

Synopsis/Notice of Intent to Sole Source

The F-35 Joint Program Office (JPO) of Arlington, VA, intends to solicit, negotiate, and award a sole source contract under the authority of the Federal Acquisition Regulation (FAR) 6.103-1, “Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements”, to Lockheed Martin Aeronautics (LM Aero). The proposed North American Industry Classification System (NAICS) code for this acquisition is 334511: Search, Detection, Navigation, Guidance, Aeronautical, and Nautical System and Instrument Manufacturing. NAICS 334511 has a small business size standard of 1,350 employees. One or more of the items under this acquisition is subject to Free Trade Agreements.

All responsible sources may submit a capability statement in response to this notice of intent to sole source. The F-35 JPO will consider all capability statements received within fifteen (15) days after the date of publication of this pre-solicitation notice.

Potential offerors must have a Secret security clearance to be eligible for award. If the Government chooses to release a solicitation for the requirements described herein, the Government will provide a DD-254 form.

The F-35 JPO has a requirement to support the Foreign Military Sales (FMS) customers by (1) establishing connectivity between a Mission Data (MD) development site at Eglin AFB, FL, and a MD Validation & Verification (V&V) site at Lockheed Martin Aeronautics in Fort Worth, TX, and (2) providing the required hardware and software for said development and test. This effort is referred to XRL Integration and supports the creation of FMS Mission Data Files (MDF). The contractor shall be responsible for procuring, delivering, and installing the necessary hardware, software, and network infrastructure that supports MDF efforts and for interconnectivity.

LM Aero is the sole designer, developer, and integrator of the F-35 aircraft, and the only entity with the experience, proprietary software, and technical expertise needed to equip the reprogramming laboratory and integrate it with a complimentary reprogramming facility. As a result, LM Aero is the only known qualified source able to fulfill the requirements specified herein.
