52.212-2 Evaluation—Commercial Products and Commercial Services (FEB 2026)

(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate offers:

(1) Award will be made to the lowest-priced offeror that meets all Government requirements.

Quotes will be evaluated on the basis of advantages and disadvantages to the Government that might result from making more than one award (multiple awards). It is assumed, for the purpose of evaluating quotes, that \$500 would be the administrative cost to the Government for issuing and administering each contract awarded under this solicitation, and individual awards will be for the items or combinations of items that result in the lowest aggregate cost to the Government, including the assumed administrative costs.

(2) IAW FAR 25.401(a)(1), trade agreement act (TAA) does not apply to acquisition set aside for small business.

(3) To ensure a clear and equitable evaluation, offerors are required to submit a fixed markup per gallon. This markup must be inclusive of all associated costs, including but not limited to overhead, profit, transportation, etc. The Government will evaluate offers and determine the most competitive quote based solely on this fixed markup.

(a) The final contract price per gallon will be determined on the delivery date of Monday June 1, 2026, using the following formula:

(i) Final Price per Gallon = (EIA Weekly Average Price) + (Contractor's Fixed Markup)

(b) The EIA Weekly Average Price will be based on the Energy Information Administration (EIA) Petroleum Administration for Defense District 3 (PADD 3), Gulf Coast, weekly retail on-highway diesel price published for the week of the delivery date, these prices are updated every Monday. This price component is subject to an Economic Price Adjustment with the following conditions:

(i) The price is capped at a maximum increase of 20% from the baseline index of \$5.012 per gallon.

(ii) There is no limit on downward adjustments if the index falls.

(iii) The fixed markup proposed by the offeror in their quote will remain unchanged throughout the contract.

(4) Award on equal low quotes:

(a) Award contracts in the following order of priority when two or more low quotes are equal in all respects:

(1) Small business concerns that are also labor surplus area concerns (Historically Underutilized Business Zone (HUBZONE))

(2) Other small business concerns.

(b) If two or more offerors remain equally eligible after application of paragraph (a) above, the contracting officer must conduct a drawing, limited to those quotes. If time permits, give the offerors involved an opportunity to attend the drawing. The drawing must be witnessed by at least three people, and the contract file must contain the names and addresses of the witnesses and the person supervising the drawing.

(c) When an award is to be made by using the priorities under this section, the contracting officer must include a written agreement in the contract that the contractor will perform, or cause to be performed, the contract in accordance with the circumstances justifying the priority used to break the tie or select bids for a drawing by lot.
