NOTE 1: A signature block will appear here (replacing these notes) based on the "Dollar Value of this Acquisition" selected above. Since most digital signatures that include date/time-stamps are redacted before they are made publicly available, always insert the date in the "Date" cell when affixing a digital signature to this document.

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

Agency: The Department of the Air Force (DAF)

Contracting Activity: 502d Air Base Wing, 502d Contracting Squadron, JBSA-Lackland, TX 78236

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

This is a sole-source procurement for the removal and installation of Variable Refrigerant Flow (VRF) communication cabling for Hitachi HVAC systems 2 and 3 in B2261 at Joint Base San Antonio (JBSA) - Fort Sam Houston (FSH), TX. This acquisition requires the contractor to provide all supervision, transportation, and equipment for the service of rewiring new communication cabling.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

The agency requires the award of a firm-fixed-price purchase order for the removal and installation of two (2) Variable Refrigerant Flow (VRF) wiring systems in B2261. This is a mission-critical facility, housing the U.S. Army Installation Management Command (IMCOM) and HQ personnel. The VRF system provides essential cooling for the Command Center data server room, in addition to critical communication rooms within the building. The estimated value of this procurement is \$18,563.00 and will utilize Operations and Maintenance (O&M) appropriations.

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(2), Unusual and compelling urgency.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

Participating in full and open competition would unduly cause serious risk to the Government due to the complete failure of two (2) inoperable HVAC units. The unforeseeable failure of VRF cabling in systems 2 and 3 have directly contributed to the rise in temperatures throughout the command center. Continuous overheating of data hardware poses significant risks leading to component failure, system downtime, security vulnerabilities, and major data loss. Therefore, it is imperative to restore cooling conditions as soon as possible. Furthermore, under RFO 6.103-2, Unusual and Compelling Urgency, this requirement will not exceed one-year.

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

Research revealed utilizing any other uncertified contractor to perform any work on equipment would void the manufacturer's extended warranty on other major components of the HVAC system. The interested and capable vendor identified is VRF Factory installation certified and possesses the proprietary knowledge specific to manufacturer requirements. Due to their unique position as a licensed installer, they are the only contractor that can perform the required service without causing unacceptable risks, voided warranty, and additional costs to the Government. If repairs are delayed hardware may fail, leading to system downtime, security vulnerabilities, and major data loss. The vendor has confirmed pricing and can perform service as soon as the contract is awarded. Furthermore, the contractor has provided a courtesy six-month warranty on its material and workmanship to be free from defects after installation.

Department of the Air Force: Justification for Other Than Full and Open Competition

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

Not Applicable.

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11)):

To overcome barriers to competition for subsequent acquisitions, a multi-faceted strategy will be implemented from situations that arise under unusual and compelling circumstances. This approach will begin with proactive market research, such as issuing Requests for Information (RFIs), to identify a broader vendor base well in advance of future needs. Furthermore, solicitation requirements will be refined to encourage wider industry participation. The agency will also explore establishing strategic sourcing vehicles, such as Blanket Purchase Agreements (BPAs) or GSA Schedules, to create a pool of prequalified vendors capable of rapid response.

I, the Contracting Officer, hereby certify that the justification is accurate and complete to the best of my knowledge and belief.
