

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT				1. CONTRACT ID CODE		PAGE 1 OF 19 PAGES	
2. AMENDMENT/MODIFICATION NUMBER 0001		3. EFFECTIVE DATE 4/27/2026		4. REQUISITION/PURCHASE REQUISITION NUMBER		5. PROJECT NUMBER (If applicable)	
6. ISSUED BY NASA KENNEDY SPACE CENTER Office of Procurement KENNEDY SPACE CENTER, FL 32899 United States Noel, LaCorsha D. (KSC-OPCS0), Contract Specialist, Email: lacorsha.d.noel@nasa.gov		CODE 80KSC0		7. ADMINISTERED BY (If other than Item 6)		CODE	
8. NAME AND ADDRESS OF CONTRACTOR (Number, street, county, State and ZIP Code)				(X)		9A. AMENDMENT OF SOLICITATION NUMBER 80KSC026R0004	
				(X)		9B. DATED (SEE ITEM 11) 4/27/2026	
				()		10A. MODIFICATION OF CONTRACT/ORDER NUMBER	
				()		10B. DATED (SEE ITEM 13)	
CODE		FACILITY CODE					

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

- ☒ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended. ☒ is not extended.
- Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:
- (a) By completing items 8 and 15, and returning 1 copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or electronic communication which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by letter or electronic communication, provided each letter or electronic communication makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

See Section G

**13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NUMBER AS DESCRIBED IN ITEM 14.**

CHECK ONE	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NUMBER IN ITEM 10A.
()	
()	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation data, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
()	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
()	D. OTHER (Specify type of modification and authority)

E. IMPORTANT: Contractor ☐ is not ☐ is required to sign this document and return _____ copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

SEE CONTINUATION PAGE

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

15A. NAME AND TITLE OF SIGNER (Type or print)		16A. NAME AND TITLE OF CONTRACTING OFFICER (Type or print) Jacqueline Brooks Email: jacqueline.a.brooks@nasa.gov

(Signature of person authorized to sign)		(Signature of Contracting Officer)	

Previous edition unusable

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

The purpose of this amendment is to:

- 1) Modify the electronic submission email address stated in section L. The email address is changed from <https://nasagov.box.com/s/dmn6rpb40txoi9xjo3xyh5nygy9r4by> to KSC-DL-OPCS-PROPOSALS@mail.nasa.gov.
- 2) Incorporate FAR Clause 52.222-90 Addressing DEI Discrimination by Federal Contractors (APR 2026) (DEVIATION APR 2026).
- 3) Provide the government responses to the bidders' inquiries.

Section A - Solicitation/Contract Form

The following changes have been made:

<u>INFORMATION</u>	<u>FROM</u>	<u>TO</u>
Party to receive Proposal	John F. Kennedy Space Center, NASA Procurement Office Code: OP-CS, Headquarters Central Campus, Bldg. M7-0301 https://nasagov.box.com/s/dmn6rpb40txoi9xjo3xyh5nygy9r4by Kennedy Space Center, FL 32899 United States	John F. Kennedy Space Center, NASA Procurement Office Code: OP-CS, Headquarters Central Campus, Bldg. M7-0301 KSC-DLOPCS- PROPOSALS@mail.nasa.gov Kennedy Space Center, FL 32899 United States

Section C - Specification/SOW/SOO/ORD

The Requirements text has been modified to:

This acquisition is for Architect-Engineer Services for the design and other professional services necessary to rehabilitate, modernize, and develop new systems for facilities, utilities, and ground support systems across the locations above.

Section I - Contract Clauses

Additional Information/Notes

The following clauses were added:

FAR Clauses Incorporated by Full Text

52.222-90 Deviation - Addressing DEI Discrimination by Federal Contractors

(a) *Definitions.* As used in this clause—

Program participation means membership or participation in, or access or admission to: training, mentoring, or leadership development programs; educational opportunities; clubs; associations; or similar opportunities that are sponsored or established by the contractor or subcontractor.

Racially discriminatory diversity, equity, and inclusion (DEI) activities means disparate treatment based on race or ethnicity in the recruitment, employment (e.g., hiring, promotions), contracting (e.g., vendor agreements), program participation, or allocation or deployment of an entity's resources.

(b) In connection with the performance of work under this contract, the Contractor agrees as follows:

(1) The Contractor will not engage in any racially discriminatory DEI activities;

(2) The Contractor will furnish all information and reports, including providing access to books, records, and accounts, as required by the Contracting Officer, for purposes of ascertaining compliance with this clause;

(3) In the event of the Contractor's or a subcontractor's noncompliance with this clause, this contract may be canceled, terminated, or suspended in whole or in part, and the Contractor or subcontractor may be declared ineligible for further Government contracts;

(4) The Contractor will report any subcontractor's known or reasonably knowable conduct that may violate this clause to the Contracting Officer and take any appropriate remedial actions directed by the Contracting Officer; and

(5) The Contractor will inform the Contracting Officer if a subcontractor sues the Contractor and the suit puts at issue, in any way, the validity of this clause.

(6) The Contractor recognizes that compliance with the requirements of this clause are material to the Government's payment decisions for purposes of 31 U.S.C. 3729(b)(4).

(c) The Contractor must include the substance of this clause, including this paragraph (c), in subcontracts at any tier, including those for commercial products and commercial services, except those where the place of delivery or performance is outside the United States.

(End of clause)

Section J - List of Attachments

The following attachments were deleted:

Attachment 4 EFSS-Box-Offeror-Proposal-Submission-Instructions

Section L - Instructions, Conditions, & Notices to Offerors or Quoters

Miscellaneous text in this section has been modified to:

INCORPORATE CHANGES INTO SOLICITATION

L. 1 COMMUNICATIONS REGARDING SOLICITATION

(1) Questions or comments regarding this solicitation must be submitted in writing via email using the Microsoft Excel format included in Section J, Attachment 2 and be directed to the following Government POC's:

National Aeronautics Space Administration

Office of Procurement

Kennedy Space Center, FL 32988

Lacorsha.d.noel@nasa.gov

Stephen.e.crooks@nasa.gov

Oral questions will not be answered due to the possibility of misunderstanding or misinterpretation.

Questions regarding this solicitation shall be submitted to the Contracting Officers stated above via email no later than 10 calendar days prior to the RFP closing date.

(2) Questions or comments should be submitted in accordance with the above to allow analysis and dissemination of responses. Late questions or comments are not guaranteed a response prior to the proposal due date. The Contracting Officer will issue a written amendment to this solicitation to answer questions. Offerors are ENCOURAGED to submit questions prior to the last date for questions.

L. 2 ELECTRONIC SUBMISSION OF OFFERS

(a) The offeror must utilize the following email address for their electronic submission: KSC-DL-OPCS-PROPOSALS@mail.nasa.gov. Electronic submissions shall not contain hidden formulas, tables, be locked, be protected, or contain links to data not included in the electronic copy. All electronic submissions should be searchable and should not contain scanned documents, except those documents that must be provided in their native format. The offeror shall ensure documents are free from viruses and malware, as documents determined by NASA to contain a virus or malware will not be opened or evaluated.

(b) Prior to the electronic submission, offerors interested in responding to this solicitation **should notify the contracting officers at least 48 hours prior to the intended submission date/time of their intent to provide a submission at the following email addresses:**

Lacorsha.d.noel@nasa.gov and Stephen.e.crooks@nasa.gov

(c) **The offeror shall submit all files on or before the exact time specified in the solicitation to:** KSC-DL-OPCS-PROPOSALS@mail.nasa.gov

(d) Electronic file names shall be limited to letters, numbers, and single spaces, with the exception of the period that is required before the file extension (e.g., .pdf), in order to successfully upload and download files from the email address. The offeror shall not use special characters "/" or "" in file names. The offeror shall clearly label the contents of the file and include the name of the offeror in the file name. Examples of acceptable file names are as follows (not specific to this solicitation):

Offeror Submissions:

Offeror name - solicitation number - Technical Capability Volume.pdf

Offeror name - solicitation number - Price Volume.xlsx

(Note: The NASA/KSC e-mail box is limited to 15MB of unencrypted and 10MB of encrypted data on a PC and 12 MB of unencrypted and 7 MB of encrypted data on a MAC. Additionally, the server may reject files within these size limits due to an array of unforeseen conditions.) Unless specifically authorized by the solicitation instructions, alternate proposal submissions shall not be submitted.

(e) Immediately after all files have been submitted in their entirety, the offeror shall notify the contracting officers at the following email addresses: Lacorsha.d.noel@nasa.gov and Stephen.e.crooks@nasa.gov with a listing of all documents that were submitted via the electronic submission email address. If any problems are experienced with the the electronic submission email address (e.g., login, file transfer), please contact the contracting officer via e-mail as soon as possible.

(f) The offeror is responsible for ensuring its submission reaches the Government office designated in the solicitation by the date and time specified in the solicitation. The Government is not responsible for any failure attributable to the transmission or receipt of documents submitted using electronic means, including the missing of any submission requirements and established deadlines. Please note that uploading documents via the electronic submission email address and the transmission of the files from the offeror to the Government may not be instantaneous. **To ensure timely delivery, the offeror is encouraged to submit its proposal at least 24**

hours prior to the due date specified in the solicitation. The electronic submission of the proposal shall contain all information required by the solicitation to be determined responsive.

Late proposals will be reviewed in accordance with FAR 15.107(b).

L. 3 SUBMISSION PAGE LIMITATIONS

A-E firms responding to this solicitation must submit a completed SF 330 package. Unique Entity Identifier (UEI), CAGE Code, and TIN numbers must be included in Block 30 of the SF 330. The submission, including the SF 330 Parts I and II, must not exceed 60 pages and must include any information the A-E firm feels may be of benefit to it in the evaluation and selection process. Any pages exceeding the maximum page limitation will not be evaluated. The following are excluded from the 60-page limitation: submission transmittal cover pages, tab pages, tables of contents, signed amendments (if applicable), licensure/accreditation copies, copies of Section I from submitted PPQs, and completed CPARS evaluations. A tab page is defined as a blank sheet used to separate the submission pages and may include a section heading. Any additional information provided on a tab page, other than section heading, will result in the tab page being counted against the 60-page limitation. A page is defined as one side of an 8-1/2" x 11" sheet of paper, with at least a one-inch margin on all sides, using Arial font with a type-size of 10-point font. The one-inch margin and 10-point font limits are applicable to pages formatted by the A-E firm. The SF 330 form has its own instructions and is exempt from the above margin and character size limits.

The submission may be submitted on single- or double-sided sheets but must not exceed the 60-page limitation. Each 8-1/2" x 11" sheet will be considered one page when printed on one side and considered two pages when printed on both sides. Printed pages and illustrations must be legible and no larger than 11" x 17" foldouts, as appropriate for the subject matter. The 11" x 17" paper must be for the exclusive presentation of tables, figures, or illustrations. Each 11" x 17" page will be considered two pages when printed on one side and considered four pages when printed on both sides.

L. 4 SUBMISSION REQUIREMENTS

Firms must submit a completed SF 330, Architect-Engineering Qualifications, Parts I and II and include specific information addressing each of the five selection criteria described in this solicitation. Firms will be evaluated to determine the most highly qualified in relation to the selection criteria. **Failure to provide the requested data or to comply with the instructions in this notice will result in an evaluation that a firm is non-responsive.**

The following factors will be used in the evaluation of offerors to this solicitation. NASA will consider the immediate past five years as the period for evaluation.

The offeror shall provide their submissions via the following email address: KSC-DL-OPCS-PROPOSALS@mail.nasa.gov. **Ensure that submissions are searchable Portable Document Format (PDF) and must be delivered on or before May 27, 2026.**

The offeror shall submit responses to the solicitation to: KSC-DL-OPCS-PROPOSALS@mail.nasa.gov.

Note: All submissions shall use the fillable version of the SF 330 (Rev. 7/2021) downloaded from the GSA Forms Library (https://www.gsa.gov/reference/forms?search_keyword=Sf330). Individual pages of the Sections can also be downloaded from this site.

1) To ensure that all firms are evaluated equally, any submissions that have altered the SF 330 Sections A-H in any way will be considered non-responsive and will not be considered for selection. The prohibited alterations include, but not limited to:

- Insertion of photos, tables, or graphics in sections A-G
- Modifying, deleting, or altering any block sizes
- Altering the font or font size. Note: The form natively uses Arial font with 10-point type with a set cell size
- Altering paragraph line spacing
- Modifying or deleting page layouts or using an in-house form
- Altering the margins of the form

2) Any additional information that cannot fit within the SF 330 Sections A-G can be included in section H.

- At least one page in section H must include the standard form with blocks 31-33 filled in
- The firm may choose to use multiple pages of the section H form; however, the A-E shall not alter the form in any way as described above
- The firm may choose to use supplemental Section H pages, (edited in Microsoft Word or similar) in which photos, tables may be included. The format of the pages shall include:
 - Font no smaller than Arial 10
 - Margins set at one inch on all sides
 - All section H pages, including supplemental pages count towards the 60-page limit

Note: Any supplemental information provided in Section H regarding Specialized Experience that is not a part of Projects 1-10 will not be evaluated under Specialized Experience.

Firms are cautioned to ensure that the cut/paste of data into the form must use the native settings.

Only submissions submitted to the following email address will be accepted: KSC-DL-OPCS-PROPOSALS@mail.nasa.gov

L. 5 ARCHITECT-ENGINEER QUALIFICATION REQUIREMENTS

Firms must submit a completed SF 330, Architect-Engineering Qualifications, Parts I and II and include specific information addressing each of the five selection criteria described in this solicitation.

1. Specialized experience and technical competence in the types of work required. Provide no more than 10 projects in Section F of the SF 330. Firms must include the customer's/owner's point-of-contact (POC), project title and location (include a customer's identification number, if applicable, such as delivery task order number /s, contract number) in Section F of each SF 330 for each project. All projects must be ongoing or completed within five years from the date of this solicitation. For submittal purposes, a single project may be considered to include multiple phases of a single effort, even under separate task orders, to include planning and feasibility studies, permitting, preliminary engineering reports, design, engineering services during construction, activation and commissioning. General engineering contracts, IDIQ contracts, basic agreements, and basic ordering agreements are not considered "projects." One task order under an IDIQ/general engineering contract will be considered one "project."

2. Professional qualifications necessary for satisfactory performance of required services.

Provide qualifications only for those key personnel who will actually perform the major duties for the A-E Scope of Services in this solicitation.

Provide resumes for the following personnel (at a minimum).

- Two (2) Civil Engineer PE's with demonstrated experience in design and ESDC of large and complex civil systems and permitting. The proposal shall indicate Professional Engineer (PE) licensure coverage in FL, TX, AL, LA, and MS or how permitting actions in each of those states will be accomplished.

- One (1) Structural Engineer PE with demonstrated experience in design and ESDC of large and complex structural systems

- Two (2) Mechanical Engineers PE's with demonstrated experience in design and ESDC of large and complex mechanical systems

- One (1) Electrical Engineer PE with demonstrated design and ESDC experience of large and complex electrical systems.

- One (1) Control Systems Electrical Engineer PE with demonstrated experience with control systems (HVAC, lighting).

- One (1) Fire Protection PE with demonstrated design and ESDC experience in fire alarm / detection, fire suppression, and/or life safety designs

- One (1) Architect American Institute of Architects (AIA) with demonstrated design and ESDC experience of architectural systems.

- One (1) Contract Manager with demonstrated experience managing federal contracts and multiple multidiscipline task orders

- One (1) Project Manager with demonstrated experience coordinating multidiscipline design efforts for large and complex projects

- One (1) Quality Control Manager with demonstrated experience providing quality control (QC) on multidiscipline design efforts for large and complex projects

- One (1) Cost Estimator (certified or PE) with demonstrated experience providing accurate cost estimates for large, complex, multidiscipline projects. Moderate emphasis is placed on a firm's senior estimator with accreditation through International Cost Estimating and Analysis Association, American Association of Cost Engineers, Society of Cost Estimating and Analysis, or American Society of Professional Estimators. A Professional Engineer with significant cost estimating experience may be submitted but will not be considered certified.

- One (1) Scheduler (certified or PE) with demonstrated experience providing accurate and detailed construction schedule for large, complex, multidiscipline projects. Moderate emphasis is placed on a firm's senior scheduler with accreditation through the Project Management Institute, American Association of Cost Engineers, or APMG International.

- One (1) Designer / Drafter with demonstrated experience in BIM / 3D software for large, complex, multidiscipline projects.

The A-E firm must provide proof of licenses or professional accreditations for key personnel as part of the submission. The A-E firms must include civil engineers registered in the states of Florida, Alabama, Texas, Louisiana, or Mississippi or how permitting actions in each of those states will be accomplished in order to meet the intent for state-regulated permits. Other listed professionals must also be registered but may be from any state. The proof of licenses and professional accreditation must be provided as follows: professional license number and the state where licensed must be provided in the SF 330 Section E, Box 17; other professional accreditation must be provided in the SF 330 Section E, Box 18. Identify which of the key personnel are LEED certified.

3. Past Performance.

Firms must provide the Past Performance Questionnaires (PPQs) (Attachment 1) to each past performance customer contact identified in Section F of the SF 330. Firms must request customers submit their completed questionnaires via e-mail to arrive no later than 2:00 p.m. Eastern Time (ET) on **May 27, 2026**, to the address listed below.

Name: **LaCorsha Noel and Stephen Crooks**

Email Address: Lacorsha.d.noel@nasa.gov / Stephen.e.crooks@nasa.gov

A sample past performance transmittal letter is provided as part of Attachment 1. Questionnaires must be returned directly from the customer contact to the Contracting Officer listed above. PPQs will not be accepted directly from the firm.

Copies of Section 1 of the PPQs the firm sends to each customer contact must be submitted with the firm's SF 330. If a completed Contractor Performance Assessment Reporting System (CPARS) evaluation is available for a project identified in Section F of the SF 330, it must be submitted along with the completed SF 330 package. NOTE: The CPARS evaluation is not a substitute for a completed PPQ.

4. Capacity to accomplish multiple task orders.

Provide an organizational chart for the key personnel in the SF 330, Part I, Section D. The organizational chart should include at a minimum each of the key personnel listed under Professional Qualifications. Provide a table indicating for each of the projects submitted under "Specialized Experience" which of the key personnel submitted under professional qualifications were a part of the design team for that project to demonstrate a history of the proposed team members (and firms) working together.

5. Location in the general geographical area and knowledge/experience at the following NASA Center locations.

Indicate the key personnel's knowledge and experience working at each of the following Centers, other NASA facilities or other federally regulated sites such as DoD facilities: Kennedy Space Center (KSC), including Cape Canaveral Space Force Station (CCSFS); Stennis Space Center (SSC); Johnson Space Center (JSC); Marshall Space Flight Center (MSFC), including Michoud Assembly Facility (MAF), and any remote sites associated with these locations.

NOTE (regarding the following requirements): Advanced Pricing Rate Proposals, Small Business Subcontracting Plans, and Safety and Occupational Health Plans should NOT be submitted with original responses until requested by the Contracting Officer.

L.6 ADVANCED PRICING RATE AGREEMENTS (APRAs)

The most highly qualified firms to perform the work must submit APRA proposals. The APRA proposals must include, at a minimum, a description of direct labor categories, direct labor rates, annual escalation of rates, G&A rates, overhead rates, Computer Assisted Design rates, and other recurring costs.

L. 7 SMALL BUSINESS SUBCONTRACTING PLANS

NASA is committed to providing Small Disadvantaged Businesses (SDB), Historically Underutilized Business Zone (HUBZone) businesses, Service-Disabled Veteran-Owned Small Businesses (SDVOSB), Veteran-Owned Small Businesses (VOSB), Women Owned Small Businesses (WOSB), and Historically Black Colleges and Universities (HBCU)/ Minority Institutions (MI), maximum practicable opportunities to participate in Agency acquisitions at the prime contract level. The participation of NASA prime contractors in providing subcontracting opportunities to such entities is also an essential part of the Agency's commitment.

In accordance with FAR 52.219-9, Small Business Subcontracting Plan, in order to be eligible for award, large businesses must, upon the Contracting Officer's request, submit and negotiate acceptable Small Business Subcontracting Plans. Such plans are only required from large businesses selected by the Selection Authority as the most highly qualified to perform the work.

The Contracting Officer has determined small business subcontracting possibilities exist and has established an overall IDIQ small business subcontracting goal of 5%. The Contracting Officer's assessment of appropriate subcontracting goals for this acquisition, expressed as a percentage of total contract value (up to \$150M for each contract), is provided in the chart below.

SMALL BUSINESS CATEGORY	SUBCONTRACTING GOAL
Small Business	5%
SDB	2.5%
HUBZone	0.0%
SDVOSB	1.0%
VOSB	1.5%
WOSB	1.5%

Historically Black Colleges and Universities (HBCU)/ Minority Institutions (MI)	0.0%
---	------

The numbers above reflect the Contracting Officer's assessment of the appropriate subcontracting goals to be achieved at the completion of contract performance. Large businesses selected as the most highly qualified to perform the work must perform an independent assessment of the small business subcontracting opportunities and are encouraged to propose goals that are equivalent to or greater than those recommended by the Contracting Officer in their Small Business Subcontracting Plans. Small Business Subcontracting Plans must discuss the rationale for any goal proposed that is less than the Contracting Officer's recommended goal in any category, the efforts made to establish a goal for that category, and what ongoing efforts, if any, are planned during contract performance to increase participation in that category.

L. 8 SAFETY AND OCCUPATIONAL HEALTH PLANS

Firms must take all reasonable safety and occupational health measures when performing work under any NASA Center task order. Firms must comply with all Federal, State, and local laws applicable to safety and occupational health and with the safety and occupational health standards, specifications, reporting requirements, and other relevant requirements of the awarded contracts and task orders. Selected firms must submit a Safety and Occupational Health Plan.

L. 9 QUESTIONS/COMMENTS

Questions or comments must be submitted in the format of the IDIQ Question Form (Attachment 2), either in a Microsoft Excel file or in the body of an email. PDFs or read-only files are not acceptable. Questions must be sent to the Contracting Officers email identified above **no later than 10 calendar days from the RFP closing date**, to allow for analysis and dissemination of responses in advance of the submission due date. Questions received after this date will be considered but may not be answered. **Oral questions will not be accepted. Before submitting a question, please review the answers to frequently asked questions listed below.**

Additional information may be given by issuance of an amendment during the announcement period.

NOTE: This solicitation has four attachments:

Attachment 1 - Past Performance Questionnaire

Attachment 2 - IDIQ Questions Form

Attachment 3 - Standard Form 330 Architect-Engineer Qualifications

Answers to Frequently Asked Questions:

1. No general breakdown of workload distribution between NASA Centers is available.
2. NASA is not able to define the location, type, or size of task orders under this contract. In general, task orders will be awarded using a technical qualification narrative to identify the best-suited firm for a particular task order.
3. The Government will only accept PPQs obtained for this solicitation. Previously obtained PPQs will not be evaluated. Please ensure that you provide a point-of-contact (POC) for PPQs submitted, so that the Government

may attempt to contact them for information. The lack of a PPQ will be considered neutral (neither positive or negative). PPQs should be emailed to LaCorsha Noel and Stephen Crooks at the identified email addresses. Review of CPARs and other systems is used by the Government to supplement the PPQ data provided by the customer contacts. Any PPQs above the maximum 10 projects in section F will be removed prior to evaluation.

4. A copy of each individual license / LEED accreditation is not required. The proof of licensure may be accomplished by providing the license number and state for verification. If copies of licenses / certificates are provided, they will not count against the total page count.

5. Respondents must use the fillable version of SF330. Offers are not allowed to modify the SF 330. Offers who modify the SF 330 will be considered non-responsive.

6. A single project may be considered to include multiple phases of a single effort, to include planning and feasibility studies, permitting, preliminary engineering reports, design, engineering services during construction, activation and commissioning. General engineering contracts, IDIQ contracts, basic agreements, and basic ordering agreements are not considered "projects."

7. The Government expects the A-E to indicate the last year of their contractual involvement with the project as the year in which professional services were completed. If the A-E was contracted to provide on-going professional engineering services during construction (also known as construction administration services), then the last year for which the A-E provided those services would be indicated. If the A-E was contracted to provide services during the construction, a description of those services must also be included in the project description.

8. Tables and graphics are acceptable on supplemental sheets for Section H.

9. The Government will evaluate the A-E's specialized experience only for the projects in Section F of the SF 330. Additional information, e.g. continuation of Section F box 24, for these projects may be included in Section H, but information regarding specialized experience for projects in excess of the projects listed in Section F will not have a positive influence on the evaluation of the A-E's specialized experience. Any additional information included in section H may provide context and example information of section H.

10. Will firms be required to submit certified cost and pricing data audits and historical contract data from previous contracts prior to award submission? Answer: Yes, all firms will need to submit an audit, independent contractor or DCAA.

Section M - Evaluation Factors for Award

Miscellaneous text in this section has been modified to:

INCORPORATE CHANGES TO SOLICITATION

M. 1 GENERAL

Proposals will be evaluated by the evaluation team in accordance with applicable regulations, including the Federal Acquisition Regulation (FAR) and the NASA FAR Supplement (NFS). The evaluation team will conduct the evaluation activities and report its findings to the Source Selection Authority (SSA), who is responsible for making the source selection decision. Acceptable proposals will be evaluated against the evaluation factors set forth in **paragraph M. 5** below. Offerors must meet all solicitation requirements, including terms and conditions, representations and certifications, and technical requirements, as well as the evaluation factors. Incomplete proposals may be deemed unacceptable and removed from further consideration.

M. 2 BASIS FOR AWARD

This acquisition will follow the evaluation process in accordance with FAR 36.202-1 and the procedures of FAR Part 15, Contracting by Negotiation.

This competitive best value source selection will be conducted in accordance with Federal Acquisition Regulation (FAR) Part 15 and NASA FAR Supplement 1815.305. Awards will be made to the offerors who are deemed responsible in accordance with Federal Acquisition Regulation (FAR) Part 9; whose proposal conforms to the solicitation's requirements, and is determined, by an integrated assessment of the evaluation criteria to represent the Best Value to the Government, consistent with procedures identified at Paragraph M.5.

M. 3 AWARD WITHOUT DISCUSSIONS

In accordance with FAR 52.215-1, the Government intends to evaluate proposals and make awards without discussions (except for clarifications as described in FAR 15.202(a)(2)). Therefore, offerors are encouraged to submit their best proposal in the initial submission. However, the Government reserves the right to conduct discussions if the Contracting Officer determines them to be necessary. Multiple awards may be made as a result of this solicitation.

M. 4 EVALUATION PROCESS

Offerors will be checked in the System for Award Management (SAM) for current entity registration, representations and certifications, and the exclusions. Proposals will also be checked for minor informalities or irregularities.

Review for Responsiveness: The Government will review all proposals to determine if each offeror has submitted a responsive proposal, and that all required documentation complies with the solicitation instructions. Review of the System for Award Management (SAM) will be conducted to determine if an offeror has an active exclusion, as well as a review of the Offerors Representations and Certifications to determine eligibility for award and firms assigned the NAICS code 541330, Engineering Services. All other participants are deemed ineligible to submit offers. Any non-responsive proposal will be handled in accordance with NFS 1815.108-71, "Identification of Unacceptable Proposals", Offerors whose proposals are found to be non-responsive in any area or offerors who has an active exclusion listed in SAM will be eliminated from the competition without further consideration, all other offers will be considered responsive and will move forward for further evaluation.

M. 5 SUBMISSION EVALUATION CRITERIA

Firms must submit a completed SF 330, Architect-Engineering Qualifications, Parts I and II and include specific information addressing each of the five selection criteria described in this solicitation. Firms will be evaluated to determine the most highly qualified in relation to the selection criteria. Failure to provide the requested data or to comply with the instructions in this notice will result in an evaluation that a firm is non-responsive.

The following factors will be used in the evaluation of submittals to this solicitation. NASA will consider the immediate past six years as the period of time for evaluation.

1. Specialized experience and technical competence in the types of work required. Through the projects provided in Section F of the SF 330, the A-E firm must demonstrate experience managing and performing planning, design, and engineering services during construction of engineering infrastructure, equipment, and facilities, including new construction or modifications of existing facilities, working in multiple project phases, and cost analysis. Firms will be evaluated on recent and relevant demonstrated experience managing and performing in all areas of the A-E Scope of Services, including the following:

- a. Designing and providing construction documents for a variety of engineering projects, including civil, structural, mechanical, electrical, controls, fire protection and fire alarm, and architecture as identified in Section III above.
- b. Preparation of specifications using the SpecsIntact and/or MasterSpecs format system;
- c. Providing engineering services during construction, including shop drawing review and disposition, Request for Information responses, Engineering Order development, construction inspection services, review and incorporation of contractor redline/record drawings for as-built drawing preparation, and project closeout;
- d. Designing and providing construction documents for large, complex multidiscipline design and construction projects on new facilities and infrastructure, modifications to existing facilities and infrastructure, and maintenance and repair projects.
- e. Preparing planning studies, including development of requirements, preparing engineering evaluations, project scoping, and/or design-build bridging documents.
- f. Developing cost and constructability analyses, including cost-benefit analyses, life-cycle cost analyses, parametric cost estimating, and detailed cost estimates/quantity takeoffs;
- g. Providing A-E services for engineering projects contracted with the Federal Government or other entities with special requirements or constraints, such as security background checks, Buy American Act requirements, classification of design documentation, and similar requirements and regulations.
- h. Providing A-E services located on a NASA Center, military base or other federal property.

For evaluation purposes, emphasis will be placed on projects demonstrating effective and reliable design of engineering projects of the types listed in subparagraph 1.a., above and in coordination with the scope and services covered in C-1. Statement of Work of the solicitation. The Government will not consider repeated information of what is provided in the solicitation itself. Firms shall state specifically what engineering services the firm provided on the submitted projects. Do not describe the project or facility as much as describe what role and what services your firm provided to demonstrate the specialized experience and technical competence.

Selection Weight: 35 percent

2. Professional qualifications necessary for satisfactory performance of required services. Basis of evaluation will be the information provided in Section E of the SF 330.

Firms will be evaluated with major emphasis placed on professionals experienced in the design of large, technically complex, multidiscipline projects, and engineering services during construction. Additional major emphasis will be placed on PEs' qualifications showing experience in modern engineering analysis through software tools that may include, but not limited to; RISA 3D, STAAD, ICPR, AFTArrow, CAESAR, SKM, ETAP, CREO, etc.

Firms will be evaluated with moderate emphasis placed on professionals providing supporting design elements to the focused work, management, construction cost estimators, and drafting.

Selection Weight: 35 percent

3. PAST PERFORMANCE. The Government will assess the firm's past performance on the projects identified in section F of the SF 330 with respect to cost control, quality of work, and compliance with performance schedules, as determined from the completed Past Performance Questionnaires (PPQs) submitted by customer contacts, as well as information obtained from other sources. The firm's history of working

relationships and management of project teams may also be considered when reviewing past performance. Other sources may include, but are not limited to, Government past performance databases (e.g., Contractor Performance Assessment Reporting System (CPARS), etc.), and interviews with previous and current customers. The Government may also consider the firm's past performance on projects other than those provided in Section F of the SF 330 using other sources as described above. The recency and relevance of the information, source of the information, context of the data, and general trends in the firm's past performance will be considered. The Government will not disclose the names of persons/companies who provide performance information. Firms may provide information on problems encountered on identified contracts and the firm's corrective actions in their description of the project in Section F. If, during the course of the evaluation, the Government obtains adverse information to which a firm has not previously had an opportunity to respond, the Government will afford the firm an opportunity to clarify the adverse information.

The following areas will be evaluated:

Recency Assessment: An assessment of the past performance information will be made to determine if it is recent. To be recent, the effort must have been completed or performed during the past five (5) years from the date of the issuance of this solicitation. Efforts that have not yet been completed shall have had at least six (6) months of performance prior to the date of issuance of this solicitation. Past performance information that fails these conditions shall not be evaluated. If the removal of one or more projects from the past performance evaluation pool results in the number of evaluated projects to fall below the minimum project requirement of five, the offeror will be removed from further consideration for award.

Relevance Assessment: The Government will conduct an evaluation of all recent performance information obtained to determine how closely the effort relates to the SERAE II IDIQ. The past performance summary and information that may be obtained from other sources will be used to establish the degree of relevance of the past performance.

The Government will use the following degrees of relevance when assessing recent contracts:

Degree	Description
RELEVANT (R)	Present/past performance effort involved similar scope and magnitude of effort and complexities this solicitation requires.
NOT RELEVANT (NR)	Present/past performance effort involved little or none of the scope and magnitude of effort and complexities this solicitation requires.

Past Performance Ratings: The offeror's relevant experience and past performance will be reviewed and an assessment made that reflects the Government's judgment of the probability of each offeror successfully accomplishing the proposed effort based on that offeror's demonstrated performance. Each individual project will not be individually rated; however, the information for each project will be considered and that data will be consolidated into a single level of confidence rating in accordance with the following:

Very High Level of Confidence

The offeror's relevant past performance is of exceptional merit and is very highly pertinent to this acquisition, indicates exemplary performance in a timely, efficient, and economical manner and very minor (if any) problems with no adverse effect on overall performance. Based on the offeror's performance record, there is a very high level of confidence that the offeror will successfully perform the required effort. (One or more significant strengths exist. No significant weaknesses exist.)

High Level of Confidence

The offeror's relevant past performance is highly pertinent to this acquisition; demonstrating very effective performance that would be fully responsive to contract requirements. Offeror's past performance indicates that contract requirements were accomplished in a timely, efficient, and economical manner for the most part, with only minor problems that had little identifiable effect on overall performance. Based on the offeror's performance record, there is a high level of confidence that the offeror will successfully perform the required effort. (One or more significant strengths exist. Strengths outbalance any weakness.)

Moderate Level of Confidence

The offeror's relevant past performance is pertinent to this acquisition, and it demonstrates effective performance. Performance was fully responsive to contract requirements; there may have been reportable problems, but with little identifiable effect on overall performance. Based on the offeror's performance record, there is a moderate level of confidence that the offeror will successfully perform the required effort. (There may be strengths or weaknesses, or both.)

Low Level of Confidence

The offeror's relevant past performance is at least somewhat pertinent to this acquisition, and it meets or slightly exceeds minimum acceptable standards. Offeror achieved adequate results; there may have been reportable problems with identifiable, but not substantial, effects on overall performance. Based on the offeror's performance record, there is a low level of confidence that the offeror will successfully perform the required effort. Changes to the offeror's existing processes may be necessary in order to achieve contract requirements. (One or more weaknesses exist. Weaknesses outbalance strengths.)

Very Low Level of Confidence

The offeror's relevant past performance does not meet minimum acceptable standards in one or more areas; remedial action was required in one or more areas. Performance problems occurred in one or more areas which, adversely affected overall performance. Based on the offeror's performance record, there is a very low level of confidence that the offeror will successfully perform the required effort. (One or more deficiencies or significant weaknesses exist.)

Neutral

In the case of an offeror without a record of relevant past performance or for whom information on past performance is not available, the offeror may not be evaluated favorably or unfavorably on past performance [see FAR 15.305(a) (2) (ii) and (iv)].

Selection Weight: 10 percent

4. Capacity to accomplish multiple task orders. The A-E firm will be evaluated on the organizational structure, identification of key personnel, and a demonstrated history of working together. In addition, the A-E firm will be evaluated on the following narrative, which should be addressed in Part I, Section H:

An anticipated high-volume workload and demanding schedules should be anticipated. Describe the availability of the firm to perform multiple task orders simultaneously, particularly across multiple geographic locations. Describe the availability of the firm to provide qualified staffing to support key personnel to ensure quality and responsiveness of services across the NASA Centers identified in Section B-1 of the solicitation.

Generic statements of availability/capacity will be considered less favorably.

Selection Weight: 10 percent

5. Location in the general geographical area and knowledge/experience at the following NASA Center locations. Projects submitted under "Specialized Experience" will be used to evaluate this section.

Firms will be evaluated on key personnel's knowledge and experience working at the locations with major emphasis placed on project experience at any of the following NASA Centers or supporting centers: Kennedy Space Center (KSC), Florida; Cape Canaveral Space Force Station (CCSFS), Florida; Johnson Space Center (JSC), Houston, TX; Marshall Space Flight Center (MSFC) Alabama, Michoud Assembly Facility (MAF) Louisiana, and Stennis Space Center (SSC) Mississippi.

Firms will be evaluated on key personnel's knowledge and experience working at the locations with moderate emphasis will be placed on project experience at other NASA facilities or other federally regulated sites.

Selection Weight: 10 percent

M. 6 CONTRACTING OFFICER'S INITIAL SUBMISSION REVIEW

Firms will be checked against the System for Award Management (SAM) List of Parties Excluded from Federal Procurement and Non-Procurement Programs. Firms appearing on the List will be eliminated without further consideration.

Firms will also be checked against the U.S. Department of Labor, Occupational Safety and Health Administration's data base for safety citations/violations. Reports of significant safety citations or violations will be referred to the KSC Safety Office for further review. Firms must address any known OSHA violations in Section H of the SF 330.

In accordance with provision at FAR 52.204-7, System for Award Management, a firm submitting a response to this solicitation acknowledges that it must be registered in the SAM database prior to award, during performance, and through final payment of any contract resulting from this solicitation.

Submissions will be checked for informalities or irregularities, **with particular emphasis to ensuring that no alterations were made to the SF 330.**

M. 7 NEGOTIATIONS

Discussions/interviews will be held with up to twelve qualified firms and the final selection decision will be made by the designated Selection Authority. The final selection will be a listing, in order of preference, of the firms considered most highly qualified to perform the work and will authorize the Contracting Officer to begin negotiations with the selected firms. Selected firms will be required to submit Advanced Pricing Rate Proposals, Small Business Subcontracting Plans (applicable to large businesses only), and Safety and Occupational Health Plans. These three documents should NOT be submitted with original responses and will be due within 14 calendar days from the date requested by the Contracting Officer.

If a mutually satisfactory contract cannot be negotiated, the Contracting Officer will obtain a written final proposal revision from the firm, and notify the firm negotiations have been terminated. The Contracting Officer

will then initiate negotiations with the next firm on the final selection list. This procedure will continue until a mutually satisfactory contract has been negotiated.

M. 8 ADVANCED PRICING RATE AGREEMENTS (APRAs)

For the purpose of simplifying and increasing efficiency in the negotiation and execution of task orders under the IDIQ contracts, firms selected by the Selection Authority as the most highly qualified to perform the work must submit APRA proposals. The APRA proposals will be negotiated and incorporated into the resultant IDIQ contract. Firms failing to negotiate acceptable APRAs with the Contracting Officer will be ineligible for award.

M. 9 SMALL BUSINESS SUBCONTRACTING PLANS

In accordance with FAR 52.219-9, Small Business Subcontracting Plan, in order to be eligible for award, large businesses must, upon the Contracting Officer's request, submit and negotiate acceptable Small Business Subcontracting Plans. Such plans are only required from large businesses selected by the Selection Authority as the most highly qualified to perform the work.

The Small Business Subcontracting Plans will be negotiated and incorporated into the IDIQ contract. Selected large businesses failing to negotiate acceptable Small Business Subcontracting Plans with the Contracting Officer will be ineligible for award.

M. 10 SAFETY AND OCCUPATIONAL HEALTH PLANS

Firms must take all reasonable safety and occupational health measures when performing work under any NASA Center task order. Firms must comply with all Federal, State, and local laws applicable to safety and occupational health and with the safety and occupational health standards, specifications, reporting requirements, and other relevant requirements of the awarded contracts and task orders. Selected firms must submit a Safety and Occupational Health Plan. The submitted plans will be negotiated and incorporated into the IDIQ contract. Firms failing to negotiate acceptable Safety and Occupational Health Plans with the Contracting Officer will be ineligible for award.

M. 11 SOURCE SELECTION DECISION

Up to ten IDIQ contracts, with up to three awards reserved for small business concerns may be made. The award of multiple IDIQ Contracts will be based on the outlined in FAR 36.202 and the procedures of FAR Part 15, Contracting by Negotiation. The Source Selection Authority, exercising prudent business judgment, will make the source selection decisions to those offerors selected that provide a proposal that meets the evaluation criteria.

[END OF SECTION]

Solicitation No. 80KSC026R0004 Project Title: Southeast Regional Architecture-Engineering IDIQ II (SERA E II)					
No.	Date Received	Reference (Section Paragraph/Page, Drawing Sheet/Page)	QUESTION	GOVERNMENT RESPONSE	Amend No.
1	4/27/2026	L.5.1 (page 50); L.9.3 (page 54)	The L.5.1 paragraph states to "Provide no more than 10 projects in Section F...". However, the FAQ in L.9.3 states that "Any PPQ's above the maximum 15 projects in section F..." Please clarify what the maximum number of Section F projects is.	Offerors are to provide no more than 10 projects as stated in Section L.5.1. Any PPQs above the maximum 10 projects will be removed prior to evaluation.	0001
2	4/27/2026	Page 50, Section L.5, Item 1 and Page 54, Section L.9, Answers to Frequently Asked Questions, Item 3	On page 50, Section L.5, Item 1. Specialized experience and technical competence in the types of work required, the synopsis asks that we provide no more than 10 projects in Section F. However, on page 54, Section L.9, Answers to Frequently Asked Questions, Item 3, the synopsis says there's a maximum of 15 projects in Section F. Please confirm that firms may provide up to 15 projects in Section F, which would align with the solicitation requirements from SERAE 1.	Refer to PPI #1 for response.	0001
3	4/27/2026	Page 59, Section M.5 Submission Evaluation Criteria	On page 59, Section M.5 Submission Evaluation Criteria, the synopsis says that only projects within the immediate past five years will be considered. However, considering the breadth and depth of work requested in the statement of work provided in C.1, we respectfully request that the past six years be considered. This change in requirement would be in line with the SERAE 1, WRAE, and ERAE synopses.	M.5 Submission Evaluation Criteria will be updated. NASA will consider the immediate past six years as the period of time for evaluation. Refer to amendment 0001.	0001
