

Synopsis/Notice of Intent to Sole Source

The F-35 Joint Program Office (JPO) of Arlington, VA, intends to solicit, negotiate, and award a sole source contract under the authority of Federal Acquisition Regulation (FAR) 6.103-1, "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements", to Lockheed Martin Aeronautics (LM Aero). The proposed North American Industry Classification System (NAICS) code for this acquisition is 336411, Aircraft Manufacturing, with a small business size standard of 1,500 employees.

All responsible sources may submit a capability statement in response to this notice of intent to sole source. The F-35 JPO will consider all capability statements received within fifteen (15) days after the date of publication of this pre-solicitation notice.

Potential offerors must have secret security clearance to be eligible for award. If the Government chooses to release a solicitation for the requirements described herein, the Government will provide all relevant DD Form 254 information.

The F-35 JPO has a requirement to modify the In-Line File Encryption Device (IFED) software to use government mandated Quantum Resistant algorithms which will facilitate the verification of all signed code inside of the IFED equipment. Contractors will be responsible for testing and integration of modified code. The vendor shall verify that the software update can be applied in the field without opening the enclosure.

LM Aero is the sole designer, developer, and integrator of the F-35 aircraft, and the only entity with the experience and technical expertise needed to modify and integrate IFED software. As a result, LM Aero is the only known qualified source able to fulfill the requirements specified herein.

Points of contact are Jonathan Chen, Contract Specialist, at Jonathan.Chen@jsf.mil, and Colin McCarthy, Contracting Officer, at Colin.McCarthy@jsf.mil.
