

SINGLE SOURCE JUSTIFICATION (UNDER SAT)

JOINT ADMINISTRATIVE OPERATIONS Acquisitions Operations

Pursuant to FAR subpart 13.106-1(b)(1)(i) and (ii), for purchases not exceeding the Simplified Acquisition Threshold (SAT), Contracting Officers may solicit from only one source if the circumstances deem only one source is reasonably available (e.g., urgency, exclusive licensing agreements, brand name, or industrial mobilization).

Instructions: The information in the text boxes are provided as sample language or to indicate a needed fill-in. Sample language should be removed from the final document. All text boxes require information and shall not be left blank.

1. Description of Need

The U.S. Fish and Wildlife Service (USFWS) requires the purchase of commercially available hunting ammunition (both traditional lead-core and non-lead/copper projectiles) for use in educational display materials ("epoxy display pucks") as part of the Service's voluntary lead-free hunting outreach initiative. These display materials are designed to allow the public, including hunters, to visually compare commonly used ammunition types and understand differences in terminal performance and fragmentation characteristics. The ammunition must be representative of what an average hunter can readily purchase in retail settings.

2. Market Research Conducted

Market research was conducted using multiple sources to identify commonly available and widely used hunting ammunition, including: Online ammunition aggregation platforms (e.g., Ammosseek) Manufacturer websites (e.g., Federal Premium Ammunition, Hornady Manufacturing Company, Barnes Bullets), Site visits to local retail outlets (e.g., sporting goods stores carrying hunting ammunition), Input from the lead-free hunting community and subject matter experts, Personal expertise and field experience related to commonly used hunting calibers and ammunition types. This research confirmed that while many retailers carry overlapping product lines, no single vendor consistently stocks all required brands, calibers, and grain weights necessary to fully represent both lead and non-lead options across multiple hunting platforms.

3. Other Capable Sources

Efforts were made to identify multiple capable sources through online searches, retailer comparisons, and review of manufacturer distribution channels. While numerous vendors sell hunting ammunition, availability is highly variable due to: Frequent stock fluctuations, Regional distribution differences, Limited production runs for certain non-lead ammunition types. Given the need for specific, representative products (by brand, caliber, and grain), sourcing from multiple vendors or allowing substitutions would introduce inconsistency and reduce the effectiveness of the educational displays.

4. Barriers to Competition

The primary barrier to competition is the requirement for specific, commercially recognized ammunition products that are widely used by hunters. This is necessary to maintain credibility and ensure the displays accurately reflect real-world choices available to the public. In addition, multiple manufactures were selected in an effort to provide fair and equitable access across this purchase.

5. Contractor's Qualifications

This is a brand name request for ammunition intended for display purposes. Contractors shall provide ammunition of the specified brand and type.

6. Determination of Fair and Reasonable Cost

Price will be determined fair and reasonable at the time of award.

7. Recommendation and Certification by Program Office

Based on the above justification, I recommend this acquisition to be conducted using sole source acquisition procedures. I hereby certify that this justification is accurate and complete to the best of my knowledge and belief.
