EVALUATION-COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES (FEB 2026) (DEVIATION 2026-00038)

(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate offers:

[Insert evaluation factors in the relative order of importance. For requests for proposals, state: Evaluation factors other than price when combined are [significantly more important than price/approximately equal to price/significantly less important] than price. For invitations for bids, list only price and price-related factors.]

A. General Information: 1. The basis of award will be the Lowest Priced, Technically Acceptable offer. Offerors must receive a rating of Technically Acceptable in all factors/subfactors in order for their overall proposal to be determined Technically Acceptable. 2. By submission of its offer, the offeror accedes to all solicitation requirements, including terms and conditions, and technical requirements. 3. The Government intends to make award without discussions, unless the Contracting Officer determines that discussions are necessary. Offerors should provide their most favorable prices in their initial offers.

B. Non-Price Evaluation Factors: 1. Factor 1- Technical: The contractor shall demonstrate that they have capabilities to perform to the specific tasks listed in Section 5 for Specific Tasks of the Performance Work Statement. If the offeror proposes to 'partner' or use a commercial service with a separate entity not owned, controlled or operated by the offeror, then the offeror should explain the nature of the arrangement with the separate entity. The explanation should explain the scope of services to be provided by the contractor and any other entities; and describe any formal/written or informal agreements between the contractor and other entities to provide the services required by this solicitation. Additionally, the explanation should specify the percentage division of payments between entities (any fractional percentages should be rounded to at least one decimal place). If the government requires additional information regarding an offeror's arrangements with separate entities or division of contract payments, the government may issue clarifications to obtain additional information. 2. Factor 2 - Past Performance: The Offerors shall provide three recent and relevant Government or private sector projects completed within the past three years that demonstrates the ability to perform the requirements in this solicitation. The Offeror shall identify the contract title, contract number, dollar value, client name and address, location of work, point of contact with telephone number, and an explanation of how each project related to the work requirements of this solicitation.

C. 1. Factor 1 - Price: Offerors shall complete the pricing schedule for each Contract Line Item Number (CLIN). Proposals will be evaluated initially independently of the price to determine the Offerors' ability to meet the Government's requirement set forth in the solicitation. The Government may make a final rating determination based on the proposal as submitted without requesting any further information. For all proposals determined to be Technically Acceptable, the offer providing the lowest price will receive the contract award. 1. Offerors' technical proposals will receive an overall rating based on the following: (a) Technically Acceptable: Offeror meets all requirements or technical specifications or has submitted all documentation requested in any technical evaluation criteria and all documentation meets the standard set forth in the solicitation. (b) Technically Unacceptable: Offeror fails to meet all requirements or technical specifications or has failed to comply in submitting requested documentation in any technical evaluation criteria or the submitted documentation fails to meet the standard set forth in the solicitation.

D. For the purposes of the award of this Contract, the Government intends to evaluate the option to extend services, provided under FAR 52.217-8, as follows: 1. The evaluation will consider the possibility that the option can be exercised at any time during any contract performance period and can be exercised in increments of one to six months, but for no more than a total of six months during the life of the contract. 2. The evaluation will assume that the prices for any option exercised under FAR 52.217-8 will be at the same rates as those in effect under the contract when the option is exercised. 3. The evaluation will therefore assume that the addition of the price or prices of any possible extension or extensions under FAR 52.217-8 to the total price for the basic requirement and the total price for the priced options has the same effect on the total price of all proposals relative to each other, and will not affect the ranking of proposals based on price, unless, after reviewing the proposals, the Government determines that there is a basis for finding otherwise. 4. This evaluation will not obligate the Government to exercise any option under FAR 52.217-8.

(b) *Options (if applicable)*. The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. The evaluation of options does not obligate the Government to exercise the option(s).

(c) *Notice of award*. A written notice of award or acceptance of an offer furnished to the successful Offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.
