

FEDERAL SUPPLY SCHEDULE SOLE SOURCE JUSTIFICATION

Per Revolutionary Federal Acquisition Regulation Overhaul (RFO) 8.401
and General Services Administration Acquisition Regulation (GSAR) 538.7104-3(b)

Acquisition Title: Payment Standardization Calculation, Application and Code Conversion
Agency: Centers for Medicare & Medicaid Services (CMS)
Contracting Officer: Bridget Rineker

1. Description of Action:

- Task Order Number: 47QRAA25D002Q/75FCMC26F0064
- Task Order Award Date: April 8, 2026
- Total Price: \$2,500,000, including options
- Period of Performance: April 8, 2026, through February 7, 2027, with one 4-month option period (transition out) February 8, 2027, through June 7, 2027
- Name of Contractor: Acumen, LLC

2. Description of Services:

CMS requires contractor support to (1) maintain and operate its Medicare payment standardization programs, providing payment standardization data for use by various CMS, Department of Health & Human Services (HHS) and other federal stakeholders for quality measure development, data analytics, to support program integrity, fraud prevention, and to support law enforcement; (2) convert the existing Statistical Analysis System (SAS) payment standardization codebase into a CMS-approved target language; and, (3) where applicable, transition the new, documented codebase and all associated payment standardization work to a successor contractor.

3. Sole Source Authority:

Pursuant to GSAR 538.7104-3(b), only one source is capable of providing the highly specialized services and solution required at the level of quality and timeliness demanded by this requirement.

4. Sole Source Rationale:

Acumen is uniquely qualified to convert the existing SAS payment standardization code into a CMS-approved target language, as Acumen is the original developer of the SAS-based Medicare payment standardization programs currently in production at CMS. This gives Acumen unmatched knowledge of the codebase's architecture, logic, analytic transformations, and calculations, knowledge no other contractor can replicate with the same accuracy, efficiency, and accountability.

Acumen has also accumulated deep expertise in CMS's payment standardization methodology, including specialized payment systems for unique provider types such as Critical Access Hospitals (CAHs), Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs), and Indian Health Service facilities. Transitioning to an unfamiliar contractor at this stage would introduce unacceptable risk of delay, data errors, and failure to meet CMS-specified tolerance thresholds.

5. Other Facts and Statements of Action:

- **Publication:** Pursuant to GSAR 538.7104-3(b)(3), this justification will be made publicly available within 14 days after task order award at the Government-Wide Point of Entry for a minimum of 30 days.
- **Price:** This task order represents a fair and reasonable price consistent with GSAR 538.7102-2(d)(2).
- **Follow-On Procurement:** CMS anticipates conducting a competitive procurement for any follow-on payment standardization data support. Requiring the contractor to fully document the converted codebase and transfer all work to a successor contractor is specifically designed to position CMS to compete future work among qualified offerors.

This justification is accurate and complete to the best of the Contracting Officer's knowledge and belief.
