

LABOR CATEGORIES AND QUALIFICATIONS

A. TASK ORDER LABOR MIX/LEVEL OF EFFORT

- 1) The table below provides the estimated composition of the annual hours by Labor Category. The Offeror shall propose the Level of Effort provided below. Offerors' proposals may not deviate from the total number of hours included in Section B.

Labor Category	BASE	OY1	OY2	OY3	OY4	Total
Aegis Computer/Display Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Electronics Maintenance Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Operations & Maintenance Manager (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Operations Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Phased Array Radar/FCS Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Test Director Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Weapons Maintenance Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Deputy Program Manager (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Lead Scheduling Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Program Manager (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Project Management Specialist, Senior (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Site Operations & Maintenance Manager (Key)	1,904	1,904	1,904	1,904	1,904	9,520
SSDS Operations & Maintenance Manager (Key)	1,904	1,904	1,904	1,904	1,904	9,520
SSDS Operations Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
SSDS Readiness Maintenance Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
SSDS Test Director Specialist (Key)	1,904	1,904	1,904	1,904	1,904	9,520
Systems Engineering Lead (Key)	1,904	1,904	1,904	1,904	1,904	9,520
2M Technician (Miniature/Micro miniature)	3,808	3,808	3,808	3,808	3,808	19,040
3M Coordinator, Senior	1,904	1,904	1,904	1,904	1,904	9,520
Aegis Technical Operator	1,904	1,904	1,904	1,904	1,904	9,520
Aegis/SSDS Computer Network Technician, Senior	9,520	11,424	11,424	11,424	11,424	55,216
Aegis/SSDS Computer Network Technician	11,424	15,232	15,232	15,232	15,232	72,352

Aegis/SSDS Computer Network Technician, Entry Level	3,808	1,904	1,904	1,904	1,904	11,424
Anti-Submarine Warfare (ASW) Technician	3,808	5,712	5,712	5,712	5,712	26,656
Anti-Submarine Warfare (ASW) Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
Audio-Visual Technician	-	3,808	3,808	3,808	3,808	15,232
Auxiliary Systems Maintenance Technician	1,904	1,904	1,904	1,904	1,904	9,520
Auxiliary Systems Specialist	1,904	1,904	1,904	1,904	1,904	9,520
Cable Technician	3,808	3,808	5,712	5,712	5,712	24,752
CANES Technician	1,904	1,904	1,904	1,904	1,904	9,520
CANES Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
CEC Technician	9,520	11,424	11,424	11,424	11,424	55,216
Close-In Weapon System (CIWS) Technician, Senior	5,712	5,712	7,616	7,616	7,616	34,272
Communications Electronics Technician	7,616	7,616	11,424	11,424	11,424	49,504
Configuration Management Analyst	5,712	5,712	5,712	5,712	5,712	28,560
Configuration Management Analyst, Entry Level	7,616	7,616	7,616	7,616	7,616	38,080
Drafter CAD Operator	3,808	3,808	3,808	3,808	3,808	19,040
Electrician Maintenance	5,712	5,712	5,712	5,712	5,712	28,560
Electronic Test Equipment Coordinator	1,904	1,904	1,904	1,904	1,904	9,520
Electronic Warfare Technician	5,712	11,424	11,424	11,424	11,424	51,408
Electronic Warfare Technician, Senior	7,616	7,616	7,616	7,616	7,616	38,080
Electronics Technician	15,232	15,232	19,040	22,848	22,848	95,200
Engineering Assistant	5,712	5,712	7,616	7,616	7,616	34,272
Fire Control System (FCS) MK-99 Technician	3,808	3,808	5,712	7,616	7,616	28,560
Fire Control System (FCS) MK-99 Technician, Senior	3,808	3,808	3,808	3,808	3,808	19,040
Gauge Calibration Coordinator	1,904	1,904	1,904	1,904	1,904	9,520
GCCS-M Technician	1,904	1,904	1,904	1,904	1,904	9,520
GCCS-M Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
General Maintenance Lead	1,904	1,904	1,904	1,904	1,904	9,520
General Maintenance Worker	17,136	17,136	19,040	19,040	19,040	91,392
Gun Weapon System Technician	1,904	3,808	3,808	3,808	3,808	17,136
Gun Weapon System Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
Library Lead	1,904	1,904	1,904	1,904	1,904	9,520
Library Technician	19,040	19,040	19,040	20,944	20,944	99,008
Link Electronics Technician	3,808	3,808	7,616	7,616	7,616	30,464
Link Electronics Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
Linux Administrator, Senior	1,904	1,904	1,904	3,808	3,808	13,328
Linux System Administrator, Entry Level	7,616	7,616	7,616	7,616	7,616	38,080
Linux Systems Administrator	3,808	3,808	3,808	5,712	5,712	22,848

Linux Systems Administrator – Tactical Networks	7,616	7,616	9,520	9,520	9,520	43,792
Linux Systems Administrator – Tactical Networks, Senior	3,808	3,808	5,712	5,712	5,712	24,752
NATO Sea Sparrow Missile System (NSSMS) Technician	3,808	3,808	5,712	5,712	5,712	24,752
NATO Sea Sparrow Missile System (NSSMS) Technician, Senior	1,904	1,904	3,808	3,808	3,808	15,232
Navigation Electronics Technician	9,520	11,424	11,424	11,424	11,424	55,216

Vertical Launching System (VLS) Technician	1,904	1,904	3,808	5,712	5,712	19,040

Vertical Launching System (VLS) Technician, Senior	1,904	1,904	1,904	1,904	1,904	9,520
Welder Combination Maintenance	1,904	1,904	1,904	1,904	1,904	9,520
WIETC Site Manager, Senior	-	1,904	1,904	1,904	1,904	7,616
TOTAL	491,232	517,888	586,432	616,896	616,896	2,829,344

The total Task Order hours identified above refer to Labor Categories required to execute the technical aspects of the Statement of Work (SOW). Other corporate and local-level management as well as general and administrative support to include administrative/financial/clerical, program control, and Task Order business management/administration (to include progress report preparation) are considered to be overhead in nature except for those oversight or administrative functions performed by the Prime Contractor's proposed Program Manager. The Offeror is permitted to propose such effort as a direct charge if it is in accordance with its standard DCAA-approved practice to do so. For Offerors whose standard DCAA-approved practice is to include Management & Support as an overhead function, the hours identified above shall still be proposed, but with a \$0 direct rate. Additionally, the cost narrative shall specify that all Management & Support costs are already included in the applicable indirect rate and already incorporated in the overall proposed Cost-Plus-Fixed-Fee. If no Management & Support costs are proposed as a direct charge, the costs will NOT be allowed as a direct charge under the resulting Task Order. This requirement applies equally to the Prime and any Sub-contractor(s), if applicable.

B. GEOGRAPHIC DISTRIBUTION

- 1) For proposal purposes, Offerors should assume that all of the support will be provided in accordance with the requirements as outlined in Section C of the solicitation.

C. TASK ORDER LABOR CATEGORY QUALIFICATIONS

- 1) To perform the requirements of the Statement of Work (SOW), the Government requires Personnel with the appropriate experience and professional qualifications. The applicable labor categories and associated qualifications are listed below. Key Personnel qualification levels are considered to be desired for those individuals whose resumes are submitted for evaluation with the proposal. All individuals performing under the Key Personnel labor categories are considered Key.
 - a) **Experience** – The specific experience for each Key Labor Category must be directly related to the tasks and programs listed in the SOW.
 - b) **Formal Education** - For each Key Labor Category, formal education qualifications are cited, as appropriate to the requirements of the Labor Category, to establish professional credentials from which applied experience is founded.
 - c) **Professional Development** - Professional development includes honors, degrees, publications, professional licenses and certifications and similar evidence of professional

accomplishments that directly impact the offers' ability to perform the Task Order. The years of experience listed below are in addition to appropriate professional development. It is incumbent upon the Offeror to demonstrate that the proposed personnel have appropriate credentials to perform the work.

- d) **Accumulation of Qualifying Experience** - Categories of experience may be accumulated concurrently.
- e) The Program Manager shall be an employee of the Prime.

2) KEY PERSONNEL – DESIRED LABOR CATEGORY QUALIFICATIONS

Program Manager

A Master's degree from an accredited college or university in an engineering, scientific, business, or technical discipline and five (5) years of experience managing a large technical effort, similar in size and scope of this effort. Five (5) years of demonstrated experience in managing large projects including ability to plan, develop schedules, organize, and coordinate team members to accomplish assigned tasks; demonstrated experience specifically directed to combat systems facilities related to Aegis, Aegis BMD, or SSDS weapon and combat systems and technology development, work breakdown structures, spending plans, and financial tracking.

Deputy Program Manager

A Bachelor's degree from an accredited college or university in an engineering, scientific, business, or technical discipline and three (3) years of experience managing a large technical effort, similar in size and scope of this effort. Three (3) years of demonstrated experience in managing large projects including ability to plan, develop schedules, organize, and coordinate team members to accomplish assigned tasks; demonstrated experience specifically directed to combat systems facilities related to Aegis, Aegis BMD, or SSDS weapon and combat systems and technology development, work breakdown structures, spending plans, and financial tracking.

Aegis Computer/Display Specialist

Ten (10) years of experience in maintenance management of shipboard combat systems equipment related to computer and display suites including COTS. Demonstrated ability to prioritize and schedule personnel to support maintenance tasks across mission facilities and make recommendations for troubleshooting, workarounds, or corrective actions.

Aegis Electronics Maintenance Specialist

Ten (10) years of experience in maintenance management of shipboard electronics combat systems equipment. Demonstrated ability to prioritize and schedule personnel to support maintenance tasks across mission facilities and make recommendations for troubleshooting, workarounds, or corrective actions.

Aegis Operations & Maintenance Manager

Ten (10) years of Combat Systems experience in the Aegis Combat Systems to include: tactical employment in support of Surface, Air, Subsurface, Ballistic Missile Defense and Strike warfare areas. Of the ten (10) years, eight (8) years of management experience with the Surface Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.

Aegis Operations Specialist

Eight (8) years of Combat Systems experience in Aegis combat systems to include: tactical employment in support of all warfare areas. Five (5) years of management experience with Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.

Aegis Phased Array Radar/FCS Specialist

Ten (10) years of experience in maintenance management of shipboard combat systems equipment, with emphasis on AN/SPY-1 variants, Phased Array Radars, and associated Fire Control Systems (FCS). Demonstrated ability to prioritize and schedule personnel to support maintenance tasks across mission facilities and make recommendations for troubleshooting, workarounds, or corrective actions.

Aegis Test Director Specialist

Eight (8) years experience with Aegis combat system baseline configurations, to include supporting elements and equipment, communication systems, and interdependencies and interfaces associated with these systems. Three(3) years experience leading technicians and conducting system level troubleshooting with familiarity with the various types of site switches and their capability. Five (5) years of experience setting up and configuring combat system baselines to support Aegis or BMD mission events. Three (3) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, set up and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An associate's degree in a technical or computer related discipline could substitute for two (2) years of experience.

Aegis Weapons Maintenance Specialist

Ten (10) years of experience in maintenance management of shipboard weapon systems equipment. Demonstrated ability to prioritize and schedule personnel to support maintenance tasks across mission facilities and make recommendations for troubleshooting, workarounds, or corrective actions.

Lead Scheduling Specialist

Seven (7) years overall experience with Aegis or SSDS combat system baseline configurations, to include supporting elements and equipment, communication systems, and a good understanding of the interdependencies and interfaces associated with these systems. Five (5) years of experience in the de-confliction of complex events and shared equipment; concise and accurate understanding of items that impact current and future scheduled events; ability to generate high-level and detailed projections; ability to forecast complex schedules; proficiency using Microsoft products (Word, Excel, PowerPoint, MS Project) along with other database programs. Three (3) years of experience utilizing the scheduling tool is required.

Project Management Specialist, Senior

Ten (10) years of Navy Combat System Technical Project Management experience in the implementation of projects of varying size and complexity. Experience in managing, organizing and controlling project activities to include: Generating, updating, monitoring and distributing documents (including Project Pre-planning, Execution, Scope, and Project Plan); preparing financial, budget, and statistical reports; coordinating meetings. Comprehensive knowledge of Microsoft (MS) Office suite and Microsoft Project software applications and best practices with skill in applying software functions necessary to prepare complex and detailed planning and budgetary documents and presentations and development of briefing materials. Project Management degree or certification may be substituted for three (3) years of Navy Combat Systems Operational or Technical background experience.

Site Operations & Maintenance Manager

Twelve (12) years of combined experience with Aegis and SSDS Mk2 combat systems management. Experience in all facets of programmatic management related to combat systems engineering, readiness, training, and operations, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.

SSDS Operations & Maintenance Manager

Ten (10) years of Combat Systems experience in the SSDS Mk2 systems to include: tactical employment in support of Surface, Air, and Strike warfare areas. Of the ten (10) years, eight (8) years of management experience with the Surface Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.

SSDS Operations Specialist

Eight (8) years of Combat Systems experience in SSDS combat systems to include: tactical employment in support of all warfare areas. Five (5) years of management experience with Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements

SSDS Readiness Maintenance Specialist

Six (6) years of experience in maintenance management of shipboard electronics combat systems equipment. Demonstrated ability to prioritize and schedule personnel to support maintenance tasks across mission facilities and make recommendations for troubleshooting, workarounds, or corrective actions.

SSDS Test Director Specialist

Eight (8) years experience with SSDS combat system baseline configurations, to include supporting elements and equipment, communication systems, and interdependencies and interfaces associated with these systems. Three(3) years experience leading technicians and conducting system level troubleshooting with familiarity with the various types of site switches and their capability. Five (5) years of experience setting up and configuring combat system baselines to support SSDS mission events. Three (3) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, setup and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An Associates Degree in a technical or computer related discipline could substitute for two (2) years of experience.

Systems Engineering Lead

A Bachelor's of Science (BS) degree from an Accreditation Board for Engineering and Technology (ABET) accredited college or university in an engineering, scientific, or technical discipline, and seven (7) years of demonstrated experience managing large projects including ability to plan, develop schedules, organize, and coordinate team members to accomplish assigned tasks.

3) NON-KEY PERSONNEL – DESIRED LABOR CATEGORIES/QUALIFICATIONS

In order to provide additional clarification to the Statement of Work, the qualification levels provided below for Non-Key Personnel are considered to be desired, unless otherwise stated. The Contractor shall provide Non-Key Personnel who are qualified to perform against this Task Order. Prior to charging Non-Key Personnel labor to this order, the Contractor shall provide written certification stating the individual's name, Labor Category, and certification that the individual is qualified to perform the tasking under the Task Order. This written certification shall be made by email to the COR. During the life of the Task Order the Contractor has autonomy to manage Non-Key personnel and Non-Key categories as they deem appropriate to perform the tasking required.

2M Technician (Miniature/Micro miniature)

Four (4) years demonstrated experience performing corrective maintenance on circuit cards and electronic modules by troubleshooting and repairing the faulty cards and modules. Preventive maintenance will be performed periodically as scheduled by Maintenance Requirement Cards for 2M Rework Stations (Pace PRC 2000) and the primary MTR test system (AN/USM-674).

3M Coordinator, Senior

Ten (10) years accumulative experience in performing 3MC, 3MA, and/or departmental 3MA duties on Naval Vessel and Shore duty. Seven (7) years of experience with implementing, evaluating, and coordinating the unit's planned maintenance systems (PMS) and operating and effectively managing the MDS.

Aegis Technical Operator

Ten (10) years of experience with Aegis Platforms, with a minimum of four (4) years leading a team of technical/tactical operators engaged in the employment of Surface Weapon Systems. Three (3) years Technical experience with Aegis Baselines, specifically with technical knowledge to bring combat systems up from cold iron status to support testing. Prefer experience as Combat Systems Maintenance Manager (CSMM).

Aegis/SSDS Computer Network Technician

Seven (7) years' demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on Hybrid Tactical Computer Networks. Performs documented organizational level maintenance on Aegis and SSDS OA variant component equipment. This equipment includes Mk 6 MOD 0 Computing Infrastructure (ACI) Client/Server Nodes and Networks, Mission Critical Equipment (MCE) cabinets, Network Attached Storage (NAS) servers, OJ-774(V) Command Control Group (CCG), OJ-719(V) Command and Decision (C&D) Consoles, OJ-723B(V) Peripheral Control Station (PCS) W/Information Assurance (IA), OJ830(V)1 Tactical Computer Console (TCC), OL-724 Computer Groups, Tactical, Ship Self Defense (V1, V2 and V3), and automated Status Boards (ASTABS), Operating and maintaining the Operational Readiness Test System (ORTS) Servers, Thin Client Displays (TCD), Virtual Data Acquisition Converters (VDAC) and Data Busses for testing and Fault Detection/Fault Isolation (FD/FI) for the Aegis/SSDS Weapon System. Hybrid techs will also need to become intimately familiar with additional equipment interfaces associated existing and future Battle Force Tactical Training (BFTT) Systems, Intercommunications Interconnecting Groups, and Radar Set Control Consoles. Hybrid techs will perform and assist other technicians with system level troubleshooting and fault isolation to the Lowest Replaceable Unit (LRU) removal and replacement, system monitoring, network manipulations, such as program load; initiation, transcription, copying, system security, addressing, and interface testing.

Aegis/SSDS Computer Network Technician, Entry Level

Four-Six (4-6) years demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on Hybrid Tactical Computer Networks. Performs documented organizational level maintenance on Aegis and SSDS OA variant component equipment. This equipment includes Mk 6 MOD 0 Computing Infrastructure (ACI) Client/Server Nodes and Networks, Mission Critical Equipment (MCE) cabinets, Network Attached Storage (NAS) servers, OJ-774(V) Command Control Group (CCG), OJ-719(V) Command and Decision (C&D) Consoles, OJ-723B(V) Peripheral Control Station (PCS) W/Information Assurance (IA), OJ830(V)1 Tactical Computer Console (TCC), OL-724

Computer Groups, Tactical, Ship Self Defense (V1, V2 and V3), and automated Status Boards (ASTABS), Operating and maintaining the Operational Readiness Test System (ORTS) Servers, Thin Client Displays (TCD), Virtual Data Acquisition Converters (VDAC) and Data Busses for testing and Fault Detection/Fault Isolation (FD/FI) for the Aegis/SSDS Weapon System. Hybrid techs will also need to become intimately familiar with additional equipment interfaces associated existing and future Battle Force Tactical Training (BFTT) Systems, Intercommunications Interconnecting Groups, and Radar Set Control Consoles. Hybrid techs will perform and assist other technicians with system level troubleshooting and fault isolation to the Lowest Replaceable Unit (LRU) removal and replacement, system monitoring, network manipulations, such as program load; initiation, transcription, copying, system security, addressing, and interface testing.

Aegis/SSDS Computer Network Technician, Senior

Ten (10) years' demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on Hybrid Tactical Computer Networks. Performs documented organizational level maintenance on Aegis and SSDS OA variant component equipment. This equipment includes Mk 6 MOD 0 Computing Infrastructure (ACI) Client/Server Nodes and Networks, Mission Critical Equipment (MCE) cabinets, Network Attached Storage (NAS) servers, OJ-774(V) Command Control Group (CCG), OJ-719(V) Command and Decision (C&D) Consoles, OJ-723B(V) Peripheral Control Station (PCS) W/Information Assurance (IA), OJ830(V)1 Tactical Computer Console (TCC), OL-724 Computer Groups, Tactical, Ship Self Defense (V1, V2 and V3), and automated Status Boards (ASTABS), Operating and maintaining the Operational Readiness Test System (ORTS) Servers, Thin Client Displays (TCD), Virtual Data Acquisition Converters (VDAC) and Data Busses for testing and Fault Detection/Fault Isolation (FD/FI) for the Aegis/SSDS Weapon System. Hybrid techs will also need to become intimately familiar with additional equipment interfaces associated existing and future Battle Force Tactical Training (BFTT) Systems, Intercommunications Interconnecting Groups, and Radar Set Control Consoles. Hybrid techs will perform and assist other technicians with system level troubleshooting and fault isolation to the Lowest Replaceable Unit (LRU) removal and replacement, system monitoring, network manipulations, such as program load; initiation, transcription, copying, system security, addressing, and interface testing.

Anti-Submarine Warfare (ASW) Technician

Seven (7) years demonstrated experience performing organizational-level operation, preventive, and corrective maintenance on shipboard sonar and undersea warfare systems, including AN/SQQ-89(V)/A(V)15, AN/SQS-53B/C/D, AN/SQS-56, AN/SQR-19(V) TACTAS, AN/UQN-4/4A/10, AN/WQC-2/2A, AN/UYQ-25A/B, SIMAS/SIMAS II, and associated subsystems. Conducts system light-off, operation, shutdown, fault isolation, testing, alignment, and repair to the Lowest Replaceable Unit (LRU) using technical manuals and diagnostic tools.

Anti-Submarine Warfare (ASW) Technician, Senior

Ten (10) years demonstrated experience performing organizational-level operation, preventive, and corrective maintenance on shipboard sonar and undersea warfare systems, including

AN/SQQ-89(V)/A(V)15, AN/SQS-53B/C/D, AN/SQS-56, AN/SQR-19(V) TACTAS, AN/UQN-4/4A/10, AN/WQC-2/2A, AN/UYQ-25A/B, SIMAS/SIMAS II, and associated subsystems. Conducts system light-off, operation, shutdown, fault isolation, testing, alignment, and repair to the Lowest Replaceable Unit (LRU) using technical manuals and diagnostic tools.

Audio-Visual Technician

Eight (8) years' experience in audio visual switching systems to include troubleshooting, repairing, maintaining, and operating systems. Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outlined above can be substituted for a degree.

Auxiliary Systems Maintenance Technician

Performs preventive, corrective, and operational maintenance on auxiliary and utility support systems that enable sustained facility and mission operations. Responsible for the operation, monitoring, troubleshooting, and repair of commercial skid-mounted systems, high-pressure and low-pressure air systems, and associated mechanical and control components. Ensures system availability, safety, and reliability through routine inspections, configuration control, and adherence to technical manuals, maintenance procedures, and safety standards. Coordinates with engineering, facilities, and operations personnel to support scheduled testing, maintenance windows, and emergent repairs. Maintains accurate documentation, maintenance records, and system status reporting to ensure compliance with contractual, regulatory, and mission requirements.

Auxiliary Systems Specialist

Five (5) years experience performing preventive, corrective, and operational maintenance on auxiliary and utility support systems. Two (2) years experience monitoring, troubleshooting, and repair of commercial skid-mounted systems, high-pressure and low-pressure air systems, and associated mechanical and control components. Ability to maintain accurate documentation, maintenance records, and system status reporting to ensure compliance with contractual, regulatory, and mission requirements.

Cable Technician (SCA 23125)

Three (3) years experience with commercial cable fabrication, inventory control, and electric design and fabrication. Demonstrated ability to work both independently and in a team environment. Three (3) years experience building and repairing cables. Shall have FF101 Certification and ETA FOI Certification.

CANES Technician

Five (5) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units and utilizes a computer matrix exchange terminal to set up and operate various ASCOMM systems, HF, UHF and satellite voice circuits, teletype circuits, and Data Link 11. Experience performing

advanced level networking system management, administration and maintenance support to the Consolidated Afloat Networks and Enterprise Services (CANES) AN/USQ-208(V) system. Bachelor's Degree in Information Systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

CANES Technician, Senior

Eight (8) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units and utilizes a computer matrix exchange terminal to set up and operate various ASCOMM systems, HF, UHF and satellite voice circuits, teletype circuits, and Data Link 11. Experience performing advanced level networking system management, administration and maintenance support to the Consolidated Afloat Networks and Enterprise Services (CANES) AN/USQ-208(V) system. Bachelor's Degree in Information Systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

CEC Technician

Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree. Seven (7) years demonstrated experience performing alignment, adjustment, removal, and replacement of Lowest Replaceable Units (LRUs). Execute casualty analysis using computer-based diagnostic tools to fault isolate, troubleshoot, and restore full operational capability of the AN/USG-2 CETPS system.

CISCO Technician – Tactical Networks

Three (3) years experience with the installation and configuration of network devices such as servers, switches, and routers, with a focus on testing and maintenance to provide maximum network uptime and availability. Two (2) years of experience installing and maintaining network infrastructure to troubleshoot and repair network connections, devices, peripherals and cabling, evaluate and improve network performance, perform backups and upgrades of network devices and equipment. Working knowledge of TCP, IP, UDP, NTP, DNS, HTTP, SMTP, SNMP, DHCP, ARP, LDAP, NFS, HANFS, SAN, NAS, SSH, SFTP, as well as experience with network trouble shooting tools, i.e. wireshark, etc. Have a bachelor's degree in computer Networking or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Close-In Weapon System (CIWS) Technician, Senior

Ten (10) years demonstrated experience performing organizational- and intermediate-level preventive and corrective maintenance on Close-In Weapon Systems (CIWS) and SeaRAM systems, including MK 15 Phalanx Blocks 11–14, MODs 31–33 SeaRAM, MK 15 MOD 40 (RAM Defense Capability), and CIWS Phalanx Block 1B Baseline 2 configurations. Maintenance actions include casualty analysis, fault detection and isolation, testing, alignment,

repair, and replacement of system components using ordnance publications, circuit diagrams, and approved technical documentation. Maintains and repairs system components such as signal processors, signal sources, improved mixers, single-board video trackers, digital resolvers, radar sensor subassemblies (RSA), electronic support measures (ESM) sensors, launcher switching multiplexer units (LSMU), missile handling and loading equipment, guided missile assemblies, and Polyalphaolefin (PAO) heat exchangers. Performs system-level troubleshooting and ensures proper operation of associated interfaces. Operates and performs watch standing duties on Local Control Panels/Stations (LCP/LCS), Remote Control Panels/Stations (RCP/RCS), PASS/WinPASS computers, and associated consoles.

Communications Electronics Technician

Seven (7) years demonstrated providing organizational-level preventive and corrective maintenance for shipboard communications, SATCOM, HF, UHF, LOS, Ku-Band, and secure voice/data systems. Performs inspection, testing, alignment, troubleshooting, and fault isolation to the Lowest Replaceable Unit (LRU) level, including removal and replacement of defective components. Maintains system-level operational readiness in accordance with Navy maintenance standards and OEM technical documentation. Supports operation, maintenance, and repair of communications systems including, but not limited to, WSC-3(V) SATCOM systems; AN/USC-61(C) Digital Modular Radio; AN/URC-131 HFRG; AN/SQR-4 with EC-181 Ku-Band; AN/URT-23 HF series; shipboard switchboards; and associated antenna, coupler, amplifier, and control subsystems. Performs planned maintenance and corrective actions on secure voice and switching systems, including AN/USQ-155(V)6, Red/Black matrix switches, and supporting servers. Executes Built-In Test (BIT) procedures; conducts software maintenance, system recoveries, reloads, and software installations; and utilizes Special and General-Purpose Electronic Test Equipment (SPETE/GPETE). Performs maintenance on hardware-based encryption devices and associated common fill devices in compliance with security and configuration control requirements.

Configuration Management Analyst

Five (5) years experience in configuration management of Combat Systems hardware and software configuration items (CI), leading a Configuration Control Board, managing configuration database(s), and performing Configuration Status Accounting of configuration items. Ability to analyze information and produce reports.

Configuration Management Analyst, Entry Level

Two (2) years experience in a Configuration Control Board process, performing audits, and writing procedures/instructions.

Drafter CAD Operator III (SCA 30063)

Five (5) years of demonstrated experience relevant to drawings in Auto-CAD (or equivalent) format using the American Institute of Architects (AIA) CAD Layer Guidelines and Microsoft Visio.

Electrician Maintenance (SCA 23160)

Five (5) years of demonstrated experience in the trade of electrician, and required license to perform the electrician functions in the state of Virginia. Demonstrated experience in installation and maintenance of industrial type electrical distribution systems.

Electronic Test Equipment Coordinator

Ten (10) years demonstrated experience performing intermediate level maintenance, repair, calibration, and documentation of General Purpose Electronic Test Equipment (GPETE) in Fleet Electronic Calibration Laboratories and selected Field Calibration Activities (FCAs) to include AD, AR, AS, CGN, CV, CVN, LHA, LHD and LPH ship classes, Shore Intermediate Maintenance Activities (SIMA) and other designated Fleet shore activities in accordance with MIL-STD-45662(series), OPNAV 3960.16 (series) and the Navy Metrology and Calibration (METCAL) Program.

Electronic Warfare Technician

Seven (7) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units to include the updated subsystem power supplies, cooling system, electrical/electronic interfaces, and antenna assemblies unique to modernized Electronic Attack (EA) functions on the AN/SLQ-32 variants.

Electronic Warfare Technician, Senior

Ten (10) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units to include the updated subsystem power supplies, cooling system, electrical/electronic interfaces, and antenna assemblies unique to modernized Electronic Attack (EA) functions on the AN/SLQ-32 variants.

Electronics Technician Maintenance III (SCA 23183)

Two-Four (2-4) years demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on electronic/electrical and/or mechanical systems and/or equipment. A two (2) year AS or AAS degree or a trade/vocational school certification in electronics, electrical or mechanical discipline may be substituted for demonstrated experience.

Engineering Assistant

Five (5) years of demonstrated experience relevant to Aegis, Aegis BMD, or SSDS Weapon and Combat Systems. Familiar with engineering design processes, engineering drawings, and reviews.

Fire Control System (FCS) MK-99 Technician

Seven (7) years demonstrated experience performing organizational level preventive and corrective maintenance on MK-99 Fire Control Systems, Legacy or current ORTS Systems and MK-84 400Hz Converter Systems. Executes fault isolation, testing, alignment, and repair actions using Operational Readiness Test Systems (ORTS) and approved technical documentation to restore and maintain system readiness. Performs preventive and corrective maintenance on the MK 99 Aegis Fire Control System, including Commercial Off the Shelf (COTS) equipment, MK 84 400Hz Power Distribution Systems, and Air Cooled Solid State Frequency Converters and follow configurations. Ensures proper system operation, integration, and performance in support of combat system missions. Operates and directs organizational level maintenance on the Aegis Weapon System (AWS) configurations. Provides technical supervision and guidance to element level technicians, coordinates system integration activities, and communicates weapon system status to command leadership during in-port and underway operations. Maintains and performs preventive and corrective maintenance on 400Hz Power Conversion Systems, including converters, current limiting devices, power distribution switchboards, solid-state automatic bus transfer systems. Operates system consoles and associated equipment in support of tactical operations, training events, and test and evaluation activities.

Fire Control System (FCS) MK-99 Technician, Senior

Ten (10) years demonstrated experience performing organizational level preventive and corrective maintenance on MK-99 Fire Control Systems, Legacy or current ORTS Systems and MK-84 400Hz Converter Systems. Executes fault isolation, testing, alignment, and repair actions using Operational Readiness Test Systems (ORTS) and approved technical documentation to restore and maintain system readiness. Performs preventive and corrective maintenance on the MK 99 Aegis Fire Control System, including Commercial Off the Shelf (COTS) equipment, MK 84 400Hz Power Distribution Systems, and Air Cooled Solid-state Frequency Converters and follow configurations. Ensures proper system operation, integration, and performance in support of combat system missions. Operates and directs organizational level maintenance on the Aegis Weapon System (AWS) configurations. Provides technical supervision and guidance to element level technicians, coordinates system integration activities, and communicates weapon system status to command leadership during in-port and underway operations. Maintains and performs preventive and corrective maintenance on 400Hz Power Conversion Systems, including converters, current limiting devices, power distribution switchboards, solid-state automatic bus transfer systems. Operates system consoles and associated equipment in support of tactical operations, training events, and test and evaluation activities.

Gauge Calibration Coordinator

Ten (10) years demonstrated experience performing Navy Afloat Maintenance Training Strategy (NAMTS) intermediate-level support procedures including inspecting, troubleshooting, and calibrating systems and associated components in support of directed requirements pertaining to Aegis/SSDS programs in accordance with MIL-STD-45662(series), OPNAV 3960.16 (series) and the Navy Metrology and Calibration (METCAL) Program.

GCCS-M Technician

Five (5) years demonstrated experience operating, securing, and maintaining information systems, networks, telecommunications, and associated peripheral equipment. Provides desktop support, system monitoring, troubleshooting, circuit restoration, and preventive/corrective maintenance for critical voice, data, and network operations. Administers commercial and military network operating systems, including MS Exchange, Windows OS, and GCCS-M Force Level 4.1. Performs Tier 2 network hardware/software corrective actions, disaster recovery, and system restoration. Implements cybersecurity policies, risk management, system accreditation, and user compliance per SECNAVMAN 5239.2. Advises command on information security, tracks workforce qualifications, maintains Cybersecurity Plans (CSP), System Security Plans (SSP), and ensures enforcement of security controls.

GCCS-M Technician, Senior

Ten (10) years demonstrated experience operating, securing, and maintaining information systems, networks, telecommunications, and associated peripheral equipment. Provides desktop support, system monitoring, troubleshooting, circuit restoration, and preventive/corrective maintenance for critical voice, data, and network operations. Administers commercial and military network operating systems, including MS Exchange, Windows OS, and GCCS-M Force Level 4.1. Performs Tier 2 network hardware/software corrective actions, disaster recovery, and system restoration. Implements cybersecurity policies, risk management, system accreditation, and user compliance per SECNAVMAN 5239.2. Advises command on information security, tracks workforce qualifications, maintains Cybersecurity Plans (CSP), System Security Plans (SSP), and ensures enforcement of security controls.

General Maintenance Lead

Five (5) years of experience with demonstrated ability to provide oversight of tactical facilities support, to include general electrical, mechanical, plumbing, and quality control of projects. Demonstrated experience operating equipment (i.e. Forklift, vehicles, etc.).

General Maintenance Worker (SCA 23370)

Ability to lift 20-50 lbs. Ability to pull heavy cables. High school diploma or equivalent.

Gun Weapon System Technician

Seven (7) years demonstrated experience performing organizational and intermediate-level preventive and corrective maintenance, troubleshooting, fault isolation, and system alignment on Gun Computer Systems (GCS) MK 160 MODs 4, 8, 9–22 and Electro-Optical Sensor Systems (EOSS) MK 20 MODs 0–1 across Gun Weapon System (GWS) MK 34 MODs 0–13. Supports operation and maintenance of gun consoles, display and control consoles, computer display consoles, signal data converters, gun mount processors, and associated equipment onboard Arleigh Burke (DDG), Ticonderoga (CG), San Antonio (LPD), and Littoral Combat Ship (LCS) class vessels, as well as shore support commands. Performs casualty analysis, fault detection and isolation, modular replacement, repair, testing, and alignment of individual equipment and subsystems using Built-In-Test (BIT) capabilities. Operates GCS/EOSS consoles and associated

equipment to support tactical operations, training evolutions, and test/evaluation activities in support of the ship's Aegis combat system.

Gun Weapon System Technician, Senior

Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree. Ten (10) years demonstrated experience performing organizational and intermediate-level preventive and corrective maintenance, troubleshooting, fault isolation, and system alignment on Gun Computer Systems (GCS) MK 160 MODs 4, 8, 9–22 and Electro-Optical Sensor Systems (EOSS) MK 20 MODs 0–1 across Gun Weapon System (GWS) MK 34 MODs 0–13. Supports operation and maintenance of gun consoles, display and control consoles, computer display consoles, signal data converters, gun mount processors, and associated equipment onboard Arleigh Burke (DDG), Ticonderoga (CG), San Antonio (LPD), and Littoral Combat Ship (LCS) class vessels, as well as shore support commands. Performs casualty analysis, fault detection and isolation, modular replacement, repair, testing, and alignment of individual equipment and subsystems using Built-In-Test (BIT) capabilities. Operates GCS/EOSS consoles and associated equipment to support tactical operations, training evolutions, and test/evaluation activities in support of the ship's Aegis combat system.

Library Lead

Five (5) years of Information Security experience to include: providing support to ensure information is properly accounted for, classified, marked, transported, destroyed and protected from unauthorized disclosure. Operation Technical library operations; providing technical information services such as software/hardware products and maintaining records from various online sources; basic understanding of cataloging of library reference materials; basic computer skills (Microsoft Word, Excel, PowerPoint); Clear communication; ability to answer inquiries and refer to persons requiring professional assistance. Ability to perform specialized technical tasks include creation of standard operating procedures, digitization of documents, searching online reference catalog, database management, destruction, and transmittal of classified material. Technical library operations; providing technical information services such as software/hardware products and maintaining records from various online sources; basic understanding of cataloging of library reference materials; advanced computer skills (Microsoft Word, Excel, PowerPoint). OR A Security Professional Education Development (SPeD) Certification with three (3) years of experience to include: comprehensive knowledge of security requirements for handling, storage, inventory and destruction of national security information/material in accordance with SECNAV 5510 (series). AND Three (3) years of proven experience in supervision/management of personnel; to include workflow management, project development, workforce schedules, coordination, conflict management, and tutoring/training of subordinates.

Library Technician - (13058) (SCA)

Three (3) years of experience in the following: operation of a technical library program; providing technical information services to include web products, visual information products;

acquiring library products; library reference assistance; and maintaining records from various online sources. Ability to perform specialized technical tasking to include review of technical publications, and report collections, digitization of documents, searching online reference catalog, and data base management, destruction, and transmittal of classified material. AND Comprehensive knowledge of security requirements for handling, storage, inventory and destruction of classified material in accordance with SECNAV 5510 (series). OR A Bachelors of Degree from an accredited college or university in information management, information science technology, or technical library and information center discipline.

Link Electronics Technician

Seven (7) years demonstrated experience performing system alignments and adjustments; conducts fault detection, isolation, and troubleshooting; and executes corrective and selective preventive maintenance on shipboard combat systems and tactical data link equipment. Supports operation and maintenance of UYQ-120, Digital Modular Radios, UYK-43, USQ-212, MK-162 Ship Gridlock System, AN/URC-107 Joint Tactical Information Distribution System (JTIDS), AN/URC-141 Multifunctional Information Distribution System (MIDS), MOS MOD, Command and Control Processor Systems, Common Data Link Management Systems, and associated link systems.

Link Electronics Technician, Senior

Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree. Ten (10) years demonstrated experience performing system alignments and adjustments; conducts fault detection, isolation, and troubleshooting; and executes corrective and selective preventive maintenance on shipboard combat systems and tactical data link equipment. Supports operation and maintenance of UYQ-120, Digital Modular Radios, UYK-43, USQ-212, MK-162 Ship Gridlock System, AN/URC-107 Joint Tactical Information Distribution System (JTIDS), AN/URC-141 Multifunctional Information Distribution System (MIDS), MOS MOD, Command and Control Processor Systems, Common Data Link Management Systems, and associated link systems.

Linux Systems Administrator

Three (3) years experience in Linux Systems Administration to include working knowledge of core internet protocols and services, Red Hat Enterprise Linux (RHEL), VMWare, Kerberos, scripting languages, Redhat Satellite, DNS, LDAP, DHCP, TLS/SSL, server troubleshooting, and written and oral communication. Two (2) years experience of Network Administration (to include CISCO). Bachelor's Degree in Computer Science or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree

Linux System Administrator, Entry Level

Two (2) years experience in Linux Systems Administration to include working knowledge of core internet protocols and services, Red Hat Enterprise Linux (RHEL), VMWare, Kerberos,

scripting languages, Redhat Satellite, DNS, LDAP, DHCP, TLS/SSL, server troubleshooting, and written and oral communication. Two (2) years experience of Network Administration (to include CISCO). Bachelor's degree in computer science or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Linux Systems Administrator, Senior

Eight (8) years system administration experience to include: seven (7) years' experience with Linux or other Unix based operating system to include: working knowledge of core Internet protocols and services, virtualization, three (3) years of experience with Active Directory and related protocols, DEVOPS automation, Storage Area Network/Network Attached Storage, Network File System, scripting Four (4) Years of experience of Network Administration (to include but not limited to Cisco). Bachelor's Degree in Computer Science or related field/discipline; or 4 additional years of demonstrated experience as outlined above can be substituted for a degree

Linux Systems Administrator – Tactical Networks

Four (4)) years experience in Linux Systems Administration to include working knowledge of core internet protocols and services, Red Hat Enterprise Linux (RHEL), VMWare, Kerberos, scripting languages, Redhat Satellite, DNS, LDAP, DHCP, TLS/SSL, server troubleshooting, and written and oral communication. Two (2) years experience of Network Administration (to include CISCO). Bachelor's degree in computer science or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Linux Systems Administrator – Tactical Networks, Senior

Eight (8) years system administration experience to include: seven (7) years' experience with Linux or other Unix based operating system to include: working knowledge of core Internet protocols and services, virtualization, three (3) years of experience with Active Directory and related protocols, DEVOPS automation, Storage Area Network/Network Attached Storage, Network File System, scripting Four (4) Years of experience of Network Administration (to include but not limited to Cisco). Bachelor's degree in computer science or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

NATO Sea Sparrow Missile System (NSSMS) Technician

Seven (7) years demonstrated experience performing organizational level preventive and corrective maintenance on the NATO Sea Sparrow Missile System (NSSMS), including MK91 MOD 2 Guided Missile Fire Control System (GMFCS), MK29 MOD 1 Guided Missile Launching System (GMLS), and redesigned NSSMS equipment (MK 57 MODs 10 and above). Conducts casualty analysis, fault detection, and isolation using ordnance publications, circuit diagrams, and approved technical documentation. Operates, tests, aligns, repairs, and maintains individual equipment, system components, and interfaces with other combat systems. Supports operation of associated digital computers, directors, television systems, radar consoles, firing

officer consoles, and launcher equipment in tactical, training, and test/evaluation environments. Ensures system readiness and proper integration with shipboard weapon systems.

NATO Sea Sparrow Missile System (NSSMS) Technician, Senior

Ten (10) years demonstrated experience performing organizational level preventive and corrective maintenance on the NATO Sea Sparrow Missile System (NSSMS), including MK91 MOD 2 Guided Missile Fire Control System (GMFCS), MK29 MOD 1 Guided Missile Launching System (GMLS), and redesigned NSSMS equipment (MK 57 MODs 10 and above). Conducts casualty analysis, fault detection, and isolation using ordnance publications, circuit diagrams, and approved technical documentation. Operates, tests, aligns, repairs, and maintains individual equipment, system components, and interfaces with other combat systems. Supports operation of associated digital computers, directors, television systems, radar consoles, firing officer consoles, and launcher equipment in tactical, training, and test/evaluation environments. Ensures system readiness and proper integration with shipboard weapon systems.

Navigation Electronics Technician

Ten (10) years demonstrated experience performing organizational-level preventive and corrective maintenance, alignment, adjustment, removal and replacement of Lowest Replaceable Units on navigation systems to include the AN/WSN-7 RLGN; AN/WSN-12(V)1, AN-WSN-7 INS IBS/Integrated Bridge Navigation System (IBNS) and Voyage Management System (VMS); ECDIS (Electronic Chart Display and Information System); MORIAH Wind System AN/WSN-9 Digital Hybrid Speed Log (DHYSL); AN/SSN-9(V)8 GPS-Based Positioning, and Timing Service (GPNTS/ GPNTS MGUE); AN/SSN-6 Navigation Sensor System Interface (NAVSSI) and IP-1747/WSN Control Display Unit (CDU). Gigabit Ethernet Data Multiplex System (GEDMS), and the Fiber Optic Data Multiplex System (FODMS). Isolates and diagnoses system faults and executes corrective actions using on- and off-line tests, test equipment, technical manuals, and user reports.

Network Engineer

In-depth knowledge of network protocols (TCP/IP, BGP, OSPF) and hardware (Cisco, Juniper). Proficiency with network monitoring tools (e.g., Wireshark, SolarWinds) and network automation using languages like Python or Bash. Understanding of network security, firewalls, VPNs, and virtualization technologies. Familiarity with cloud platforms (AWS, Azure, Google Cloud) and software-defined networking (SDN). Strong analytical and problem-solving abilities to troubleshoot complex issues. Effective communication skills to explain technical concepts to non-technical colleagues and stakeholders. Organizational skills to manage multiple projects and priorities effectively. The ability to work well in a team and collaborate with other IT professionals. Bachelor's degree in computer science or related field. Or an associate's degree with certifications and related experience. Certifications should include a combination of CompTIA Network+, Cisco Certified Network Associate (CCNA), Cisco Certified Network Professional (CCNP), or Juniper Networks Certified Associate (JNCIAQ – Junos).

Plumber Maintenance (SCA 23810)

Five (5) years of demonstrated experience in the trade of plumber, and required license to perform the plumber functions in the state of Virginia. Demonstrated experience in installation and repair of industrial type cooling systems for water cooled systems, dry air systems, and chemically cooled systems.

Port Planner

Five (5) years' experience in the Navy equipment modernization and overhaul process to include the ability to assess combat systems and equipment, to include, developing long-range planning schedules for modernization and overhaul, and preparation of work packages. Five (5) years knowledge of naval combat systems operation and maintenance, depot level combat systems alteration, maintenance, and integrated test procedures. Knowledge and experience aboard naval vessels with detailed experience working on one or more major Navy surface ship weapon systems.

Project Manager

Five(5) years of Navy Combat System Technical Project Management experience in the implementation of projects of varying size and complexity. Experience in managing, organizing and controlling project activities to include: Generating, updating, monitoring and distributing documents (including Project Pre-planning, Execution, Scope, and Project Plan); preparing financial, budget, and statistical reports; coordinating meetings. Knowledge of Microsoft (MS) Office suite and Microsoft Project software applications and best practices with skill in applying software functions necessary to prepare complex and detailed planning and budgetary documents and presentations and development of briefing materials. Project Management degree or certification may be substituted for three (3) years of Navy Combat Systems Operational or Technical background experience.

Q21 Computer/Display Technician

Seven (7) years demonstrated experience performing preventive and corrective maintenance on the BMD system and associated components including computer and display systems. Maintenance includes fault isolation, tests, alignments, and repair on assigned equipment at the organizational level using the BMD Operational Readiness Test System (ORTS) and supporting work package documentation.

Q21 Computer/Display Technician, Senior

Ten (10) years demonstrated experience performing preventive and corrective maintenance on the BMD system and associated components including computer and display systems. Maintenance includes fault isolation, tests, alignments, and repair on assigned equipment at the organizational level using the BMD Operational Readiness Test System (ORTS) and supporting work package documentation.

Radar/IFF Electronics Technician

Seven (7) years demonstrated experience performing preventive and corrective maintenance (PM/CM) on shipboard AN/UPX-29(V) AIMS Central IFF System (CIS), including OE-120/UPX Antenna Group (AS3134 Antenna, CV-3372 Antenna Position Programmer, C-10063 Antenna Control), AN-QPX-24(V) Interrogator Set (CP-1273 Central Processor Controller, C-10065 Control-Monitor, C-10064 Remote Control Indicator), KIR-1A/TSEC Crypto Computer, and AN/UPX-27 Interrogator Set (AS-2188/UPX Linear Array Antenna, AS-177(B)/UPX Omni Directional Antenna, SA-1807/UPA-61 Electronic Switch, C-8834/UPA-61 Control Monitor). Performs organizational-level preventive and corrective maintenance on AN/URN-25/32 TACAN using general and special purpose test equipment, Built-In Test (BIT), diagnostic software, and technical manuals to restore equipment to optimum operating conditions. Performs organizational and/or intermediate-level maintenance on radar systems, including AN/SPS-67(V)3/5, AN/SPS-73(V)12/18 Next Generation Surface Search Radar (NGSSR), AN/SPQ-9B ASMD Radar, AN/SPS-48G(V)1 Surveillance Radar, and AN/SPS-49A(V)1. Duties include power output checks, minimum discernible signal tests, standing wave ratio inspections, waveguide and transmission line fault identification, RF/IF/video amplifier circuit alignments, fault isolation, casualty analysis, and replacement of subassemblies, parts, and components to restore systems to optimum condition. Utilizes interactive Maintenance Built-In Test (MBIT) software and embedded maintenance manuals for NGSSR and other radar systems.

Scheduling Analyst

Two (2) years overall experience with scheduling events with complex configurations and a good understanding of the interdependencies and interfaces associated with these systems. One (1) year of experience in the de-confliction of complex events and shared equipment; understanding of items that impact current and future scheduled events; ability to generate high-level and detailed projections; ability to forecast complex schedules; proficiency using Microsoft products along with other database programs. One (1) year of experience utilizing the current scheduling tool is highly desired.

Security Specialist

Three (3) years of Information Security experience to include: providing support to ensure information is properly accounted for, classified, marked, transported, destroyed and protected from unauthorized disclosure. Operation of a technical library program; providing technical information services; acquiring library products; configuration change tracking; and maintaining records from various online sources. Ability to perform specialized technical tasks to include creation and/or review of standard operating procedures, digitization of documents, searching online reference catalogs, database management, destruction, and transmittal of classified material. OR A Security Professional Education Development (SPeD) Certification with two (2) years of experience to include: comprehensive knowledge of security requirements for handling, storage, inventory and destruction of national security information/material in accordance with SECNAV 5510 (series).

Site Switching Technician

Seven (7) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance on Layer 1 Network Switching Systems to include APCON, PURVIS, GET, DTS, and CISCO. Two (2) years' experience conducting Network Switching hardware and software installations, and the skills to plan, organize and implement complex maintenance activities. Bachelor's degree in computer Networking or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Site Switching Technician, Senior

Ten (10) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance on Layer 1 Network Switching Systems to include APCON, PURVIS, GET, DTS, and CISCO. Four (4) years' experience conducting Network Switching hardware and software installations, and the skills to plan, organize and implement complex maintenance activities. Bachelor's degree in computer Networking or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

SPY Technician

Seven (7) years' experience operating, maintaining, and directing organizational level preventive and corrective maintenance of tactical equipment related to Phased Array Radar, or B/D Mod or D (V) systems. Performs maintenance, fault isolation, testing, alignment, repair, and restoration of radar and combat system equipment using approved technical documentation, ordnance publications, Operational Readiness Test Systems (ORTS), special tools, and test equipment. Performs preventive and corrective maintenance on all variants of the AN/SPY6(V) radar systems (V)1, (V)3, and (V)4, supporting Aegis Baseline 10 operations. Ensures system maintainability and availability in accordance with Mean Time to Repair (MTTR) requirements.

SPY Technician, Entry Level

Two (2) years' experience operating, maintaining, and directing organizational level preventive and corrective maintenance of tactical equipment related to Phased Array Radar, or B/D Mod or D (V) systems. Performs maintenance, fault isolation, testing, alignment, repair, and restoration of radar and combat system equipment using approved technical documentation, ordnance publications, Operational Readiness Test Systems (ORTS), special tools, and test equipment. Performs preventive and corrective maintenance on all variants of the AN/SPY6(V) radar systems (V)1, (V)3, and (V)4, supporting Aegis Baseline 10 operations. Ensures system maintainability and availability in accordance with Mean Time to Repair (MTTR) requirements.

SPY Technician, Senior

Ten (10) years' experience operating, maintaining, and directing organizational level preventive and corrective maintenance of tactical equipment related to Phased Array Radar, or SPY B/D Mod or D (V) systems. Performs maintenance, fault isolation, testing, alignment, repair, and restoration of radar and combat system equipment using approved technical documentation, ordnance publications, Operational Readiness Test Systems (ORTS), special tools, and test equipment. Performs preventive and corrective maintenance on all variants of the AN/SPY6(V)

radar systems (V)1, (V)3, and (V)4, supporting Aegis Baseline 10 operations. Ensures system maintainability and availability in accordance with Mean Time to Repair (MTTR) requirements. Directs, coordinates, and supervises assigned technicians in the functional integration, operation, and maintenance of Aegis Weapon System elements and interfacing systems. Organizes technicians as integrated system teams; provides technical guidance; monitors system status; and communicates weapon system readiness to command leadership during tactical operations, training events, and test and evaluation evolutions.

SSDS Operations Coordinator

Eight (8) years of Combat Systems experience in the SSDS Mk2 systems to include: tactical employment in support of Surface, Air, and Strike warfare areas. Five (5) years of management experience with Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.

SSDS Technical Operator

Ten (10) years of experience with SSDS platforms, with a minimum of four (4) years leading a team of technical/tactical operators engaged in the employment of Surface Weapon Systems. Three (3) years Technical experience with SSDS Baselines, specifically with technical knowledge to bring combat systems up from cold iron status to support testing.

Systems Engineer

A Bachelor's of Science (BS) degree from an accredited college or university in an engineering, scientific, or technical discipline.

Systems Engineer, Senior

A Bachelor's of Science (BS) degree from an accredited college or university in an engineering, scientific, or technical discipline, and five (5) years of demonstrated experience relevant to Aegis, Aegis BMD, SSDS or DDG 1000 Weapon and Combat Systems.

Tactical Network Systems Administrator

Five (5) years demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on Aegis Computer Network systems and equipment. Demonstrated experience performing preventive and corrective maintenance on the UYQ-70 or COTS Computer/Display Systems. Bachelor's Degree in Information Systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Tactical Network Systems Administrator, Senior

Ten (10) years demonstrated experience assessing, troubleshooting, and performing corrective maintenance and preventive maintenance on AEGIS Computer Network systems and equipment.

Demonstrated experience performing preventive and corrective maintenance on the UYQ-70 or COTS Computer/Display Systems. Bachelor's Degree in Information Systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree.

Tactical Tomahawk Weapon Control System (TTWCS) Technician

Seven (7) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units and perform operational readiness test of the system for the Tactical Tomahawk Weapon Control Systems (TTWCS). Perform organizational and/or intermediate level maintenance and operate all assigned equipment with the TTWCS and associated support and test equipment.

Tactical Tomahawk Weapon Control System (TTWCS) Technician, Senior

Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree. Ten (10) years demonstrated experience assessing, troubleshooting, and performing preventive and corrective maintenance for the alignment, adjustment, removal and replacement of Lowest Replaceable Units and perform operational readiness test of the system for the Tactical Tomahawk Weapon Control Systems (TTWCS). Perform organizational and/or intermediate level maintenance and operate all assigned equipment with the TTWCS and associated support and test equipment.

Technical Library Aide/Clerk (13050) (SCA)

High school diploma. General knowledge in: Technical library operations; providing technical information services such as software/hardware products and maintaining records from various online sources; basic understanding of cataloging of library reference materials; basic computer skills (Microsoft Word, Excel, PowerPoint); Clear communication; ability to answer routine inquiries and refer persons requiring professional assistance to the Librarian or Security Specialist. AND Basic knowledge of security requirements for handling, storage, inventory and destruction of classified material in accordance with SECNAV 5510 (series).

Technical Operator

Eight (8) years of experience with surface combat systems in support of Surface, Subsurface, Air, Strike, C5I, or Aegis BMD warfare areas and five (5) concurrent years of experience operating and maintaining recent (computer program versions in effect in the past seven (7) years) Aegis or, Aegis BMD, or SSDS combat systems.

Technical Specialist

Five (5) years subject matter expertise relevant to specific technical disciplines of the SOW, demonstrating a technical understanding and ability to prepare complex and detailed technical and budgetary planning documents, reports, and presentations. Three (3) years of specialized

experience in: financial planning, budgeting and execution of project funds for allocation purposes; integrated management schedule (IMS) development and tracking for planning and budgeting; coordination of task planning, schedule development and task execution for Navy programs and projects. Professional experience shall include: Comprehensive knowledge of Microsoft (MS) Office suite and Microsoft Project software applications and best practices in applying software functions necessary to prepare complex and detailed planning and budgetary documents and presentations; processing complex and lengthy technical reports that include tables, graphs, charts, or multiple columns; participating in Technical Progress Reviews, Design Reviews and program technical meetings; and providing status and inputs to technical reports, white papers and meetings.

Test Director

Five (5) years experience with Aegis or SSDS combat system baseline configurations, to include supporting elements and equipment, communication systems, and a good understanding of the interdependencies and interfaces associated with these systems. Two (2) years of experience setting up and configuring combat system baselines to support Aegis, SSDS, or BMD mission events. Two (2) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, setup and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An Associates Degree in a technical or computer related discipline could substitute for two (2) years of experience.

Test Director, Entry Level

Two (2) years experience with Aegis or SSDS combat system baseline configurations. Ability to follow documented procedures in a technical environment. Ability to set up and configuring combat system baselines to support Aegis, SSDS, or BMD mission events. Two (2) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, setup and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An Associates Degree in a technical or computer related discipline could substitute for two (2) years of experience.

Test Director, Senior

Eight (8) years experience with Aegis or SSDS combat system baseline configurations, to include supporting elements and equipment, communication systems, and interdependencies and interfaces associated with these systems. Five (5) years of experience setting up and configuring combat system baselines to support Aegis, SSDS, or BMD mission events. Three (3) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, setup and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An Associates Degree in a technical or computer related discipline could substitute for two (2) years of experience.

Test Director/Computer Operator, Entry Level

Two (2) years experience with AEGIS or SSDS combat system baseline configurations. Ability to follow documented procedures in a technical environment. Two (2) years experience in loading and maintaining program/project documentation on Combat Systems to include: loading computer programs and equipment utilizing established procedures, verify system operations, setup and collect data recording/data extraction, document observed issues/problems while operating combat system suites. An Associates Degree in a technical or computer related discipline could substitute for two (2) years of experience.

Training/Simulation Systems Operator

Three (3) years of experience in combat systems training systems to include experience working with at least two of the developmental training systems: Next Generation Simulation (NGS), OASIS, Wrap Around Simulation Program (WASP), Multi-Link System Test & Training Tool (MLST), TIGER, and Common Connectivity Devices (CCD).

Training/Simulation Systems Operator, Senior

Six(6) years of experience in combat systems training systems to include experience working with at least two of the developmental training systems: Next Generation Simulation (NGS), OASIS, Wrap Around Simulation Program (WASP), Multi-Link System Test & Training Tool (MLST), TIGER, and Common Connectivity Devices (CCD).

Vertical Launching System (VLS) Technician

Seven (7) years demonstrated experience operating, inspecting, and performing organizational-level preventive and corrective maintenance on MK 41 Vertical Launching System (VLS) configurations and VLS Hybrid simulation equipment in a test facility environment. Performs basic and advanced troubleshooting using authorized organizational and intermediate-level procedures. Utilizes Built-In Test Equipment (BITE), general-purpose electrical and electronic test equipment, and approved system test equipment to isolate, remove, and replace missile launcher electrical and mechanical components at the Lowest Replaceable Unit (LRU) level. Executes installation, checkout, and system test procedures to ensure launcher readiness and operational integrity. Ensures system operability during tactical operations, maintenance evolutions, and inspections.

Vertical Launching System (VLS) Technician, Senior

Bachelor's degree in information systems or related field/discipline; or 4 additional years of demonstrated experience as outline above can be substituted for a degree. Ten (10) years demonstrated experience operating, inspecting, and performing organizational-level preventive and corrective maintenance on MK 41 Vertical Launching System (VLS) configurations and VLS Hybrid simulation equipment in a test facility environment. Performs basic and advanced troubleshooting using authorized organizational and intermediate-level procedures. Utilizes Built-In Test Equipment (BITE), general-purpose electrical and electronic test equipment, and

approved system test equipment to isolate, remove, and replace missile launcher electrical and mechanical components at the Lowest Replaceable Unit (LRU) level. Executes installation, checkout, and system test procedures to ensure launcher readiness and operational integrity. Ensures system operability during tactical operations, maintenance evolutions, and inspections.

Welder Combination Maintenance (SCA 23960)

Five (5) years demonstrated experience in the trade of welding and required license/certifications to perform welder functions in the state of Virginia. Demonstrated experience in the installation and maintenance of equipment foundations, brackets and fasteners, and antennas mounted on a mast or tower.

WIETC Site Manager, Senior

Ten (10) years of Combat Systems experience in the Aegis or SSDS Mk2 systems to include: tactical employment in support of Surface, Air, and Strike warfare areas. Of the ten (10) years, eight (8) years of management experience with the Surface Combat Systems, including responsibility for managing technical performance, reliability, maintainability, cost, schedule, and delivery requirements.
