidance through its Annexes, describing the four phases of emergency management: preparedness, response,

mitigation, and recovery. These frameworks ensure a holistic approach to emergency management, integrating proactive planning, operational readiness, continuity strategies, and rigorous testing and training to maintain organizational resilience.

The Contract shall:

- A. Provide a comprehensive emergency management service that complies with National Fire Protection Association (NFPA) 1660 Standard on Continuity, Emergency, and Crisis Management, NFPA 1550 Standard on Emergency Services Incident Management System and Command Safety, and NPR 8715.2, NASA Emergency Management Program Procedural Requirements, and Emergency Management Center plans.
- B. Maintain, implement, and periodically review the Emergency Management Plan as specified in DRD TBD, Comprehensive Emergency Management Plan. The Plan shall be implemented within four (4) hours of activation as directed by the OPS Emergency Manager (EM). Sustain the mission essential operations for up to 30 days utilizing existing and available field infrastructure where practical.
- C. Upon request from Annex COR, send personnel to attend a local, state, or Federal emergency management conference, NASA emergency management meeting, and utilize the information obtained from the conference to update the training provided to NASA and other onsite contractors. Requests to send personnel to such a conference or training will be processed through the TO approval process.
- D. Ensure all personnel supporting emergency management under this PWS obtain and maintain all required training and certifications.
- E. Respond to emergencies not requiring Emergency Operations Center (EOC) activation.
- F. Prepare and present After-Action Reviews (AAR) and document lessons learned.
- G. Provide recommendations for and implement a Lessons-Learned Program and Corrective Action Plan (CAP) consistent with best practices to identify shortfalls, weaknesses, and failures identified during the post-event evaluation, to be provided to the Emergency Manager within 10 business days following the event. A published, final report shall describe assessed performance and recommend corrective actions in accordance with DRD TBD, Contingency and Emergency Plan.
- H. Operate the NASA Emergency Notification and Accountability System (ENS), NASA SAFE App, and/or equivalent systems. Conduct quarterly tests of the NASA ENS, NASA SAFE App, and equivalent systems, or when directed by the Center EM.

3.1. Emergency Preparedness

The Contractor shall:

- A. Provide comprehensive planning in policy, procedures, directives, and all-hazard assessment requirements in accordance with DRD TBD, Contingency and Emergency Plan.
- B. Implement applicable emergency preparedness policies and directives from NASA Headquarters, Federal, state, and local directives. Provide for an integrated and coordinated Federal, state, and local response consistent with the National Incident Management System (NIMS); the National Response Framework (NRF), NFPA 1660 Standard on Continuity, Emergency, and Crisis Management; and NFPA 1550 Standard on Emergency Services Incident Management System and Command Safety.
- C. Implement protective measures and mitigation strategies in accordance with Annex directives to safeguard Government-Furnished Facilities (GFF) and Government-Furnished Property (GFP).
- D. Conduct operational readiness checks of applicable Government-provided hand-held, mobile, and fixed communication devices (e.g., high frequency radios, ham radios, radios, cell phones, and satellite) in accordance with a contractor developed checklist approved by the Annex COR.
- E. Conduct operational and process verification reviews of existing plans from Center employees, partners, visitors, and tenants to ensure all Annex EMP requirements are adequately addressed.
 - 1. Review existing plans, procedures and other documents annually and as necessary to ensure these documents adequately address functional target capabilities, such as evacuations; post-disaster response and recovery operations; deployment of resources; interoperable communications, notifications, alerts and warning systems.
- F. Provide oversight of the emergency notification and emergency communications systems, including inspection, testing, reporting of needed repairs.
- G. Regularly review all new or updated evacuation plans to ensure compliance and effectiveness. Coordinate and oversee evacuation drills as directed by the NASA Emergency Manager, ensuring proper execution and documentation of each exercise.

3.2. Emergency Operations

The Contractor shall:

- A. Activate and operate the EOC when major emergencies occur or are likely to occur, as well as interagency emergency operations and other responses where an intra- or interagency response is required. Additionally, the EOC shall be activated when

deemed necessary by the Center EM, Annex COR or CCPS. EOC shall be activated within 30 minutes of notice during business hours and activate EOC within two (2) hours during non-business hours.

1. If an emergency requires continuous (24/7) EOC operation, provide additional staffing outside normal operating hours as an IDIQ task.
- B. Provide EOC management and support, interoperable communications processes and systems, damage assessments, interagency coordination, and mutual aid upon EOC activation. Coordinate Center emergency activities with Center Emergency Support Functions (ESF) staff.
- C. Staff and operate an EOC or Incident Command Post, including all related equipment such as computer systems/software and communications equipment). Maintain capability to staff an alternate facility under continuity of operations planning.
- D. Ensure the operability of all emergency equipment in the EOC and operational weekly tests shall be performed on all EOC equipment. As maintenance is required, notify the Annex COR and Center EM and then submit a work order to initiate repairs. Ensure weather tracking equipment is up to date and make informed recommendations should newer versions be required.
- E. Support damage assessment and recovery operations with NASA, other Government agencies, and contractors consistent with Center Damage Assessment and Recovery plans and provide support for an operational pre-brief for each event.
- F. Conduct emergency operations and recovery actions in accordance with the CEMP.
- G. Comply with the NIMS when deploying mitigation, preparedness, response, and recovery actions associated with emergency management.
- H. Train the ESF staff in accordance with NIMS and maintain training records.

3.3. Continuity Of Operations (COOP)

The Contractor shall:

- A. Maintain, implement, and periodically review the COOP to ensure alignment with current and anticipated operations. Verify that all identified COOP capabilities are in place and functioning as intended. Document findings and provide recommended updates to the NASA Emergency Manager for review and action.
- B. Ensure a level of readiness and consistency in the outcomes directed by Federal Continuity Directive-1 (FCD-1) and Federal Continuity Directive-2 (FCD-2), Federal Executive Branch National Continuity Program and Requirements; EO 12472, Assignment of National Security and Emergency Preparedness Telecommunications Functions; EO 12656, Assignment of Emergency Preparedness Responsibility; and when applicable, comply with Memorandum of Understanding (MOU) or Mutual Aid

Agreements (MAA) with Federal, state, and local counterparts engaged in continuity of operations activities such as shared facilities and systems.

3.4. Test, Training and Exercise (TT&E)

The Contractor shall:

- A. Maintain, and administer a comprehensive TT&E program in accordance with standards and requirements outlined in NIMS, FCD-1, the Homeland Security Exercise and Evaluation Program (HSEEP) and NPR 8715.2, NASA Emergency Management Program Procedural Requirements. Provide recommendations for the TT&E to the Center EM.
- B. Ensure that testing of the alert, notification, and activation procedures and systems are accomplished in accordance with FCD-1 and HSEEP.
- C. Conduct and participate in annual exercises to demonstrate the capability to:
 - 1. Execute emergency response plans using first response force (including active shooter exercises).
 - 2. Activate the EOC (all ESFs).
 - 3. Activate the Alternate EOC (COOP Management, Support Team).
 - 4. Interoperate with established MOUs/Memorandums of Agreement (MOA).
- D. Support, participate, and coordinate TT&E activities with NASA, Federal, state, and local emergency management officials and other Government agencies including tenants/partners and adjacent military installations.
 - 1. Assist and participate in annual statewide severe weather drill(s)
- E. Develop and administer a Lessons-Learned Program and CAP consistent with best practices to identify shortfalls, weaknesses, and failures identified during the evaluation of TT&E activities. A published, final report shall describe assessed performance against exercise objectives and include recommended corrective actions no later than 45 workdays following an exercise in accordance with DRD TBD, Contingency and Emergency Plan.
- F. Ensure emergency management activities such as training, exercises, reviews, response to emergencies, and accident/incidents requiring emergency response activities are documented and available in a shared file system.
- G. Promote, administer, and manage the Independent Study Training courses offered by the Emergency Management Institute (EMI), Federal Emergency Management Agency (FEMA) for all personnel that support this PWS. Document the completion of the subject training courses.

- H. Develop additional training courses at the direction of the NASA Emergency Manager.

4. PSCC

The Contractor shall:

- A. Provide certified personnel in accordance with the Appendix TBD, Position Table to operate the PSCC on a 24/7, 365-day basis and track and record all incidents. PSCC personnel shall have the training and certification to functionally operate all PSCC/ Enterprise Physical Access Control System (EPACS) hardware and software systems as required by the Annex.
- B. Dispatch all responders who provide police, security, fire, and emergency medical services utilizing the provided dispatch systems. Provide response data to the Annex COR as requested including but not limited to fire and Emergency Medical Services responses, alarms activations, audio dispatch recordings.
- C. Provide certified personnel to operate the PSCC containing both emergency and administrative telephones, point-to-point telephones, radios, access control systems, fire and security alarm systems, Video Surveillance Systems (VSS), 2-way radio base stations with multi-net/bridging capabilities, emergency notification systems, recording systems, National Crime Information Center (NCIC) terminal, and other Annex specific requirements.
- D. Perform a wide range of dispatch procedures and functions, (not an exhaustive list) medical, fire, security, law enforcement, and local hazard alarm operations; emergency (911) and non-emergency telephone operations; emergency and non-emergency text and paging systems; conference call coordination; protective services radio systems; Telecommunications Device for the Deaf (TDD) operations; and intercom operations. PSCC operators must provide emergency response elements with accurate and timely information, maintain a continuous chronological log of all response activities for each shift, monitor and track the status of emergency services personnel, and deliver updated information critical to decision-making throughout the incident.
- E. Create a chronological record of activities and significant events during each shift as directed in the SOP. Perform data entries and complete reports for all incidents in accordance with SOP.
- F. Ensure all PSCC personnel obtain and maintain certification to use the National Criminal Information Center (NCIC) and State Criminal Justice Information Systems (CJIS) in accordance with Federal and state requirements.
- G. The following is applicable to Annex's that directly "dispatch" Fire services (without assistance from of an outside dispatching center): train PSSC personnel in accordance with to the requirements of NFPA 1225, Standard for Emergency Services Communications.

- H. Maintain and update written SOPs, and Emergency Action Checklists (EAC) for all PSCC equipment, as well as response policies for routine and emergency events.
- I. Maintain an up-to-date list of emergency contact telephone numbers, including: the Center OPS, Center management, after-hours response points of contacts, mutual-aid contacts, Federal and local law enforcement agencies, local emergency management, and fire departments. The Contractor shall reconcile all contact list monthly.
- J. Ensure PSCC operators monitor and dispatch security personnel to investigate designated alarms, including those related to doors, environmental monitoring, and personal duress. They must also monitor network video cameras for suspicious activity and to provide real-time assessment of alarms. Additionally, operators are responsible for utilizing the network to identify and investigate possible facility penetration attempts by unauthorized personnel. The PSCC shall promptly place a work order for all alarm and video surveillance system issues or outages that are identified.
- K. Promptly place work orders and/or report facility safety issues that are identified/reported by security personnel.
- L. Immediately utilize an alternate communications system (e.g., handheld radios, phones) in the event of a radio failure at the PSCC. Dispatchers shall inform the security supervisor, fire supervisor, and appropriate repair personnel of radio failures without delay.
- M. Maintain readiness and conduct quarterly tests to ensure the ability to activate the alternate PSCC location.
- N. Dispatch first responders to all emergency calls within NFPA time requirements.
- O. Answer all phone calls by the third ring. However, 911 and emergency phone lines take priority.
- P. Immediately acknowledge all radio traffic upon receipt.
- Q. During emergency operations, support the EOC by providing periodic updates of information and Protective Services force deployment status.

5. PHYSICAL SECURITY SUPPORT

The Contractor shall:

- A. In accordance with NPR 1620.3, Physical Security Requirements for NASA Facilities and Property, promote the safeguarding of NASA personnel, information, and property by reducing the opportunity for theft, sabotage, terrorism, and workplace violence. Crime prevention shall be reinforced by ensuring everyone safeguards Government property. This is accomplished through the implementation of a comprehensive resource protection plan, physical security plan, vulnerability and threat assessments, and the identification and protection of NASA Critical Infrastructure.

- B. Provide comprehensive and integrated systems that combine personnel and equipment to safeguard personnel, physical assets, and information. Support shall extend to NASA Priority/Critical Resources, and Space Launch Systems, payload systems, aircraft, and command and control systems. The Contractor shall deploy teams to evaluate and report on installation protection needs and requirements based on the current threat conditions and as directed by the Annex COR.
- C. Execute and sustain a comprehensive physical security protection program utilizing physical measures designed to safeguard people and prevent unauthorized access to equipment, facilities, material, and documents and to safeguard them against damage, loss and unauthorized dissemination. The Contractor shall conduct security studies, recommend security solutions, write reports, conduct briefings, review and analyze proposed construction and renovation projects, respond to user inquiries, evaluate statistical data, and execute additional or enhanced physical security measures during periods of increased threat. The Contractor shall provide special attention and added protection to NASA Critical Infrastructure (NCI) assets and conduct Facility Security Assessments (FSA). The Contractor shall adhere to policies as set forth in NPR 1620.2, Facility Security Level Determinations, NPR 1620.3, Physical Security Requirements for NASA Facilities and Property, and NPR 1600.1, NASA Security Program Procedural Requirements.
- D. Conduct physical security inspections, audits, key audits, and assessments of Center facilities and areas for the purpose of identifying security weaknesses and vulnerabilities and recommend countermeasures in accordance with applicable Federal and NASA policy. Provide the Annex COR, with the Contractor's planned approach for performing inspections in accordance with NPR 1620.3, Physical Security Requirements for NASA Facilities and Property. The Contractor will not implement the plan until concurrence has been received from Annex OPS.
- E. Review and analyze proposed construction, design reviews, and renovation projects to ensure compliance with the security requirements. Provide formal reports with comments, observations, justifications, and where appropriate, citations of security compliance or reference documents. Respond to user requests and evaluate statistical data. Participate in preconstruction meetings.
- F. Conduct risk assessment and studies in accordance with NPR 1620.2, Facility Security Assessments, and NPR 1620.3, Physical Security Requirements for NASA Facilities and Property.
- G. Maintain, review, recommend revisions to all security procedures, program security plans, facility security plans, site security plans, contingency plans, and operational security plans. Distribute these documents as directed by the Annex COR.
- H. Maintain cognizance of current resource protection requirements, physical security requirements, protective services issues, trends, and technologies, proposed and implemented changes to all compliance documents including all applicable laws, regulations, policies, and directives. Identify and notify Annex COR of impacts to

Contractor requirements, processes, and practices. Make recommendations to the Annex COR on how to best meet the requirements based on the current technology and information available. Make trade-off recommendations to the Government for new or changing requirements to avoid cost impacts

- I. Conduct Design-Basis Threat analysis for formulating terrorism counteraction measures.
- J. Manage, review plans, and operate the physical, mechanical, and electronic/IT systems used to control access to installations, areas, and facilities. The Contractor shall adhere to IT policy contained in NPR 2810.1, Security of Information and Information Systems. In accordance with NPR 1620.3, Physical Security Requirements for NASA Facilities and Property, review and test the physical, mechanical, electronic, and IT systems used to control access to installations, areas, and facilities using the EPACS. This includes, but is not limited to, walls, fences, gates, doors, electronic and mechanical locks, turnstiles, and bollards. Submit deficiencies to Annex COR.
- K. Evaluate and recommend to Annex OPS installation protection needs and requirements based on National Terrorism Advisory System or local threat changes.
- L. Provide priority attention and added protection to NCI and conduct Facility Security Assessments in accordance with NPR 1620.2, Facility Security Level Determinations and NPR 1620.3, Physical Security Requirements for NASA Facilities and Property. Submit annual reviews to the Annex COR of the COOP with recommendations to relocate any NCI, if necessary, under COOP.
- M. Maintain, review, and recommend improvements to contingency exercises and operations. Provide support and conduct evaluations for the following situations and locations (not an exhaustive list):
 - 1. Anti-hijack, anti-robbery, and anti-terrorist measures.
 - 2. Bombings or bomb threats, hostage, and barricaded situations.
 - 3. NCI facilities.
 - 4. Mass casualty incidents, mobility, and Non-Nuclear Munitions Storage Areas.
 - 5. Work stoppages or walkouts, strikes and demonstrations.
 - 6. Natural disasters.
 - 7. Civil disturbance or riot threatening priority or critical resources.
 - 8. Overt attack on a restricted or critical area.
 - 9. The need to deploy security forces or obtain additional security forces.

10. Arrival of military or commercial aircraft.
 11. The Department of Energy nuclear shipments.
- N. Support the NCI Program to include (not an exhaustive list): managing designation, tracking, and access control to NCI; conducting evaluations to determine if an area, facility, or portion of a facility meets NCI designation criteria; performing NCI surveys and inspections; and developing and maintaining comprehensive NCI records and reports.

5.1. Locksmith Services

The Contractor shall:

- A. Comply with NPR 1600.2, NASA Classified National Security Information (CNSI), NPR 1620.3, Physical Security Requirements for NASA Facilities and Property, and DoDM 5200.01, Volume 3, The DoD Information Security Program, Protection of Classified Information. Provide comprehensive locksmith services, including (not an exhaustive list), lock and key management, data control, installation and repair of mechanical and electronic locks and locking devices, emergency openings of safes and vaults, combination setting and changes, fabricating and issuing keys, issuing and controlling padlocks, and maintaining work order information. Ensure that personnel performing locksmith duties under this PWS maintain all required manufacturer's certifications for installation, operation, maintenance, troubleshooting, and repair of installed locking systems.
- B. Furnish (excluding new construction and major renovations), install, repair, and re-key all lock cylinder cores as needed. Additionally, construct, maintain, evaluate, remove, replace, and repair door locks as required. All key locks shall be compatible with the existing Center master key system. Refer to Annexes for more information.
- C. Evaluate, maintain, certify, force open, and repair security containers, safes, vaults, vault doors and locks in accordance with FED-STD-809E, Federal Standard Inspection, Maintenance, Neutralization and Repair of GSA Approved Containers, Lock Extensions and Vault Doors.
- D. Respond to all emergency work orders, as designated by the Annex COR, within one (1) hour during normal business hours. Additionally, maintain the capability to respond to emergency work orders after normal working hours within four (4) hours of notification.
- E. Set and change combination locks on GSA-approved safes, security containers, and vaults. All combinations shall be changed on safes and vaults annually, or when an individual's access is removed, or upon re-issuance. Record changes on Standard Form 700 and filing combinations immediately.
 1. Personnel performing these tasks must be trained and proficient in the X-series lock, and other emerging electronic/mechanical locking devices.

- F. Install, service, remove, and provide annual preventative maintenance on mechanical and electromechanical locks for safes and vaults. Confirm all safes are in compliance with requirements prior to being reused. Safes that are not compliance shall be referred to the Annex COR for direction.
- G. Manage the Center's GSA approved security container inventory and maintain a current database reflecting the location, condition, make and model. Conduct an annual inventory of all containers and provide a copy of the inventory to the Annex COR.
- H. Ensure operability of equipment and tools to manufacture specifications, safely operate tools and machinery in the locksmith shop, and report any deficiencies to the Annex COR.
- I. Make duplicate keys within two business days of receiving request.
- J. Advise and consult with maintenance, operations, engineering, and Physical Security Specialist regarding locking devices and other keying material. Recommend appropriate devices, upgrades, and procedure changes to enhance site security and support new construction or rehabilitation project designs by specifying appropriate locks required. Meet with facility design engineers, attend other meetings and briefings when necessary.
- K. Develop training and provide presentations for new lock/key mechanisms or those that are not common.
- L. Maintain current inventory levels of spare parts, such as, (not an exhaustive list) padlocks, pins, cores, combination locks, chains, keys, and components documented as GFP, required for locksmith assignments and duties.
- M. Conduct annual inventories of keys, locks, padlocks, bench stock, and locksmith equipment.
- N. Assist in evaluating and tracking lost key incidents, and reviewing investigations involving all locking systems, and provide recommendations to the Annex COR.
- O. Ensure locksmiths are proficient in all aspects of required services and maintain required certifications in accordance with Appendix TBD, Position Table.
- P. Maintain a database inventory of security locks and keys and keep it current to track and control all locks, keys, and lock combinations.
- Q. Ensure locking cores are rekeyed to restrict access on doors in which electronic access control has been installed.
- R. Maintain accurate service records and documentation.
- S. Control and issue keys, padlocks, and other related material.

- T. Ensure that only authorized individuals receive keys, and that issued keys only permit access to authorized areas, facilities, buildings, and rooms.
- U. Track and manage work order information for locksmith services. Process all authorized requests for lock installations, locking devices, lock repairs, safes, locking security (GSA certified) containers, and other related locking devices. Work orders shall be completed within 5 business days of submission.
- V. Maintain a master safe in the lock shop office.

5.2. Electronic Security System (ESS) Services

The support service functions include installation and sustainment of existing Lenel access control systems, as well as operation, end of line maintenance, repair, and periodic maintenance of all Enterprise Physical Access Control System (EPACS), electronic security systems, intrusion detection systems, alarms, Video Surveillance System (VSS), and physical access controls. These include but are not limited to physical, mechanical, electronic and IT-based systems, used to control physical access to operational facilities and areas, (i.e., walls, fences, gates, doors, electronic and mechanical locks, turnstiles, and traffic controls).

The Contractor shall:

- A. Install, maintain, provide maintenance, test, and document Electronic Security Systems (ESS) as directed in the Annex SOP's, for all devices such as, (not an exhaustive list); intrusion alarms, network video systems, access control systems, electronic locking devices, gate controls, active bollards, turnstiles and other security barriers (including turnstiles), audio alarms, duress/panic alarms, body cameras, and mobile patrol video cameras and recording equipment. All systems are to be installed and maintained according to all applicable state and federal regulations.
- B. Maintain and operate Center-wide ESS. Provide user-level operation, maintenance, programming, management, and monitoring of the ESS. Coordinate activities with all supporting service Contractors involved in ESS functions, including locksmiths, Network Services, Lenel Regional Administrators, System Administrators, Facilities Division Support Services personnel, other vendors as required, OPS Physical Security Lead, and Annex COR.
- C. Serve as the SME on all security related ESS services, integration, construction, planning, planning, design, installation, maintenance, and maintain the necessary records, drawings, and schematics for these systems. Ensure all SOPs, checklists, design reviews, drawings and plans associated with specific job functions are submitted to the Annex COR for review and approval before implementation.
- D. Manage and operate the physical, mechanical and electronic/IT systems used to control access to installations, areas, and facilities. Obtain Lenel Regional Administrator privileges and obtain the appropriate elevated user privileges to work on the system to maintain the EPACS systems. Serve as a LENEL technical resource in handling the configuration of new and existing EPACS hardware; assist a Value-Added Resellers

and the ESS Technician on new EPACS hardware installations and existing EPACS reconfigurations and maintenance. Assists in coordinating and scheduling maintenance and installation activities. Follow all industry and manufacturer installation standards and guidelines in accordance with NIST SP 800-53/53-A, Security and Privacy Controls for Information Systems and Organizations.

- E. Provide service within two (2) hours of receiving notice/work order during normal business hours. Provide service within four (4) hours of receiving notice of an emergency work order during non-business hours, as directed/approved by the Annex COR.
- F. Prepare estimates for installations of EPACS equipment; coordinate with appropriate organizations for smooth, efficient, timely, and complete installations (installations will be requested in an IDIQ task) of EPACS equipment and components.
- G. Furnish all tools and equipment necessary to successfully support ESS operations, unless specified as GFP in the Annex.
- H. Replacement parts for the ESS will be supplied as GFP or under terms of the system and component warranties.
- I. Maintain accurate records, drawings, and diagrams of the wiring, installations, and other ESS-related data directly involved with in maintaining ESS; establish schedules for and perform preventive maintenance; prepare and produce system reports for program audits, reviews and assessments as needed and directed by Annex COR.
- J. Provide support and oversight to any outside vendors who may be contracted to install ESS for projects in ensuring system configuration requirements meet NASA requirements and ensure the installation meets the manufacturers defined specifications.
- K. Conduct Performance Verification Testing of the ESS components before declaring the system is fully operational and turned over to the Government.

6. SECURITY OPERATIONS

The Contractors authority to carry weapons and effect arrests is derived from 51 U.S. Code § 20133, Permission to carry firearms and 51 U.S.C. § 20134, Arrest Authority and 14 CFR Part 1203(b), Security Programs; Arrest Authority and Use of Force by NASA Security Force Personnel as implemented by NPR 1600.1, NASA Security Program Procedural Requirements. Contractors granted authority to carry weapons and make arrests may exercise such authority only while guarding and protecting people and property owned or leased by, or under the control of NASA.

The Contractor shall:

- A. Conduct security operations to perform tasks such as, (not an exhaustive list):

1. Respond to and investigate administrative violations and criminal conduct.
 2. Respond to alarms, emergencies, and acts/threats of violence.
 3. Enforce federal law and regulations, including NPDs and NPRs.
 4. Perform searches, checks, and inspections of personnel, parcels, vehicles, and facilities.
 5. Enforce perimeter and facility access control.
 6. Perform crowd control.
 7. Perform parking enforcement and traffic control and enforcement.
 8. Perform foot and vehicle patrols of public areas, Government property, and roadways to support security, law enforcement, and safety operations in accordance with SOPs. While on patrol, observe and report all security and safety hazards, including but not limited to suspicious conditions, fires, water leaks, environmental threats, unsafe or potentially unsafe conditions, and other hazardous situations to the PSCC.
 9. Establish roadblocks and restrictions.
 10. Lock and unlock facilities and rooms.
 11. Conduct flag protocols.
 12. Safeguard NASA aircraft and other sensitive and critical assets.
 13. Provide motorist assistance.
 14. Escort equipment, outside emergency services, and VIP personnel.
 15. Collect, process, inventory, secure, preserve, and store evidence in accordance with Annex SOP.
- B. Respond immediately to requests for assistance and emergencies or alarms in accordance with OPS-approved SOPs. Examples include response to electronic security system alarms, unsecured area alarms, duress alarms, credit union alarms, fire alarms, environmental and oxygen sensor alarms, hazardous incidents, medical emergencies, and unlock requests.
- C. Report all serious and/or potentially serious situations, including but not limited to; traffic stops, incident response, emergency response, alarms, suspicious conditions to dispatch immediately before responding, or as soon as it is safe to do so.
- D. Notify the Annex COR in advance of all work-related court-related appearances.

- E. Guard and maintain the legal and physical integrity of evidence from destruction, tampering, or loss. The Contractor shall protect, secure, and ensure only personnel authorized by the Annex COR are permitted access to the evidence room.
- F. Support denial of access, watchlist, and be on the lookout (BOLO) actions by ensuring the information is entered into the electronic databases, as required by SOP, and/or as directed by Annex COR.
- G. Provide support for lost and found items at the center, including processing, releasing, storage, and destruction as directed by SOP and/or Annex COR.

6.1. Security and Security Police Services

The Contractor shall:

- A. Provide comprehensive security services that are in accordance with the NPR 1600.1, NASA Security Program Procedural Requirements, Center Security Procedural Requirements, and SOPs.
- B. Execute security police duties, to detain and arrest for violations of Federal law (which includes Assimilated Crimes Act, 18 U.S. Code § 13, Laws of States adopted for areas with Federal jurisdiction).
- C. Notify the Annex COR as soon as feasible of all significant incidents (e.g., potential for violence, felony arrest, potential counterintelligence matters, and media involvement).
- D. Document all information into Annex-specific incident crime information system (e.g., offense reports, traffic reports, incident reports, field interviews and photographs, and citations).
- E. Provide armed officers to safeguard personnel and material resources located on NASA property. Post hours for each position are listed in Appendix TBD, Position Table. As directed by the Annex COR, the Contractor shall support any deviations from standard post assignments, such as redirecting mobile units to support a fixed post at the airfield for aircraft protection while on a flight line.
- F. Conduct shift formation at the beginning of each shift prior to deploying to post. Shift formation shall include roll call, uniform inspection, weapons check, intelligence and safety briefings, and other briefs as necessary.
- G. Ensure all patrols and other specialty units are equipped with vehicles that meet the specifications outlined in the Appendix TBD, Vehicle Requirements.
- H. Establish extended restricted areas to preclude entry of unauthorized persons into the expanded temporary restricted or critical areas as outlined in plans approved by Annex COR to support special operations (e.g. Launch, Hazardous Operations or other operations).

- I. Provide convoy or escorts for risky movements such as (not an exhaustive list) launch system payloads, flight hardware, VIP visit, oversized loads, miscellaneous movements, and other dangerous or hazardous movements as directed by the Annex COR.
- J. Control ingress and egress at specified entry control points in accordance with Appendix TBD, Position Table, Post Orders, applicable Center directives, and SOPs, or as directed by Annex COR.
- K. Conduct random inspections of vehicles entering and exiting NASA property in accordance with the Random Vehicle Inspections SOP.
- L. Investigate incidents and offenses, enforce traffic regulations, investigate traffic accidents, direct traffic, and issue citations. Provide the initial incident report and/or traffic accident report within four (4) hours of clearing the incident scene.
- M. Establish Incident Command when required.
- N. Maintain and control access to incident scenes involving but not limited to safety, fire, workplace violence, natural disaster, or other emergencies as directed by the Incident Commander.
- O. Provide patrols for the inspection and immediate reporting of suspicious activities; and unsecured, unsafe, and/or hazardous conditions of assets, gates, bollards, facilities, offices, docks, and roadways.
- P. Conduct roving patrols of the Center roadways at various times to avoid patterns of predictable behavior. Patrol's primary function is to participate in maintaining a secure facility (e.g., to prevent and detect break-ins, vandalism, Center and facility breaches, security violations, criminal conduct). While patrolling, remain alert for potential crimes of opportunity and initiate positive control actions to deter or prevent criminal activity.
 - 1. Identify suspicious packages, items, or conditions, and immediately notify the PSCC to dispatch additional resources for further investigation into determination if they are potential hazardous devices.
 - 2. Establish and secure perimeters for an area or facility if a package or items are determined to be a potential threat.
 - 3. Respond to, investigate, and recognize potential hazardous devices. Examples are a bomb, improvised explosive device, commercial explosives, illegal fireworks, suspicious packages, or ordnance.
- Q. Detain individuals for identification and conduct field interviews for investigative purposes.

- R. Identify and immediately report unsafe or potentially unsafe conditions, procedures, or activities to the PSCC for prompt action and resolution.
- S. Provide patrols to randomly check both the interior and exterior of facilities to ensure they are properly secured. Periodically conduct facility walk-through inspections to verify security compliance, including checks for unlocked controlled or limited-access areas, and classified security containers.
- T. Conduct Random Anti-Terrorism Measures (RAMs) to include special activities such as badge checks upon entry to or exit from specific locations, areas, or facilities on Center. Utilize a COR-approved, randomly generated system to produce the schedule. RAM activities will be performed in lieu of routine patrol activities using on-duty assets as directed by the Annex COR. Officers shall check to ensure that badges are properly displayed and ensure that only properly badged personnel enter NASA buildings.
- U. Escort people from the Center for security reasons when necessary or directed by Annex COR, or CCPS, or their designee.
- V. Make appropriate warning notifications and evacuations as necessary to ensure safety of people.
- W. Ensure that all armed personnel performing under this PWS complete the Casualty Rescue Team (CRT) training course. This course integrates law enforcement, fire, and rescue personnel into a unified taskforce designed to extract injured individuals from mass casualty events, such as active shooter incidents, for immediate medical care once the threat has been neutralized or contained. If a joint training exercise with the fire department is not feasible, CRT concepts shall be delivered through classroom instruction. CRT training must be completed within one year of Annex Task Order start.
- X. Develop and provide NASA required in-service and on-the-job site-specific training or remedial SO/SPO training to correct identified deficiencies.
- Y. Respond to all emergency calls, alarm activations or other situations where life or property is endangered within the time limits stated in the Annexes. Arrive on-scene for all non-emergency calls within the time limits stated in the Annexes.

6.1.1. Emergency Response Team (ERT)

The ERT unit is a highly specialized team that has training in special weapons and tactics and is capable of immediate response to any type of threat or security emergency. ERT will provide direct support to the Watch Commander, in accordance with specific requirements in the Annexes.

6.2. Traffic Enforcement

Traffic Enforcement Units are dedicated to keeping the roadways safe. These units conduct specialized operations in problem areas during critical times using marked and unmarked patrol vehicles.

The Contractor shall:

- A. Provide traffic enforcement in accordance with 14 C.F.R. § 1204.1101 as required or directed by Annex COR.
- B. Enforce and respond to traffic violations, conduct selective enforcement, conduct vehicle stops, direct traffic, investigate traffic crashes, write reports, and issue traffic citations.
- C. Provide crime detection and prevention, make arrests, respond to emergencies, traffic control, roadblocks, and provide roadway safety.
- D. Provide and utilize in-car audio, video, and body camera systems. Cameras shall be activated for all traffic stops and other atypical interactions with employees and the public. In-car and body camera system requirements are defined in Appendices TBD, Uniforms, Equipment, and Grooming Requirements, and TBD, Vehicle Requirements.
- E. Provide security and protection to persons in custody and transport them to a detention facility as necessary.
- F. Perform protection of VIP and dignitary visits when required and provide escort of flight hardware and other critical resources.
- G. Provide support for emergency responses when traffic control is required.
- H. Track points, disposition, and account for all citations to include appeals.
 - 1. Send notices using the established process and systems in place, which shall be completed within three business days.
- I. Operate speed radar check points as directed by the Annex COR. Speed detection in sensitive areas shall be coordinated with the Annex COR. Notify the PSCC of any unusual or unsafe traffic, road and weather conditions. Deploy traffic control and/or safety devices to prevent access to unsafe areas.
- J. Will deploy GFP mobile/temporary traffic control devices and/or signs and coordinate with the Facilities contractor. The Contractor is also responsible for coordinating maintenance as directed by the Annex COR.

6.3. Criminal Violation Enforcement

In performing the security functions described in this PWS, the Contractor will encounter criminal activity. Certain Centers use the Federal Magistrate Program (FMP) to prosecute individuals observed committing various criminal acts. All personnel who are required to utilize FMP must obtain specialized training in the Federal magistrate process and the Central Violation Bureau process and are authorized to issue District Court Violation Notices. SPOs must be trained in Center processes for handling misdemeanors and felonies.

Where the FMP is applicable, and as may be detailed in the relevant annex, the Contractor shall:

- A. Enforce Federal law, assimilated state law, and NASA regulations; conduct vehicle stops; direct traffic; make arrests; issue citations; write reports; transport suspects; and testify in court.
- B. Comply with local policies when responding to subpoenas, and coordinate with the Annex COR to manage civil and criminal processes, including the collection and submission of evidence requested for court proceedings.

6.3.1. Investigations

The Contractor shall:

- A. Provide qualified SPOs to conduct initial investigations and submit reports on lost or stolen property, suspicious activity, suspicious mail, and other incidents including but not limited to workplace violence. Initial investigations shall be conducted, and a preliminary report submitted to the Annex COR within four (4) hours of clearing the incident scene.
- B. Provide investigative support to conduct internal and special investigations as directed by the Annex COR.
- C. Preliminary investigations shall be followed up in a timely manner with a detailed investigation.
- D. Provide documentation and reports generated from all investigations. The reports shall be complete, concise, accurate, and provided in a timely manner.
- E. Maintain files for all such documentation and reports. The Contractor shall collect and provide incident video footage, photographs, incident statements, diagrams, and copies of reports from outside entities as directed by the Annex COR.
- F. Provide aid, assistance, and support in all aspects of preventing, investigating, and responding to threats or incidents of workplace violence.
 - 1. Ensure this assistance and support includes (not an exhaustive list), providing specific tailored education and training for employees and managers concerning the identification and proper response to threatening behavior; providing an

appropriate security presence during any employee meeting where there is a potential for disruption or violence; and participating in meetings of the workplace violence Threat Assessment Advisory Group.

- G. Provide support to the OPS Physical Security program as directed by the Annex COR.

6.4. Weapons Storage Areas (Security Armory)

This section encompasses the operations and maintenance of the Armory for the purpose of storage and issue of weapons, ammunition, and other necessary equipment.

The Contractor shall:

- A. In accordance with NPR 1620.3, Physical Security Requirements for NASA Facilities and Property, utilize a compliant weapons storage area to safely store, maintain, repair weapons, ammunition, and other necessary equipment. Ensure proper accountability, issuance, and receipt of these items to authorized personnel.
 - 1. Ensure the armory security systems are tested and recorded, at a minimum frequency of monthly, or as directed by the Annex COR.
 - 2. Weapons issued for on-duty use, such as rifles and shotguns, will be secured in Annex COR approved storage containers when not carried on the officer's person.
- B. All firearms and magazines will be provided as GFP.
- C. Provide a manufacturer-certified armorer to service all GFP OPS weapons, including those issued to OPS Special Agents. The armor must hold valid manufacturer certifications for specific weapon platform serviced.
- D. Ensure all weapons and shift equipment are accounted for at the start and end of each shift. Ensure requirements for weapons storage and inventory in accordance with NPR 1620.3, Physical Security Requirements for NASA Facilities and Property. Inventory reports shall be provided to the Annex COR upon request.
- E. Notify involved Annex COR immediately of any lost or damaged weapons, ammunition, or equipment, and initiate an investigation and provide a report to the Annex COR.
- F. Immediately notify the Annex COR of any negligent discharges or close calls.
- G. Ensure the Government provided weapon clearing barrels and NASA approved clearing/loading procedures are utilized for the safe issuance and turn-in of weapons. The NASA-approved clearing procedures are to be posted in the armory and at each clearing barrel.
 - 1. Weapons will only be exchanged in the approved armory.

- H. Remove any unserviceable weapons and notify the designated Annex COR. Upon authorization, ensure repairs are performed by a manufacture-certified armorer to effect repairs.
1. Ensure the safety, serviceability, and proper maintenance of all GFP (firearms) and related equipment.
 2. Maintain all firearms assigned, including a function check to ensure they are safe to operate. All repaired firearms shall be test fired prior to returning the weapon to service.
 3. Provide environmentally safe and manufacturer recommended cleaning supplies.
 4. All firearm modifications and/or additions shall be approved in writing by the Annex COR or CCPS.

6.5. Flag Protocol

The OPS provides instruction on handling flags including the raising and lowering of flags and replacement of worn flags on designated poles, half-staff notifications to tenant organizations, flag procurement, and storage.

The Contractor shall:

- A. Comply with the Center Flag Policy, Chapter rules, and Federal regulations concerning flag protocol.
- B. Raise and lower flags on designated poles during replacement of worn flags and half-staff notifications. Rendering honors to the U.S. Flag will be performed only by uniformed personnel, who shall perform these duties; fold, unfurl, hoist and lower, render appropriate honors toward, and protect flags from disgrace or dishonor.
 1. Patrol Officers will raise the flags no later than 6:30 AM and lower at 5:00 PM or sunset (whichever occurs first), daily, or as specified by the Annex COR.
- C. Maintain and store a sufficient supply of GFP new and flown flags and provide storage.
- D. Initiate work order and support requests when maintenance is required on designated flagpoles to include illumination fixtures if so equipped.
- E. Periodically inspect the flags for weathered or worn appearance. Replace flags when they are deemed to be unserviceable by the Center OPS. Secure unserviceable flags pending disposition instructions by the Annex COR.

6.6. Internal Security Education and Training

The Contractor shall:

- A. Develop and implement a Security Education and Training Program Plan at each Center in accordance with DRD TBD, Security Education and Training Program Plan.
- B. Provide a two week (80 hours) “site-specific” training (classroom and On the Job Training (OJT)) to newly hired armed Contractor personnel, unless otherwise stated in the Annex. Personnel just completing the NBTS are not qualified to work a post until they have completed their OJT. The training and lesson plans will be submitted to the Annex COR for approval.
- C. Provide safe operation and oversight of the range and ensure properly trained and certified range-master/firearms instructors and range safety officers are available to conduct scheduled weapons qualifications. Range qualification will be conducted in compliance with NPR 1600.1 and all NASA safety and firearms training standards to help ensure safe range operations.
- D. Provide instruction for firearms, less-lethal weapons, judgmental shooting drills, low light firing, shoot-house, force-on-force scenarios, and “Active Shooter” responses.
- E. Provide and support security education training such as but not limited to Surviving and Armed Violent Encounter (SAVE) to both NASA affiliated personnel and tenants.
- F. Provide 8 hours of annual CE training to Security Officers, Security Police Officers, and NASA Special Agents. All armed officers and Agents must complete the training within the NPSTA training calendar year (January 1 through December 31). NPSTA will distribute the CE curriculum.
- G. Attend the NPSTA's annual instructor workshop.
- H. Ensure that all armed personnel performing under this PWS complete the Casualty Rescue Team (CRT) training course. This course integrates law enforcement, fire, and rescue personnel into a unified taskforce designed to extract injured individuals from mass casualty events, such as active shooter incidents, for immediate medical care once the threat has been neutralized or contained. If a joint training exercise with the fire department is not feasible, CRT concepts shall be delivered through classroom instruction. CRT training must be completed within one year of Annex Task Order start.
- I. Ensure all officers (NBTS) are trained and maintain certification for Cardiopulmonary Resuscitation (CPR), Automated External Defibrillator (AED), First Aid, Stop the Bleed, and guidelines and procedures governing utilization of naloxone. Initial training for utilization of naloxone is required for all employees permitted to carry weapons.
- J. Maintain records for all OPS (Contractor and civil servant) personnel certified to carry firearms, qualifying scores, rounds fired, and all other pertinent data. Current firearm

data shall be maintained and made available to Annex COR upon request. Records for all personnel who qualified with a weapon and any NASA required training shall be maintained in accordance with NPR 1600.1, NASA Security Program Procedural Requirements, and annotated in the Training Resource Automation Center (TRAC).

- K. Provide ECD training to Security Police and Security Officers, that are designated to carry the weapon.
- L. Extend invitations to the CO, COR, CCPS, or any designated representative of the CCPS, for any training sponsored or provided by the Contractor.

6.6.1. Firearms Instruction Certification

The Contractor shall:

- A. Ensure Firearms Instructors hold or obtain the certification identified in Appendix TBD, Position Table. Instructor applicants who request to obtain certification to instruct firearms topics shall:
- B. Possess a General Instructor Certification.
- C. Have successfully completed through a Law Enforcement training school, approved by the NPSTA Program Manager, a Firearms Instructor Course containing but not limited to the following subject blocks:
 - 1. Fundamentals of Marksmanship.
 - 2. Firearms Handling Techniques.
 - 3. Coaching Techniques.
 - 4. Safety Rules and Consideration.
 - 5. Low Light.
 - 6. Liability Considerations.
 - 7. Range Management.

6.7. NASA Physical Agility Standards for Armed Personnel

Reference Appendix TBD, Screening Standards for Armed Personnel, for more information.

7. ICAM

ICAM encompasses but is not limited to the issuance and control of identification badges, temporary passes, area permits, special badges, and Center-specific badges and serves as the centralized location for identification management at the center.

The Contractor shall:

- A. Provide ICAM badging at each Center.
- B. Staff and provide services, in accordance with the Annex, to operate, fabricate, and issue passes and badges, including but not limited to:
 - 1. Visitor (Temporary) passes
 - 2. Center-Specific (Local) badges
 - 3. Agency Smart Badges (ASB)
 - 4. NASA Personal Identification Verification (PIV) credentials
 - 5. Permanent Area Access (PAA) and Temporary Area Authorizations (TAA)
 - 6. Badges for Certified escorts of foreign nationals

Note: Badging System software and hardware are GFP. The Contractor will utilize Government-furnished services for the maintenance of the Badging Systems software and hardware.

- C. Coordinate and schedule maintenance of the badging equipment such as (identity, enrollment workstations and credential printing stations). Immediately notify the Annex COR of any outages.
- D. Provide only NASA-approved ancillary badge material such as non-PIV cardstock, access cards, electromagnetically opaque sleeves, printing ribbons, transfer film, laminate, holders, pouches, lanyards, and clips that comply with NPR 1600.4, ICAM and FIPS 201-3, Personal Identity Verification (PIV) of Federal Employees and Contractors.
- E. Utilize only NASA-approved systems and related databases (e.g., the NASA Enterprise Physical Access Control System (EPACS), Card Management System (CMS), Enterprise Visitor Access Management System (EVAMS), Identity Management and Account Exchange (IdMAX) for issuing and recording badges and other facility access credentials to employees, contractors, and visitors.
- F. Process, ship, track, and receive PIV/ASB cardstock, fingerprint cards, and maintain control/accountability of all items shipped and received.

1. Maintain and update status changes for individuals. Once a PIV badge is received from the printing vendor, the Contractor shall ensure that the person's access is accurately and completely replicated to the credential.
 2. Utilize a scheduling system to coordinate the issuance of credentials.
- G. Process and secure badges returned from personnel upon separation/termination or suspensions of employment or as directed. Credentials will be properly accounted for, destroyed and removed from applicable systems. Comply with NASA badge deactivation procedures when the badging office is notified of an employee termination. Ensure the NASA badge is deactivated in IdMAX within one (1) hour of notification and properly destroyed in accordance with NPR 1600.4.
- H. Inventory and maintain control of all PIV/ASB credentials received from the printing vendor. Blank PIV/ASB cardstock will be provided by the Government as GFP, and inventories shall be conducted quarterly for accountability and reconciliation.
- I. Perform enrollments of individuals, using the IdMAX system, and obtain electronic fingerprints using Government provided electronic systems as well as traditional inking systems, photograph, scans of NASA-approved identity source documents, and signature in accordance with NASA ICAM requirements and NPR 1600.4, ICAM. Support potential biometric solutions that may be incorporated into the identification process.
1. Fingerprints must be collected in accordance with NASA ICAM requirements.
- J. Ensure participation by subject matter experts in ICAM teleconferences, and at the direction of the Annex COR, attend annual ICAM conference. Travel will be processed through the Task Order review and approval process, if travel is deemed necessary.
- K. Perform background checks using National Crime Information Center (NCIC), National Law Enforcement Telecommunications System (NLETS), and local law enforcement system as directed in Annex.
- L. Process and issue credentials for foreign nationals, foreign representatives, dignitaries, and guests in accordance with NPR 1600.4, ICAM.
- M. Perform compliance checks and associated tasks in support of the administration of the Foreign National Access Management Program to include Department of Homeland Security's SAVE and Visual Compliance checks.
1. Support the NASA foreign visitor program. Review, administer and conduct periodic compliance reviews of Access Control Plans (ACPs).
 2. Perform duties to support the International Visits Coordinator (IVC), including identity vetting/verification, credential issuance, maintaining records, and conducting briefings.

- N. All ICAM Support Specialists shall cross-train and rotate working in all areas of the badging station to maintain continuity of operations and proficiency in all areas.
- O. ICAM Support Specialists are expected to maintain awareness of the level of activity in the badging office and make positional adjustments to support surges. Perform scheduled requests within 15 minutes of the customers scheduled time. Perform unscheduled requests within 60 minutes of the customer's arrival. The idea is to help customers quicker and eliminate a large back up in the waiting area/parking lot.

8. NPSTA

NASA Protective Services Training Academy (NPSTA): provides qualified personnel to instruct the NASA Basic Training Standard (NBTS) throughout the NASA enterprise, develop and distribute eight (8) hours of Continuing Education annually, comply with standards to maintain accreditation through the Federal Law Enforcement Training Accreditation (FLETA) program, maintain and monitor training records entered into the agency database for compliance. The NPSTA program is administered by NASA HQ OPS and managed by the NPSTA Program Manager who is located at KSC. NPSTA personnel fall under the direction of the NASA HQ Office of Protective Services. NPSTA is based at KSC and travels to other centers as scheduled to provide training.

All Government required Instructor travel shall follow the approval process for Task Order (TO) funding.

The Contractor shall:

- A. Propose a NBTS schedule to make the NBTS course available to all NASA Centers for all Security Officers, Security Police Officers, and NASA Protective Services Special Agents. The NBTS schedule shall be submitted to the NPSTA Program Manager for review and approval prior to being implemented.
- B. Develop training recommendations to enhance security, safety, and related law enforcement capabilities upon request from the NPSTA Program Manager. Once approved, distribute the materials and deliver the training to the designated audience.
- C. Annually develop and propose an eight (8)-hour continuing education (CE) training program for armed personnel. Upon approval, distribute the training materials and deliver the program to NASA Center Trainers. All armed officers and Agents must complete the training within the NPSTA training calendar year (January 1 through December 31). The curriculum must receive NPSTA Program Manager approval prior to implementation or distribution.
- D. Host an annual workshop for all NASA center trainers. This workshop should include CE training and updates on defensive tactics to ensure all trainers are up-to-date with the latest practices and procedures.
- E. Maintain accreditation by the Federal Law Enforcement Training Accreditation (FLETA) program for these areas.

1. Federal Arrest Authority Basic/NASA Basic Training Standard.
 2. NASA Protective Services Training Academy.
 3. NASA Protective Services Training Instructors.
- F. Maintain timely records of student performance and instructor certifications.
- G. Conduct NPSTA business with utmost integrity when dealing with other members of Academy staff, students, public, and customers. Ensure students' safety and welfare.
- H. Maintain a ratio of one instructor to no more than six students during high liability training (e.g., defensive tactics, force on force, dye-marking cartridge).
- I. Maintain the Training Resource Automation Center (TRAC). TRAC is an Agency record system that allows tracking of all mandated training requirements for armed personnel.
- J. Administer the NPSTA Physical Fitness Test in accordance with Appendix TBD, Screening Standards for Armed Personnel.
- K. Training uniform: Officers' choice of pants, t-shirt and boots /shoes (athletic shoes permitted).
