We are currently in the process of preparing our proposal for the National Park Service, Contracting Operations (ConOps) East, Solicitation Number: 140P5126R0008 that will provide Maintenance Repairs of Unpaved Roads - Big South Fork National River and Recreation Area (BISO) Onieda, Tennessee.

Provide Maintenance Repairs of Unpaved Roads by delivering a minimum of 16,100 tons of TDOT 903-specification crusher run limestone aggregate ($\frac{3}{4}$ -inch down to fines) or an NPS-approved equivalent. Tailgate-spread aggregate in a uniform and continuous manner across the full width of travel along each designated road segment unless otherwise directed by the COR. Spot dumping, segregation, or uneven distribution is not permitted. Aggregate shall be tailgate-spread to achieve a uniform average lift of three (3) inches, with an allowable tolerance of plus or minus one-half (0.5) inch. The contractor shall use hauling equipment capable of safely accessing all roadways. Most roads maintain approximate clearances of ten (10) feet width and twelve (12) feet height; however, Duncan Hollow Road, Alfred Smith Road, Jack Ridge Road, and Big Island Road contain tighter segments with minimum clearances of nine (9) feet width and eleven (11) feet height. The contractor is solely responsible for selecting appropriate equipment and ensuring safe passage without resource damage. The contractor must provide all traffic control necessary to safely deliver materials, including managing encounters with public vehicles on narrow roads. The National Park Service will not supply flaggers or escorts for Big South Fork National River and Recreation Area (BISO) Onieda, Tennessee.

As part of our proposal, we have listed you as a reference on our performance for this type of service with your agency under the previous/current contract listed below. Your input on our performance is therefore requested.
