

OVERHAUL DESCRIPTION

ITEM NAME CYLINDER HEAD,DIESEL
STOCK NUMBER 2815-12-401-6623 SHELF LIFE CD S
PART NUMBER EX52904100073
USED ON MTU 4000 SERIES ENGINES ON THE 154 WPC VESSELS

Items as received by the contractor must be complete and of the proper cited part number. Discrepancies shall be reported to the Coast Guard Contracting Officer.

OVERHAUL REQUIREMENTS:

ITEM NAME : Cylinder Head, Diesel Engine
STOCK NO. : 2815-12-401-6623
PART NUMBER : EX52904100073
ITEM USE : MTU Main Engines 154' WPC Vessels

PRELIMINARY INSPECTION REQUIREMENTS

The Contractor shall disassemble, clean and inspect the, Cylinder Head to obtain the overall condition and determine the estimated cost of overhaul. A detailed report and repair plan including material, labor rate, labor hours, overhaul, testing, preservation, packaging, packing, marking, bar-coding and crate repair or replacement costs shall be submitted to the Coast Guard Contracting Officer for approval. Overhaul is intended to restore the Cylinder Head to a condition that is equal to that of a new Cylinder Head as listed above. No further work shall be accomplished until the report is approved in writing by the Coast Guard Contracting Officer.

The inspection report and repair plan shall consist of, as a minimum, the following information:

1. Name of Contractor
2. Date of Inspection
3. Identification of Cylinder Head by serial number, part number and stock number.
4. Condition of shipping crate and any cost of repair or replacement.
5. A list of parts and materials recommended for replacement with individual pricing.
6. Cost of overhaul labor broke down by number of hours and hourly rate.
7. Comments if any pertaining to unusual observations during inspection and disassembly.

OVERHAUL REQUIREMENTS

Overhaul - The Cylinder Head shall be overhauled to a service ready "A" condition, which shall restore the operating, coating and performance characteristics to the "original" design and technical specifications as listed above. Overhaul shall be performed in accordance with Original Equipment Manufacturer (OEM) specifications and standards.

*** Service Ready "A" condition is defined as a reconditioned Cylinder Head meeting all required design specifications and dimensions in accordance with the OEM and being capable of functioning and performing in the same manner as an identical new Cylinder Head. All non-coated Cylinder Head surfaces shall be preserved to prevent corrosion for a period of up to two

FOR OFFICIAL USE ONLY

years. Cylinder Heads shall be primed and coated meeting the original color and thickness characteristics. The Cylinder Heads(s) shall be individually packaged, packed, labeled and bar-coded in reusable wooden crates. ***

Replacement Parts - All replacement parts used for this requirement shall be new OEM parts. Reclaimed, recycled or aftermarket parts are not acceptable and shall not be used. The overhaul facility or any sub-contractors shall not manufacture parts to be used on overhauled assemblies without permission from the Contracting Officer. Parts not normally manufactured by the OEM such as nuts, bolts, o-rings, seals, gaskets etc. shall be equal to the quality of such parts originally installed by the OEM, but are not required to be supplied by the OEM.

Testing - Following completion of overhaul, the Contractor shall perform standard production tests and inspections to assure maximum design performance in accordance with OEM drawings and specifications. The Contractor shall provide certifications of successful standard production tests and inspections. One certification shall be placed in the box with each unit and a copy of each certification shall be forwarded to the Coast Guard Contracting Officer.

Coating (if applicable) - Contractor shall clean and prepare surfaces for coating IAW coating manufacturer requirements. Contractor shall use a suitable primer compatible with final coating. Primer thickness and application shall be IAW primer manufacturer instructions. Color of finish coat shall be the same as originally coated when new. Any changes to color shall be approved by the Contracting Officer.

Calibration - Contractor shall have a tool calibration program. All measuring devices, test equipment and attached gages shall be calibrated and have a current calibration sticker attached. Calibration shall be traceable to National standards.

Assembly - The Cylinder Head shall be delivered to the Coast Guard completely assembled and ready for installation.

Warranty - The standard manufacturer warranty applies to this requirement.

PRESERVATION, PACKAGING, PACKING, MARKING AND BAR-CODING

Preservation - The Charge Air Cylinder Heads are for system stock and will not be installed immediately. The Contractor shall use an appropriate preservative, if necessary to preserve the item from rust or corrosion for a minimum of two years.

Packaging and Packing - Each Charge Air Cylinder Head shall be packaged individually in a skid mounted framed in wooden crate capable of providing maximum protection from damage during long term warehouse storage and multiple commercial shipments worldwide. The crate shall be manufactured using ring type nails or wood screws. The crate lid shall be secured using corrosion resistant wood screws. Each Charge Air Cylinder Head shall be secured to the skid mounted crate or packed in such a way to prevent any movement and damage.

Marking - The marking described herein shall be placed on the longest two sides of each box (on opposite ends). All markings shall be done via machine-made stencils where applicable. The lettering shall be at least 1/2" high, in permanent black print lettering on a painted white background.

OVERHAUL DESCRIPTION

NOTE: ALL PREVIOUS MARKINGS AND / OR QUALITY ASSURANCE DECALS SHALL BE COMPLETELY REMOVED FROM THE REUSABLE SHIPPING CONTAINER PRIOR TO THE APPLICATION OF ANY NEW MARKINGS.

NATIONAL STOCK NUMBER: NSN: 2990-12-354-2436
ITEM NAME: CHARGE AIR CYLINDER HEAD
PART NUMBER: 0030986020
CONTRACT NUMBER: SEE CONTRACT
SERIAL NUMBER: CONTRACTOR PROVIDE
SHIPPING WEIGHT: CONTRACTOR PROVIDE

THE FOLLOWING STATEMENT: COAST GUARD SFLC MATERIAL
CONDITION "A", 1 EA

Coast Guard Acceptance - Acceptance will be made at destination by a government representative. Acceptance will be contingent upon representative's verification of no damage in transit, correctness and completeness of order and Contractor's conformance to preservation, packaging, packing, marking and bar-coding requirements.
