Pricing

The following information shall be included in the SF1449

- Proposed pricing shall be submitted on the Price/Cost Schedule of Services/Supplies.

EVALUATION PROCESS: The Government intends to award an Indefinite Delivery Indefinite Quantity (IDIQ) contract resulting from this Solicitation to the responsible quoter with the lowest price.

This procurement will be evaluated using FAR Part 13 procedures and in accordance with Addendum to FAR 52.212-2.

Factor: Price: The Government will evaluate proposed fuel pricing for completeness, reasonableness, and risk. Due to fluctuating propane market rates, **only Base Year pricing will be evaluated for award purposes.** Pricing for each Option Year will be negotiated **prior to exercising the option**, subject to market conditions at that time. To ensure fair and reasonable pricing over the full potential term of the contract, offerors **must certify** that future Option Year pricing **shall not escalate more than 5% annually**, on a **non-compounded basis**.

Award will be made to the responsible offeror submitting the **lowest Base Year price**, who also certifies in writing that Option Year pricing will not exceed the 5% escalation cap.

Price Escalation Formula (Non-Compounded)

Option Year Price = Base Year Price $\times$ (1 + 0.05 $\times$ Number of Years Since Base Year)

For example:

Year 1 (Base Year): \$1.00

Year 2 (Option Year 1): \$1.05

Year 3 (Option Year 2): \$1.10

Year 4 (Option Year 3): \$1.15

Year 5 (Option Year 4): \$1.20
