

Q and A 2026 OHV Solicitation

1. OHV Typing:

Amendment 001 in SAM

Replace all OHV Typing with:

Categories:

Type 1 – OHV1: Minimum of 2 seats in each row, a minimum of 2 rows of seating, and a minimum vehicle payload capacity of 1,000lbs. A rear box load capacity of 500lbs or greater.

Type 2 – OHV2: Minimum of 2 seats in each row and a minimum of 1 row of seating and a minimum vehicle payload capacity of 1,000lbs. A rear box load capacity of 500lbs or greater.

Type 3 – OHV3: Minimum of 2 seats in each row, a minimum of 2 rows, and a minimum vehicle payload capacity of 800lbs. A rear box load capacity minimum of 150lbs.

Type 4 – OHV4: Minimum of 2 seats in each row, a minimum of 1 row, and a minimum vehicle payload capacity of 550lbs. A rear box load capacity minimum of 150lbs.

2. I can only select a Single Dispatch Center?

- a. Only a single Dispatch Center maybe be selected per GACC. The 450 mile radius will be used from location of OHV to be used by other Dispatch Centers.

3. My OHVs have easy to use Manual Transmissions, is this acceptable?

- a. No Manual Transmissions will be solicited or awarded. Only Automatic transmissions or CVT will be accepted.

4. Do all my OHVs have to meet ANSI/OPEI B71.9-2022 or ANSI/ROHVA 1-2023 requirement?

See Amendment 001 in SAM

After the Amendment only have to conform to either the American National Standard Institute Outdoor Power Equipment Institute (ANSI/OPEI) or American National Standard Institute Recreational Off-Highway Vehicle Association (ANSI/ROHVA) standard in effect at the time of manufacture and shall not have any modifications that cause non-compliance

5. Do I need to have two pictures of the VIN# as section E says provide VIN and Vehicle ID?
 - a. Need one picture of VIN (all characters must be clearly shown) AND a Picture of the Vehicle ID (name of company) located on the OHV.
6. Is it required to have a trailer for each OHV?
 - a. Yes, each OHV must have its own trailer. You can transport multiple OHVs with Trailers on a single lowboy or similar delivery method. If multiple OHVs are delivered on a single Lowboy or similar delivery method only one mileage rate will be paid.
 - b. Trailers used to transport vehicles shall remain with the vehicles. Trailers must be in good working order and in compliance with all applicable federal and state motor vehicles laws. Trailers will include a spare tire for the trailer. Forest Service Fleet Policy 7109.19_30. This policy requires the vendor to have trailer brakes on all trailers towed over 1500 pounds.
7. What type of licensing do the OHVs require?
 - a. Must meet any State License requirements required by State of Location.
 - b. Additional off-road registration is required in some states. The vendor is responsible for acquiring this prior to assignment.

8. Is it ok to have tire jack and lug wrench in a tool box attached under the seat?
 - a. Yes, this is acceptable. Must show pictures of tool box with items inside.
9. Unable to find 1" to 2" tread depth unless a Mud Bogging Tire?

See Amendment #001

Tread depth has been amended to minimum of .75" (24/32") to 1 ¼".

10. Does my OHV have to go 50MPH?
 - a. No, the solicitation says: D.2.1.2 All transportation vehicles.....used to mobilize OHV under this Agreement shall be able to be legally driven on highways under their own power and be able to travel at a minimum of 50 miles an hour.
This is for the Vehicle transporting the OHVs to the incident, not the OHV itself.

11. What type of GPS?

GPS can be any system that you would have available that would give a "last" location to the ICP if requested. There is no requirement for it to be used in areas of no service.
