52.204-29 Federal Acquisition Supply Chain Security Act Orders-Representation and Disclosures. (DEC 2023)

(a) *Definitions.* As used in this provision, *Covered article*, *FASCSA order*, *Intelligence community*, *National security system*, *Reasonable inquiry*, *Sensitive compartmented information*, *Sensitive compartmented information system*, and *Source* have the meaning provided in the clause 52.204-30, Federal Acquisition Supply Chain Security Act Orders-Prohibition.

(b) *Prohibition.* Contractors are prohibited from providing or using as part of the performance of the contract any covered article, or any products or services produced or provided by a source, if the prohibition is set out in an applicable Federal Acquisition Supply Chain Security Act (FASCSA) order, as described in paragraph (b)(1) of FAR 52.204-30, Federal Acquisition Supply Chain Security Act Orders-Prohibition.

52.236-28 Preparation of Proposals - Construction. (OCT 1997)

L - Instructions, Conditions, and Notices to Bidders

Although brand names may be mentioned in the specifications and drawings of this solicitation, contractors are not mandated to submit only those specific brand names for consideration and are encouraged to submit materials that are equal to those brand names when bidding on this project.

All complete proposal submissions shall include: three (3) sections addressing the factors listed in Section M of the solicitation: Section I-Technical Proposal, Section II-Past Performance, and Section III-Cost Proposal.

Section I: Technical Proposal (Not to exceed 20 pages)

Technical proposal shall address the work to be accomplished in the specifications and address the evaluation criteria (Technical Approach) listed in section M of this solicitation. Offerors shall provide a list of subcontractors planned for use on this project. Offerors should describe the number of years or previous contracts that the offeror and subcontractor(s) have teamed together (state clearly if this is the first time you have teamed together). A technical proposal that is not complete will not be evaluated.

Section II: Past Performance

The offeror should provide **three (3) relevant past performance references** as part of its proposal submission. References must demonstrate experience on projects of similar magnitude and nature, involving comparable technical requirements, disciplines, and performance conditions as described in the specifications for this contemplated contract, and must be completed within five (5) years of the issuance date of this solicitation. At least one reference shall reflect experience performing work in remote geographic locations with logistical complexity requiring coordination with project stakeholders.

For each reference, the offeror shall provide the client/organization name, project title, period of performance, brief description of work performed, and a current point of contact (name, title, phone number, and email). The Government will evaluate past performance based on the quality, relevance, and recency of the references provided.

Offerors are cautioned that in conducting the past performance questionnaire the Government may use data provided in the offerors proposal and data obtained from other sources, such as the Contractor Performance Assessment Reporting System (CPARS) or similar systems. Since the Government may not necessarily interview all the sources provided by the offerors, it is incumbent upon the offerors to explain the relevance of the data provided. Offerors are reminded that while the Government may elect to consider data obtained from other sources, the burden of proving low performance risk rests with the offerors.

Section III: Cost Proposal

All contractors are required to provide a detailed cost proposal with a breakout of costs associated with general conditions, materials, labor, overhead, profit, bonding, and insurance. All contractors must complete this section as part of their cost proposal. Costs will be evaluated against current industry standards. In cases of a perceived discrepancy, offerors may be asked to clarify costs based on the findings of the Government. Additionally, all offerors must submit with their proposal, a signed SF-1442 solicitation and signed amendments to the solicitation if applicable,

M - Evaluation Factors for Award

Basis for Contract Award – Proposal Evaluation Criteria

The techniques and procedures described under FAR 15.404-1 will be the primary means of assessing proposal reasonableness. The Government intends to award a contract without discussion with respective offerors to the most suitable contractor per the evaluation process; however, the contracting officer reserves the right to establish a competitive range

and open discussions with offerors if it is deemed necessary. The Government's technical evaluation committee will evaluate the proposals submitted against the following evaluation criteria:

Factor A – Technical Approach

Evaluation of this factor will be based on the offeror's description of their technical approach to the project. Offerors are encouraged to provide detailed specific information. Failure to provide sufficient information so that the evaluation team cannot discern if the offeror has a thorough understanding of the work in question may lead to the proposal receiving a lower rating. Information provided in the Technical Proposal should be relevant to the specifications of the project. The Government will evaluate the offeror's means and methods to accomplish the construction project, including selection of subcontractor(s) and their role in the project.

Estimated time of completion will also be considered.

Factor B – Past Performance, Experience, and Technical Capability

The Government will evaluate the offeror's past performance based on demonstrated experience performing projects similar in scope, magnitude, and complexity to the requirements of this solicitation. Offerors shall submit descriptions of at least three (3) similar projects completed within the past five (5) years, including historic project scope, size, location, performance outcomes, and the roles fulfilled by proposed key personnel. References with current client points of contact shall be provided. Projects should demonstrate experience performing culvert or comparable drainage conduit cleaning and inspection work, including performance in remote or logistically complex environments requiring coordination with stakeholders.

The Government may also consider relevant past performance information obtained from other sources. Offerors will be afforded an opportunity to address adverse past performance information to which they have not previously had an opportunity to respond.

Past performance will be evaluated for recency, relevancy, and quality, and confidence ratings will be assigned. In accordance with FAR 15.305(a)(2), an offeror without a record of relevant past performance or for whom information is not available will receive a Neutral confidence rating (neither favorable nor unfavorable). Greater confidence may be assigned to proposals demonstrating highly relevant, successful past performance.

Factor C – Cost Proposals

Evaluation of this factor will be based on the reasonableness of the detailed cost proposal. Cost will be evaluated for reasonableness through a comprehensive comparison of each proposal received. Reasonableness will be determined based on costs submitted by the competition, current market conditions, and comparison to the Government estimate. Offerors must provide a cost breakout to include all costs associated with their proposal.

Each proposal shall be evaluated to ensure that all information provided in the RFP has been addressed, is accurate and complete, and each individual cost category under each division is

properly identified (e.g., design, general requirements, concrete, masonry, mechanical, electrical, site work, etc.). Offerors shall identify the subtotal cost for each standard construction division, and the aggregate total cost for each phase of the overall project. The proposed costs will also be evaluated using the cost techniques listed at Federal Acquisition Regulation (FAR) 15.404-1 (b)(2)(i), (b)(2)(v), and (b)(2)(vi). The offeror's total cost shall be identified by divisions as shown in the project specifications schedule.

Relative Weight of Evaluation Criteria

All evaluation factors other than cost, when combined, are "significantly more important" than cost. All non-cost factors will be combined and evaluated as an overall technical proposal rating. Thereafter, cost will be considered after each technical proposal has been evaluated and scored. The best value is determined by comparing differences in the value of non-cost features with differences in cost to the Government. In making this comparison, the Government is more concerned with obtaining superior non-cost features than with making an award at the lowest overall cost to the Government.

However, the Government will not make an award at a significantly higher overall cost to achieve slightly superior non-cost features. Therefore, cost is not expected to be the controlling factor in the selection of an Offeror, but the degree of importance of cost as a factor could become greater depending upon the equality of the proposals for other factors evaluated. When competing proposals are determined to be substantially equal after evaluation of all non-cost factors, the cost could become the controlling factor.

Evaluation Standards

Rating: For purposes of this solicitation, ratings will consist of an adjectival rating in conjunction with a narrative.

(1) Technical Ratings. The ratings below include the consideration of risk in conjunction with the strengths, weaknesses, significant weaknesses, uncertainties, and deficiencies in an offeror's proposal. These shall be used on all technical factors and sub-factors and sufficient documents supporting these ratings shall be included with the ratings:

Adjectival Rating	Description
Outstanding	Proposal indicates an exceptional approach and understanding of the requirements and contains multiple strengths, and risk of unsuccessful performance is low.
Good	Proposal indicates a thorough approach and understanding of the requirements and contains at least one strength, and risk of unsuccessful performance is low to

	moderate.
Acceptable	Proposal meets requirements and indicates an adequate approach and understanding of the requirements. and risk of unsuccessful performance is no worse than moderate.
Marginal	Proposal has not demonstrated an adequate approach and understanding of the requirements, and risk of unsuccessful performance is high. Proposal is unawardable without discussions.
Unacceptable	Proposal does not meet requirements of the solicitation and thus contains one or more deficiencies, and risk of unsuccessful performance is unacceptable. Proposal is unawardable without discussions.

(2) Past Performance Evaluations shall address the following three items.

(i) **Recency:** Recency is generally expressed as a time during which past performance references are considered relevant and is critical to establishing the relevancy of past performance information.

(ii) **Relevance:** In establishing what is relevant for the acquisition, consideration should be given to those aspects of an offeror's history of contract (or subcontract) performance that would provide the most context and give the greatest ability to measure whether the offeror will successfully satisfy the current requirement. Common aspects of relevancy include, but are not limited to, the following: similarity of product, service, support, complexity, dollar value, contract type, use of key personnel (for services), and extent of subcontracting.

(iii) **Quality:** The past performance evaluation conducted in support of a current source selection does not establish, create, or change the existing record and history of the offeror's past performance on past contracts; rather, the past performance evaluation process gathers information from customers on how well the offeror performed those past contracts. Requirements for considering history of small business utilization are outlined at FAR 15.304(c)(3)(ii). The Past Performance Evaluation will review all past performance information collected and determine the quality of the offeror's performance, general trends, and usefulness of the

information.

Once the past performance evaluation is completed, one of the following ratings shall be assigned.

Performance Confidence Assessments Rating

Rating Adjectival Rating	Description
Substantial Confidence	Based on the offeror's recent performance record, the Government has high expectations that the offeror will successfully perform the required effort.
Satisfactory Confidence	Based on the offeror's recent performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort.
Limited Confidence	Based on the offeror's recent performance record, the Government has low expectations that the offeror will successfully perform the required effort.
No Confidence	Based on the offeror's recent performance record, the Government has little or no expectation that the offeror will be able to successfully perform the required effort.
Neutral Confidence	No recent performance record is available, or the offeror's performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The offeror may not be evaluated favorably or unfavorably on the factor of past performance.

Additional Information

- A. The Source Selection Authority shall make an integrated best value award decision to meet the goal of awarding the contemplated contract.
- B. Offerors are cautioned to submit sufficient information, in the format specified by Section L, Proposal Preparation Instructions.
- C. Offerors may be asked to clarify certain aspects of their proposal (for example, the relevance of past performance information) or respond to adverse past performance

information to which the offeror has not previously had an opportunity to respond. Communication conducted to resolve minor or clerical errors will not constitute discussions and the contracting officer reserves the right to award a contract without the opportunity for proposal revision.

- D. System updates may lag policy updates. The System for Award Management (SAM) may continue to require entities to complete representations based on provisions that are not included in agency solicitations, including 52.223-22, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals—Representation, and paragraph (t) of 52.212-3, Offeror Representations and Certifications—Commercial Products and Commercial Services. Agencies will not consider or use these representations. Entities are not required to, nor are they able to, update their entity registration to remove these representations in SAM.
