NOTE 1: A signature block will appear here (replacing these notes) based on the "Dollar Value of this Acquisition" selected above. Since most digital signatures that include date/time-stamps are redacted before they are made publicly available, always insert the date in the "Date" cell when affixing a digital signature to this document.

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

The contracting organization that is responsible for the proposed contract action is the Air Force Test Center (AFTC), Directorate of Contracting, Installation Contracting Division, AFTC/PZZG, 5 South Wolfe Avenue, Edwards AFB, CA 93524-1185.

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

The execution of a firm-fixed-price contract for the acquisition of a brand name Shark R-134a Refrigerant Reclaimer. This equipment is a specialized system designed to recover, recycle, and remove contaminants such as oil, acid, and moisture from R-134a refrigerant. This procurement will ensure the availability of certified equipment to safely handle and reclaim refrigerant in compliance with environmental standards.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

██████████ requires an R-134a Refrigerant Reclaimer to perform maintenance on Polyalphaolefin (PAO) Liquid Coolant Carts, critical for ground maintenance of F-22 aircraft. Current USAF Refrigerant Reclaimer, BV-300-1, NSN 4250-01-359-0396, is no longer procurable. Original Equipment Manufacture (OEM) ceased operations in 2018. Current on-hand BV-300-1, maintained by ██████████ (AGE), have obsolescence issues in terms of repair parts. ██████████ Manager ██████████ indicated standard USAF replacement for BV-300-1 is the SHARK-230-134A NSN 4250-01-658-3113. All USAF Refrigerant Reclaimer assets are no longer centrally managed; rather, they are procured via Installation Contracting.

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

The services required are highly specialized and necessitate the use of a "SHARK refrigerant reclaimer." This equipment is critical to ensure maintenance actions can occur and the Polyalphaolefin (PAO) coolant remains in a stable, environmentally safe condition. The SHARK refrigerant reclaimer, manufactured by RefTec International Systems, LLC, possesses a unique and critical capability that no other equipment can provide: it is the only unit certified by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI) to clean dirty R134a refrigerant to the ARI 700 standard for reclaimed gas in a single pass.

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

During market research the Mission Partner reached out to three small businesses to verify if they can meet their requirement of SHARK-230-134A, refrigerant reclaimer to perform maintenance on Polyalphaolefin Liquid (PAO) Liquid Coolant Carts, as a result there are multiple vendors that can provide a Shark refrigerant reclaimer.

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

Department of the Air Force: Justification for Other Than Full and Open Competition

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

The unique and proprietary "single-pass" reclamation technology of the SHARK unit, combined with the specific requirements of handling R134a with PAO coolant and the critical need to adhere to the ARI 700 standard, create a situation where only a contractor with access to this specific piece of equipment can meet the government's minimum and requirement.

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11)):

On subsequent acquisitions, every effort will be made to attempt to remove/overcome barriers to competition before future contracts are awarded for similar supplies. Continuous market research efforts will be made to determine whether new products enter the market that provide the capabilities required for future requirements.
